GENERAL—The material condition of the ships of the Fleet is very good. The principal deficiencies are the lack of RADAR equipment, the increased displacement, the inadequate ventilation, and the unsatisfactory facilities for fighting fires under conditions of battle damage. The first two items apply to all ships. The latter two to the older ships.

Degaussing gear either temporary or permanent, has been installed on all ships. Replacement of temporary with permanent gear is proceeding. Work to reduce missile hazards is proceeding. A discussion of important items by forces follows:

- (a) *BATTLE FORCE.*
Battleships:
 (a) Sky lookout stations installed.
 (b) Accommodations for additional crew provided.
 (c) Airports at ends of ships welded closed.
 (d) Regunned main batteries NEW MEXICO, PENNSYLVANIA, MARYLAND;
 Secondary batteries MARYLAND and NEVADA.
 (e) Blisters completed on MARYLAND.
 (f) Radar (search) installed on CALIFORNIA.

1264 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(g) All ships except ARIZONA and NEVADA had four 3" 50 A.A. guns installed pending the availability of 1.1" machine guns. Two 5" 51 broadside guns were removed to permit this.

(h) Splinter protection was installed around all A.A. gun mounts.

(i) The inability of the electric drive battleships to maintain full power under tropical conditions is a serious matter. It has been taken up in previous correspondence.

Cruisers:

(a) Splinter protection provided around A.A. guns.

(b) Certain airports have been welded closed.

(c) Difficulty experienced with turbo generators BROOKLYN, PHILADELPHIA and HONOLULU. Corrective action is underway.

Carriers:

(a) Radar installed in the YORKTOWN.

(b) Bow arresting gear installed in SARATOGA and flight area increased at bow and stern.

DESTROYERS:

(a) There have been about thirty cases of cracked shell plating in the 1500-ton destroyers during the year, indicating structural weaknesses. Action by the Bureau of Ships to correct this has been initiated.

(b) *SCOUTING FORCE.*

Cruisers:

(a) Splinter protection for A.A. guns has been or will soon be completed on all ships.

(b) Sky lookout stations installed on all but three ships.

(c) Certain airports welded closed.

(d) Cafeteria system and accommodations for additional crew completed on nine ships. Will soon be completed on other three.

[24] (e) Ballistic protection of armored spaces improved.

(f) Renewing of reduction gears NEW ORLEANS Class, completed except for NEW ORLEANS which will get new gears during forthcoming overhaul.

(g) Radars (search) installed on four ships.

(h) Four 3" 50 A.A. guns temporarily installed in CHICAGO, PORTLAND, LOUISVILLE, and SAN FRANCISCO. 1.1" mount foundations were installed in SALT LAKE CITY, PENSACOLA and NORTHAMPTON.

(i) Mark XIX Directors modified.

Submarines:

(a) Air conditioning equipment which must be installed before the S Class submarines can be considered ready for war patrol in tropical waters has been authorized and will be completed about December 1941.

(b) Correction of the defective air conditioning system in the ARGONAUT and NARWHAL has been completed. Some work has been accomplished on the DOLPHIN'S system. This should be completed early in October 1941.

(c) ARGONAUT sustained surface speed of 8.9 knots is not satisfactory. This condition will obtain until the ship is reengineered.

(d) Plane fueling facilities have been completed in NARWHAL. These facilities will shortly be completed in ARGONAUT.

(e) The use of contract lubricating oils in submarine main engines has not been satisfactory. Special oils have been resorted to in all H.O.R. engines, and are being experimented with on one set of Winton engines.

(C) *BASE FORCE.*

Oilers:

(a) All oilers have been equipped for fueling heavy ships at sea.

(b) The newly acquired Fleet oilers have certain defects for Naval purposes, most of which will be corrected when conversion is undertaken. The most serious of these is the lack of sufficient evaporator capacity to be self sustaining in fresh water. The matter of exposed ship and cargo control wiring and piping not at present included in conversion items has been taken up in separate correspondence.

(c) The slow speed and antiquated machinery installation of the older ships of the Base Force will seriously handicap the supply of services to Fleet under war conditions.

Mine Vessels:

(a) All ships of the Mine Squadron TWO (formerly Mine Squadron THREE) have been equipped or are now equipped with magnetic sweeping gear.

(b) The lack of depth charge equipment and listening gear in the AMs, DMs and DMSs is a serious defect. Corrective measures have been recommended.

(B) OVERHAULS.

Regular overhauls were carried out as scheduled by the Department. A new and more satisfactory basis for future overhauls was worked out between the Commander-in-Chief and the Department. This reduced the length of overhauls, and limited the numbers of combatant ships of each type permitted to be under overhaul at any one time.

Regular overhauls have been handicapped due to lack of opportunity for advance planning and the difficulty of obtaining deliveries of material for alterations. Improvement in this situation is expected as a result of recent correspondence.

In addition to regular overhauls, wide use of restricted availabilities at Pearl Harbor has been resorted to in order to accomplish in a minimum of time, many alterations of great military importance. It is expected that this procedure will find wide use in the future.

[25] (C) ADVANCE BASE AND EXPEDITIONARY FORCE EQUIPMENT.

The present war has demonstrated the urgent need for advance base and expeditionary force equipment in modern warfare. The situation in the Pacific demands not only a large volume of such equipment but also that it be the most modern and the latest kind procurable.

The general situation as to advance base and expeditionary equipment in the Pacific area is most unsatisfactory. Specific deficiencies contributing to this situation are:

(a) Material for advance bases is being assembled in the Twelfth Naval District and an Advance Base Depot with warehouse is in process of development. An exercise for the testing of advance base material has been directed but the amount of material on hand has so far been too small to warrant conducting the exercise. However, improvement in the unsatisfactory delivery situation is expected in the near future.

(b) Aeronautical advance base and expeditionary force equipment was requisitioned about one year ago but has not been received to date. The Bureau of Aeronautics has advised that this equipment is on schedule.

(c) There are no transports now in the Pacific capable of being combat unit loaded. This situation will be relieved, in part, by November 1941, but sufficient transports and cargo vessels should be made available to move the Second Marine Division and at least one Defense Battalion.

(d) All destroyer transports have been transferred from the Pacific area.

(e) No hospital ship is now available to this Fleet. A mobile hospital unit will arrive in the near future, but further steps to relieve the hospitalization situation must be taken.

(f) Landing boats, artillery lighters, tank lighters, amphibian tractors, and rubber boats are not yet available, or are of such insufficient numbers as not to meet even training requirements.

(g) There are serious deficiencies in the equipment and armament of the Second Marine Division, particularly in vehicles and weapons.

(h) Bombardment projectiles are not on hand at mobilization bases in sufficient quantities to meet war plan requirements.

(i) Antisubmarine nets and netlaying vessels for providing adequate defense for advance bases are not yet available in sufficient quantity.

(j) Floating drydocks for light force vessels are a particular necessity.

(k) Portable A. A. guns and fire control equipment must be provided in greater numbers.

(l) Equipment for rapid construction of landing fields should be developed and procured.

(m) Base oilers, provision and ammunition lighters, etc., should be made available.

(n) Distilling ships and distilling units for fresh water for troops are required to maintain troops and air operating personnel in localities where the potable water supply is undeveloped or entirely lacking.

(D) AVIATION.**(a) Tactical Developments.**

Excellent progress has been made in aircraft tactical development as a result of almost continuous tactical exercises with the Fleet or Task Forces thereof. Reports of current war operations have formed a fertile basis for testing and developing new ideas and procedures and there has been general improvement in terms of reduced artificiality and increased realism. In addition, good advance has been made in inter-type tactics between aircraft and surface types, including

submarines, and valuable training has been had in the various forms of coordination along this line that will be essential in action.

The use of aircraft in combination with the Radar for Fleet defense has become a subject of major importance and its further development will be intensively carried on.

War reports have indicated the increasing importance of adequate aerial photographic reconnaissance and its development has been stressed throughout the year. Progress is hampered by the time factor with respect to both material and personnel. Satisfactory results are contingent on the assistance that the Department is able to render.

[26] Aircraft tactics of all kinds must continue to be influenced by the current status of armament and protection of Fleet aircraft. As these characteristics improve with the delivery of newer aircraft, the tactics of aircraft employment can be made more effective.

The Fleet Aircraft Tactical Unit has continued its valuable work, both directly in connection with aircraft tactics and indirectly by its compilations from war reports of aircraft tactical information.

(b) New Airplanes.

Although considerable improvement is more immediately in sight, the situation still remains similar to that reported last year in that too few modern or modernized Fleet aircraft have been delivered and the numbers of spare parts and spare planes for those on hand, in all categories, are too few. It is realized that diversions of deliveries to other destinations have necessarily interfered with the program for Fleet aircraft and that various phases of manufacturing priorities have been beyond the Department's control. It cannot be repeated too often, however, that the readiness of Fleet squadrons should not be jeopardized.

It is realized that many replacement planes now being delivered are not intended to be the final word in improvement and that more satisfactory planes are scheduled to replace them shortly. This plan must not be lost sight of, for many of the new airplanes with armament and protection built into designs already existing, have lost thereby altogether too much in the way of performance.

(c) Material Conditions.

The material condition of Fleet aircraft is, on the whole, far from satisfactory. The faults are due either to obsolescence and accumulative wear of types not yet replaced or to serious defects that have too frequently become apparent in new types after their exposure to actual service conditions.

The most important examples of the foregoing are:

(1) Failure of the R-1280-32 and 40 engine main bearing and seals which required a major disassembly of the engines to correct.

(2) Failure of rivets in the SBD wings in way of the wheel wells and wing fairing at the fuselage. This necessitated the return to the contractor of those airplanes which were already delivered to west coast units.

(3) Failure of the F2A landing gear struts. This required reworking and strengthening of all F2A main landing gear struts. These failures persist and are currently being experienced regardless of the reinforcements.

(4) Displacement of the wing bulkhead in the F2A airplanes to which landing gear main strut hinges are attached. This failure is progressive and prevents the landing gear from housing and causes failures in the wings. It was found necessary to suspend these airplanes from carrier operations pending correction of this trouble inasmuch as carrier landings aggravated the situation.

(5) Failure of some of the F2A aileron control rods incident to the contractor having installed non-heat treated rods.

(6) Discovery of numerous instances wherein foreign objects such as riveter's bars were left in sealed compartments. This resulted in a few near crashes due to jammed controls and necessitated much labor in opening sealed compartments for inspection.

(7) Elongated wing attachment bolts in numerous SBD airplanes. This trouble required the inspection and replacement of approximately 20,000 bolts.

(8) Nose section failure of the engines of new PBY-5 airplanes. This, unless and until corrected, is extremely serious.

(9) Weakness of main floats and wingtip float struts of OS2U (battleship) aircraft caused numerous failures in operations at sea. New and strengthened floats and struts will, it is hoped, correct this defect.

(10) The extreme obsolescence of SOC, SON (cruiser aircraft), both in terms of material condition and battle suitability. Deliveries of replacement planes have been greatly delayed. The highest priority for these deliveries is none too

good, for the characteristics of aircraft now carried in cruisers will be a serious liability in action.

[27] Perhaps the most serious matter of all has been the concentration on manufacture and delivery of new aircraft, for the sake of total numbers produced, at the expense of concurrent provision of spare parts and spare accessories that are manifestly essential for continued effective operation. Until the Department is able to alter this policy, the readiness of Fleet aviation will be far more apparent than real.

(r) *Overhaul.*

There has been a gratifying increase in total overhaul facilities available. The overhaul situation in the Hawaiian area, however, remains far from satisfactory. As has frequently been stated, it is an unsound and potentially dangerous situation for Pacific Fleet aircraft, other than patrol planes, to have to be overhauled almost entirely on the mainland as a result of current overhaul facilities at Naval Air Station, Pearl Harbor being limited to the amount necessary for patrol plane overhaul. Transportation for overhaul now necessary between Pearl Harbor and the mainland, in addition to the mis-use of aircraft carriers that is periodically necessitated for this purpose, results in dead-time that, in effect, reduces an already meager supply of spare aircraft. Under war conditions it is altogether too apparent that this transportation for overhaul might be impracticable.

(e) *Miscellaneous Equipment.*

No comment.

(f) *Experimental Development and Tests.*

There have continued to be numerous tests in the various Fleet aircraft units of new equipment, as well as tests for determination of causes and remedies of material troubles. An excellent step toward relief of operating units from a major portion of this load has been the recent establishment of the Acceptance, Test and Training Unit under Commander Aircraft, Scouting Force.

The following items, both test and experimental, are of interest:

- (1) Exhaust de-icers.
- (2) Extension of oil draining interval.
- (3) True airspeed meters.
- (4) Solar heating units.
- (5) Camouflage.
- (6) Propeller and engine vibration tests.
- (7) Fuel tank and armor protection.
- (8) Oxygen equipment.
- (9) Blind landing equipment.
- (10) Tractors.
- (11) Parachutes.
- (12) Fuel jettisoning.
- (13) Night photography using flare bombs.
- (14) Numerous other photographic tests and developments, including the development of films while in flight.
- (15) Improved flight clothing.
- (16) Further progress in night recovery of cruiser airplanes.
- (17) Various improvements in hoisting arrangements for ship-based aircraft.

(g) *Aerology.*

Additional raysonde equipment is needed for installation on outlying Pacific Islands as well as regular aerological equipment for four such stations. Preliminary steps have been taken to procure this material and it is expected to be delivered shortly after the commissioning of the air stations at Midway, Wake, Palmyra, and Johnston Islands.

Raysonde equipment was temporarily removed from the U. S. S. INDIAN-APOLIS for installation at Kaneohe, where a complete aerological unit has been set up during the year. Necessary radio equipment and instruments needed for the expanding operation of the Fleet Weather Central have been requested but not yet received.

[28] The complete equipment of the aerological unit assigned to Cruisers, Battle Force was removed from the Pacific Fleet due to the transfer of the U. S. S. BROOKLYN to the Atlantic Fleet. Replacement equipment has been requested.

(E) *SUPPLY ACTIVITIES.*

The past year has presented exceptional opportunities for improvement in the logistic support of the Fleet. Conditions closely akin to war time supplanted

those of years gone by. The inadequacy of auxillary vessels of all classifications became quickly apparent.

(a) *Provisions.* The problem of subsisting the Fleet in the Hawaiian Area was attended by greater difficulties than ever before encountered due to:

- (1) Inadequacy of provision stores ships.
- (2) Lack of cold storage facilities at Pearl Harbor.
- (3) Inadequacy of commercial cold storage facilities at Honolulu.
- (4) Inadequacy of refrigerated cargo space in commercial ships serving the Hawaiian Area.

(5) Inadequacy of locally produced meats, vegetables, fruits, and dairy products for the needs of the civilian population, and Army and Navy personnel. Solution was found in the completion of the cold storage plant at Merry Point, Navy Yard, Pearl Harbor, on 1 June 1940, in furnishing to prospective contractors of guaranteed estimates of purchases to be made, and in the stocking of the cold storage plant at Merry Point means of commercial shipments, and by two shipments in the ALDEBARAN.

Formerly provision stores ships were loaded by totaling individual ship requisitions submitted months in advance. There are now standard loadings controlled by the Fleet Supply Officer. Requisitions are required from the individual ships ten days in advance of the arrival of the provision stores ship in order to prorate the cargo.

The standard loadings of provision ships has worked out advantageously from every angle. The Navy Purchasing Office is given more time in which to contract for requirements. Lengthy radio dispatches are eliminated, and flexibility to meet changes necessitated by turning over stocks at Pearl Harbor and by unscheduled movements of ships is provided for. Even under the difficulties raised by unexpected ship movements it has been possible to operate with less than 4% of error.

To accomplish these results continuous collaboration and cooperation between the Supply Officer, Pearl Harbor and the Fleet Supply Officer were essential. The excellent results obtained are evidence of the collaboration and cooperation which existed.

For many years it had been the rule to require ships to receive from provision ships any excesses remaining after provisioning the Fleet. In theory this was to prevent loss, but in practice it amounted in most cases to a dispersion of surveys of provisions unfit for use among the ships of the Fleet rather than have a large survey which might look bad for the provision ship. This subterfuge fooled no one, and required additional and unnecessary labor and correspondence. Since the rule served no good purpose it was abolished. No forced issues were necessary, nor were any large surveys required. In a few cases transfer of excesses to the cold storage plant at Merry Point prevented loss which might otherwise have occurred.

The need for more provision ships is worthy of serious consideration. There were many times when the disablement of one of the two provision ships assigned to the Base Force would have required the withdrawal of a portion of the Fleet to the Mainland. Had the Fleet operated beyond Pearl Harbor, many of the ships would have had to subsist on dry stores solely, after the first three weeks.

At the close of the period covered by this report the tentative future assignment of provision ships for the Base Force was ARCTIC, BOREAS, ALDEBARAN and POLARIS, the BRIDGE being transferred to the Atlantic Fleet. Based on a Fleet complement of 60,000 officers and men, each of the four ships could carry supplies sufficient to last the Fleet for twenty-three days. It is believed, however, that the ALDEBARAN and POLARIS will be found by experience to have at least 15% greater capacity. The planned operation of these ships presupposed one under overhaul during the next nine months. It was planned to keep one ship at Pearl Harbor at all times, each ship remaining three weeks. This plan would have made a provision ship at once available for an extended cruise if required, would have permitted combatant ships to keep loaded with provisions to 75% of capacity, and would have allowed each ship six weeks for going to and coming from San Francisco, loading and upkeep.

[29] Mention should be made of the approaching need for supplying provisions to Midway, Wake, Guam, Johnston, Palmyra, and Samoa. Such a task could not be accomplished by the Base Force with only three provisions ships in operation, and with the Fleet complement of 60,000 officers and men.

The Hawaiian Islands could be self-sustaining as to many items and provide for Army and Navy needs. This condition will not, however, be met unless sub-

stantial encouragement is received from the military forces. An excellent grade of potato of fine flavor is being raised by the Oahu Sugar Plantation. It will mature about March. At that time the potatoes available on the Coast are in poor condition, and a considerable portion is lost due to shrivelling, sprouting, dry rot and susceptibility to decay in open storage after being kept in chilled storage. The Oahu potatoes are firm, free from imperfections, thin skinned, and of good keeping quality in open storage. Under these conditions the disparity in price, approximately .015 against .025, is not as great as the figures indicate. Mr. Hans L'Orange, Manager of the Oahu Sugar Co., intends to experiment with a potato of greater yield with a view to reducing the price.

Many sugar plantations due to sugar quotas now have land not required for cane planting, but they are loathe to go into the potato business unless assured of a local market. If the Navy agreed to buy a given tonnage of island grown potatoes at a price not to exceed a specified figure during the months of March, April, and May, there would be a response from the sugar plantations. The subject merits investigation.

(b) *Fuel.*

The fiscal year of 1941 has seen many changes in the fueling tasks, fueling facilities, and fueling points of the Base Force. The year commenced with inadequate equipment, stocks at low points, and reliance on commercial oilers to meet all the fuel needs of the Fleet. The fuel situation is now satisfactory and well in hand. A few minor desirable improvements remain to be made as time permits.

Early in fiscal year 1941 four hundred thousand barrels of fuel oil per month were required for Fleet use at Pearl Harbor. During the period the major portion of the Fleet concentrated in Pearl Harbor the seven Base Force oilers were not adequate to meet this demand and also replenish the depleted fuel stocks at Pearl Harbor. Commercial deliveries of fuel oil were contracted for with difficulty and during the period July to December 841,800 barrels of fuel were delivered in commercial bottoms to Pearl Harbor storage. The price of fuel oil delivered into Pearl Harbor dropped from \$1.44 per barrel in July to \$0.96 per barrel in December. The contract price for Navy fuel oil in Los Angeles Harbor averaged \$0.65 per barrel and \$0.30 per barrel is considered a fair price for transporting fuel oil from Los Angeles to Pearl Harbor. The excess price paid by the Navy for the transportation of oil was due to a world wide demand to increase fuel stocks in storage coincident with German Victories in Europe.

In addition to the reserve stock of fuel oil at Pearl Harbor, (3,495,478 barrels which cannot be used without Presidential authority), there is space available for approximately 500,000 barrels of fuel oil. It was not necessary to use any of the reserve stocks of fuel oil, although at the end of July 1940 there was only 2,165 barrels of fuel oil available for immediate issue to the Fleet. The reserve stock of fuel oil consists of 2,804,540 barrels of Navy fuel oil, and 690,928 barrels of topped crude, a long time storage oil. Arrangements have been completed to deliver an additional 300,000 barrels of topped crude into storage during the months of May and June 1941. It is understood that when the first units of the new underground storage at Pearl Harbor are completed they will be filled with topped crude from present stocks.

During the second quarter, the major part of the Fleet returned to West Coast bases for a two weeks leave and liberty period, and prolonged its stay for well over a month for installation of degaussing equipment and drydocking. While the Fleet was away from Pearl Harbor, issues decreased, and fuel stocks were increased to maximum capacity. At this time word was received that four high speed national defense oilers of the CIMARRON Class would be on the West Coast and available to Base Force by December 1940. Additional Commercial deliveries of fuel oil to Pearl Harbor were not needed as these four new tankers gave Base Force sufficient capacity to provide all fuels required.

By the end of January the major portion of the Fleet was again concentrated in Pearl Harbor. A new Fleet operating policy was instituted whereby half of the Fleet was underway all the time and fuel issues jumped to over 600,000 barrels per month. 703,036 barrels were issued during the month of March. Base Force had no difficulty in keeping pace with the increased fuel demands, although the oilers of the CIMARRON class were required to make the trips from the West Coast to Pearl Harbor in six days instead of the usual seven days, and upkeep periods were [30] omitted. The assignment of the RAMAPO and SEPULGA will not permit Base Force to meet the increased demands for fuel and also assign proper upkeep periods to the high speed oilers.

1270 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

There are seven oilers of the CIMARRON class assigned to Base Force. Each of these has been assigned a period of final conversion. The CIMARRON returned to Philadelphia in September 1940, and was expected to return to the West Coast prior to the NEOSHO entering the Navy Yard Puget Sound on 1 April. The return of the CIMARRON has been delayed because of delays in receipt of materials, will enter Navy Yard Puget Sound on 15 July. The NEOSHO has encountered difficulties and her return to the Fleet is not expected until after 1 August.

Oilers of the BRAZOS class plus the TIPPECANOE have been used to deliver fuel oil to Pearl Harbor, as well as maintain the full stocks at San Diego and Puget Sound. In addition, the CUYAMA delivered 21,000 barrels of fuel oil to Palmyra both in December and in March for use of the contractor's dredge. The NECHES delivered 20,000 barrels of fuel oil to Dutch Harbor, Alaska for the Coast Guard, and the KANAWHA delivered 20,000 barrels to Navy storage at Wake in May. The fuel oil requirements of the outlying islands, the Alaskan stations and the Canal Zone will probably develop into a full time job for the oilers of the BRAZOS class. The SANGAMON accompanied to Samoa the four cruisers and nine destroyers visiting Australian and New Zealand ports.

The fuel oil requirements at the Canal Zone have been met by oilers transitting the canal. The CIMARRON replenished stocks at Balboa and Cristobal on her trip to Philadelphia, and will again replenish these stocks on her return to the West Coast. The KASKASKIA, SABINE, SANTEE, and SANGAMON filled the Navy storage in Canal Zone to capacity when they transitted in December 1940.

Large combatant ships going to Navy Yard Puget Sound for overhaul from Long Beach have filled to capacity with fuel oil prior to departure and delivered fuel oil into storage at the yard. Fuel oil issues at Puget Sound have increased over 30%, and more frequent trips of oilers to Puget Sound have been required. It is planned to keep fuel stocks at Puget Sound at not less than 80% of capacity by oilers making Alaskan trips discharging available fuel oil to Puget Sound on return, as well as by the large oilers going to the Navy Yard for overhaul.

Base Force oilers have executed many assigned tasks not involving fuel during the course of the year. The PLATTE escorted the floating drydock YFD-2, towed by CAPELLA and NAVAJO, from Balboa to Pearl Harbor. Large quantities of freight have been transported in oilers from Mainland to Pearl Harbor as well as to outlying islands and Alaskan ports. The oilers have towed lighters and oil barges from California to Hawaiian Area and likewise have escorted small craft able to make the trip under their own power. The PLATTE made a special trip from San Diego to Puget Sound in May to transport two artillery lighters. The increase in Navy personnel has resulted in the oilers being filled to capacity with both officers and enlisted men as passengers on every trip.

The distribution of fuel oil at Pearl Harbor was accomplished with difficulty early in the year. One oil barge, the YO-21, was used to capacity but it could not meet the needs of the Fleet. Oilers were used to fuel large combatant ships and destroyers were fueled at Merry Point dock. Ships at Navy Yard piers were fueled by yard lines at every opportunity. This arrangement required a great deal of supervision and caused many inconveniences to the ships being fueled. As time went along and it became apparent that the Fleet would remain in the Hawaiian Area, the three oil barges from San Pedro and one from San Diego were transferred to Pearl Harbor. The five fuel oil barges meet the requirements of the Fleet at the present time, but often have to work twelve to sixteen hours a day. A rapid fueling of the Fleet would necessitate many cruisers, and all destroyers fueling from Navy Yard piers. Each barge has a capacity of 3,500 barrels and 28,000 barrels of fuel oil can be delivered during an eight hour day. Four barges are kept working each day, and one barge is assigned an upkeep period. There is a real need for barges of 10,000 barrel capacity, as the small barges use 62½% of their time on a fueling job going and coming from fuel docks and re-loading. When practicable, barges fuel from oilers at anchor in Pearl Harbor. This procedure shortens the fueling time as oilers can fill the barges in a shorter time than the shore activity, and the barges have a shorter distance to travel.

Commander Base Force is responsible for the scheduling and delivery of fuels to the Fleet at Pearl Harbor. An arrangement whereby the Navy Yard, Pearl Harbor assumed the responsibility for these functions was tried for a week, and then rejected.

Base Force is responsible for the delivery of aviation gasoline to Canal Zone, Pearl Harbor, and Kaneohe Bay, Oahu, T. H. It is expected that Base Force will be assigned the responsibility of maintenance of aviation gasoline stocks in

Alaska. Aviation gasoline storage is being constructed on the outlying islands and these points will be filled and replenished by Base Force [31] oilers. Sufficient gasoline space has been available in oilers to meet the operating needs of the Fleet, the short activities as well as the new storage at Naval Air Stations, Pearl Harbor and Kaneohe Bay. During the months of January, February, and March 1941, Base Force oilers transported 5,050,469 gallons of aviation gasoline from San Pedro to Pearl Harbor. There was space available for transportation of three times this amount.

The distribution of aviation gasoline at Pearl Harbor was quite unsatisfactory at the beginning of this fiscal year. Commander Base Force had available for duty two old gasoline delivery boats with gasoline bowsters. These boats would often incur material failures at times when delivery schedules were heavy. Gasoline was delivered by gasoline truck to ships at piers. Large oilers would gas ships when alongside for delivery of fuel oil.

The YO-43, a self-propelled barge with a capacity of 150,000 gallons of gasoline and 30,000 gallons of diesel oil, was completed by Navy Yard and made available to Base Force on 1 March 1941. At the same time, the YO-44 (same as YO-43) was transferred to the Hawaiian Area from San Diego. These two gasoline diesel barges have simplified the gasoline distribution problem. In addition they are being used to fill the new gasoline storage at Kaneohe Bay. At the present time they are the only means of delivering bulk gasoline to Kaneohe other than by truck. Early in April the YO-44 was sent to Johnston Island to deliver 200,000 gallons of diesel oil in order that the contractor could continue dredging work. The gasoline tanks of the YO-44 were filled with diesel oil in order that the desired quantity would be delivered. Some difficulty was experienced in cleaning the gasoline tank of all traces of diesel oil. Another barge similar to the YO-43 will be needed in the Hawaiian Area within the next twelve months to permit proper upkeep of the YO-43 and YO-44, deliver gasoline and diesel oil to the Fleet, and also make deliveries of gasoline and diesel oil to the outlying islands.

No difficulty has been encountered in the transportation of diesel oil to the Canal Zone and Pearl Harbor, but the distribution of diesel oil in Pearl Harbor was unsatisfactory until the YO-43 and YO-44 reported for duty. Diesel oil issues at Pearl Harbor have increased over 50% because of the increase in number of diesel burning ships, the diesel oil burning equipment of contractors and the near completion of dieselization of small boats program. No requests for the delivery of motor gasoline to large ships have been received since January 1941.

To meet fully and expeditiously the needs of the Fleet, as constituted during the past year, and island bases the following ships are required: (1) one base oiler of about 300,000 gallons minimum capacity of aviation gasoline, similar to SAN DIEGO, the acquisition of which has been previously requested; (2) five 10,000 barrel Fleet oil barges, self-propelled at a speed of ten knots; and (3) two additional oilers of the CIMARRON type as a reserve for casualties, and to provide for a widely scattered disposition of Fleet units.

(c) *GENERAL STORES.*

The value of stores issue ships to the Fleet was made plain during the past year. This was however little more than a token; indication of what could be done with an adequate number of stores ships of adequate size.

The size and construction of the ANTARES, the sole stores issue ship assigned to the Base Force, her retention in the Hawaiian Area for use as relief flagship for the Base Force, and her diversion to island bases, interfere with the usefulness of the ANTARES to the Fleet. Until the ships of the Fleet can be assured of regular dependable service from stores issue ships, they will continue to rely on Mainland sources of supply.

The planned operation of stores issue ships in time of peace is: (1) to stock bulky items which combatant ships cannot carry in quantity and (2) to stock small items for retail issue to top off the ships of the Fleet to prevent depletion of their stocks below a six month's supply. The first mission has not yet been fulfilled. Ships continue to submit requisitions to Mainland supply points, and to draw from the ANTARES as well. Under these conditions ANTARES has been unable to determine a normal cargo of bulky items or to increase the bin space in order to better provide for retail issues. Even under the above handicaps the ANTARES did increase its efficiency. The number of items carried for general issue was increased from five hundred to seven hundred.

The preparation of stores issue ships to meet their wartime mission will play an important part in enabling the Fleet to perform its task. Without supplies for operation, maintenance and repair, the Fleet would be quickly hamstrung. The

supply, shipment, and delivery of individual ship's requisitions in wartime is not possible. On the other hand, the supply of bulk cargoes to stores issue ships is definitely possible. The supply of all ship's needs of general stores. [32] from stores issue ships, and the replenishment of stores issue ship's stock by bulk shipments in cargo carriers, is the solution.

The Base Force is in immediate need of two modern cargo ships to replenish the stock of stores issue ships, to transport the varied cargoes which the Base Force is called upon to handle in constantly increasing quantity, to do the various odd jobs which have been assigned to the ANTARES in the past, and to transport advance base material.

[33]

PART IV—PERSONNEL

(A) COMMISSIONED.

(a) Allowances.

In general surface ships have been provided with officers sufficient in numbers but insufficient in training and experience. Regular officers have been and continue to be replaced by reserves of relative inexperience. The rapid turnover of experienced personnel coupled with inexperienced reserve replacement officers has served to lower combat efficiency. Such replacement reserve officers are being trained insofar as possible in one specialty billet in which the individual shows aptitude, thus the beneficial effects of training will be realized much earlier. In time, as such training progresses, it is expected that the above condition will gradually improve and as reserve officers gain in experience, allowances will be adequate in terms of efficiency.

The harmful effect of the withdrawal of a good portion of the experienced gunnery officers from the Fleet for duties ashore to meet the production demands is gradually being overcome by intensive training through the medium of gunnery schools.

Insufficient officers are assigned to submarines from the viewpoint of training to meet the needs of the expanding submarine force. At least six officers should be attached to each fleet type submarine to provide necessary trained submarine officers for war patrols and reserve crews. Reserve officers are being ordered direct from engineering schools to submarines without the benefit of instruction in the Submarine School. This provides numerical relief but delays the state of training of qualified submarine personnel. Additional junior line officers should be ordered to the submarine service after prescribed school instruction in order to provide an adequate supply of young officers qualified for command.

Insufficient Naval Aviators are assigned all types of squadrons from both the point of view of continuous war operations and to meet the requirements of the expansion program. An eight to one expansion in patrol plane personnel is planned within the next several years, which is indicative of the acute need for training of additional officers. Existing deficiencies will not be made good for many months. This situation has been the subject of separate correspondence.

(b) Training.

The Naval building and expansion program will require that additional experienced officer personnel continue to be removed from operating units. Inexperienced reserves must serve as replacements, consequently strong emphasis has been placed upon the training of reserve officers with the end in view of having each experienced officer instruct an understudy along the line of his particular duties, looking to his eventual replacement when he is needed elsewhere in the expansion program. Type gunnery schools were conducted stressing fundamental training and including extensive instructional firings.

Type gunnery schools for the forthcoming year have started and will continue over a longer period than in past years. Officers attending these type gunnery schools are not allowed to be absent from their ships while the ships are underway. This system tends to prolong the school session but it satisfies all conditions of the emergency and, in the long run, it is believed greater benefit will result therefrom.

With an influx of a large number of inexperienced reserve officers, the necessity of more intensive training of junior officers has developed. Some types have prepared syllabi of training for the various duties within departments, and junior officers are required to pursue these courses. Reserve ensigns are trained for duty in one department only.

Although training strives to keep apace with expansion and modern trends, it has been seriously handicapped in some instances because of the rather steady reduction in the number of officers qualified to supervise the inexperienced off-

cers. Tactical training is emphasized during exercises at sea and tactical schools are held in part.

A school for Prospective Commanding Officers is conducted in each submarine squadron to train the second officer of each submarine for command duties and to serve as a refresher course for officers already qualified for command who have been separated from the submarine service. Junior officers have been required, under the immediate supervision of commanding officers, to handle submarines under all conditions of submerged and surface operations.

In the Patrol Wings, in order to maintain the barest minimum of patrol plane commanders essential for operation of the planes assigned, as well as to train additional pilots it has been [34] necessary to assign first priority to pilot training in Patrol Wings One, Four, and Six. Such action was necessitated by the diversion of a considerable number of qualified patrol plane commanders to duty away from the above named wings.

(c) Assignments.

Permanency of personnel has not been in evidence during the past year. There has been considerable shifting of personnel which, in turn, has a tendency to lower efficiency.

The recent establishment by the Bureau of Navigation of a policy whereby each ship maintains an up-to-date list in the Bureau showing the order in which Commanding Officers desire that officers should be detached when and if it becomes necessary, will assist in the future, to retain key personnel on board. It is expected that such a move toward permanency will markedly benefit the Fleet.

In destroyers, a comparatively large number of commanding and executive officers were detached and replaced with more junior officers, which meant the loss of experienced destroyer officers to other types. In addition, a large number of experienced gunnery and engineer officers have been ordered out of destroyers to other duties afloat and ashore.

Insofar as practicable officers are assigned to duties wherein full utilization of their special training is obtained. An abnormal number of changes in assignments of officers have been required in Patrol Wings One, Four, and Six in order to maintain an equitable distribution of officers in those wings, incident to the depletion of officer personnel as mentioned before.

(B) ENLISTED

(a) Allowances.

Special personnel studies during the past year indicate that allowances are inadequate. The Fleet Personnel Board report as approved by the Commander-in-Chief, indicated need for increased allowances to meet war-time demands in all Types. Such an increase in allowance as recommended would accelerate training and would serve to alleviate the situation of impermanency of assignments. In addition to increasing the allowances, requests have been made to the Bureau of Navigation to provide additional personnel for training to meet the demands of new construction over and above that required to properly man the ships. Actual conditions at the end of the fiscal year find all types seriously undermanned. From this inadequate source huge demands have been and are being made upon the Pacific Fleet. A most critical condition of affairs will soon result unless positive action is quickly taken to furnish the Fleet with men in sufficient numbers who can be started on a training program at a time early enough to anticipate the expansion program demands for trained personnel. The Commander-in-Chief has repeatedly pointed out to the Navy Department the urgent need for men in order to get them at least partially trained for needs elsewhere in the expansion program.

The current lack of raw personnel material to train, for both the ship building program and the expanding aeronautical facilities is considered to be the most obvious and dangerous deficiency in the Navy expansion program. The Naval establishment will find itself confronted with a condition of having ships and planes without sufficient trained personnel to operate the equipment unless early and adequate recruits are provided. The result of such a condition will be that not only new construction will be inadequately manned but trained personnel will have been withdrawn from operating vessels to such an extent that their effectiveness will be unacceptably reduced.

The situation in regard to training the aviation and submarine personnel is especially marked and has been the subject of separate correspondence.

During the past year, in order to more expeditiously handle personnel coming into the Naval Organization and to make a more rapid distribution of this per-

1274 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

sonnel, the Fleet Personnel Officer moved to the Headquarters, Eleventh Naval District in November, 1940. In order to coordinate with the activities of the Commander Base Force Subordinate Command, the Fleet Personnel Officer moved, in June, 1941, to Headquarters, Twelfth Naval District. These moves accomplished the desired results in reducing the loss of time involved in the handling of incoming and outgoing drafts and reducing radio traffic.

Beginning with January, 1941, the demands for personnel to fill new construction, acquired and converted vessels, newly established shore and outlying stations, were considerably increased over the first six months of the fiscal year. Since January 1, 1941, the Pacific Fleet Personnel Officer was called upon to supply 7,233 men for these activities. Most of these men were rated men. The following table gives some idea of how these men were spread among the various demands:

[35]	To Combatant vessels (new BBs, DDs)-----	1172
	To Auxiliaries (New, converted, and acquired)-----	2710
	To shore stations-----	1679
	To outlying stations-----	1672

The following table shows the number of recruits received in the Pacific Fleet by quarters for the fiscal year:

	1st	2nd	3rd	4th	Total
School Grad.....	332	1,077	846	1,246	3,501
Gen. Service.....	3,750	10,527	6,190	3,401	23,868

It will be noted that in the 4th quarter the number of recruits fell off very badly.

In October, 1940, complements were made effective in lieu of allowances for all vessels of the U. S. Fleet. On March 31, 1941, new complements were put into effect which were greater than previously. The following table is furnished for information:

	June 1940		December 1940		April 1941 (latest available figures)	
	Allow- ance	On Board	Comple- ment	On Board	Comple- ment	On Board
BATSHIPS.....	13,931	13,180	17,664	17,515	18,566	17,589
AIRBATFOR.....	7,113	6,645	8,309	8,141	8,525	8,256
MINBATFOR.....	962	974	1,673	1,573	1,676	1,675
CRUBATFOR.....	5,698	5,702	10,640	10,752	10,489	9,469
CRUSCOFOR.....	8,105	7,972	8,234	7,927	11,066	10,016
DESBATFOR.....	14,813	13,686	17,718	16,672	17,472	16,519
SUBSCOFOR.....	4,749	4,498	7,455	6,667	3,414	3,596
AIRSCOFOR ¹	2,110	3,015	1,522	1,673	1,378	1,490
PATWING 2.....	1,210	1,218	1,033	1,078	1,527	1,649
BASEFOR.....	6,183	6,237	7,679	7,379	9,908	9,328
Totals.....	68,874	63,167	81,927	79,377	84,021	79,587

¹ Does not include Patrol Wing TWO.

Whenever possible, men on general detail and otherwise becoming available to the Fleet Personnel Officer have been utilized to fill demands for new construction, acquired and converted vessels, etc., but when the limiting date which would permit arrival at their respective destinations approached, it was of course, necessary for the Fleet Personnel Officer to go to the Fleet and make demands upon Type Commanders.

(b) *Training.*

(1) *General.*

The expansion of the Fleet and the increase in personnel has opened up large numbers of ratings. The heavy drain on the Fleet for new construction, recommissioning and conversions, has resulted in a strenuous training program to provide the needed rates without loss of efficiency.

Eligibility for advancement in certain ratings (CRM, CTM, CEM, CFM, CCStd, and (Aerog) includes the requirement that the candidates be graduates of certain service schools. Since quotas for these schools are limited, advancement in these

ratings does not keep pace with other unrestricted ratings, and results in considerable hardship to personnel in these ratings.

A serious shortage exists in the fire controlman ratings. Recommendation is being made that class "A" schools lay the ground work for this rating for certain selected recruits before their transfer to the Fleet.

Even though insufficient recruits have been furnished, school training facilities are being utilized fully in order to keep the school organizations intact. Decided handicap has been in evidence due to the Bureau of Navigation ordering away to new construction partially trained seamen when nearly ready for petty officer ratings. The result has been that these men must in effect commence training again on a new ship and thereby lose the benefit of that which has been obtained previously. It has been recommended that new recruits be utilized insofar as possible for such transfer.

[36] (2) *Service Schools.*

The following Fleet schools are being conducted at the Destroyer Base, San Diego, under the administration of Commander Base Force.

Elementary firecontrol school.

Torpedo school (elementary and advanced).

Diesel school.

Visual signalling.

Welding school (elementary and advanced).

Radio striker school.

Requests in excess of the quota are received for all schools except the advanced courses in torpedoes and welding.

Additional torpedo schools (elementary) are at Submarine Base, Pearl Harbor, T. H.; Naval Torpedo Station, Newport, R. I.; and at the Naval Torpedo Station, Keyport, Washington. The latter is being organized and is not yet in operation.

(3) *Special Schools.*

Special schools, such as Minecraft Mine School, have been conducted within types. Special Patrol Wing radio schools have proved to be valuable source of training both elementary and as additional instruction for slower members of the Class "A" radio schools.

(4) *Ships' Schools.*

Systematic schooling to train men in specialist duties and for advancement in rating has been conducted in all ships of the various types. Excessive transfers do not permit the requisite training of sufficient personnel to fill key ratings, in spite of the accelerated program.

(5) *Bureau of Navigation Training Courses.*

Bureau of Navigation Training Courses are satisfactory but courses are lacking for some ratings. To be of value they must be kept revised to date, particularly now when conditions are changing rapidly and large numbers of new men must be trained. Recommendations have been submitted in separate correspondence to bring these courses up to date. The demand for these courses has been heavy. They continue to be most satisfactory for use in training men for advancement in rating. In spite of increased demands, the Bureau of Navigation and its issuing agencies have managed to keep abreast of the number of request.

(C) *ATHLETICS.*

(a) The athletic facilities in the Pearl Harbor—Aiea area (Hawaii) have been greatly increased during the fiscal year ending 30 June 1941. The following facilities are available to the enlisted personnel of the Fleet:

5 Baseball diamonds

17 Softball fields

5 Basketball courts

10 Tennis courts

6 Handball courts

2 Volleyball courts

4 Swimming pools

Golf course at Navy Yard

In addition to the above, a large number of men in swimming parties and overnight camping parties has been accommodated in Camp Andrews, Nanakuli, T. H.

The following facilities are available to officers:

7 Tennis courts

1 Badminton court

1 Paddle Tennis court

2 Handball courts

2 Swimming pools

[37] (b) On 30 June 1941 the enlisted men's pool and clubhouse at Alea was ready for opening. The new athletic development at Alea has done much to increase the athletic facilities available, and has proved to be very popular with the men in the Fleet. It is anticipated that the Fleet Recreation Center will be completed about the middle of August 1941. The Fleet Recreation Center consists of an arena and an enlisted men's clubhouse. The arena will seat approximately 6,000 people. It is planned to use the arena for motion pictures, boxing matches and theatricals. The enlisted men's clubhouse, adjoining the arena, contains reading rooms, writing rooms, canteen, pool tables, and ten bowling alleys.

(c) A project is underway to develop a swimming beach with bathhouse, at Barber's Point Territory of Hawaii for officers and enlisted men. The capacity of Camp Andrews, T. H., is being increased and more modern facilities are being installed.

(d) The Fleet Recreation and Morale Officer reported for duty on 21 May 1941. He is charged with the allocation, maintenance and upkeep of the athletic fields. He is also responsible for arranging swimming meets, boxing matches, and theatricals with the Fleet.

(e) The Fleet athletic policy has been to continue the competitions in various sports within each type in-so-far as operating schedules permit. Every effort is made to get the maximum number of men on the athletic fields.

(f) In the Fall of 1940, three separate Task Forces were sent to the Coast for recreation and liberty. This resulted in athletic schedules being slightly modified. Athletic competitions were handicapped somewhat when the Pacific Fleet was operating as two Task Forces, one Task Force being at sea all the time. This condition is improved now that the Fleet is operating as three separate Task Forces.

(g) During the past year, three athletic groups were established for the purpose of allocating available athletic facilities. This plan has been successful and has tended to provide a more equitable allocation and permit greater use of facilities available.

(D) CHAPLAINS' ACTIVITIES AND WELFARE.

The duties of the Fleet Chaplains have been considerably augmented by the Fleet basing in Hawaiian waters.

Demands have increased for rendering personal services in addition to the religious ones. These have been handled most successfully, and have been a considerable factor in maintaining a high morale.

The usual collateral duties of the Chaplains, such as welfare, recreation, Navy Relief, and Red Cross liaison, have been successfully performed in all worthy cases.

(E) HEALTH & HYGIENE.

With the exception of sharp outbreaks in Measles and Mumps incidental to increased numbers of recruits lacking in "Mass Immunization", an epidemic of Catarrhal Fever and sporadic mild occurrences of gastrointestinal upsets in the Fleet, it is considered the general health has been at normal levels.

The injury rates, and venereal incidence have both decreased perceptibly.

The exanthemata have been reduced to a slightly above normal admission rate which should be stabilized at this level depending always on influx of new personnel. At no time was the situation such as to cause alarm nor require measures prejudicial to the training schedules. However, there was a marked outbreak of Catarrhal Fever in the Fleet which reached its peaks in September and January. This was concomitant with a national situation which unquestionably was the source of our infection. No serious complications appeared except in a few isolated cases. The mortality in these was practically nil. In one instance a battleship was forced to remain at anchor in Lahaina Roads for a few days incidental to the large sick list. Efficient drastic steps were taken in the instance and the schedule was readily resumed.

Various gastrointestinal upsets, mostly of unknown origin, were noted. These were traced in a few instances to food handlers, shore-side foods of questionable quality, et cetera, but as a [38] rule, no definite cause could be detected. The water supply has been suspected wrongly—in all but one case. The repeated weekly and tri-weekly analysis of barge water failed to substantiate any such accusation. Water distilled aboard has been carefully checked especially while in Pearl Harbor. Further precautions were taken in some ships by not distilling drinking water in port, and by chlorination. Several cases were periodically transferred to the Naval Hospital for

thorough study especially whenever the diagnosis of DYSENTERY, BACILLARY, was considered advisable, or indicated by the finding of *Paratyphenteriae* *Shigilla* in the stools.

One theory advanced was the droplet contamination of vegetables transported in spray splashed boats from source of supply to ships. Another was the existence of a "droplet" contamination causing a condition which appeared in Los Angeles epidemically during May and June, also in Honolulu during June and July. The latter has been reported in Los Angeles—1939. Other instances appeared in Denmark—1935, England—1936. Milwaukee reported 120,000 cases in 1936. The symptomatology is practically identical.

However, in the Fleet no deaths occurred, very few cases were severe and though disabling for 2 to 5 days, recovery took place with usual routine treatments. Dehydration and high fevers were the important features in the more severe cases. No one group of ships was affected nor were the instances of localities under suspicion. Breaks in the technique at the dishwashing area, principally low temperature of water and the presence of "carriers" have accounted for many difficulties of this type. Sporadic increases in "sore throats" were traced to defective sterilization or care of scuttlebutts, also to the ubiquitous common drinking cups in some parts of ships.

The injury rates have decreased noticeably and this can only be attributed to the added interest and publicity in prevention by thorough study of each accident followed by remedial steps where possible.

An outstanding improvement has been the lowered venereal disease incidence. This has been truly remarkable. In June, 1939, the rate per 1,000 was 82; in 1940 it was 72. These figures apply to the U. S. Fleet (less Fleet Marine Force and Asiatic Fleet). For the first 5 months of this year the Pacific Fleet showed an admission rate of 41 per 1000 for venereal admissions.

The location of ships has materially affected these statistics, especially when there were sojourns in some of our less supervised Coast ports. Many features concur in the lowering and raising of venereal rates, such as lectures aboard ships, but the excellent measures, supervision and cooperation of the authorities in Honolulu must be given just dues and be pointed out as worthy of attempted emulation by some of our coastal confreres.

There have been very few cases of "food poisoning" per se in the Fleet this year. Only one of mement where over 600 appeared on the "COLORADO" during a gunnery practice. This was traced to a "carrier" of entero-toxic staphylococci in a food handler. No complicated case appeared and the situation fortunately responded to routine medical aid. The necessity for readily available hand washing facilities for food handlers cannot be stressed too much. This is applicable in controlling the fresh water curtailments or "water hours" which manifestly preclude availability to more than a favored portion of the personnel. Efficiency competitions are commendable only until they jeopardize health and comfort.

The increased personnel aboard ships of all types brings problems of sanitation which require constant surveillance, energetic remedial or preventive measures and justifiable concern for the presence of any possible epidemic. This is applicable to the air borne and contaminated food diseases.

Ventilation must be and is being constantly considered, especially in the avoidance of protracted periods of gas attack and other drills. These problems have been given due consideration during the past year with commendatory results. Expediency and necessity in an emergency necessarily control factors in a manner dissimilar to those of placid times. Hygiene and sanitation standards have been modified but have been more carefully watched by that token.

The procurement of drinking fountains at "strategic" areas continues and is relieving a situation which made for problems of sanitation. The sooner our common drinking cups—coffee and otherwise—disappear from their many storerooms, firerooms and the like, the greater will be the decrease of upper respiratory diseases. Most ships have taken substantial steps in this direction.

A dishwashing machine of small restaurant type such as seen in the many "hamburger stands" is urgently needed in officers' pantries. The dishwashing method in these instances has not changed in over thirty years.

[39] Garbage disposal in port remains a problem. Large accumulations over 24 hour periods are detrimental to proper sanitation and fly control. The "lighter" service should be carefully controlled to permit of no breaks, perhaps doubled in frequency.

All personnel have been blood typed excepting an occasional new arrival. The issuance of identification tags in the next few weeks will afford a ready means of information at all times.

Landing Force exercises provided much needed training for the Medical Department personnel and have pointed to some outstanding necessities in equipment and supplies. These latter are applicable to preparation and provisions for casualties more especially in the service of supply and transporting of injured from field of action to evacuating area or ship.

Hospital facilities have been adequate to date. The absence of a hospital ship has thrown a patient increase on the hospital at Pearl Harbor where it has been absorbed efficiently and expeditiously. It now has a bed capacity of 1,000. A mobile hospital of 500 bed capacity is on its way for installation. This is in the area chosen for the erection of a new Naval Hospital at a strategic distance from the industrial and military activities of the Yard. Provided no obstacles arise, this unit should be functioning shortly and furnish components available for installations, if needed, at distant points. The hospital has a daily average patient complement of about 600, leaving a good margin of safety, when the mobile unit and its 500 beds are added. This should be further increased by the expeditious construction of the new permanent hospital. This already has been planned and appropriated for but not started. Possible major catastrophes or large scale casualties make this adjunct urgently needed. With the above situation in mind, a determined successful effort has been made to decrease transfers to hospitals and hospital ship for minor injuries, minor surgery and mild conditions. This accomplishes much towards indoctrination of Medical Department personnel, stimulates resourcefulness and maintains a crew intact while undergoing its scheduled training aboard combatant ships.

(F) *DISCIPLINE AND MORALE.*

The excellent character of Naval personnel continues to be self-evident.

The discipline and morale of the Fleet is considered excellent. This is particularly impressive in view of the existing rapid turn-over in personnel, distance of the Fleet Units from their home bases, and rigorous conditions under which the Fleet operates at sea.

In spite of the rapid personnel expansion program taking place during the year, there appears to have been no corresponding increase in breaches of discipline.

With increased recreational and housing facilities rapidly becoming available, it is anticipated that the present high morale will continue. The only primary unsatisfactory obstacles to morale are the increased cost of living for both officers and enlisted personnel with families, the more lucrative salaries offered civilian workers on "defense" projects, and the uncertainty as to the length of time personnel will be separated from dependents on the Mainland of the United States. This latter feature is compensated for partially by scheduled recreational visits to the West Coast of the United States.

[40]

PART V—INSPECTIONS

The prescribed inspections, military, material, medical supply, and surprise have been conducted in accordance with current instructions. They indicate that the Fleet has generally maintained satisfactory conditions as to material, discipline, efficiency, health, and morale. Wherever conditions requiring remedy were discovered, action was initiated leading to their correction.

The Secretary of the Navy, Frank Knox, accompanied by Captain M. L. Deyo, U. S. Navy, was present with the U. S. Fleet during the September, 1940, tactical period, and informally inspected various Fleet units, including a battleship, aircraft carrier, light and heavy cruisers, destroyers, and 14th Naval District.

EXHIBITS—NAVY COURT OF INQUIRY

VOLUME III

No. 45 to 62 (both inclusive)

and

No. 69 to 77 (both inclusive)

NOTE.—Exhibits No. 63 to 68, both inclusive are filed with the testimony which by direction of the court was extracted from the record in the interest of national security and the successful prosecution of the war.

NOTE.—Exhibit 72 contains privileged matter, which though not classified as "Top-Secret", does contain mater which is against the public interest to release for any purpose whatsoever. This privileged matter has been plainly marked by underlining in "red" together with an appropriate note calling special attention to its classification.

NAVY DEPARTMENT

OFFICE OF THE CHIEF OF NAVAL OPERATIONS

Washington, Aug. 13, 1941.

In reply refer to Initials and No.

Op-30B3-BP

(SC) A16-1/ND14 D-33960

Serial 079630

From: The Chief of Naval Operations.

To: The Commander-in-Chief, U. S. Pacific Fleet

Subject: Fourteenth Naval District—Local Defense Forces.

Reference: (a) CinCPac conf. ltr A16/(16) Serial 01231 of August 9, 1941.

1. The Chief of Naval Operations is fully aware of the seriousness of the situation in the Fourteenth Naval District as again put forth by the Commander-in-Chief, U. S. Pacific Fleet in reference (a). However, at this time it is impossible to *obtain either authority or funds* to acquire or build any craft other than that now under construction.

2. At the present time, mainly due to lack of engines, it does not appear that any patrol craft now under construction will be completed before the middle of October.

3. It is expected that Motor Torpedo Boat Squadron 1 will leave for Hawaii in about two weeks. This squadron will be attached to the Pacific Fleet rather than to the District and consists of twelve motor torpedo boats.

4. The situation as to the sampans which have been seized in Hawaii has not yet been determined although the Department is doing its utmost to obtain at least some of these boats expeditiously.

5. Vessels now available for the Naval Local Defense Forces for the Fourteenth Naval District include:

4 Old destroyers

Coast Guard Cutter Taney, Tiger, Reliance

2 Coast Guard YPs

4 AMc's

There are also twelve tugs of various types assigned to and in the Fourteenth Naval District which, should the fleet leave, might be used for patrol purposes. In addition to the vessels now actually in the Fourteenth Naval District PG-19 SACRAMENTO should arrive there within two or three days and YT-HOGA and YN-56 WAPELO are expected to sail from San Pedro for Hawaii on August 17, 1941.

6. When patrol boats now under construction are completed as many as practical will be assigned to the Fourteenth Naval District but as previously stated construction is progressing very slowly.

R. E. Ingersol,
R. E. INGERSOL,
Acting.

First Endorsement to Com-14 Secret ltr. S-A16-1/ND14(01084) of 17 October 1941
From: Commander-in-Chief, U. S. Pacific Fleet,
To: The Chief of Naval Operations.
Subject: Reappraisal of Local Defense Forces,
Hawaiian Coastal Frontier.

1. Forwarded.

2. There is a possibility that the reluctance or inability of the Department to furnish the Commandant, Fourteenth Naval District with forces adequate to his needs may be predicated upon a conception that, in an emergency, vessels of the U. S. Pacific Fleet may always be diverted for these purposes. If such be the case, the premise is so false as to hardly warrant refutation. A Fleet, tied to its bases by diversion to other purposes, of light forces necessary for its security at sea, is, in a real sense, no Fleet at all. Moreover, this Fleet has been assigned, in the event of war, certain definite tasks, the vigorous prosecution of which requires not only all the units now assigned, but as many more as can possibly be made available.

3. The necessities of the case clearly warrant extraordinary measures in meeting the Commandant's needs.

4. Transmission of this document within the continental limits of the United States by registered air mail is authorized.

H. E. KIMMEL.

- (e) Com 14 Conf. ltr. to Opnav of 31 October 1940, Serial 510

1. All of the above references bear on the local defense forces and security measures of this area.

2. The only increment that has been made to these forces during the past year, exclusive of net vessels, is the U. S. S. SACRAMENTO which has no battery, to speak of, with which the vessel can fight, and no speed with which she can run.

3. Although the writer of this letter is aware that the department has been fully informed about the deficiencies in this district, he feels it necessary to again bring this subject to attention.

4. Recently, the Commandant endeavored to obtain, without much success, from the Commander-in-Chief the assignment of certain planes which could be used in connection with anti-submarine patrol. The only planes now available

for this purpose are Army planes, and the types and numbers are inadequate for the purpose.

5. The only anti-submarine vessels now in the district are the four destroyers of Destroyer Division EIGHTY, one still being unequipped with listening gear, and three Coast Guard cutters. These vessels will not only have to be used for hunting and tracking down submarines but will also be required for escort and security patrols in a very extensive frontier.

6. It is urged that the department send a number of small, fast craft to this district equipped with listening gear and depth charges for this purpose. It is further urged that the department send to this district at least two squadrons of VSO planes which can be used for patrol against enemy submarines.

7. Nearly all of the failures of the British have been caused by what may be expressed in the cliché "too little and too late." It is hoped that we may profit from their errors.

C. C. BLOCH.

1. The request of the Commandant, Fourteenth Naval District, in reference (e), for a number of small anti-submarine craft and at least two squadrons of VSC planes for anti-submarine patrol, and the endorsement thereon by Commander in Chief, U. S. Pacific Fleet, reference (f), have been given full consideration by the Chief of Naval Operations.

2. A previous letter of the Commander in Chief, U. S. Pacific Fleet, reference (a), pertaining to the same general subject, was replied to in reference (d).

3. The Chief of Naval Operations notes that the Commander in Chief, U. S. Pacific Fleet, in his war plan, reference (c), has taken full cognizance of his responsibilities in connection with his tasks pertaining to the Hawaiian Naval Coastal Frontier. The forces available in the Hawaiian area, both Fleet and Local Defense Forces, and the actual operations of our own and hostile forces, will, of course, indicate the numbers of Fleet vessels or aircraft required to be assigned to local defense tasks.

[2] 4. Neither the Local Defense Force Operating Plan—Rainbow No. 5 (Naval District Plan O-5, Rainbow No. 5) nor the Joint Coastal Frontier Defense Plan, both required by reference (b), have yet been received by the Chief of Naval Operations. The joint plan should indicate what assistance in anti-submarine or other patrols will be rendered by Army air forces. A recent joint letter of the Chief of Naval Operations and the Chief of Staff, contained in reference (g), provided for joint exercises of Army and Navy Frontier forces and called attention to the necessity of early completion of joint defense plans.

5. The augmentation of the Local Defense Forces of the Fourteenth Naval District is proceeding as fast as the availability of ships, funds, personnel, material and priorities will permit. The current situation in this regard may be summarized as follows:

1282 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(a) The Department now has authority to acquire and convert four small and ten larger types of privately-owned vessels for the Naval Local Defense Forces of the Fourteenth Naval District. These are generally of the yacht type and do not have very high speeds. The delivery of underwater detection devices is slow, but every effort will be made to give priority for such gear assigned these vessels.

(b) The completion of the 173-ft. sub-chasers (PC) is progressing slowly, and they will not be turned out in any quantity until about May, 1942. Eight of these, due for completion in May, 1942, are tentatively assigned to the Fourteenth Naval District. The date of completion of the 110-ft. sub-chasers (PC) is indefinite due to the engine situation.

(c) The Commandant now has under his command the Coast Guard of the Fourteenth Naval District. Of the Coast Guard vessels under his command, the following are equipped with depth charges and underwater detection gear: TANEY, RELIANCE, and TIGER.

(d) Ten YMS, expected to have depth charges and sound gear when available, are tentatively assigned to the Fourteenth Naval District. Two of these are due for completion in the third quarter.

(e) The Department has no additional airplanes available for assignment to the Fourteenth Naval District. Allocations of new aircraft squadrons which become available in the near future will be determined by the requirements of the strategic situation as it develops.

[3] 6. Transmission of this document by the following means is necessary and is authorized: within the continental limits of the United States by registered air mail; beyond the continental limits of the United States via P. A. A. locked box.

NAVY DEPARTMENT,
OFFICE OF THE CHIEF OF NAVAL OPERATIONS,
Washington, February 15, 1941.

From: The Chief of Naval Operations
To: The Commander-in-Chief, Pacific Fleet
Subject: Anti-torpedo baffles for protection against torpedo plane attacks, Pearl Harbor.

1. Consideration has been given to the installation of A/T baffles within Pearl Harbor for protection against torpedo plane attacks. It is considered that the relatively shallow depth of water limits the need for anti-torpedo nets in Pearl Harbor. In addition the congestion and the necessity for maneuvering room limit the practicability of the present type of baffles.

2. Certain limitations and considerations are advised to be borne in mind in planning the installation of anti-torpedo baffles within harbors, among which the following may be considered:

(a) A minimum depth of water of seventy-five feet may be assumed necessary to successfully drop torpedoes from planes. One hundred and fifty feet of water is desired. The maximum height plane at present experimentally drop torpedoes is 250 feet. Launching speeds are between 120 and 150 knots. Desirable height for dropping is sixty feet or less. About two hundred yards of torpedo run is necessary before the exploding device is armed, but this may be altered.

(b) There should be ample maneuvering room available for vessels approaching and leaving berths.

(c) Ships should be able to get away on short notice.

(d) Room must be available inside the baffles for tugs, fuel oil barges and harbor craft to maneuver alongside individual ships.

(e) Baffles should be clear of cable areas, ferry routes, and channels used by shipping.

[2] (f) Baffles should be sufficient distance from anchored vessels to insure the vessels' safety in case a torpedo explodes on striking a baffle.

(g) High land in the vicinity of an anchorage makes a successful airplane attack from the land side most difficult.

(h) Vulnerable areas in the baffles should be so placed as to compel attacking planes to come within effective range of anti-aircraft batteries before they can range their torpedoes.

(i) Availability of shore and ship anti-aircraft protection, balloon barrages, and aircraft protection.

(j) Availability of naturally well protected anchorages within a harbor from torpedo plane attack for a number of large ships. Where a large force such as a fleet is based, the installation of satisfactory baffles will be difficult because of the congestion.

3. As a matter of interest the successful attacks at Taranto were made at very low launching heights at reported ranges by the individual aviators of 400 to 1300 yards from the battleships, but the *depths of water* in which the torpedoes were launched were *between 14 and 15 fathoms*. The attacks were made in the face of intensive and apparently erratic anti-aircraft fire. The eastern shore line of the anchorage and moorings were protected by numerous balloon barrages, but there was no trawler borne balloon barrage to the west. The torpedoes were apparently dropped inside of the nets, probably A/T nets.

4. It is considered that certain large bays and harbors, where a fleet or large force of heavy ships may be anchored and exposed with a large body of water on an entire flank, should have that flank protected by a series of baffles if the water is deep enough for launching torpedoes. The main fleet anchorage at Scapa Flow, for instance, has an A/T net extending slightly to the north of a line between Calf of Flotta and Cava Island protecting the main fleet anchorage. The depth of water where this net is laid is approximately 17 fathoms. On the other hand constricted harbors, in which practically all available space is taken up by anchorages, and which is relatively deep probably must depend upon other defense measures. It might be possible and practicable to provide in some places, which are not protected by relatively shallow water, anti-torpedo baffles

1284 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

practically surrounding a limited [3] number of berths for large ships, such as battleships or carriers. An extreme example of this is furnished at the present time by the French at Dakar, where double nets surround the Richelieu; she is placed similarly as in a dry dock, and evidently would have to open a section of the net to be hauled clear. The depth of water at Dakar, however, is very shallow.

5. The present A/T nets are very expensive, extremely heavy, their heavy anchors and moorings take up about 200 yards of space perpendicular to the line of the net, take a long time to lay, and are designed to stand up under heavy weather conditions. There is apparently a great need for the development of a light efficient torpedo net which could be laid temporarily and quickly within protected harbors and which can be readily removed. It is hoped that some such net can be developed in the near future.

6. Recommendations and comments of the Commander-in-Chief are especially desired.

SECRET

Cincpac File No.

UNITED STATES PACIFIC FLEET

U. S. S. PENNSYLVANIA, *Flagship*

PEARL HARBOR, T. H., *December 2, 1941.*

DEAR BETTY: We had your despatches in regard to reinforcing the outlying islands with Army pursuit planes and Army personnel. With regard to the use of Army pursuits on the island bases, some time ago we investigated the feasibility of putting some kind of fighters on the outlying islands and decided at the time that our best chance of quickly reinforcing the islands and to make the minimum demands upon the supplies in the island that we could send a minimum number of ground crews to Wake and Midway in order when the time came, to be in a position to fly off the Marine planes from a carrier or to send them direct from Pearl to Midway in the case of the SBD's. At the time your despatch in regard to Army pursuits was received we had the WRIGHT at Wake discharging the Marine ground crews and she arrives at Midway tomorrow, December 3, to discharge Marine ground crews there.

Halsey, in the ENTERPRISE, with three heavy cruisers and a squadron of destroyers, will fly off 12 Marine fighting planes for Wake tomorrow morning after which he returns to Pearl. We have been covering his advance by 2 VP squadrons operating from Johnston, Midway and Wake. Upon the completion of the movement we now plan to return one VP squadron to Pearl and leave the other one at Midway awaiting further developments. I will hold the Marine SBD's at Pearl awaiting further developments as they can fly under their own power from Pearl to Midway.

During all the period that I have been in command the question of the development of supply and defense of these outlying bases has been a very difficult one. We cannot expect to supply Wake quickly and expeditiously until we have a space to put a ship alongside for loading and unloading. The Commandant of the District has been and is exerting every effort to obtain this objective. As you know, ships have been delayed in unloading at Wake for as long as 28 days, due to bad weather, and it is not unusual for a ship to take as much as 7 or 8 days. This, in the face of any opposition, presents an impossible situation. Present facil-

ities at Wake must be improved, particularly as to storage of fuel oil, aviation gas, food and ammunition. This work should not stop and the 1,000 defense workers at Wake are essential to keep this work moving as rapidly as material can be supplied. A recent estimate by Bloch sets the time for the completion of the ship channel to about the first of May. I hope, and so does he, that this date can be anticipated. At the present time we cannot support more personnel on Wake than we now have there. As you will remember, we put six 5" guns and twelve 3" [2] anti-aircraft guns, together with a number of machine guns on the island, well knowing that we did not have sufficient Marine personnel to man them. However, I think good progress has been made in organizing the defense workers to assist in the manning of the battery at Wake. In case the present situation should ease, we can readily withdraw the Marine fighters from Wake in order to decrease the demands upon the facilities there and also in order to keep up the training of the pilots of these planes.

The situation at Midway is somewhat better than at Wake. You will note from our report of the defenses submitted today that we have shipped three of the four 7" guns to Midway. Also we have shipped, or are shortly shipping, four of the 3"—50 anti-aircraft guns to Midway. These, in addition to the batteries already installed there, which comprise six 5"—51's and twelve 3" anti-aircraft. You will also note from our official letter submitted today that the defenses of Johnston and Palmyra, while not what we would like to have, are nevertheless not entirely inadequate.

Your despatches in regard to the use of Army personnel and the organizations of Army defense forces to be used in outlying islands is being given earnest consideration. I know you appreciate the difficulties of mixing Army, Marine Corps and Navy personnel in a small island base. I believe you will subscribe to the principle that all these outlying bases must be under Navy command and the forces there must be subject to the orders of the Commander-in-Chief without any qualification whatsoever. I anticipate some difficulties along this line when Army personnel is injected into the picture unless a very clear directive is issued jointly by the War and Navy Department. On inquiry and conference with the Army I find that the Army in Hawaii has no guns, either surface or anti-aircraft, available for outlying bases. They can supply some .30 caliber machine guns and rifles. I have frequently called to your attention the inadequacy of the Army anti-aircraft defense in the Pearl Harbor area with particular reference to the shortage of anti-aircraft guns. So far, very little has been done to improve this situation. With nothing but .30 caliber machine guns and rifles the replacement of Marines by Army at outlying bases now will result in an increased number of Marines in Oahu with no suitable equipment as Army would require all of the Marine equipment now in the islands. The Marines in the outlying islands are trained, acclimated and efficient beyond standards immediately obtainable by the Army even if they took over the present Marine equipment. We cannot appreciably increase the number of military personnel in the outlying islands unless we remove the defense workers. We cannot afford to remove the defense workers if we expect ever to reach a satisfactory condition in the islands. Essential items include, as I have previously stated, [3] provision to berth a ship at Wake, completion of air fields at Palmyra and Johnston and completion of fuel, gasoline, food and ammunition housing at all bases. I am proposing in official correspondence that:— (2) the Army organize 3 defense battalions of approximately 800 men each; that steps be taken in Washington to supply them with guns, both surface and anti-aircraft; supply them with 37mm or .50 caliber machine guns; to make up a well balanced defense battalion; that prior to the time the equipment of these organizations is supplied that they drill with the five inch guns of the Fourth Defense Battalion now at Pearl as long as the equipment is available here. If it is decided to supply these battalions with some other caliber of guns, that sufficient number of guns of the type to be used be shipped to Oahu to be utilized for training purposes, (b) that these Army defense battalions be held in readiness to (1) furnish replacement to presently occupied islands (2) to relieve battalions in presently occupied islands (3) to garrison islands to be occupied.

The Marine garrisons now at Midway, Johnston and Palmyra should be retained there for the present. They will not be withdrawn until arms and equipment for the Army defense battalions have been received and the Army trained. At this time a decision can be made according to the situation then existing.

That the Army organize three 12-plane pursuant squadrons and keep them in an expeditionary status; maintain the ground crews organized and ready to man them; maintain the planes ready to be transported by carrier when ordered.

The Army has orders to defend Canton and Christmas. We are turning over to them two five-inch 51 guns for use at Canton. These they will man with Army personnel and supplement with some obsolete anti-aircraft guns and machine guns. The expedition is now due to leave here on December ninth.

The Army is also sending some obsolete guns and a garrison to Christmas. I will let you know more definitely what they send when I find out exactly.

I feel that we cannot determine the defenses of Canton and Christmas until we find out how much personnel can be maintained there. Meanwhile the Army is sending some forces there.

[4] In view of the foregoing I am unable to understand the reason for the despatches from the War and Navy Department directing us to utilize the Army in the defense of the outlying bases, as we can hope for no relief from this quarter until they have been supplied with suitable equipment.

I feel the wiser course is to continue to organize Marine defense battalions and supply them with the necessary equipment. I believe we can train Marine defense battalions just as rapidly as the Army can do so and probably as rapidly as the equipment can be supplied. If there is any prospect of the immediate supply of considerable quantities of suitable equipment I can see some reason for injecting the Army into the picture.

I think it would be well for you to read the despatch sent by the War Department to the Commanding General on this subject. It differs considerably from the one you sent to us in that the War Department says they will take over the defense of some outlying bases from the Navy in accordance with an agreement to be reached by the Commanding General and myself. Your despatch left me with the conviction that the Army was to reinforce the Naval and Marine forces on the outlying bases in case of necessity. I feel that this should be clarified.

We have one transport in commission which, due to a delay in the sailing of the WHARTON we are now obliged to use for one trip to transport essential Naval personnel from the West Coast to the Fleet. The other transports, to a total of six, are in various stages of completion. The Marines at San Diego are in urgent need of transport training and will not be ready to come to Hawaii until some time in February. I can see very little chance for any overseas expedition even on a small scale until that date. Eventually this war will require a much greater number of transports and supply ships in the Pacific. We are working on an estimate of the requirements. This estimate, in addition to some thirty or forty transports and an equal number of supply ships must also include a thirty to fifty percent increase in the fighting strength of the Fleet before we can occupy the Marshall's and Caroline's is an advance across the Pacific.

With these considerations in mind I am at loss to understand the considerations which injected the Army into the picture.

My kindest regards and best wishes, always.

Most sincerely yours,

H. E. KIMMEL.

P. S. The Commanding General of the Hawaiian Air Detachment made the statement in conference that his pursuit planes could not operate farther than 15 miles from land. If this be the case, I can see very little use for Army pursuit planes in an outlying island. This, added to the inability of this type plane to land on a carrier, makes them practically useless for an overseas expedition of any kind. Except for the four-engined Army bombers, we must depend upon Navy and Marine Corps planes to support any overseas expedition and to man outlying bases. This is and has been one of my reasons for urging the supply of all types of carrier planes.

P. S. You will note that I have issued orders to the Pacific Fleet to depth bomb all submarine contacts in the Oahu operating area.

H. E. K.

Admiral H. R. STARK, *U. S. Navy,*
Chief of Naval Operations,
Navy Department,
Washington, D. C.

P. S. From correspondence which General Short has furnished me I note that the Army is engaged in developing air fields in Fijil and New Caledonia. This will involve questions of supply and protection both of shipping and the fields themselves. The Australians I understand are loath to assume the protection of the field in New Caledonia. The Navy is bound to be involved in these affairs. I fear we may become so much concerned with defensive roles that we may

become unable to take the offensive. Too much diversion of effort for defense will leave us an inadequate force with which to take the offensive.

With regard to the escort of convoys by using a single cruiser to escort not to exceed 8 ships, we endeavor to limit the number of cruisers so occupied at one time to four. We now find that routing via Torres Strait to Manila, we are going to have seven cruisers continuously occupied with convoy duty. This without any consideration for such protection as may eventually be required from San Francisco to Oahu. I realize of course that the demands for trans-Pacific escorts may decrease if it becomes impossible to route ships to Manila but it will still be necessary to supply the Asiatic Fleet and our allies in the Far East.

H. E. KIMMEL.

SECRET

EG61/(16)
Serial 0114W

PEARL HARBOR, T. H., 2 Dec, 1941.

From: Commander-in-Chief, United States Pacific Fleet.

To: The Chief of Naval Operations.

Subject: Defense of Outlying Bases.

References:

- (a) Opnav despatch 270038 of November 1941.
- (b) Opnav despatch 270040 of November 1941.
- (c) Cincpac despatch 280627 of November 1941.
- (d) Opnav despatch 282054 of November 1941.
- (e) War Dept. despatch 48 of Nov. 29, 1941.
- (f) Cincpac secret serial 0113W of December 3, 1941.
- (g) Cincpac secret serial 090W of October 21, 1941.

1. Reference (a) advised that Army pursuit planes, could be made available for Wake and Midway in order to retain 2d Marine Aircraft wing available for expeditionary use. Reference (b) advised that Army could make infantry available to reinforce defense battalions now on station, and that Army proposed to prepare in Hawaii garrison troops for advance bases which the Commander-in-Chief, Pacific Fleet, *might occupy* but that they could provide no anti-aircraft units.

2. Reference (c) outlined certain measures that the Commander-in-Chief, Pacific Fleet, had already taken to strengthen the air defenses of Midway and Wake and others, including Army air cooperation, that were in progress. Reference (d) approved of the arrangements made and stated that the War Department would instruct the Commanding General, Hawaiian Department, to co-operate with Navy in plans for use of Army pursuit planes and Army troops in support of Marines. It also asked for report on present defenses of outlying bases and increases planned in immediate future. The report is furnished in reference (f).

3. Reference (e) from the War Department to the Commanding General, Hawaiian Department, which referred to Commander-in-Chief, Pacific Fleet's 280627, is somewhat at variance with Chief of Naval Operation despatches in that it states the War Department has offered to take over defense of Pacific advance bases from the Navy except for furnishing AA equipment. It also stated that the War Department has assumed responsibility for defense of Christmas and Canton Islands.

[2] 4. Reference (g) contained a study by the Commander-in-Chief, Pacific Fleet, of the defenses of outlying bases and recommendations as to personnel and equipment therefor.

5. It is not completely clear whether or not the Navy Department has in mind that the Army will ultimately relieve the Marine Defense Battalions. If so, it is assumed that such action would be taken in order to have those battalions and their equipment available to garrison positions taken by assault in the Marshalls and the Carolines. Should such assumption be correct, it is pertinent to note that transports, *trained* assault troops, etc., are not now available to make the seizures. Moreover, the local Army authorities are not only short of anti-

aircraft equipment, but of most other armament necessary for defense of an advanced island base. If the Marine Defense Battalions were withdrawn at this time it would be necessary to leave behind most of their equipment, and they would have none for use elsewhere.

6. To clarify the current situation to some extent, certain information and considerations that may not otherwise be readily available in the Department are mentioned below:

(a) Army is not only lacking AA guns for outlying bases, but has a serious shortage on Oahu. It has insufficient suitable guns for replacing Marine 7" and 5" guns without weakening the defenses of Hawaii. By taking 155mm guns from Hawaii the Marine 5" guns might be replaced but the 155mm guns would either cover a limited arc or else their mobility would be lost.

(b) Army can spare no .50 caliber machine guns but can supply rifles and .30 caliber machine guns.

(c) Army has a limited number of 37mm guns, badly needed for defenses in Hawaii, but some few might be made available by weakening the defenses here; particularly as a considerable increase in the number of such guns is expected in the near future. At present there is a marked shortage of ammunition for 37mm.

[3] (d) (1) Army pursuit planes are available in sufficient numbers to send at least one squadron each to Midway and Wake.

(2) The fighting capabilities of those planes is superior to that of Marine fighters or light bombers.

(3) They have no offensive capabilities against hostile surface craft or submarines.

(4) They lack navigational equipment, their personnel are inexperienced in flying over water and are much averse to operations more than fifteen miles from land.

(5) Pursuit planes once having landed at Midway or Wake, cannot fly off to carriers. It would be virtually impossible to take them out of Wake; and a very slow and difficult undertaking to remove them from Midway.

(e) Army has personnel available in sufficient numbers to reinforce or relieve the Marine Defense Battalions. The Marines have been organized, equipped, and trained for work of this particular character. They are already established, habited to the mode of life, and experienced in fitting their activities to accord with the various other naval activities in these outlying places. It is no reflection upon the Army to say that their units would require considerable time to acquire the proficiency in this specialized work that the Marines already have.

(f) In emergency, Army personnel might replace casualties or reinforce Marines, but it would, for very obvious reasons, be highly preferable to have other Marines available for that purpose.

(g) No spare armament for defense battalions is available. In fact, some deficiencies in equipment for existing battalions exist; and the recommendations of reference (g) as to armament for the outlying bases have not been completely filled. Armament and equipment for any new defense battalions have not been assembled.

[4] (h) The bases are being developed to facilitate fleet operations. Irrespective of the source of defense forces, various other naval activities will continue at these outlying bases. Placing the defenses in Army hands would bring some difficult problems of command relationships. Such problems would not, of course, be insurmountable, but they would be avoided if the Marines are not replaced.

(i) Twelve Marine fighting planes are now on Wake; a squadron of Marine light bombers is in readiness to fly to Midway. These planes are accustomed to long operations over water, and from carriers. The bombers have offensive power against surface ships or submarines.

(j) Arrangements exist or will shortly exist on both Midway and Wake for temporary offensive operations of Army B-17 bombers, using Navy bombs. Only six such bombers on Oahu are now in operating condition.

(k) Personnel and equipment, up to the limits given in reference (g), are being transferred to the outlying bases as rapidly as available and the conditions at those bases make feasible.

(l) Prior to receipt of reference dispatches, arrangements for Army cooperation in certain respects had been made; and close cooperation and liaison will continue.

(m) Essential work is being pushed at outlying bases, and it is not intended to withdraw civilian workers if hostilities develop. Plans have been made to incorporate such workers into the defense organization insofar as practicable.

7. From the foregoing, it is concluded that at this time:

(a) Marine armament can be withdrawn from outlying islands to a very limited extent.

[5] (b) If the Marines are replaced, the personnel relieved, lacking equipment, will be valueless as a defense battalion.

(c) Replacing the Marines will very materially weaken the defenses because of less proficient personnel.

(d) Considering all aspects of the matter, Marine planes are more valuable in the Advance Bases than Army pursuit planes.

8. The presence of Army forces on outlying bases will inevitably bring up the question of command. Midway, Wake, Johnston and Palmyra are Naval Air Stations, designed and built primarily to support Fleet operations. Any other activities there, including defense, must be subordinate to this purpose. Defense itself exists solely for the purpose of insuring the availability of the bases. The establishments are small and close coordination of all activities is mandatory, extending to joint use of material and equipment and even to joint participation by all hands in unusual tasks. This can be accomplished only by unity of command, which must be vested in the one officer qualified to insure that the base fulfills its purpose, whether under attack or not and no matter what organization operates the defenses. The interests of the Navy are paramount and unity of command must be vested in the Commanding Officer of the Station. The Commander-in-Chief, Pacific Fleet, as already brought out in his despatches, cannot too strongly emphasize this point.

9. The Commander-in-Chief recognizes that unforeseen events may rapidly develop that would necessitate replacement of Marines by Army personnel, provided suitable equipment is available. He has had conferences with the Commanding General, Hawaiian Department, on the matter and arrangements are in progress looking toward

(a) Organization of three Army defense battalions of approximately 800 men each (organization along the lines of Marine Defense Battalions);

[6] (b) Training of such units with equipment, Army or Marine, available on Oahu;

(c) Army steps to obtain requisite armament comparable to that called for in reference (g) for use in the Advance Bases;

(d) Army organization of three 18-plane pursuit squadrons to be kept in expeditionary status with crews, ground crews and equipment ready for transportation, on short notice, to Advanced Bases—planes to be transported by aircraft carrier and flown off near destination.

(e) Bringing aforementioned units to a satisfactory state of readiness and keeping them available for (1) relieving, supporting, or furnishing replacements for Marine Defense Battalions, or (2) for garrisoning other islands or developments not now manned by Marines.

10. In connection with this whole question, the major point for the moment appears to be that the Advanced Bases we now have are, to a greater or lesser extent, going concerns. Their development and provisions for defense have been evolved after much work and study. The international situation is such that active defense against hostile forces may be required on extremely short notice. Any radical change in the defense arrangements should be made only if there is compelling necessity therefor; and a definite indication of clear cut gain for over all operations.

11. The Commander-in-Chief is not aware of the particular circumstances which have opened up the questions under discussion. If additional Advanced Bases in our own or friendly territory are contemplated, it is highly important that further information on the subject be furnished the Commander-in-Chief.

12. If, during the progress of the war, enemy positions are taken and require garrisons they should, of course, be defended by Marine Defense Battalions. It would be preferable to have Marine battalions with full equipment available for such duty without disrupting the defenses of existing bases. At present, our Advanced Bases should be defended by the most competent personnel available, viz, the Marine Defenses [7] Battalions. If our progress in the war has brought more advanced positions under our control, then the most seasoned and experienced personnel should be in the more exposed positions; and

the present Advanced Bases which, by virtue of our forward movement, would be less liable to enemy attack, could be manned by less skilled personnel. Even so, it would be better to have new Marines rather than the Army take over their defense, but the Army should be ready and qualified to do so. In any event, the battalions projected into the new bases must have their full equipment without withdrawing that in the present bases.

13. The foregoing discussion has had particular application to Midway, Wake, Johnston, and Palmyra. The situation as to Samoa is not greatly different. Construction of Army airfields at Canton and Christmas Islands has brought those places into the picture. The Commander-in-Chief has felt that some defense at Canton should be provided at once against an enemy raider. As the Army has no suitable guns available for the purpose, he has arranged to send two five-inch guns with fire control equipment from the Fourth Defense Battalion to meet temporarily the existing situation, pending clarification of the Department's policy regarding Canton. These guns will be manned by Army personnel.

14. Meantime, the Commander-in-Chief is making a study as to minimum requirements for the defenses of Canton. This will be forwarded separately within the next few days. The defenses contemplated will call for not more than two or three batteries of three inch AA guns, not more than two batteries of five inch guns and a limited number of smaller weapons. It is expected that not more than 300 men will be required for manning the defensive armament. It is probable that the requirements for Christmas would be less rather than more than that for Canton.

15. In view of the Commanding General's information that the War Department had assumed responsibility for defense of Christmas and Canton Islands, no steps have been taken toward defending Christmas, and agreement has been made locally with Army authorities that Marine equipment now going to Canton would be replaced as soon as possible.

[8] 16. It seems appropriate here to express the growing concern of the Commander-in-Chief over the increase in number of Army and Navy stations that may require support from the Fleet. Such support may involve logistics, keeping open lines of communications, or active defense. Establishments at Wake, Midway, Johnston, Palmyra, and Samoa are already well advanced. Our Army is now engaged in building air fields at Christmas, Canton, Fiji, and New Caledonia, and consideration is being given to other installations in the New Hebrides and Solomon Islands. In addition, discussion has been made from time to time over establishment of American bases in the Gilberts, Bismarck Archipelago, and other places.

17. Whether or not the Navy is initially concerned in the building or logistics or defense installations of these far flung establishments, it inevitably will become involved with them if war develops. Such involvement may seriously interfere with offensive operations of the Fleet. It can not be too strongly emphasized that new development of this nature must be curtailed, and only those permitted that will definitely contribute toward success in the Western Pacific. A Fleet in being behind a series of defensive positions in the Central and South Pacific can not contribute very much toward victory over a power some thousands of miles to the westward.

18. To summarize: the Commander-in-Chief considers that the current setup in the existing bases is in accordance with long and well considered plans that should not now be changed. He intends to:

(a) Continue the Marine Defense Battalions at Wake, Midway, Johnston, and Palmyra;

(b) Continue use of Marine planes at such of those places as circumstances require;

(c) Transfer a battery of five inch guns to the Army for use by Army personnel at Canton until the Army can obtain suitable replacement;

[9] (d) Continue cooperation and liaison with local Army authorities to develop and maintain in readiness Army units and equipment that may, on short notice, reinforce or relieve Marines at aforementioned bases in whole or in part.

19. It is recommended that:

(a) Deficiencies in armament at existing Advance Bases, and in existing Marine Defense Battalions, be remedied as rapidly as possible (see reference (g));

(b) Fourth Defense Battalion and proposed new Defense Battalion be maintained as mobile battalions in Pearl Harbor in accordance with existing plans; and that the organization and acquirement of equipment for this new additional battalion be expedited;

(c) At least two additional defense battallions be organized and equipped at San Diego, with plans to use these battallions and those mentioned in (b) above for garrisoning positions captured in the Marshalls;

(d) An understanding with Army be reached now that in case Army takes over defense of Advance Bases, command of such bases will remain in the Navy (See paragraph C);

(e) Commitments to further island developments in the Central and South Pacific be held to a minimum as to number and logistic requirements;

(f) No plans be made for relieving Marine Defense Battallions or air units until Army has organized, equipped and trained for coordinated action suitable units for taking over.

20. Transmission via U. S. Registered air mail is hereby authorized.

H. E. KIMMEL.

Serial 01772

PEARL HARBOR, T. H., October 31, 1941.

Confidential

PACIFIC FLEET CONFIDENTIAL LETTER 14CL-41

From: Commander-in-Chief, United States Pacific Fleet.

To: PACIFIC FLEET.

Subject: Task Forces—Organization and Missions.

Reference:

(a) Pacific Fleet Conf. Letter No. 4CL-41

(b) Cinpac Conf. Ltr. A4-3/FF12/(13) Serial 01254 of 13 Aug. 1941 (Furnished only to Type, Force and Task Force Comdrs. and CG, Second Marine Div.).

1. Reference (a) is cancelled and superseded by this letter, effective 15 November 1941.

2. To provide for all phases of type, inter-type, and Fleet training, concurrently with performance of certain required patrol and escort duties, the following Task Force organizations are prescribed:

TASK FORCE ONE, (COMMANDER BATTLE FORCE)

Batdivs TWO, FOUR	6 BB
Cardiv ONE less LEXINGTON	1 CV
Crudiv NINE	5 CL
Desflot ONE less Desron FIVE	1 OCL, 2 DL, 16 DD
OGLALA, Mindiv ONE	1 CM, 4 DM

Primary Mission:

To organize, train, and continue development of doctrine and tactics for operations of, and in the vicinity of, the Main Body; to keep up-to-date normal arrangements and current plans for such operations; and to accumulate and maintain in readiness for war all essential material required by the task force in order to provide an efficient *Covering Force* available for supporting operations of other forces; or for engagement, with or without support, in fleet action.

TASK FORCE TWO, (COMMANDER AIRCRAFT, BATTLE FORCE)

Batdiv ONE	3 BB
Cardiv TWO	1 CV
Crudiv FIVE	4 CA
Desflot TWO	1 OCL, 2 DL, 16 DD
Mindiv TWO	4 DM

1292 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Primary Mission:

To organize, train, and develop doctrine and tactics for reconnoitering and raiding, with air or surface units, enemy objectives, particularly those on land; to keep up-to-date normal arrangements and plans for such operations; to accumulate and maintain in readiness for war all essential material required by the task force *in order to* provide an efficient *Reconnoitering and Raiding Force* for testing the strength of enemy communication lines and positions and for making forays against the enemy, and for operations in conjunction with other forces.

[2] TASK FORCE THREE, (COMMANDER SCOUTING FORCE)

Cruidivs FOUR, SIX.....	8 CA
LEXINGTON plus Marine Air Group 21.....	1 CV
Desron FIVE.....	1 DL, 8 DD
Minron TWO.....	13 DMS
Trainron FOUR.....	6 AP
2nd Marine Division less Defense Battalions and Advance Detachment	

Primary Mission:

To organize, train, and develop doctrine and tactics for capturing enemy land objectives, particularly fortified atolls; to keep up-to-date normal arrangements and plans for such operations; and to accumulate and maintain in readiness for war all essential material required by the task force *in order to* provide an efficient *Amphibious Force* for attack, with or without support of other forces, on outlying positions of the enemy.

TASK FORCE FOUR, (COMMANDANT FOURTEENTH NAVAL DISTRICT)

That part of Fourteenth
Naval District Activities
which involve the Island
Bases.

Primary Mission:

To organize, train, and develop the Island Bases *in order to* insure their own defense and provide efficient services to Fleet units engaged in advanced operations.

TASK FORCE SEVEN, (COMMANDER SUBMARINES, SCOUTING FORCE)

Subron FOUR less Subdiv FORTY-ONE.....	1 SM, 8 SS, 1 AM, 1 ASR, 1 DD
Subron SIX.....	12 SS, 1 AS
Subron EIGHT ¹	6 SS, 1 AS
Subron TEN ¹	4 SS, 1AS

¹ Upon reporting.

Primary Missions:

(1) To organize, train and, concurrently with execution of the expansion program, to continue development of doctrine and tactics *in order to* provide an efficient *Submarine Observation and Attack Force* for independent operations or operations coordinated with other forces.

(2) To conduct patrols in areas and at times prescribed by the Commander-in-Chief, United States Fleet *in order to* improve security of Fleet units and bases.

TASK FORCE NINE, (COMMANDER PATROL WING TWO)

Patwing ONE.....	36 VPB(A), 1 AV, 2 AVD, 1 AVP
Patwing TWO.....	42 VPB(A), 2 AV, 2 AVD, 1 AVP

[3] Primary Missions:

(1) To organize, train and, concurrently with execution of the expansion program, to continue development of doctrine and tactics *in order to* provide an efficient long range *Air Scouting and Air Striking Force* for independent operations or operations coordinated with other forces.

(2) To conduct patrols in areas and at times prescribed by the Commander-in-Chief, United States Pacific Fleet *in order to* improve security of Fleet units and bases.

TASK FORCE FIFTEEN. (COMMANDER BASE FORCE)

Units assigned 4 CA or CL

Primary Mission:

To escort trans-pacific shipping *in order* to protect trans-pacific shipping against possible attack.

3. Commanders of Task Forces ONE, TWO, and THREE, established by this order, will perform the duties incident to the organization, training and operations of their respective Task Forces. In addition, they will control the allocation of time for Task Force and Type exercises, in the at sea exercise periods of the employment schedules of their respective Task Forces. The relation of the Type Commanders to the Task Force Commanders, in matters relating to the above will be the same as now exist between Type Commanders and Force Commanders.

4. Commander Task Force FOUR, established by this order, will perform the duties incident to organization, training, and developments of the Island Bases.

5. Commanders of Task Forces SEVEN and NINE, established by this order, will perform the duties incident to organization, training, expansion and operation of their respective Task Forces. They will issue orders for and supervise the conduct of prescribed patrols. In addition, they will control the allocation of time within their respective Task Forces to operations (including type and inter-type training) and upkeep, with due regard to sufficiency of upkeep for maintaining material conditions of readiness for war service.

6. Commander Task Force FIFTEEN, established by this order, will perform the duties incident to organization and operations of his Task Force. For the present, cruisers will be assigned to this Task Force in rotation and, in the proportion of one each from Cruiser Divisions FOUR, FIVE, SIX and NINE, insofar as overhaul schedules and other circumstances permit. Trans-pacific westbound convoys will be formed on the West Coast by the Commandant Twelfth Naval District or in the Hawaiian Area by the Commandant Fourteenth Naval District depending on circumstances. Eastbound convoys will be formed in the Manila Area by the Commandant Sixteenth Naval District. Commandant Fourteenth Naval District will provide liaison between the three District Commandants and Commander Task Force FIFTEEN, furnishing information as to makeup, schedules, and routing of convoys. Commander Task Force FIFTEEN will issue the orders for and supervise the conduct of escort duties. Cruisers assigned to the Escort Force but not actually engaged in escort duty will be available to their respective Type Commanders for routine training and upkeep.

7. Force and Type Commanders will continue to exercise other functions as now assigned, and as required by U. S. Navy Regulations and basic instructions.

8. Unless already covered by appropriate publications, Task Force Doctrines and Current Tactical Orders for Task Forces shall be prepared and issued in tentative form. As soon as they have been sufficiently tested they shall be submitted to the Commander-in-Chief, U. S. Pacific Fleet, for final approval.

9. Units of the U. S. Pacific Fleet, not specifically detailed to the Task Forces appearing herein, will remain under the Force Commanders as at present.

[4] 10. *Communications.* Effective with the organization set forth in this letter:

(a) Units in Task Organizations, while at sea or away from Pearl Harbor, shall use the effective Task Force frequency plans, except,

(1) Island Base shore radio stations guard 4265 series.

(2) Units of Task Forces SEVEN and NINE ordered to patrol in vicinity of Island Bases guard 4265 series.

(3) In Task Forces FOUR, SEVEN, and NINE, certain *Task Group* designations are assigned additional geographical area significance, as follows:

1. Midway.
2. Wake.
3. Johnston
4. Palmyra

In order that other components of the Fleet and Fourteenth Naval District forces may know automatically how to communicate with the forces present in those areas.

Example:

Task Group

4.1—District Activities at Midway.

7.1—Submarine Patrol at Midway.

9.1—Patrol Planes operating from Midway.

(b) Units of each task organization, when in port, will guard and use harbor circuit (2562 kcs. currently in use in Pearl Harbor) and such other circuits as may be prescribed. Senior Officer Present Afloat will also guard the harbor circuit, and establish communication, preferably by visual or landline, with the nearest shore command activity.

11. *Schedules.* Current employment schedules for Task Forces ONE, TWO and THREE, and units not assigned to Task Forces, remain in effect except for units transferred to Task Forces SEVEN and NINE by this letter. Assignments to Task Force FIFTEEN will be indicated in the Task Force ONE, TWO and THREE schedules. Commanders Task Force SEVEN and NINE submit revised schedules for the period 15 November to 31 December 1941, at the earliest practicable date. For the present, required inter-type training of submarines and patrol planes with surface types will be limited to the Fleet Tactical periods listed in reference (b). Commanders Task Forces SEVEN and NINE will, if practicable, have at least two divisions of submarines and two squadrons of patrol planes available for each of these Fleet Tactical periods. Commanders of Task Forces SEVEN and NINE will include in their schedules joint arrangements for exercises between patrol planes and submarines in recognition signals, visual and radio communications, and coordinated tactics. Commanders of Task Forces SEVEN and NINE will also arrange for inter-type training in addition to that required during Fleet Tactical periods by mutual agreement with Commanders of Task Forces ONE, TWO, and THREE during the regular at sea operating periods of the surface Task Forces.

H. E. KIMMEL.

PEARL HARBOR, T. H., 27 February 1941.
File. C-A16-3/A4-3(5)/ND14(0164)
Confidential—Operation Plan No. 1-41

TASK ORGANIZATION

- (a) *Inshore Patrol* (Commander Inshore Patrol)
 - Destroyer Patrol (2 DD)
 - Outer—1 DD
 - Inner—1 DD
 - Boom Patrol (1 Power Boat)
 - Harbor Patrol (4 Power Boats)
 - A/B Boom
 - Mine Sweepers—
 - Magnetic (KEOSANQUA, YS-86)
 - Anchored (Mine Force and Base Force Detail)
 - (b) *Base Defense Air Force* (Commanding Patrol Wing Two) In conjunction with Army.
 - (c) *Anti Aircraft Defense* (District Marine Officer) In conjunction with Army.
 - (d) *Harbor Control Post* (District Operations Officer) In conjunction with Army.
1. *Information.* Attention is directed to Pacific Fleet Confidential letter No. CL-41 of 15 February 1941, to Pacific Fleet Confidential Memorandum No. 1 CM-41 of 25 February 1941, and to 14ND-JCD-13 (Hawaiian Joint Coastal Frontier Defense Plan).

By cooperation in support of the Army, Naval security measures will be established as necessary for the joint protection of PEARL HARBOR Base in order to safeguard the Fleet.

In conjunction with the Commanding General Hawaiian Department, the Naval Base Defense Officer (Commandant Fourteenth Naval District will arrange to coordinate joint effort; to set conditions of readiness; to hold required drills; to make "alarm" and "all clear" signals.

Assumptions.—(a) That no responsible foreign power will provoke war under existing conditions, by attack on the Fleet or base, but that irresponsible and misguided nationals of such powers may attempt:

(1) Sabotage from small craft on ships based in PEARL HARBOR.
(2) Block the entrance channel to PEARL HARBOR by sinking an obstruction in the channel.

(3) Lay magnetic or other mines in the approaches to PEARL HARBOR.

(b) That a declaration of war might be preceded by:

(1) A surprise submarine attack on ships in base area—probable.

(2) A surprise air attack on ships in PEARL HARBOR—possible.

[2] (3) A combination of these two—possible.

2. This force, in cooperation with and in support of the Army, will establish security measures including air defense and surface ship patrol to enforce Presidential Proclamation No. 2375 of 4 November 1939, and General Order one hundred eighteen in order to protect PEARL HARBOR and to safeguard the Fleet.

(3). (a) *Inshore Patrol.* Maintain a continuous patrol of the interior waters of PEARL HARBOR, and the seaward approaches thereto; keep the Pearl Harbor channel and its approaches against magnetic and anchored mines; operate and patrol the A/B boom; prevent approach to the channel entrance of any unauthorized vessel; maintain continuous listening watch for submarines; and report movement of foreign registry ships. Detailed Inshore Patrol Plan—Annex "A".

(b) *Base Defense Air Force.* Maintain readiness of shore based Fleet aircraft for joint effort in conjunction with Army air units against air attack on PEARL HARBOR area.

Commander Patrol Wing TWO in consultation with the Army will prepare detailed naval participation air defense plan—Annex "3".

(c) *Anti-Aircraft Defense.* Defense Battalions of the Fleet Marine Force present in PEARL HARBOR in conjunction with Army and Fleet units in PEARL HARBOR, provide anti-aircraft defense.

The District Marine Officer will, in consultation with Army and Fleet Officers concerned, prepare the detailed naval participation anti-aircraft defense plan—Annex "C".

(d) *Harbor Control Post.* Establish and maintain Harbor Control Post in the Operations Office, Fourteenth Naval District. Provide selected telephone circuits separate from dial system, to Army and Navy activities necessary for proper functioning of this post under present conditions. In conjunction and cooperation with Army personnel attached to Harbor Control Post train officer personnel and carry out duties prescribed in OpNav serial 041230 of 5 November 1940. Detailed Harbor Control Post Plan—Annex "D".

[3] (x) This plan will be implemented by orders and instructions to the task groups concerned incorporated in this plan as annexes. As operating experience is gained, and conditions change, these annexes will be revised and re-issued as replacements.

4. Logistics for Fleet details provided by Type Commanders; for District forces by Commandant Fourteenth Naval District.

5. (1) Communications in accordance with Annex "E". (2) Use zone plus ten and one half time. (3) Naval Base Defense Officer (Com 14) at Headquarters, Fourteenth Naval District.

C. C. BLOCH,
Naval Base Defense Officer,
Commandant, Fourteenth Naval District.

Confidential—Operation Plan I. S. P. No. A-1-41

To Naval Base Defense Force Operating Plan No. 1-41

HEADQUARTERS, NAVAL BASE DEFENSE FORCE,
FOURTEENTH NAVAL DISTRICT.

TASK ORGANIZATION

(a) *Outer Harbor Patrol*: Senior Unit Commander or C. O. Desdiv Eighty, TANEX, and Fleet Vessels Detailed.

(1) *Picket line*: Unit Commander or Senior C. O. Not to be stationed at present.

(2) *Channel Entrance Patrol*: C. O. DD detailed. 1 DD, detailed by Comdesdiv Eighty, or TANEX.

(3) *Ready Duty Destroyer*: C. O. DD Detailed. 1 DD detailed by Comdesbatfor.

(b) *Harbor Channel Patrol*: Senior Boat Officer.

(1) *Entrance Channel Patrol*: Boat Officer—1 Power Boat. Not to be stationed at present.

(2) *Boom Patrol*: Boat Officer—1 Power Boat detailed by Combatfor.

(c) *Inner Harbor Patrol*: Senior Boat Officer. 4 Power Boats detailed by Combatfor and administered by Combase.

(1) *Drydock Channel Patrol*: Boat Officer—1 Power Boat.

(2) *East Loch Patrol*: Boat Officer—1 Power Boat.

(3) *Middle Loch Patrol*: Boat Officer—1 Power Boat.

(4) *West Loch Patrol*: Boat Officer—1 Power Boat.

(d) *A/B Boom*: Lieut. Spear. Maintenance and Operating crews furnished by Captain of the Yard, Navy Yard, Pearl Harbor, and boom operated as at present.

(e) *Minecraft*:

(1) XAMc Division: Lieut. Comdr. C. D. Line, D-C, USNR REEDBIRD, CONDOR, COCKATOO, CROSSBILL.

(2) YS-86: C. O. Towing Vessel. KEOSANQUA, and YT-142 towing vessels detailed by Captain of the Yard, Pearl Harbor Navy Yard.

[2] 1. This paragraph same as paragraph 1 of basic plan, No. 1-41 Serial ND14 (0164) of 27 February, 1941. In addition, the following excerpts from "Joint Action of the Army and the Navy 1935" and "14ND J. C. D. 42 (Joint Coastal Defense Plan)", are quoted in order to clarify the extent and limits of the Harbor Patrol and to standardize the nomenclature of Task Groups:

"A defensive coastal area pertaining to a fortified harbor includes the *Outer Harbor Area*, the *Harbor Channel Area*, and the *Inner Harbor Area*".

"The *OAHU Defensive Coastal Area* (OAHU D. C. A.) comprises all water areas within circles and the connecting tangents drawn with points as centers and with respective radii as follows:

KEAHI POINT	Forty-nine thousand (49,000) yards.
PUU KAPOLEI	Forty-five thousand (45,000) yards.
PUUIKI STATION	} Twenty-three thousand (23,000) yards."
KAHUKU POINT	

"The *Outer Harbor Area* is the water area which extends to seaward from the outer exits of the entrance channels to a fortified harbor and lies within the range of the harbor defense batteries". (OAHU being a small island containing three fortified harbors, PEARL, HONLULU and KANEOHE, whose defensive batteries comprise all the island coast defense batteries, the outer harbor areas of these harbors merge and complete the waters of the OAHU Defensive Coastal Area).

"The *Harbor Channel Area* is the water area which lies between the *Outer Harbor Area* and the *Inner Harbor Area*, and which comprises all the entrance channels to the harbor".

"The *Inner Harbor Area* is the entire water area of a fortified harbor inside the inner entrance of all the entrance channels to the harbor".

[3] 2. This force will maintain a continuous patrol of the interior waters of PEARL HARBOR, and the seaward approaches thereto; sweep the PEARL HARBOR channel and its approaches against magnetic and anchored mines; patrol the A/B boom; prevent approach to the channel entrance of any unauthorized vessel; maintain continuous listening watch for submarines; and report movement of foreign registry ships.

3. (a) *Outer Harbor Patrol* maintain a continuous patrol of the water approaches to PEARL HARBOR as follows:

(1) *Picket Line* patrol the outer limits of the Outer Harbor Area (OAHU D. C. A.) Report all surface vessels, submarines, and aircraft sighted or contacted, and subsequent development and identification reports direct to Army Harbor Defense Command Posts and to Commander Inshore Patrol by voice radio on Patrol Group Inshore Patrol frequency 2670 kcs. Escort vessels through Outer Harbor Area (OAHU D. C. A.) as ordered. (Details in Addendum I)

(2) *Channel Entrance Patrol* patrol the seaward area within one and one half mile radius of entrance buoys. Enforce General Order one hundred eighteen. Prevent approach to the entrance channel of the harbor by any unauthorized vessel. If necessary to seize a vessel, report to Naval Base Defense Officer (Commandant, Fourteenth Naval District) for instructions. See District Order 17-41 (Revised). Report movements of foreign registry ships.

(3) *Ready Duty Destroyer* moor at normal berth in PEARL HARBOR or at discretion remain under way in vicinity of harbor entrance, ready to proceed immediately to re-enforce the Channel Entrance Patrol in repelling hostile run-in [4] attempts, submarine attacks, or mining operations; to act as screening vessel in the area between PEARL HARBOR channel entrance buoys and outer limits of Outer Harbor Area for Gunnery School Vessels and others when ordered. Maintain the following condition of readiness: Boiler Power for twenty-five (25) knots. (If moored in port, steaming and sea watches posted, engines ready to answer all bells, and ship ready to get underway).

(b) *Harbor Channel Patrol* maintain continuous patrol of Harbor Channel waters as follows:

(1) *Boom Patrol* patrol the seaward side of the A/B boom in order to safeguard the boom and prevent damage thereto by sabotage attempts from small craft or from shore. (Details in Addendum I).

(2) *Entrance Channel Patrol* patrol the entrance channel from the A/B boom to the entrance buoys and the waters of the Defensive Sea Area of PEARL HARBOR inshore of the entrance buoys. (Details in Addendum I).

(c) *Inner Harbor Patrol* maintain continuous patrol of the interior waters of PEARL HARBOR in order to control small boat traffic, guard against laying of mines in the harbor, and prevent damage to ships of the Fleet at anchor and to Navy Yard waterfront property, from sabotage attempts. (Details in Addendum I).

(d) *A/B Boom* to be maintained and operated as present under the Captain of the Yard, Navy Yard, pearl harbor.

1298 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(e) *Minecraft* conduct sweeping operations in the seaward approaches to PEARL HARBOR as follows:

(1) XAMc Division daily, commencing at 0200, sweep a channel one mile wide on either side of [5] buoyed channel axis extended) from entrance buoys to the one hundred fathom curve. Carry out daily operations with two vessels each making single ship sweep, one for moored mines and one for magnetic mines. Immediately upon completion of sweeping operations, the senior commanding officer of the sweeping group will send the following despatch "priority" in plain language, addressed to the Commandant, Navy Yard PEARL HARBOR and Commander Inshore Patrol, Fourteenth Naval District "Clear" to mean "The sweeping operation at the PEARL HARBOR channel entrance is completed".

(2) YS-86 conduct magnetic sweeping as ordered.

(x) (1) The following task groups under Task Organization will not be stationed at present, due to lack of available vessels:

(a) (1) *Pickel Line.*

(b) (2) *Entrance Channel Patrol.*

(2) The following task group under Task Organization will be administered by Commander Base Force in accordance with Base Force Operation Plan No. 6-40 of 12 June 1940:

(c) *Inner Harbor Patrol.*

4. Logistics as provided in basic plan No. 1-41 of Serial ND14 (0164) of 27 February 1941.

5. Communications in accordance with Naval Base Defense Communication Plan, Annex E. Use zone time plus ten and one half. Commander Inshore Patrol, 14ND, at Headquarters, Fourteenth Naval District.

G. B. Wooley,

G. B. WOOLEY,

Commander, U. S. N. (Ret)..

Commander Inshore Patrol,

Fourteenth Naval District.

J. W. Bays,

J. W. BAYS,

Aide to Commandant.

Distribution: Same as Basic Plan.

[1] Annex Baker to Commander Naval Base Defense Force Operation Plan No. 1-41 Dated February 27, 1941

C-A16-3/A4-3 (5)/ND14 (0348)

Confidential

BASE DEFENSE AIR FORCE, PATROL WING TWO,
FLEET AIR DETACHMENT, NAVAL AIR STATION,
PEARL HARBOR, T. H. April 9, 1941.

Naval Base Defense Air Force Operation Plan No. A-1-41

TASK ORGANIZATION

(a) *Search and Attack Group* (Commander Naval Base Defense Air Force (Commander Patrol Wing TWO)).

The following units in accordance with current conditions of readiness:

Patrol Squadrons.

Shore-based VO-VS units.

Shore-based carrier VB and VT squadrons.

Shore-based carrier VS planes not assigned to the air combat group.

Shore-based Marine VS and VB squadrons.

Army bombardment squadrons.

Army reconnaissance squadrons.

Navy Utility squadrons.

(b) *Air Combat Group* (Senior VF Squadron Commander).

The following units in accordance with current conditions of readiness:

Shore-based carrier VF squadrons.

Shore-based Marine VF squadrons.

One division of shore-based carrier type VS planes.

1. *Information.*—This plan is made in accordance with: The Joint Air Operations agreement approved and promulgated on 21 March 1941; Joint Estimate covering joint Army and Navy air action, addendum I to this plan; and Pacific fleet confidential letter No. 2CL-41 dated 15 February 1941. An air combat group under the direction of the Commander Hawaiian Air Force will: Intercept and destroy hostile aircraft; Identify and report type of attacking aircraft; Trail attacking carrier type planes to carrier and report location to commander search and attack group; and as a secretary mission support search and attack group upon request.

[2] *Assumptions:* As in Addendum I of this plan. Antiaircraft gun control in the PEARL HARBOR area will be coordinated with operations under this plan. Air traffic lanes and recognition signals will be prescribed as found necessary.

2. This force will locate and destroy hostile forces raiding against OAHU or Fleet Units in the Operating Areas.

3. (a) *Search and Attack Group.* (a) Locate, report, and track all hostile surface units in position to take or threaten hostile action. Destroy hostile ships by air attack. Priority of targets: (1) carriers (2) large supporting ships. If choice of location is presented priority should be given to: (1) carrier involved in attack (2) vessels beyond reach of our surface vessel interception.

(b) *Air Combat Group.* (b) Operate as directed by the Commanding General Hawaiian Air Force.

(x) This plan is effective upon receipt. It is operative without signal in the event of a surprise attack on OAHU. It might be made operative by despatch. In the meanwhile conditions of readiness prescribed in Addendum II will be taken as directed by the Commanding General Hawaiian Department for Army units and by the Naval Base Defense Officer (Commandant Fourteenth Naval District) for Navy units. This plan supersedes and replaces Annex Baker of Naval Base Defense Force Operation Plan No. 1-41 of 27 February 1941. Units assigned to task groups of this plan shall make readiness reports in accordance with Addendum II of this plan.

4. The senior carrier commander based ashore at Fleet Air Detachment, PEARL HARBOR, shall at all times see that one division of VS planes is detailed to the Air Combat Group. When all carrier planes are to embark the Group Commander shall so inform the Commander Second Marine Aircraft Group, who will make the detail required by this paragraph.

5. Communications in accordance with Annex Easy to Naval [3] Base Defense Force Operation Plan No. 1-40 of 27 February 1941. Use zone plus ten and one half time. Operation orders for the search and attack group will be separately distributed.

Addendum I—Joint Estimate.

Addendum II—Aircraft Readiness.

1300 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Addendum I to Naval Base Defense Air Force Operation Plan No. A-1-41.

Joint estimate covering Joint Army and Navy air action in the event of sudden hostile action against OAHU or Fleet Units in the Hawaiian area.

1. *Summary of the Situation.*—(a) Relations between the United States and Orange are strained, uncertain, and varying.

(b) In the past Orange has never preceded hostile actions by a declaration of war.

(c) A successful, sudden raid, against our ships and Naval installations on OAHU might prevent effective offensive action by our forces in the Western Pacific for a long period.

(d) A strong part of our fleet is now constantly at sea in the operating areas organized to take prompt offensive action against any surface or submarine force which initiates hostile action.

(e) It appears possible that Orange submarines and/or an Orange fast raiding force might arrive in Hawaiian waters with no prior warning from our intelligence service.

II. *Survey of Opposing Strengths.*—(a) Orange might send into this area one or more submarines and/or one or more fast raiding forces composed of carriers supported by fast cruisers. For such action she is known to have eight carriers, seven of which are reported to be capable of 25 knots or over and four of which are rated at 30 knots or better. Two of the carriers are converted capital ships, armored and armed with 10-8" guns each and reported to have heavy AA batteries. Two others are small (7000 treaty tons) and limited to 25 knots. Exact information on numbers and characteristics of the aircraft carried by these ships is not available. However the best estimate at present available is that the small carriers can accommodate from 20 to 30 planes and the large ones [2] about 60. Probably the best assumption is that carrier complements are normally about equally divided between fighter and bomber types. Lacking any information as to range and armament of planes we must assume that they are at least the equal of our similar types. There probably exist at least 12 eight inch gun and least 12 six inch gun fast modern cruisers which would be suitable supports. Jane's Fighting Ships (1939) shows over forty submarines which are easily capable of projection into this area. An Orange surface raiding force would be far removed from their base and would almost surely be inferior in gun power to our surface forces operating at sea in the Hawaiian area.

(b) The most difficult situation for us to meet would be when several of the above elements were present and closely coordinated their actions. The shore-based air force available to us is a constantly varying quantity which is being periodically augmented by reinforcements from the mainland and which also varies as fleet units are shifted. Under existing conditions about one-half of the planes present can be maintained in a condition of material readiness for flight. The aircraft at present available in Hawaii are inadequate to maintain, for any extended period, from bases on OAHU, a patrol extensive enough to insure that an air attack from an Orange carrier cannot arrive over OAHU as a complete surprise. The projected outlying bases are not yet in condition to support sustained operations. Patrol planes are of particular value for long range scouting at sea and are the type now available in this area best suited for this work. If present planes are used to bomb well defended ship objectives, the number available for future use will probably be seriously depleted. In view of the continuing need for long range overseas scouting in this area the missions of those planes for operations as contemplated in this estimate should be scouting. Certain aircraft of the Utility Wing, although not designed for combatant work, can be used to advantage in augmenting the scouting of patrol planes. Other types of aircraft, in [3] general, can perform functions that accord with their type.

III. *Possible Enemy Action.*—(a) A declaration of war might be preceded by:

1. A surprise submarine attack on ships in the operating area.

2. A surprise attack on OAHU including ships and installations in Pearl Harbor.

3. A combination of these two.

(b) It appears that the most likely and dangerous form of attack on OAHU would be an air attack. It is believed that at present such an attack would most likely be launched from one or more carriers which would probably approach inside of three hundred miles.

(c) A single attack might or might not indicate the presence of more submarines or more planes awaiting to attack after defending aircraft have been drawn away by the original thrust.

(d) Any single submarine attack might indicate the presence of considerable undiscovered surface force probably composed of fast ships accompanied by a carrier.

(c) In a dawn air attack there is a high probability that it could be delivered as a complete surprise in spite of any patrols we might be using and that it might find us in a condition of readiness under which pursuit would be slow to start, also it might be successful as a diversion to draw attention away from a second attacking force. The major disadvantage would be that we could have all day to find and attack the carrier. A dusk attack would have the advantage that the carrier could use the night for escape and might not be located the next day near enough for us to make a successful air attack. The disadvantage would be that it would spend the day of the attack approaching the islands and might be observed. Under the existing conditions this might not be a serious disadvantage for until an overt act has been committed we probably will take no offensive action and the only thing that would be lost would be complete surprise. Midday attacks have all the disadvantages and none of the advantages of the above. After hostilities have commenced, a night attack would offer certain advantages but as an initial crippling blow a dawn or dusk attack would probably be no more hazardous and would have a better chance for accomplishing a large success. Submarine attacks could be coordinated with any air attack.

IV. *Action open to us:* (a) Run daily patrols as far as possible to seaward through 360 degrees to reduce the probabilities of surface or air surprise. This would be desirable but can only be effectively maintained with present personnel and material for a very short period and as a practicable measure cannot, therefore, be undertaken unless other intelligence indicates that a surface raid is probable within rather narrow time limits.

(b) In the event of any form of surprise attack either on ships in the operating areas or on the islands:

1. Immediate search of all sea areas within reach to determine the location of hostile surface craft and whether or not more than one group is present.

2. Immediate arming and preparation of the maximum possible bombing force and its dispatch for attack when information is available.

(c) In the event of an air attack on OAHU, in addition to (b) above:

1. The immediate despatch of all aircraft suitable for aerial combat to intercept the attackers.

2. The prompt identification of the attackers as either carrier or long range shore based aircraft.

3. The prompt dispatch of fast aircraft to follow carrier type raiders back to their carrier.

[5] (d) In the event of a submarine attack on ships in the operating area in addition to (b) above:

1. Hold pursuit and fighter aircraft in condition of immediate readiness to counter a possible air raid until search proves that none is imminent.

2. Despatch armed shore based fleet aircraft to relieve planes in the air over the attack area.

3. Establish a station patrol by patrol planes two hundred twenty mile radius from scene of attack at one hour before daylight of next succeeding daylight period.

(e) None of the above actions can be initiated by our forces until an attack is known to be imminent or has occurred. On the other hand, when an attack develops time will probably be vital and our actions must start with a minimum of delay. It therefore appears that task forces should be organized now, missions assigned, conditions of readiness defined and detailed plans prepared so that coordinated immediate action can be taken promptly by all elements when one of the visualized emergencies arises. To provide most effectively for the necessary immediate action, the following joint task units will be required:

1. Search Unit.

2. Attack Unit.

3. Air Combat Unit.

Carrier scouts, army reconnaissance and patrol planes can be employed with very widely varying effectiveness, either for search or attack. Under varying conditions some shifts of units between the search and attack groups may be desirable. Also, the accomplishment of these two tasks must be closely coordinated and therefore these two groups should be controlled by the same task group commander.

V. *Decisions:* 1. This force will locate and attack forces initiating hostile actions against OAHU or fleet units in order to prevent or minimize damage to

1302 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

our forces from a surprise attack and to obtain information upon which to base coordinated retaliatory measures.

[6] 2. *Subsidiary decisions.* In order to be in all respects prepared to promptly execute the above decision:

(a) Establish a task organization as follows by the issue of a joint air operation plan:

1. *Search and Attack Group (Commander Naval Base Defense Air Force (Commander Patrol Wing TWO))*

The following units in accordance with current conditions of readiness:

Patrol squadrons.

Shore-based VO-VS units.

Shore-based carrier VB and VT squadrons.

Shore-based carrier VS planes not assigned to the air combat group.

Shore-based Marine VS and VB squadrons.

Army bombardment squadrons.

Army reconnaissance squadrons.

Navy Utility squadrons.

2. *Air Combat Group (Commander Hawaiian Air Force)*

The following units in accordance with current conditions of readiness:

Army pursuit squadrons.

Shore-based carrier VF squadrons.

Shore-based Marine VF squadrons.

One division of shore-based carrier VS planes. (Primarily for trailing aircraft)

(b) Assign missions to the above groups as follows:

1. *Search and Attack Group.* Locate, report and track all hostile, surface units in position to take or threaten hostile action. Destroy hostile ships by air attack. Priority of targets: (1) carriers (2) large supporting ships. If choice of location is presented priority should be given to: (1) carrier involved in attack (2) vessels beyond reach of out surface vessel interception.

2. *Air Combat Group.* Intercept and destroy hostile aircraft. Identify and report type of attacking aircraft. Trail [7] attacking carrier type planes to carrier and report location to commander search and attack group. As a secondary mission support search and attack group upon request.

(c) Provide a means for quickly starting all required action under this plan when:

(a) An air attack occurs on OAHU.

(b) Information is received from any source that indicates an attack is probable.

(c) Information is received that an attack has been made on fleet units.

(d) Define conditions of readiness for use with this plan as follows:

Conditions of readiness shall be prescribed by a combination of a letter and number from the tables below. The letter indicating the part of a unit in a condition of material readiness for its assigned task and the number indicating the degree of readiness prescribed for that part.

Material readiness

A. All assigned operating aircraft available and ready for a task.

B. One-half of all aircraft of each functional type available and ready for a task.

C. Approximately one-quarter of all aircraft of each functional type available and ready for a task.

D. Approximately one-eighth of all aircraft of each functional type available and ready for a task.

E. All aircraft conducting routine operations, none ready for the purpose of this plan.

Degree of readiness

1. For pursuit and VF types—four minutes.

Types other than fighters—fifteen minutes.

2. All types—30 minutes.

3. All types—one hour.

4. All types—two hours.

5. All types—four hours.

The armament and fuel load for each type under the [8] above conditions of readiness are dependent upon the tasks assigned in contributory plans and orders and will be prescribed therein.

(e) Establish a procedure whereby the conditions of readiness to be maintained by each unit is at all times prescribed by the Senior Officers Present of the Army and Navy as a result of all information currently available to them. In using the above conditions it should be noted that: CONDITION A-1 requires a preparation period of reduced operations and can be maintained for only a short time as it is in an all hands condition. CONDITION B-1 and B-2 require watch and watch for all personnel and personnel fitness for air action will decrease rapidly if they are maintained too long. Any Condition 1, 2, or 3 will curtail essential expansion training work. CONDITIONS C, or D, 4 or 5 can be maintained without unduly curtailing normal training work.

(f) In order to perfect fundamental communications by use and to insure that prospective Task Group Commanders at all times know the forces immediately available to them for use, under the plan above, in case of a sudden emergency, provide, for daily dispatch readiness reports as of the end of normal daily flying from all units to their prospective task force commander. These reports to state:

(a) Number of planes in the unit by functional types such as bomber, fighter, etc.

(b) Number of each type in commission for flight and their degree of readiness as defined above.

(g) After the joint air operations plan under subsidiary decision (a) above has been issued, the task group commanders designated therein will prepare detailed contributory plans for their groups to cover the various probable situations requiring quick action in order that the desired immediate action in an emergency can be initiated with no further written orders. To assist in this work the following temporary details will be made:

[9] (a) By Commander Naval Base Defense Air Force (Commander Patrol Wing TWO): an officer experienced in VF and VS operations and planning to assist the Commander of Air Combat Group.

(b) By the Commander Hawaiian Air Force: an officer experienced in Army bombardment and reconnaissance operations and planning to assist the Commander of the Search and Attack Group.

F. L. MARTIN,
Major General, U. S. Army,
Commanding Hawaiian Air Force.

FLEET AIR DETACHMENT, NAVAL AIR STATION,
Pearl Harbor, T. H., April 9, 1941.

ADDENDUM II TO NAVAL BASE DEFENSE AIR FORCE OPERATION PLAN No. A-1-41

CONDITIONS OF READINESS AND READINESS REPORTS

1. Conditions of readiness will be prescribed by a combination of a letter and a number from the tables below. The letter indicating the part of a unit in a condition of material readiness for its assigned task and the number indicating the degree of operational readiness prescribed for that part.

MATERIAL READINESS

- A. All assigned operating aircraft available and ready for a task.
- B. One-half of all aircraft of each functional type available and ready for a task.
- C. Approximately one-quarter of all aircraft of each functional type available and ready for a task.
- D. Approximately one-eighth of all aircraft of each functional type available and ready for a task.
- E. All aircraft conducting routine operations, none ready for the purposes of this plan.

DEGREE OF OPERATIONAL READINESS

All times listed in this table are the maximums allowed for the first plane of a unit to be in the air armed and proceeding with the assigned task.

1. For pursuit and VF types—four minutes. Types other than fighters—fifteen minutes.
2. All types—30 minutes.
3. All types—one hour.
4. All types—two hours.
5. All types—four hours.
2. The armament and fuel load for each type under the above conditions of readiness are dependent upon the task assigned in contributory plans and orders and will be prescribed in these.
3. *Readiness Reports:*
 - (a) A despatch readiness report, as of 1500 each day shall be made by each unit assigned to a task group by this plan as follows:
 - (1) Units of "Search and Attack Group" to the Commander Naval Base Defense Air Force (Commander Patrol Wing TWO).
 - (2) Units of the "Air Combat Group" to the Commanding General of the Hawaiian Air Force via Commander Naval Base Defense Air Force.
 - (b) These reports shall state:
 - (1) The number of operating planes in the unit by functional types as bomber, fighter, etc.
 - (2) The number of each type in material readiness for flight and their degree of operational readiness as defined above.
 - (c) The officer detailing VS planes to the Air Combat Unit (paragraph 4 of N. B. D. A. F. plan No. A-1-41) shall inform the Commander Naval Base Defense Air Force and Commanding General Hawaiian Air Force by despatch of the detail and any changes therein.

OPERATION PLAN No. 1-41, ANNEX "C"

ANTIAIRCRAFT DEFENSES

Task organizations

- (a) *Group One:* All ships in PEARL HARBOR assigned by Pacific Fleet Confidential Letter No. 2CL-41 to Sector I.
- (b) *Group Two:* Those so assigned to Sector II.
- (c) *Group Three:* Those so assigned to Sector III.
- (d) *Group Four:* Those so assigned to Sector IV.
- (e) *Group Five:* All antiaircraft units of Defense Battalions of the Marine Corps present.
- 1. *Information:* See Pacific Fleet Confidential Letter No. 2CL-41, Fourteenth Naval District Operation Plan 1-41 and OCABF-38. Information on special situations as they arise will be furnished to all units in accordance with the Communication Plan, Annex "E".
- 2. All naval forces of the Fourteenth Naval District and those of the U. S. Fleet in insular waters will support the Army antiaircraft defense of OAHU:
 - (1) by gun fire, (2) by antiaircraft watches, and (3) by furnishing RADAR service when available.

3. (a) *Groups One to Four, inclusive:* Assume defense missions and defense conditions in accordance with the provisions of Pacific Fleet Confidential Letter No. 2CL-41.

(b) *Group Five:* Report to Commanding General, Provisional Antiaircraft Brigade for tactical assignment. Conform to conditions of readiness prescribed for that brigade.

4. *Logistics: Group Five:* Classes 1, 2 and 3 Supplies—normal. Ammunition, except for infantry weapons, to be furnished by COM 14.

5. *Group Five: Command Post:* To be announced later.

H. K. PICKETT,
Colonel, U. S. Marine Corps,
District Marine Officer.

Approved:

C. C. BLOCH,
Rear Admiral, U. S. Navy,
Commander Naval Base Defense Force,
Commandant, 14th Naval District).

HEADQUARTERS, NAVAL BASE DEFENSE FORCE

FOURTEENTH NAVAL DISTRICT

OPERATION PLAN No. 1-41, ANNEX "D"

PEARL HARBOR, T. H.,
5 March 1941.

TASK ORGANIZATION

(a) Harbor Control Post. District Operations Officer.

1. *Information.* As in basic plan No. 1-41. The Harbor Control Post has been established in the Operations Office, Fourteenth Naval District, in a modified form. The Army has provided telephone connections to the various Army circuits listed herein, and will maintain a suitable watch at their various stations; the Hawaiian Separate Coast Artillery Brigade will endeavor to provide the Harbor Control Post with a teletype connecting into the HSCAB loop, and operator for same. Army officer personnel and secretaries for the Harbor Control Post will be provided from available personnel from HSCAB as needed. Army observation (lookout) stations around the island of OAHU will be manned as required and Army defense units will be placed in the condition of "alert" considered necessary. The water area under the cognizance of the Harbor Control Post embraces the OAHU Defensive Coastal Area, with particular interest in the area south of OAHU, and will be known as the Control Post Area.

2. This Harbor Control post will train personnel and operates in a modified form in accordance with OpNav serial 041230 in the establishment of security measures as necessary for the joint protection of PEARL HARBOR Base in order to safeguard the Fleet.

3. (a) *Harbor Control Post.* (1) In conjunction and cooperation with the Army and Navy units listed below, man as necessary and operate the following direct telephone connections:

Harbor Control Post to

- Hqtrs. Haw'n Dept., FT. SHAFTER
- Hqtrs. HSCAB, FT. DERUSSY
- Command Post, FT. KAMEHAMEHA
- Command Post, HICKAM FIELD
- Commander Patrol Wing TWO
- SOPE (if at dock)
- Navy Yard Signal Tower
- Navy Yard Power House

(2) In conjunction with Army and Navy reporting, communication, and intelligence agencies be prepared to "alert" Army and Navy forces against aircraft, or other surprise attack, and assist in coordinating their defense measures. Direct Yard Power [2] House when to sound air raid and blackout alarms and the secure signal.

1306 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(3) Report promptly any action taken to immediate Superiors in Command, Army and Navy, and keep them advised of all known developments.

(4) In conjunction with Commander Inshore Patrol, Captain of the Yard, and District Public Works Officer keep the Army Harbor Defenses informed of authorized ship movements within the Control Post Area.

(x) (1) All personnel of Harbor Control Post will become familiar with the Communication Plan, Annex "E", and be prepared to direct Power House as to signal to be used (See paragraph 6000, *Special Signals*.)

(2) Obtain from Commander Inshore Patrol the day-by-day list of Patrol and mine sweeping vessels under his command. Maintain up to date data on Army-Navy defenses and Conditions of Readiness.

(3) This annex will be revised from time to time as operating experience is gained, facilities are increased, and conditions change.

4. (1) Telephone switchboard watch standers will be provided from the enlisted personnel of the Organized Reserves on active duty. Until such time as watch standers are available to the Operations Officer, the necessary officer watch standing duties after working hours, will be carried out by the District and Navy Yard Duty Officer.

(2) The following Conditions of Readiness are prescribed for the Harbor Control Post:

Condition I Post fully manned and ready to operate in all respects.

Condition II Post manned by Army and Navy watch officers, telephone and teletype operators on watch.

NOTE: Conditions I and II are "Alert" conditions.

Condition III Normal condition. Telephone operator on watch. District and Yard Duty Officer on call.

[3] 5. (1) The Harbor Control Post may be called on any of the telephones listed in paragraph 3. (a) (1). The District Operations Officer may be reached over these telephones during working hours, and over dial phones 411 and 508; after working hours on Honolulu 75148.

(2) Use zone plus ten and one half time.

(3) District Operations Officer at Harbor Control Post (District Operations Office), headquarters, Fourteenth Naval District.

H. B. Knowles
H. B. KNOWLES,
Commander, U. S. Navy,
District Operations Officer.

Approved:

C. C. Block,
C. C. BLOCH,

Naval Base Defense Officer,

(Commandant, Fourteenth Naval District)

Distribution:

In accordance with Distribution List of Operating Plan No. 1-41

[1] ANNEX EASY TO OPERATION PLAN NO. 1-41 (MODIFICATION NO. 1)

Communication Plan—July 19, 1941

This plan supersedes Annex Easy to Operation Plan No. 1-41.

1100 *General.*

In order that Commandant, Fourteenth Naval District, may coordinate the defense, it is necessary that he have a means for instantly communicating with every vessel and shore activity of the district and with responsible senior officers present in Pearl Harbor.

1111 The Hawaiian Separate Coast Artillery Brigade maintains an Army Anti-aircraft information Service centered at A. A. A. Brigade Headquarters, Fort Shafter, which broadcasts information of enemy aircraft by voice on 900 kc. This information is also vital to all activities including Fleet units present in Pearl Harbor. In order to simplify communications and avoid multiplicity of circuits, Commandant, Fourteenth Naval District (NBDO), will establish a Fox

series on 900 kc. using radio telegraph with a modulated CW Transmitter. These transmissions can be copied on an ordinary broadcast receiver which even small vessels should be able to provide. For the present only the SOPE and Sector commanders are required to guard this frequency. All other vessels should guard this frequency is practicable, especially those having anti-aircraft batteries.

1112 The destroyer patrol will use the Joint Army and Navy Inshore Patrol frequency of 2550 kc. The commander of the Pearl Harbor Groupment probably will have a radio station on this circuit which will normally receive only.

1113 Information of hostile or potentially hostile forces acquired by Fleet forces in operating areas must be reported to Commandant, Fourteenth Naval District (NBDO), promptly. This can most easily be done on the Ship-Shore frequency (355 kc).

1120 This modification effective upon receipt.

1130 USE ZONE PLUS 10 and ½ TIMES.

[2] 1150 *RADIO SILENCE*.

There will be no restriction upon the use of circuits set up herein, prior to an ALERT, except in care of an emergency. During an ALERT or an emergency, radio silence will be maintained except for contact reports, amplifying reports and tactical orders, instructions or reports.

1170 *CONTACT REPORTS* made by units under this command will be addressed to Commandant, Fourteenth Naval District (NBDC), call sign W2X. Fleet units operating outside Pearl Harbor will include Commandant, Fourteenth Naval District (NBDC), as an information addressee. Evaluated information will be placed on Army and Navy Joint teletype or wire loops, and if desirable on Local Fox method circuit. All contact reports concerning hostile aircraft or carriers within 250 miles of Oahu will be made in plain language. Contact reports of enemy surface or submarine forces within 50 miles of Oahu will be made in abbreviated plain language. (See USF 70, Article 1178).

1180 Visual signalling by day will be by searchlight, Flag Hoist or Semaphore. At night use blinker tube if practicable. Ships should refrain from using searchlights at night except in emergencies. Visual signalling prohibited during blackout.

2430 *AUTHENTICATORS* will be used when challenge is made by receiving station. All contact reports will be challenged. Units directly under Commandant, Fourteenth Naval District (NBDC), including Destroyer Patrol will use SOI No. 27-7 (Joint) of December 16, 1940. Fleet units should use these grids when communicating with shore radio stations of Army and Navy. Copies of SOI 27-7 (Joint) herewith.

2500 *RADIO CALL SIGNS*.

Units operating directly under command of Commandant, Fourteenth Naval District (NBDC), will use call signs provided in Signal Operating Instruction (SOI No. 43-8 (Joint)) effective April 1, 1940. Same call will be used for Visual and Radio. Copies of SOI No. 43-8 (Joint) herewith.

DESTROYER-PATROL

Inner DD Patrol.....	N5F
(Inshore Patrol Station #1)	
Outer DD Patrol.....	J5Y
(Inshore Patrol Station #2)	

The following calls from SOI No. 43-8 are assigned. All stations enter under NAVY on Page 5.

[3] ALL SWEEPERS.....	V5Z
Sweeper No. 1 (magnetic).....	V1Y
Sweeper No. 2 (Anchored).....	V7P
Sweeper No. 3 (Anchored).....	K2Q

5000 *DESTROYER PATROL*

(a) When patrol is on station, patrol commander report assumption of patrol to Commandant, Fourteenth Naval District (NBDC), information to patrol being relieved. Relieved unit will then secure on patrol frequency.

(b) Guard effective Fox schedules when so ordered. Normally, Vallupeguards Fox schedules for destroyer patrol.

(c) Destroyer patrol will use CSP-1023 and CSP-1024.

6600 *CRYPTOGRAPHIC AIDS*

1308 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

The following cryptographic aids are authorized for Joint Army and Navy use:

For Use Among—	Contact Code	Aircraft Code	General Cipher	D/F Code
All stations less aircraft.....	CSP 680 CSP 696 CSP 697	----- ----- -----	CSP 642 CSP 645 *CSP 732 *CSP 733	USF 64
Aircraft (plus air-ground communications).....	CSP 680 CSP 696 CSP 697	USF 66 -----	-----	USF 66

*Army Short Title—"SIG NOG".

NOTE: By special arrangement, Busdefairfor and Hawaiian Air Force are authorized to use CSP-740 when operating jointly.

7000 HARBOR PATROL.

Very pistol signals will be employed by Harbor Patrol (Motor Boats) as follows:

- (1) General Alarm----- One White Star (may be repeated at intervals)
- [4] (2) Require Assistance-----Two White Stars (repeated at intervals until certain it has been observed)
- (3) All Clear----- One White Star Followed by Two White Stars Simultaneously.

8000 SPECIAL SIGNALS.

(1) AIR RAID ALARMS

SIGNAL	MEANING
(a) <i>Yard Whistle</i> 1 long blast 30 sec Interval 25 sec 1 Short Blast 5 sec	PREPARE for Air Raid—If at night— BLACK OUT (See Blackout procedure 14th ND Order No. 20-40)

This signal to be repeated by one ship in each sector (PACFLT Conf. letter 20L-41) as designated by Sector Commander.

(b) STREET LIGHTS (at night)

- (1) Flashed 3 times PREPARE for Air Raid
(Simultaneous with start of whistle signal)
- (2) Remain dark 5 sec BLACKOUT
- (3) Lighted for 10 sec
- (4) Extinguished

(c) SIGNAL TOWER

Appropriate Emergency hoist (day only) Be prepared for attack by enemy aircraft

RADIO CIRCUITS

Transmit on 900 and 355 kc in plain English Urgent Precedence "AIR RAID" (number and type of planes will be given if possible)

[5] (d) TELEPHONE

Yard duty officer:

- Notify FAD Lualualoi—phone 954
- Notify Radio Lualualoi—phone 976
- Notify Old Naval Station—phone 449

(2) **ALL CLEAR SIGNALS**

SIGNAL	MEANING
(a) <i>Yard Whistle</i> 3 long blasts	All clear
(b) <i>Street Lights</i> Turned on as first long whistle blast is sounded	All clear
(c) <i>Signal Tower</i> Same signal as (1) (c) under negative	All clear
(d) <i>Radio Circuits</i> The all clear signals will be followed by a despatch on all circuits "All Clear". CAUTION: Radio despatch must not be relied upon unless confirmed by other methods.	
8000 DRILLS	
(a) When drills are held they will be preceded by a despatch "Prepare for air raid drill".	
(b) All despatches and orders in conduct of drills will be preceded by word "drill".	
(c) The all clear signal terminating the drill will be followed by despatch "Air Raid Drill Completed".	
This messages will be transmitted on all air raid circuits.	
(d) CAUTION .—Radio despatch terminating drill or actual raid must not be relied upon unless confirmed by other methods.	

(At this point in Exhibit No. 53 there appears a Radio Frequency Plan for the Fourteenth Naval District, which will be found reproduced as Item No. 13, EXHIBITS-ILLUSTRATIONS, Navy Court of Inquiry. These illustrations are bound together following the printed exhibits of the Navy Court of Inquiry.)

1. VERIFICATION CODE.

a. All radio stations receiving messages from another radio station must be prepared to challenge or obtain verification as to the authenticity of the transmitting station.

b. Inasmuch as the present verification system becomes unsafe after a few challenges and replies have been intercepted it is necessary to restrict the use of this grid system to challenges when in an emergency situation the station receiving a message, for some reason actually suspects the authenticity of the transmitting station. The verification system should be used in training exercises but not more than once in 24 hours by each station.

c. The transmission of ZWA in joint Army Navy Radio Operations during an actual emergency will be challenged.

1310 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

d. The method of verification is as follows: Two letters, not on the same line or column, will be selected at random from the daily grid by the receiving station and sent as a challenge. The original transmitting station will take the other two letters which complete the rectangle, the first letter being on the same line as the first letter of the challenge, and reply to the challenge. *EXAMPLE*:—AB receives a message from EF on the first day of the month. If the message has been received without error but AB for some reasons suspects the authenticity of the station AB will select a group at random from the first day grid such as DY. AB will then transmit "R II DY II K". If EF is the authentic station the available grid will disclose that or complete the diagonal, EF will therefore reply "OV VA". If AB transmits: "R II YD II K" the reply on the date in question would be: "VO VA".

2. VERIFICATION GRIDS:

a. The following grids are effective each month of the year at 0001 for the date specified;

1ST	2ND	3RD	4TH	5TH

b. Only such grids will be furnished as are necessary for a single flight or mission.

By order of Rear Admiral BLOCH and Lieutenant General HERRON:

J. W. LEWIS,
Captain, U. S. N.
Chief of Staff.

PHILIP HAYES,
Colonel, General Staff Corps,
Chief of Staff.

Checked by:

W. E. Gultar,
W. E. GUITAR,
Lt. Comdr., U. S. N.

OFFICIAL:

R. C. THROCKMORTON,
Lt. Col., General Staff Corps,
Assistant Chief of Staff, G-3.

Subject: Anti-torpedo baffles for protection against torpedo plane attacks.

1. In previous correspondence the Commandants and local Joint Planning Committees have been requested, where considered necessary, to submit recommendations concerning the employment of nets and booms in their defenses. In nearly all cases the recommendations received were limited to harbor entrances. One of the reasons for this was that the Department, after previously making studies of many harbors, submitted certain proposals for consideration by the Districts, but did not specifically propose any protection against torpedo plane attacks.

2. The Commandants and Local Joint Planning Committees are requested, if they have not already done so, to consider the employment of and to make recommendations concerning anti-torpedo baffles especially for the protection of large and valuable units of the fleet in their respective harbors, and especially at the major fleet bases.

3. In considering the use of A/T baffles, the following limitations, among others, may be borne in mind :

(a) A minimum depth of water of seventy-five feet may be assumed necessary to successfully drop torpedoes from planes. About two hundred yards of torpedo run is necessary before the exploding device is armed, but this may be altered.

(b) There should be ample maneuvering room available for vessels approaching and leaving berths.

(c) Ships should be able to get away on short notice.

(d) Room must be available inside the baffles for tugs fuel oil barges and harbor craft to maneuver alongside individual ships.

(e) Baffles should be clear of cable areas, ferry routes, and channels used by shipping.

(f) Baffles should be sufficient distance from anchored vessels to insure the vessels safety in case a torpedo explodes on striking a baffle.

(g) High land in the vicinity of an anchorage makes a successful airplane attack from the land side most difficult.

(h) Vulnerable areas in the baffles should be so placed as to compel attacking planes to come within effective range of anti-aircraft batteries before they can range their torpedoes.

(i) Availability of shore and ship anti-aircraft protection balloon barrages, and aircraft protection.

(j) Availability of naturally well protected anchorages within a harbor from torpedo plane attack for a number of large ships. Where a large force such as a fleet is based, the installation of satisfactory baffles will be difficult because of congestion.

R. E. INGERSOLL,
Acting.

Subject: Anti-torpedo baffles for protection against torpedo plane attacks.

Reference: (a) CNO conf. ltr. Op-30C1 Serial 010230 of Feb. 17, 1941.

1. In reference (a) the Commandants were requested to consider the employment of and to make recommendations concerning anti-torpedo baffles especially for the protection of large and valuable units of the fleet in their respective harbors and especially at the major fleet bases. In paragraph 3 were itemized certain limitations to consider in the use of A/T baffles among which the following was stated:

"A minimum depth of water of 75 feet may be assumed necessary to successfully drop torpedoes from planes. About two hundred yards of torpedo run is necessary before the exploding device is armed, but this may be altered."

2. Recent developments have shown that United States and British torpedoes may be dropped from planes at heights of as much as three hundred feet, and in some cases make initial dives of considerably less than 75 feet, and make excellent runs. Hence, it may be stated that it can not be assumed that any capital ship or other valuable vessel is safe when at anchor from this type of attack if surrounded by water at a sufficient distance to permit an attack to be developed and a sufficient run to arm the torpedo.

Certified to be a true copy of file copy in Cincpac.

H. E. Rorman,
Ensign H. E. RORMAN, USN.
Secret Mail Officer.

3. While no minimum depth of water in which naval vessels may be anchored can arbitrarily be assumed as providing safety from torpedo plane attack, it may be assumed that depth of water will be one of the factors considered by any attacking force, and an attack launched in relatively deep water (10 fathoms or more) is much more likely.

4. As a matter of information the torpedoes launched by the British at Taranto were, in general, in thirteen to fifteen fathoms of water, although several torpedoes may have been launched in eleven or twelve fathoms.

R. E. INGERSOLL.

CONFIDENTIAL

OP30C-MD-2/7/41

(SC)N20-12

Serial 07830

FEB. 11, 1941.

From: The Chief of Naval Operations

To: The Chief of the Bureau of Ordnance

Subj: Experimental and Development Work on Nets and Booms

Ref: ALUSNA London Dispatch 041625 of February 5, 1941

1. Ref. (a) requested information concerning all promising experimental and development work on nets and booms done by the U. S. Navy since March 1940.

2. As far as this Office is aware, no such work has been done other than the making of minor modifications to the Admiralty designs. It is considered that experimental and development work should be undertaken. If necessary, additional personnel for this purpose should be secured.

3. There appears an urgent need for an anti-torpedo net which can be laid and removed in certain harbors in a short time for temporary use, and which will give good if not perfect protection from torpedoes fired from planes. The present Admiralty type net is designed to withstand torpedoes armed with cutters, and its appurtenances are very heavy. A lighter net which will stop a torpedo not armed with cutters would furnish some protection, especially against torpedoes which would explode on contact with a metal net.

4. Effort should be made to reduce the weights of the present Admiralty nets and booms and their appurtenances without reducing their efficiency in order that they may be more readily handled. As a beginning, it is also suggested that plans be made to test sections of the old A/S net and of the new, as well as indicator nets, by attacking submarines. While such tests may duplicate British experiments, valuable lessons may be learned. It is requested that this Office be kept informed of development work and all tests and experiments conducted with nets and booms.

/s/ H. R. STARK.

FORTNIGHTLY SUMMARY OF CURRENT NATIONAL SITUATIONS

(Information concerning Anti-Axis Belligerents is omitted from this publication due to its wide dissemination by mail.)

Because of the CONFIDENTIAL nature of the sources from which some of the information embodied in the text of this publication issues, and because of the CONFIDENTIAL channels through which it is transmitted to the Division of Naval Intelligence, it is appropriate to invite particular attention to the CONFIDENTIAL character of this publication.

T. S. Wilkinson,
T. S. WILKINSON,
Captain, U. S. Navy,
Director of Naval Intelligence.

[1] *Confidential*Serial No. 25.
December 1, 1941

FORTNIGHTLY SUMMARY OF CURRENT NATIONAL SITUATIONS

A. *The Diplomatic Situation*1. *Japan.*

Unless the Japanese request continuance of the conversations, the Japanese-American negotiations have virtually broken down. The Japanese Government and press are proclaiming loudly that the nation must carry on resolutely the work of building the Greater East Asia Co-prosperity Sphere. The press also is criticising Thailand severely. Strong indications point to an early Japanese advance against Thailand.

Relations between Japan and Russia remained strained. Japan signed a five-year extension of the anti-comintern pact with Germany and other Axis nations on November 25.

2. *Germany.*

Members of the German Armament Commission in Casablanca are now authorized to wear uniforms and make arrests. General Schultheiss of the Air Force. Head of the Commission, is reported to favor a German military occupation of Morocco.

There is evidence that Germany, now virtually in control of the governments of Spain and Portugal, has impressed upon these governments the necessity of maintaining friendly relations with the United States and with Britain. It is Germany's expectation that such a policy will increase the resources of these two countries with materials which eventually can be turned against those who have supplied them.

Turkey still is being subjected to diplomatic pressure to join the Axis or "take the consequences." Germany's representations have had no apparent effect.

According to a press report from Berlin, seven more nations have signed the anti-comintern pact. The new signatories are Finland, Denmark, Bulgaria, Croatia, Slovakia, Rumania, and the Nanking Government in China. This pact should not be confused with the Tri-Power Accord of which Germany, Japan and Italy were the original signatories and to which Rumania, Hungary, Bulgaria and Yugoslavia subsequently adhered.

[2] 3. *Italy.*

The repurchase of war materiel sold to Italy by the French is now the subject of conversations being held by a French delegation which arrived recently in Rome. These conversations were initiated by Italy and were based on Italy's urgent need for foreign exchange. These negotiations are not expected to meet with particular success.

The visit of the German Minister of Economics (Dr. Funk) to Rome on October apparently was motivated by the serious concern felt by Germany over the steady climb in Italian prices of exports to Germany. Dr. Funk threatened to raise the price of coal shipments to Italy, but it was agreed finally that Italy would not raise prices, and that Germany would increase the yearly exports of coal to Italy from the twelve million tons previously agreed upon to eighteen million tons. Previous shipments of coal from Germany barely reached two-thirds of the Italian national requirements. This was demonstrated by the recent laws restricting heating this winter.

4. *France.*

France moved a step closer to the "new order" in Europe on November 18 when Marshal Petain, under continued pressure from Berlin and the pro-collaborationist elements within the Vichy government, announced the "retirement" of General Maxime Weygand as delegate-general and military commander of French North Africa. That strategic area henceforth is to be administered from Vichy under the direct control of Vice Premier Darlan. Lieutenant General Alfonse Juin, until June of this year a prisoner of war of Germany and later commander of French troops in Morocco, succeeds Weygand as military commander in North Africa. The military command of French West Africa goes to General Jean Barrau, formerly in command of troops at Dakar. Vice Admiral Fenard was named permanent Secretary General of French Africa, and Yves Chatel is the new Governor General of Algeria. Additional concessions to the Germans may be announced following the meeting of Petain and Darlan with Reichsmarshal Goering which is scheduled for the near future. There are indications that this meeting may be followed by a conference with Adolph Hitler, with the possible attendance of Premier Mussolini.

[3] The Reich is said to be attempting to persuade Vichy to provide naval convoys for Italian supply vessels and to have requested that French Army divisions replace Nazi troops between Nantes and Irun. Germany meanwhile, is reported to have cut the occupation cost levied against France from \$8,000,000 to \$6,000,000 a day, retroactive to May 10, 1941.

France's concern over the situation in Africa is manifested by the sudden departure from Vichy of Admiral Platon (Minister of Colonies), General Bergeret (Air Secretary) and Admiral Auphan (Chief of the Naval General Staff) to inspect the defenses of North and West Africa. During the absence of Platon and Bergeret, Admiral Darlan will act as Interim Secretary of Colonies and Air. Additional powers have been granted Darlan by placing under his National Defense Ministry all services under the Franco-German armistice formerly administered by the War and Foreign Ministries.

Following the dismissal of General Weygand, the United States Department of State announced that trade with North Africa would be suspended and that Franco-American relations were to be studied in the light of the new developments. At the same time American lend-lease aid was extended to the Free French of General Charles de Gaulle.

On November 26, General Catroux (Free French Commander in Syria) proclaimed the independence of Lebanon and the termination of the mandate in the name of France. The new government will be headed by President Alfred Macache.

France is understood to have protested to the Japanese government over the size of the mission, numbering 350 political and economic experts, accompanying Kenkichi Yoshizawa, new Japanese Ambassador to French Indo-China.

Despite rumors of capitulation, the situation in French Somaliland remains unchanged. The Paris radio announced on November 21 that the colony could not hold out longer than four to six weeks under the continued British blockade.

[4] 5. *Latin America.*

Mexico.

President Roosevelt has nominated the present Ambassador to Cuba, George S. Messersmith, to succeed Josephus Daniels as Ambassador to Mexico. The new British Ambassador to Mexico, Charles Bateman, is expected to arrive in mid-December, which is about the same time that Messersmith probably will take up his new duties.

The State Department announced an agreement has been reached with Mexico providing: (1) The settling of a final fair price for American properties taken over in 1933, through experts or through further diplomatic negotiations. Mexico tendered \$9,000,000 in advance as a token payment. (2) General and agrarian claims comprised, Mexico to pay \$40,000,000 in full settlement. Mexico has already paid \$3,000,000 on these claims and will pay \$3,000,000 upon exchange of ratifications of the conventions covering them. The remaining \$34,000,000 is payable at the rate of \$2,500,000 annually. (3) A reciprocal trade agreement to be negotiated at once. (4) The United States will provide a \$40,000,000 stabilization fund to maintain the peso at its present rate. (5) The United States will purchase up to 6,000,000 ounces of newly-mined Mexican silver monthly.

The Export-Import Bank has established a \$30,000,000 credit for the development of roads and highways. The credit will be available in yearly increments up to \$10,000,000 over a three year period. The Mexican Government guarantees payment unconditionally; and additional security is provided, in the form of highway bonds, payable from the Federal gasoline tax.

Costa Rica.

President Calderon has repeated his offer of landing fields, air and naval bases to the United States, as free measures of hemispheric defense.

El Salvador.

Pro-Axis Chief of Police Colonel Merino has been replaced by pro-Ally Colonel Monterrosa.

Little progress is noted in the new government of Panama towards consolidation of its gains. The second designate to the presidency is named Minister to Washington; the third designate, Anibal Rios, is in Colombia, and will be arrested if he returns to Panama, where a number of his supporters have been jailed. Key positions still are occupied by Ariaristas, although there is a cordial disposition to cooperate with the United States. The extreme nationalistic laws passed by Arias are not repealed, but already their application is lapsing. The government is unlikely to do anything that will frighten off U. S. tourist or business dollars.

Argentina.

There are many indications that a secret understanding as to the joint defense of the Straits of Magellan has been established between Argentina and Chile. The recent death of the President of Chile probably will reopen discussions on defense in that area. There have been expressions of annoyance on the part of high Argentine officials over staff discussions between the United States and countries adjacent to the Argentine, and over the U. S. lend-lease aid promised to Paraguay, Uruguay and Brazil. The view is held that the Argentine is an interested party to all such discussions and dispositions.

A new political party, of Fascist character, called *Patria* has been launched in Buenos Aires by the pro-Axis Manuel Fresco. Observers note a new student's party, or "Young Argentine" party, in process of formation. It is a coalition of radical nationalist groups.

German influence in the Argentine is very low, the Russian war having alienated many former supporters. There is demand for a more vigorous attitude toward the Axis than that exhibited by Vice-President Castillo, and an intensification of the Taborda Committee activities may be expected.

While there are no immediate signs of trouble in the Argentine, the next few weeks will be critical. The conscripts are finishing their military service and returning home. Justo, always a dubious factor in [6] politics, seems firmly in control of the Army. In the Senate, the nationalists and the Democratic factions have reached an impasse. A coalition of nationalist—or totalitarian—factions, under a strong leader, probably would mean the overthrow of the present government.

Brazil.

During the period under review there have been some alarming reports from various sources in Brazil, forecasting trouble between Vargas and the explosive elements in his government. To date, however, nothing serious has occurred. Brazil is meeting, with some hesitation, her commitments in hemisphere defense, and cooperating in the movement of U. S. troops to *Surinam* by sending a military mission to *Paramaribo*, and strengthening her border forces in that area. Currently, General Goes is denouncing U. S. aims as imperialistic in South America, and his good faith in staff discussions should be accepted with grave reservations.

Chile.

The sudden death of President Aguirre Corda, from a bronchial affection, has caused considerable unrest in Chile, and responsive uneasiness in that country's neighbors. Don Tinto as he was affectionately called, because of the red wine for which his vineyards were famous, headed the only popular front government, but was generally regarded as a friend to Democracy. He has preserved for some years an uneasy equilibrium between highly antagonistic and immoderate factions. His successor pro tempore is a noted conciliator. Most observers believe that the government will remain stable during the sixty-day period before the election of a new President.

Colombia.

The Colombian Senate has rejected the U. S. Black List of Axis firms in the Western Hemisphere, on the grounds that, in a matter of such mutual interest to the American Republics, all their governments should have been consulted.

The Colombia press condemns articles on the country by Benjamin Welles and John Gunther, terming them "Ambassadors of Ill-Will." It is not realized [7] in the United States to what a high degree the Latin-American press is sensitive to criticism of national custom and usage. The sum total of U. S. literary comment on the Latin Americas is undoubtedly harmful to Pan American accord.

Bolivia.

A U. S. Army Air Mission has been established in *La Paz*.

Ecuador.

The notorious and able Dr. Kuhne, suspected Nazi-agent in Quito, has been banished to a small town on the Ecuador-Colombian border, because of attention focused on him by the writer John G. Gunther.

Peru.

Early in the period observers in Peru reported widespread popular resentment over Peru's failure to receive certain airplanes and material, embargoed by the U. S. Department of State pending settlement of the Ecuador-Peru border dispute. Concessions have been made in the procurement of non-combatant types, and the excitement is subsiding. Affairs on the border are quiescent.

In Lima, the Aprista Party announces the possibility of the resignation of President Prado, because of popular dissatisfaction with the border situation.

General Ureta, the hero of the Ecuadorean war, is a strong Presidential possibility, but he is said to have no desire to gain the office by unconstitutional means. Ureta is pro-U. S. and anti-Axis.

General.

The ABC countries at large are showing signs of disillusionment and exhausted patience in the matter of lend-lease material. Much has been promised; almost literally nothing has been sent. Some deliveries, even token deliveries, would have a happy effect at this time.

[8] *Trends.*

Military and Naval.

Mexico.—The naval budget for 1942 has been set at \$5,000,000 pesos, or about \$8,000,000. This is twice the 1941 budget.

South America.—Nothing to add to summary of November 15.

Economic.

The period under review has been characterized by numerous complaints in the press of the American Republics, and in reports from various local sources, over the growing dearth of materials essential to the support of industries. Deprived of European export markets, the American Republics look to the United States for a variety of heavy materials, neither produced nor manufactured south of the Rio Grande. Immediate obstacles are: The matter of priorities, and the availability of shipping. Here, as in the lend-lease military and naval material, the patience of the Latin-Americans is about exhausted, and their confidence in U. S. good faith is deteriorating. Few Latin Americans appreciate the magnitude now of the demands upon U. S. industry. Aids to Britain, to Russia, and to China, and confusion in U. S. production, are widely advertised. Opponents to U. S. and to Pan American policies are alert to take advantage of current circumstances. As a measure for the future, no less than for immediate benefit, the allotment to Latin American trade of certain priorities, however limited, and of shipping, appears urgently desirable.

[9] *B. The Japanese Military Situation*

Japanese troops, supplies and equipment were pouring into Indo-China during the past fifteen days. Units landed at Haiphong were sent south by rail to Saigon. Troops were moved quickly through Saigon towards the interior and the Thailand border. The arrival of reinforcements continues. Japanese army strength now in Indo-China is believed to be about 25,000 in Tongking province, and between 70,000 and 100,000 in south Indo-China.

Naval craft and aircraft also moved south. It is estimated that there are about 200 Japanese planes in Indo-China and roughly the same number on Hainan Island.

C. The Japanese Naval Situation

Deployment of naval forces to the southward has indicated clearly that extensive preparations are underway for hostilities. At the same time troop transports and freighters are pouring continually down from Japan and northern China coast ports headed south, apparently for French Indo-China and Formosan ports. Present movements to the south appear to be carried out by small individual units, but the organization of an extensive task force, now definitely indicated, will probably take sharper form in the next few days. To date this task force, under the command of the Commander in Chief Second Fleet, appears to be subdivided into two major task groups, one gradually concentrating off the Southeast Asiatic coast, the other in the Mandates. Each constitutes a strong striking force of heavy and light cruisers, units of the Combined Air Force, destroyer and submarine squadrons. Although one division of battleships also may be assigned, the major capital ship strength remains in home waters, as well as the greatest portion of the carriers.

The equipment being carried south is a vast assortment, including landing boats in considerable numbers. Activity in the Mandates, under naval control, consists not only of large reinforcements of personnel, aircraft, munitions but also of construction material with yard workmen, engineers, etc.

D. The Chinese Military Situation

The Chinese are concentrating troops to defend the Burma Road. In position, or moving up for this duty, are about 185,000 men, including China's only mechanized units. Skirmishing was reported during the period in north Honan, south Hopei, Shantung, south Anhwei, near Shanghai and near Canton.

[10] *E. The German Military, Naval and Air Situations*1. *Military.**Strength.*

It has been estimated that Germany now may have 300 divisions. Of these, 28 divisions are unidentified. Of the identified divisions 72 are probably unfitted and not yet ready for field duty. This would leave 200 divisions ready for active service at the present time.

Distribution.

The 272 identified divisions are distributed as follows:

<i>Location.</i>	<i>Number of Divisions</i>	
Russian Front.....	Total 168	(including 20 motorized, 19 armored, 2 cavalry, and 2 mountain divs.)
Northern Group.....	31	
Central Group.....	86	
Southern Group.....	51	
Italy and Libya.....	3	(including 2 armored)
Balkans and Hungary.....	14	(including 1 mountain)
Poland and East Prussia.....	10	
Finland	7	(including 1 motorized and 3 mountain)
Germany and Austria.....	33	
Holland, Belgium and France.....	27	
Norway	8	
Denmark	2	

Operations.

(Note: Eastern Front only; see ITALY for Libyan Campaign.)

[11] Following the freezing of the ground, German offensive operations have been resumed.

Finnish Sector.—There is evidence of renewed pressure towards Murmansk, Kandalaksha and the White Sea. None of these objectives has been reached to date. The situation along the Svir River and in the southern Karelian front remains unchanged. There has been a resumption of artillery action at Hangoe.

North-Central Sector.—The siege of Leningrad continues with no apparent change in the situation. The Kronstadt batteries are reported to be still active against the Finnish right flank on the Isthmus and against the German left flank engaged in the siege of Leningrad.

Russian counter-attacks have prevented German forces at Tichvin, just east of the Volkhov River, from effecting a junction with Finnish-German units in the Svir River section. This leaves the Russian route to Leningrad via Lake Ladoga still open.

The Russians claim to have carried out counter-attacks in the vicinity of Novgorod. These attacks have had no visible results to date.

Central Sector.—German assault against Moscow has been resumed during the past 6-10 days. Despite bitter Russian resistance and incessant counter-attacks, the Germans have made some headway north and south of the city. At Kalinin no appreciable shift in the lines has been apparent. Southeast of Kalinin the Russians have admitted fighting near Klin, and the Germans have officially claimed the capture of Solnechnogorsk, indicating considerable German penetration northwest of Moscow. The Russians admit being forced back in the Mozhaisk sector. Another threat is developing at Tula, where the Russians report great German pressure.

South-Central Sector.—Gradual German advances along the Orel-Kursk front, which have been hinted at for some time but not substantiated, are confirmed in the reports that Yefremov (on the Moscow-Yelets railroad) has been captured and that advance units, progressing toward the important center of Voronezh, have reached Tim, 40 miles east of Kursk.

[12] *Donetz Basin Sector.*—The Russians claim deep advances in a counter-attack on the "Donetz Plateau", but fail to mention the recapture of any important industrial centers. Axis reports have emphasized gradual progress along a broad front, but have been vague as to details.

Rostov apparently has been captured, although the Soviets insist street fighting is still in progress. A crossing of the lower Don River and the pursuit of retreating Red forces towards the Caucasus is reported from Berlin.

Crimean Sector.—According to reports, all of the Crimea except Sevastopol is now in German hands. The defeat of Russian forces in the central Crimea, the breaking of strong defense positions across the Kerch Peninsula, the capture of

Kerch and the western shore of Kerchinski Straits have opened up another avenue for the invasion of the Caucasus.

Sevastopol is isolated and under siege, and apparently has lost its value as a base for the Red Black Sea Fleet.

Personalities.

General Kurt von Briesen was killed in action on the eastern front on November 20, 1941.

2. Naval.

3 Units.....	DD	September 24.....	North Sea ports.
2 Units.....	DD	October 24.....	Cherbourg.
Remaining Units.....	DD		Unknown.
150 Units (estimated).....	SS		Operating out of German, Norwegian and French Atlantic ports.

Operations.

A smaller number than usual of German submarines were encountered during the period November 6 to November 13. Two forces were operating: one off the Portuguese coast, and one off the southern coast of Greenland.

British October shipping tonnage losses were less than 75% of the September, 1941, losses.

[14] HMS ARK ROYAL was attacked and sunk by two or more German submarines just east of Gibraltar on November 13, 1941. It is not certain whether these submarines were operating out of the usual French West Coast bases, or from newly established bases in the Mediterranean.

In the light of available information, it appears practically certain that all Rumanian and Bulgarian Black Sea ports are being prepared by the Germans for use as bases for offensive operations. The naval forces at Axis disposal in this sea are still very inferior to the Russian Black Sea Fleet. Axis Black Sea naval operations on any extensive scale are not to be expected until such time as the Red Black Sea Fleet either will have been destroyed or otherwise neutralized.

It is reported that Axis Black Sea forces have been reenforced by five small submarines brought down the Danube. A sixth small U-boat is to follow.

A shortage in available Axis Black Sea shipping may be indicated by the recent sinking of a 1200-ton Hungarian river motor vessel. This ship was reported to have been carrying munitions for Axis land forces and was sunk by a mine in the Black Sea.

H. M. S. DEVONSHIRE (CA) encountered and sank a converted German commerce raider on November 22 in the South Atlantic. The Axis raider, believed to have been the TAMESIS, was blown up by a magazine explosion thirteen minutes following the commencement of the engagement.

According to belated evidence, it is not fairly certain that the German 6,000-ton light cruiser KOELN was engaged in operations leading to the capture of the Baltic (Oesel) Islands six weeks or so ago.

1326 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Personalities.

Lt. Reschke and Lt. Guggenberger were in command of the two German submarines credited with the sinking of the *ARK ROYAL*. Reschke entered the Navy in 1929 and Guggenberger in 1934. Neither officer had been previously mentioned in connection with submarine operations.

[15] Captain Bernhard Rogge was in command of the raider reported sunk by *H. M. S. DEVONSHIRE*. Captain Rogge entered the Navy in 1915 and was advanced to his present rank in 1940. He has been awarded the Knight's Cross of the Iron Cross.

3. Air.

Strength and Disposition.

According to a recent reliable report, the disposition of the German Air Force in Russia is as follows:

	Leningrad	Moscow	South of Kharkov- Kiev	Finland & North Norway
Long range bombers.....	90	200	240	40
Bomber reconnaissance.....	30	30	45	10
Dive bombers.....	0	90	60-75	30
Single-engine fighters.....	30	180	130	30
Two-engine fighters.....	30	35	0	10
Totals.....	180	535	475-490	120

Grand total: 1310-1325.

A previous report from the same source estimated that, as of October 1, 1941, the Germans had almost exactly twice the above number of planes on the Russian front. This reduction in air strength may be due to some, or all, of the following factors: (a) reported withdrawal of some 560 bombers and 150 single-engine fighters from the Russian front to central Germany for refitting; (b) losses; (c) shift of air strength to the Mediterranean, which has recently been reported from several sources.

In the Mediterranean, prior to the beginning of the recent British offensive in Cyrenaica, German Air Force distribution was reliably reported as follows:

[16]	Bombers	Dive bombers	Fighters	Recon- nais- sance	Coastal
Cyrenaica.....	30	70	75	5	-----
Sicily.....	10	-----	-----	-----	-----
Crete.....	-----	20	10	-----	-----
South Greece.....	60	-----	-----	20	25

Total: 325.

This represented a slight decrease in German air strength in the Mediterranean from the last previously reported figures.

Operations

West. Reconnaissance continues to be the chief German aerial activity in this theater, operations being carried out over the British Isles and over the sea approaches. A small number of bombers were regularly in action, and activity of mine-laying planes was reported occasionally.

Russian Front.—According to German claims, the German Air Force has been very active on the Eastern Front. Leningrad and Moscow were bombed regularly during the past two weeks. The northern part of the city of Leningrad is now in ruins, the Germans report. German bombers also are said to have paid particular attention to railroad communications; namely, the yards near Moscow and the Murmansk railroad at and north of Vologda.

The Luftwaffe also claims many successes in pounding the Russians in the Crimea at Sevastopol and at Kerch.

Up to November 1, German sources claim that 83,000,000 pounds of supplies in 30,000 flights had been carried to the front by German air transport.

On November 21, the Germans claimed further that, to that date, 15,877 Russian planes had been destroyed.

[17] *Mediterranean.*—German activity in this theater has been limited largely to defensive operations. It has been reported that German air units in Libya have recently vainly requested reinforcements of troop-carrying planes.

Personalities

During the last fortnight, the German Air Force has lost its greatest technical expert and its leading ace. Col. Gen. Udet was killed while testing a new secret weapon. Lt. Col. Moelders was killed when a transport plane in which he was a passenger crashed near Breslau on November 22. Moelders was returning to the front after attending Udet's funeral.

[18] *F. The Italian Military, Naval and Air Situations*

1. *Military.*

Libya.

At dawn, Tuesday, November 18, the British launched their long-awaited offensive against the Italian and German forces in the Libyan Desert. The British have been preparing for this drive for many months, and a steady stream of matériel has been flowing to the Middle East. For the first time British forces are meeting the Germans with ample equipment and air superiority.

The main spearhead of the attack began south of Sidi Omar, fifteen miles from the coast at Sollum, and branched northward to Bir el Gobi and Sidi el Rezegh. At Bir el Gobi, the Italian 132nd Ariete Armored Division apparently was badly mauled by the British. At El Rezegh, Imperial forces captured the airfield, including planes and personnel. Further south an Imperial Motorized Force, starting from Giarabub, raced across the desert to Gialo Oasis and captured the Italian outpost of El Augila.

Since the initial thrust a tank battle, between German and British armored forces, ensued at El Rezegh where both sides lost heavily in mechanized equipment. To date the fighting is still fluid, and no decision has been reached. However, the British are now in possession of Rezegh; Gambut and Sidi Omar Nuovo (the main supply bases of the German armored forces) have been captured, and the Tobruk garrison has made a juncture with the main Imperial forces at Ed Duda.

East Africa.

Gondar, the last stronghold of the Italians in Ethiopia, is expected to capitulate within the next few weeks. The beleaguered Italian forces are entrenched on a mountain top north of Lake Tana where they have been cut off from supplies for the past seven months. British forces are closing in now and are only seven miles from Gondar.

(NOTE: Since the preparation of this report, the fall of Gondar has been announced.)

[19] *Russian Front.*

Italian ground lines of communication are being obstructed on the Russian Front and air transport is being used to supply the troops. Italian difficulties are due to mined and mired roads, lack of transportation facilities and the refusal of the Germans to repair the railroads in that sector. As a result, Italian forces in the Stalino area have been directed to exploit whatever local resources are available.

2. *Naval.*

The Italian Navy is demonstrating its inability to protect convoys to Africa. In the attack on an Italian convoy November 8 by the British, the two Italian 8-inch gun cruisers stayed beyond the range of the British 6-inch gun cruisers during the entire action. Seven of the ten ships sunk in this convoy contained German troops. Again on November 21/22 a British submarine attacked another Italian convoy escorted by three cruisers and three destroyers in the Straits of Messina. One cruiser and a destroyer were hit. On the night of November 22 the convoy was again attacked by British aircraft off Cape Spartivento in which hits were claimed on another cruiser and several merchant ships.

German submarines are basing now in the Mediterranean. Reports indicate that the principal German submarine base in the Mediterranean is located at Capri. Permits to visit Capri are almost unobtainable, even for persons of Italian nationality. A German submarine base also is being established on the West Coast of Sardinia which will accommodate seven submarines.

3. *Air.*

On November 15 a serious shake-up occurred in the Italian Air Force when General Rino Corso Fougler succeeded General Francisco Pricolo as Under-Secretary for Air. First reports of the ousting of General Pricolo indicated that he had failed to protect Italian cities from British air attacks because his interest lay in bomber and torpedo planes. It was believed that General Fougler, who is

1328 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

a specialist in pursuit aviation, would relegate bombers to second place in favor of the manufacture and use of pursuit planes. However, subsequent reports state that the Germans have taken over complete control and command of the Italian Air Force because of [20] the sinking of the big convoy on November 8 when many German soldiers were drowned. Mussolini was said to have acquiesced to the German demand and, rather than submit, General Pricolo resigned.

General Fougler is only a figure-head, and it is reported that he is not respected by the Air Force. He was a protege and satellite of the late General Balbo and commanded the 3rd Italian Air Fleet.

PACIFIC FLEET CONFIDENTIAL LETTER 23CL-42

From: Commander-in-Chief, United States Pacific Fleet.
To: Pacific Fleet.
Subject: Battle Organization and Condition of Readiness Watches at Sea.
References: (a) Cincpac Conf. Ser. 0300 of 21 Feb. 1941.
(b) War Instructions—Chapter 8, Section 2.
Enclosure: (A) Copy of reference (a).

1. Enclosure (A), which discusses in detail and sets forth the basic principles upon which conditions of readiness are established, is herewith issued to the Fleet.

2. With the personnel now on board ships of the Pacific Fleet, the proportion of the armament to be manned in the various types of vessels under the three conditions of readiness for action and based on the principles of enclosure (A) should be as follows:

CONDITION ONE

Type	Main battery	A. A. battery	Automatic weapons
BB.....	All	All	All
CV.....	All	All	All
CA.....	All	All	All
CL.....	All	All	All
DL.....	All		All
DD.....		All	All
DM & DMS.....	All		All
AUX.....	All	All	All

CONDITION TWO

BB.....	$\frac{1}{2}$	All	All
CV.....	$\frac{1}{2}$	All	All
CA.....	$\frac{1}{2}$	All	All
CL.....	$\frac{1}{2}$	All	All
DL.....	$\frac{1}{2}$		All
DD.....		$\frac{1}{2}$	$\frac{1}{2}$
DM & DMS.....	$\frac{1}{2}$		$\frac{1}{2}$
AUX.....	$\frac{1}{2}$	$\frac{1}{2}$	$\frac{1}{2}$

CONDITION THREE

BB.....	None	All	$\frac{1}{2}$
CV.....		$\frac{1}{2}$	$\frac{1}{2}$
CA.....	None	All	$\frac{1}{2}$
CL.....	None	All	$\frac{1}{2}$

*Three section organization. Conditions two and three identical.

3. Although the three conditions of readiness for action provide varying degrees of security, they were devised *primarily to preserve the fighting efficiency of the personnel* over extended periods of time.

4. Responsible Commanders are enjoined to keep the balance between security and rest and to choose that Condition of Readiness, even if it is in effect for only a short period, which will conserve to the maximum the energy and readiness of personnel for battle.

5. The War Instructions set forth the circumstances under which Condition Two is the appropriate Condition of Readiness to be maintained.

6. The Commander-in-Chief, Pacific Fleet believes that with efficient Radar equipment and the security afforded by air and surface screening, Condition Three will normally meet security requirements when not in contact with the enemy.

Subject: Battle Organization and Condition Watches.

1. The problem of battle organization and Conditions of Readiness for Action for all types in the Fleet is an acute one, requiring immediate and realistic solution. The Fleet at any moment may find itself faced with actual war conditions requiring a state of alertness and readiness, at sea and in port, not experienced since World War I and incompletely anticipated in the intervening years.

2. That our ships are properly organized for battle itself and personnel assigned to essential stations, especially in view of what has been revealed by the Fleet Personnel Board, is not questioned. However, the various Conditions of Readiness for Action based on these Battle Organizations need to be examined in the light of modern needs, and they are, in the opinion of the Commander-in-Chief, susceptible of great improvement.

3. It is not desired to require rigid and detailed standardization of battle and condition watch bills for all types. But there is need of agreement in basic and fundamental principles, so that Fleet and Task Force Commanders may know what they are getting in the way of security, and in the way of rest for the crews of their ships, when they order any Condition of Readiness for Action.

4. Since under modern war conditions it is impossible to man continuously all battle stations without relief, except when battle is imminent or actually joined; since men without adequate rest are soon rendered unfit for battle; and since, however, each ship must at all times be prepared to meet a surprise attack, the three Conditions of Readiness for Action have been devised. One fundamental consideration is stressed—these conditions were devised as much to give men adequate rest as to keep all possible stations manned. If the sole requirement is to keep every station manned—to provide maximum security—there can be only one condition, Condition One. The object of the other conditions is to give the crews adequate rest, thereby bringing them fresh into battle, and at the same time to provide reasonable security. If in any Condition of Readiness, security becomes no longer reasonable and adequate, the next higher condition must be set. Operating, as we may soon have to operate, in a large theatre of war this delicate balance between security and rest must be carefully kept or we shall be worn out on the one hand or caught unaware on the other.

5. The part that sound organization plays in this is to assign all men to their various stations under all three conditions, so that each man may know where he goes and when, in shifting from one of the conditions to another; to permit these shifts to be made without confusion; and to insure that the maximum number of essential stations is manned in each condition. What is desired is a division of labor to avoid exhaustion. If we considered Condition Watches as primarily involving men we shall get extra dividends in security by their efficient use.

[2] 6. An examination of the Type reports of the Fleet Personnel Board reveals that the complements recommended by that board permit the setting of a Condition Two Watch, except in destroyers and certain auxiliaries, meeting latest maximum requirements; also that even with complements less than those recommended, but equal to those provided for in the latest Fleet Operating Plan, a fully manned A. A. battery can be provided in that Condition. This arrangement is already in effect in the heavy and light cruisers. The Commander-in-Chief has therefore recommended a change in the War Instructions requiring all, instead of half, the A. A. battery being manned in Condition Two.

7. It follows that, if in Condition Two all of the A. A. battery can be manned, in Condition Three at least one half of this battery can be manned. This should be the minimum requirement for Condition Three. However, the number of men available in all large ships permits the manning of much more than half, and in some ships practically all, of the A. A. battery in this Condition on a basis of a watch in four. When this can be done a measure of security is obtained approaching that of Condition Two, insofar as the A. A. battery is concerned, without the undesirable watch and watch feature of that Condition. Over long periods such an augmented Condition Three Watch may not only be desirable but essential to prevent exhaustion of our men.

8. That the above cannot be accomplished without the use of main battery personnel is obvious. To man all A. A. guns in Condition Three without calling on all personnel already available will require more than a ship can carry. Not to man these guns to the fullest extent is to fail in providing every possible defense and to neglect a reservoir of men, who in that Condition, have no other duties to perform. It is not proposed to use main battery personnel when they are needed in the main battery, nor is it intended to place too much stress on A. A. protection to the detriment of main battery fire. But, when the situation at sea permits the setting of Condition Three or the situation in port requires the manning of A. A. guns only over long periods of time, to require the A. A. battery personnel to continue a watch in two on the one hand or to man a lesser number of guns on the other (while at the same time large numbers of main battery personnel are idle) is to fail in making efficient use of the men and material available. That this question is highly controversial is recognized. But the Commander-in-Chief fails to see how we can come to any other conclusion than to make full use of our men.

9. To insure the smooth functioning of condition watches requires strict adherence, in those ships carrying sufficient personnel, to the time honored quadrilateral organization of two watches and four sections. This is essential, and in no other way can the shift from one condition to another be accomplished without confusion and without the imposition of successive double watches on part of the personnel. In this connection the use of the terms

"Watch One" and "Watch Two", in lieu of Starboard and Port Watches, is not only confusing, since the sections are already numbered "one" to "four" inclusive, but it disguises the fact that these watches must actually be the starboard and port watches throughout the ship to make a watch in four work. This confusion already exists in some ships for sea watches; and will be further accentuated in all ships using this system, when Base Conditions of Readiness are established in port.

10. To permit the use of the basic four section arrangement, and the employment of the main battery personnel in Condition Three, requires the longitudinal division of main battery into starboard and port watches in Condition Two. This may be accomplished by having all turrets half manned, instead of half the turrets fully manned, in Condition Two; or it may be accomplished by having half the turrets fully manned in four turret ships; or in three or five turret ships by having one or two turrets fully manned and the odd turret half manned. Turrets fully manned should have the entire turret crew in the starboard or port watch and subdivided into only two sections. Turrets half manned should have the turret crew equally divided between the starboard and port watch. Of these systems the one should be adopted which will give the maximum return considering the material installations in the individual ships and the difficulty of getting men into the turret while the turret is being fired. The past practice in heavy cruisers of manning only one turret complete in Condition Two, thereby falling far short of the requirement of having one half the battery manned, is not approved.

11. The system of half manning all the turrets in Condition Two has been in effect in some heavy cruisers and all 10,000 ton light cruisers and has proved feasible. Indications are, since many of the installations in a triple turret are in duplicate rather than triplicate, that fire can be opened with all and continued with two-thirds, rather than one half, the battery until the off [3] watch responds to general quarters. A firing test, shortly to be conducted in Light Cruisers, should settle this question conclusively for that type.

12. Certain types, such as destroyers and some auxiliaries, and some activities in heavy ships, such as the M. E. and Radio Divisions, do not lend themselves to a four section arrangement. They have been organized on a three section basis, partly from long established custom and partly because enough qualified personnel cannot be carried to permit of a normal watch in four. When the latter is truly the case this situation should be recognized and accepted. When the A. A. battery is also the main battery, as in most destroyers, it is frequently impossible to man all this battery in Condition Two on a basis of a watch in two. If all the battery is required; Condition One must be set for its efficient service. However, it appears feasible to man half the battery efficiently on a basis of a watch in three. The logical solution in such cases is to make Conditions Two and Three identical—a straight watch in three.

13. The Commander-in-Chief desires that for all Types:

(a) Ships be organized on a strictly quadrilateral basis of two watches and four sections (straight three section basis for such destroyers and auxiliaries as cannot meet this requirement).

(b) In Condition Three one-fourth (or one-third where applicable) of the ship's company, less certain men such as cooks, bakers, mess attendants, etc., for essential services, be placed on watch.

(c) It be determined what essential stations can be manned by full and efficient use of one-fourth (or one-third) of the ship's company and report made to the Commander-in-Chief, so that the requirements for Condition Three can be changed in basic directives.

14. The Commander-in-Chief desires to impress upon Force and Type Commanders, in complying with paragraph 13, that the above sets forth principles which are to be followed and that departures in detail will be necessary. The end in view is a division of labor in order to avoid exhaustion.

H. E. KIMMEL.

Enclosure. (A) ComPatWing TWO Secret Ltr. Serial 0033 of December 30, 1941.

1. In recent despatches, references (c) and (d), the Commander-in-Chief, Pacific Fleet, pointed out the vital need for improvement of the aircraft situation in the Hawaiian area. This letter is written in amplification.

2. The following factors must form the basis for any consideration of aircraft requirements here:

(a) *The attack of 7 December will be followed by others.* The enemy has exploited the element of surprise. He can however, use it again, although to a lesser extent because of local alertness measures, if adequate search is not maintained. In any case, his strength in carriers and heavy ships is such that he need not depend on surprise. His objectives in the first assault were aircraft and ships. There remain untouched the very important and tempting objectives of fuel supply, navy yard industrial establishment and drydocks, commercial docks and the city of Honolulu. There remains, further, as an ultimate objective the taking of the island of Oahu itself, retention of which is by no means assured with the forces now available to us.

(b) *Japanese aircraft carrier aviation, with all due allowance for the advantage of surprise, proved itself on 7 December to be in a very high state of development.* This applies with full force not only to material and to the training, skill and determination of personnel, but also to the unquestionably brilliant manner in which the entire expedition was conceived, planned and handled. This arm of the Japanese fleet has been greatly underestimated. Its potentialities must be recognized from now on.

(c) *Aircraft for Hawaiian defense must comprise adequate forces for long range search, for striking and for local interception.* All of these are vital for effective defense. None of these can be effective if any of the three is inadequate. It must be assumed that the Japanese will continue to have excellent intelligence reports of our activities here. An organization as perfect as that which provided complete information for every minute detail of the first attack cannot safely be assumed to have been eliminated. It follows that inability to maintain an effective search can hardly fail greatly to increase the probability of renewed attack.

3. The objectives of long range search are to make it possible to strike any enemy force before it can strike Oahu and to give ample advance warning of any such attempt. Provision for the first of these objectives covers the second. As will readily be seen by simple mathematical analysis (see enclosure (A)), the search should extend out to about 800 miles before planes turn homeward each day in order to:

(a) Make it possible to reach the enemy with an air striking force during daylight on the day he is discovered, and

(b) Prevent the enemy, if undiscovered on the previous day, from reaching a position close enough for launching aircraft before the succeeding day's search has reached him.

4. Search requirements are based on the following assumptions:

(a) *Carrier aircraft may be launched 300 miles from Oahu.* There is definite evidence that carrier aircraft were launched and recovered on 7 December 225 and 300 miles respectively from Oahu. These launching and recovery points can be interchanged without increasing the demand on Japanese aircraft endurance that has already been met. It is possible that even greater ranges might be used by substitution of bombs for torpedoes and with retention near enemy carriers of shorter range types for their local defense.

(b) *Carrier speed for the run-in may be 27 knots.* This speed is not unreasonable and is believed to have been used on 7 December. The enemy can accept the logistic problem in fuel, for he did so.

(c) *It cannot be assumed that any direction of approach may safely be left unguarded.* The fuel problem is no deterrent, for the approach was made from the north on 7 December. Increase in difficulty of the logistic problem would not be proportionately great if even an approach from the east were attempted. At the same time, as discussed above, neglect of any sector is apt soon to be known.

(d) *Air Search visibility is 25 miles.* That is, aircraft during the majority of the search are 50 miles apart, although they are closer together than this from departure until they are 300 miles out. This visibility assumption is obviously optimistic, particularly since clear weather will seldom extend over the entire search area. It is, however, the best (and the most) that can be done with aircraft available unless very large areas are to be entirely neglected. Although each succeeding day's search tends to disclose, at closer range, what might have been missed on the previous day, the long range search should be far more positive than is now possible.

5. The upshot of the foregoing assumptions, *which include perfect visibility*, is that about 50 planes (the number varying slightly with type) are needed daily for search. This number cannot be reduced, as suggested in the enclosure, if and when *reliable* radar equipment for airplanes is *available*, for this equipment will merely serve to counter the effect of poor visibility. Actually, toward meeting at present the minimum requirement of 50 per day, the situation is as follows: With departure of Patrol Squadron Twenty-two for the Asiatic theater and with completion of the current transfer here of three squadrons from the mainland, the number of patrol planes here becomes 67, with 4 of these under repair for at least a month. The number of Army heavy bombers (B-17's) here is 42, with 2 additional expected later. (Note that paragraph 2 of the enclosure is not up to date on these patrol plane and Army bomber figures). This leaves a total on hand of 109 long range planes.

6. With these it is not possible simultaneously and effectively to maintain necessary long range search operations, to keep available a useful air striking force, and to meet constant requirements for special missions, such as covering submarine contracts and guarding convoy approach and departure, without having on hand for search alone at least three times the number of planes that are needed for search on any given day. There is no way of getting around this if material and personnel are to maintain the pace. Neither one nor the other can do more.

7. Search actually being made has had to be reduced to the following basis:

(a) The radius for the long range planes is 700 miles. Neither patrol planes nor B-17's can go farther, with reasonable margin for safe return, while carrying any bombs.

(b) 25 patrol planes and 12 Army B-17's are being used daily for search (18 B-17's are being held continuously ready as a minimum striking force). The long range searching planes cover total sectors of about 290 degrees. Such relatively ineffectual planes (VSO, VJ and Army B-18's) as are available are used to cover remaining sectors totalling about 70 degrees to distances of 200 or 300 miles.

8. These figures vary somewhat from day to day, but the overall result is that only *four-fifths* of the circle is being covered to a reasonable range, and this with mediocre effectiveness, although available material and personnel are being strained to the limit. Furthermore, the remaining fifth is being covered very poorly, to short and inconclusive ranges. Still further, this essential expenditure of effort leaves no patrol planes available for support of task forces

1334 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

on special missions and none for our outlying island bases, beyond the two each that are now being maintained on an exchange basis at Johnston and Palmyra.

9. To improve the situation outlined above, which is not only critical but dangerous, there should be earliest possible action toward increasing the patrol wings in the Hawaiian area to at least twelve 12-plane squadrons of long range planes. Commander Patrol Wing Two in enclosure (A), and Commander Scouting Force in references (a) and (b), make entirely clear the very great advantages of naval use of long range land planes where this is practicable. The patrol wing increase to twelve squadrons should include the provision that at least one-half of these planes be of the B-24 type. This is essential not only because of their superior characteristics but also because, otherwise, the limited seaplane operating potentialities of this area would be too crowded for war conditions.

10. It is realized that this expansion cannot be accomplished immediately. Nevertheless, the necessary machinery therefor should be set in motion now at highest priority. Meanwhile, favorable consideration of reference (c), asking for B-24 landplane bombers at once in place of the 17 PBV-3 planes now here, is earnestly recommended. This is a small part of the necessary increase, but, as pointed out in the reference, it is relatively easy to do and it will make an important immediate improvement in the picture.

11. The request of the Commanding General, Hawaiian Department, for a total of 200 heavy bombers, with which the Commander-in-Chief concurred in reference (d), is amply justified. It must be recognized that renewed attack will almost certainly be in force as great or greater than that of the first attack, which included at least four aircraft carriers, and it may in addition be divided. The only way in which to have any assurance of decisive effect on major enemy attack is to be prepared to strike a heavy blow. But the only available shore-based striking force consists of 18 B-17's, held in reserve daily for this purpose, and such patrol planes, neither searching nor undergoing maintenance, as are not in use for special daily missions. The resultant air striking force is literally trivial. It would be practically useless against surface forces comparable to those that were in this area on 7 December. Its effect could not possibly be decisive. With 200 heavy bombers on hand, however, availability of a powerful striking force for all contingencies can be continuously assured.

12. In all of the foregoing, *Hawaiian air defense* alone has been considered. Any plans for any other uses in the Pacific area for the recommended types of aircraft must include provision of appropriate numbers of additional aircraft.

13. Returning to the immediate situation; with present limited numbers of searching and striking planes we are constantly confronted with the dilemma resulting from the relative futility of either effective search at the expense of striking force or useful striking force at the expense of search. There is no answer to this except more planes. Unless we are to play the inevitably losing game of local air defense alone, the recommended total increases for both the patrol wings and the Hawaiian air force must be soon provided. Meanwhile, it is reiterated that *any* immediate increase for either will vitally improve the present situation.

PATROL WING TWO,
U. S. NAVAL AIR STATION,
Pearl Harbor, T. H., December 30, 1941.

Secret

From: The Commander Naval Base Defense Air Force (The Commander Patrol Wing TWO).

To: The Commander-in-Chief, United States Fleet.

Via: The Commander-in-Chief, United States Pacific Fleet.

Subject: Long Range, Landplane, Bombers for Scouting in Hawaiian Area; Recommendation for Assignment of.

Reference: (a) Comairscfor Confidential letter A4-1(0755) dated December 18, 1941.

Enclosure: (A) Determination of Search Group Requirements.

(B) Memorandum of Air Corps Liaison Officer.

1. By reference (a) the Commander Aircraft, Scouting Force, set forth the need for long range landplane bombers for use initially as scouts in protective searches from Oahu, and stated briefly the advantages and further uses of such aircraft. It is the purpose of this letter to amplify the presentation of this subject and to present facts which will prove beyond reasonable doubt that the immediate allocation of such equipment to Patrol Wings is vital, not only to defense, but also to future offensive air operations.

2. There are currently 78 PBY aircraft available for flight in the Hawaiian Area, of which 34 are recently received reinforcements. Present search operations require 30 of the available PBY planes to conduct a daily 700 mile radius search from Oahu, covering a 240 degree sector. The remaining 120 degrees is covered daily, with concomitant serious reduction of offensive power by B-17 aircraft of the Army searching to 800 miles; or by B-17 aircraft and VO-VS or VJ aircraft, the latter searching to 200-300 miles, when the B-17s available for search are less than 16. It is evident that such a daily search is only partially effective. The lack of experience and training of Army Air Corps flight crews in performing long range protective search missions over water is a condition which was naturally to be expected. The result of this has the effect of throwing the major part of the burden of search on the Patrol Plane units in this area, and rightly so, for, at the present time, the few long range bombardment aircraft available to the Army in this area, even if used solely as a striking force, are totally inadequate. It is imperative that Hawaiian-based Patrol Wings be provided with sufficient aircraft to take over Oahu searches and to release Army bombers for the stand-by as a striking force. As a guide to the material required a study has been made as outlined in enclosure (A), based upon utilizing PBY aircraft, and [2] upon alternate long range equipment having cruising speeds of 150 and 200 knots. The results of this study are tabulated below:

	PBY	150 knot airplane (4 engines)	200 knot Airplane (4 engines)
Radius of daily search	800	840	880
Number searching planes daily (25 mile visibility)	50	54	54
Flight time per search plane-hrs	16.5	11.7	9.0
Total plane hours per month	24,750	19,415	14,580
Total number of planes required	150	162	162
Number of flight crews required	225	243	243
Engine changes per month	82.5	129.6	97.2
Spare engines required	182	286	214
Fuel consumption per month—gal	1,080,000	2,912,250	2,916,000
Average search effectiveness (estimated)	50%	60%	60-70%

1336 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

With A. S. V. (40 mile visibility assumed)

	PBY	150 knot airplane (4 engines)	200 knot Airplane (4 engines)
Radius of daily search.....	800	840	880
Number searching planes daily.....	32	34	34
Flight time per search plane-hrs.....	16.5	11.7	9.6
Total plane hours per month.....	16,840	11,934	9,180
Total number of planes required.....	96	102	102
Number of flight crews required.....	134	153	153
Engine changes per month.....	52.8	79.8	61.2
Spare engines required.....	117	178	137
Fuel consumption per month—gal.....	1,267,000	1,700,100	1,836,000
Average search effectiveness (estimated).....	75%	95%	100%

3. Conclusions which may be drawn from the above tabulations and from the study, enclosure (A), are as follows:

(a) PBY aircraft are *too slow* for the mission required of them. Their lack of speed not only reduces search effectiveness because of their inability to cover the required area during daylight hours, but also because the excessive duration of flight increases [3] pilot and crew fatigue. The only alternative is to provide planes of sufficient speed to conduct the required search in daylight hours.

(b) Regardless of how fast or how many planes are available, the effectiveness of the search is dependent upon visibility. All planes utilized for search should be provided with A. S. V. equipment with which search effectiveness can be increased to near 100%, despite low visibility. Not only would A. S. V. equipment make the search effective but, by permitting wider coverage by each plane, would reduce the numbers of planes and flight crews required. This, combined with shorter flight hours, would reduce fuel consumption, engine changes, spare engines required, and other maintenance, as well as reducing crew fatigue. It is clear that A. S. V. equipment also is a vital requirement and should be provided on a not-to-delay basis.

(c) The PB2Y-3 airplane has a cruising speed of about 150 knots and adequate range. But the operation of 102 PB2Y-3 airplanes presents more difficulties than the operation of a similar number of landplane bombers. PB2Y-3s are not fast enough. They are not immediately available. While a number of these planes are needed for certain types of missions, the immediate requirement for search is for landplanes of yet higher speed.

(d) Surveying the landplane field two types are available; the B-17 and the B-24. Experience with the B-17 on search has been disappointing. Their cruising speed at the low altitudes required during search is about 155 knots. In order to search to radius 800, auxiliary tanks must be installed in the bomb bays, precluding the carrying of bombs.

(e) The B-24 airplane most nearly meets the requirements of effective search in this area. Available information on characteristics is given in enclosure (B). Provision of 102 B-24 airplanes would provide not [4] only for effective search but also would provide a formidable reserve striking force. It is believed that a number of B-24 aircraft could be made available immediately by diversion from Lend Lease aircraft awaiting delivery. Such diversion is considered vital to the defense of Oahu.

(f) From actual flight experience of our pilots in B-17-E aircraft, I am convinced that experienced patrol plane crews can readily and in short order take over the operation of four-engined landplane bombers.

(g) Some fields are available and others can shortly be made available in the Hawaiian Group which are suitable for, or capable of rapid expansion as necessary to accommodate 102 B-24 Navy long range landplane bombers. These fields include Kaneohe, Ewa, Maui, Barking Sands on Kaula, and Hilo Airport at Hawaii.

4. Recommendations:

(a) It is strongly recommended that at least 102 B-24 bombers be allocated to Hawaiian-based Patrol Squadrons, and delivered as rapidly as possible.

(b) Immediately equipping with B-24s of the three patrol squadrons now on the West Coast equipping with PBY-5As is recommended as the first increment.

(c) For the second increment, it is recommended that the 17 PBY-3s now in this area, 7 of which are now due for overhaul, be replaced with 24 B-24s, Patrol Squadron TWENTY-TWO and Patrol Squadron TWENTY-ONE flying the

PBY-3s in succession to the West Coast, and, after a brief training period, returning with B-24s.

(d) The following equipment should be provided for these planes on a *not to delay* basis:

- (1) A. S. V. equipment.
- (2) Converter for use with YE homing device.
- (3) I. F. F. equipment.

/s/ P. N. L. BELLINGER.

[1]

Enclosure A

PATROL WING TWO
U. S. NAVAL AIR STATION
Pearl Harbor, T. H.

DETERMINATION OF SEARCH GROUP REQUIREMENTS

A. PBY AIRCRAFT

Assumptions

1. Best sustained speed of enemy carrier—27 knots.
2. Enemy carrier can launch an attack at a maximum distance of 300 miles.
3. PBY ground speed during search averages 100 knots.
4. Duration of daylight and dark:

(At Pearl)	Dec. 22	June 22
Daylight.....	11.0 hrs.	13.6 hours.
Dark.....	13.0 hrs.	10.4 hrs.

5. Daily search must cover a radius such that enemy cannot reach the 300 mile launching circle the following morning before the daily search reaches the 300 mile circle.

6. Aircraft depart on search daily at dawn.

Work	22 Dec.	22 June
Launching radius.....	300	300
Enemy's night run (27 x 13).....	(27 x 10.4) 351	281
Enemy's day run before search reaches 300 mile circle		
300 x 27.....	81	81
100.....		
Radius to cover effective at dark.....	732	662

[2] Let a=hours of daylight remaining when plane starts return leg.

Radius of search required is (r) $732+27(a)$ $662+27(a)$

Radius of search plus transfer (50 miles for 25 mile visibility) equals distance plane goes before starting return leg, equals hours of daylight minus a, times plane speed.

$$732+27a+50=(11-a) 100$$

$$a=2.5 \text{ hrs.}$$

$$662+50=(13.6-a) 100$$

$$a=5.1$$

$$\text{Radius of search (r)} \quad 732+27(2.5) \quad 662+27(5.1)$$

$$\text{Radius of search r} \quad 799.5 \quad 799.7$$

Conclusions

1. Radius of search 800 miles. Daily flight time 16.5 hrs/plane.
2. For radius of visibility of 25 miles requires 50 search planes daily and a total search force of 150 planes.
3. Since radius of visibility usually averages 15 miles, search effectiveness is about 60%. On 22 December plane flies last 550 miles in darkness. This reduces to

1338 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

290 miles on 22 June. Effectiveness of search is further reduced by this to an estimated 50% coverage over the entire year.

4. Plane hrs/mo—24,750 hrs.
5. Fuel consumption/mo (at 80 gal/hr)—1,980,000 gal.
6. Engine changes per month (at 600 hrs)—82.5
- Spare engines required (220% of monthly changes)—182

[3] B. PBY AIRCRAFT WITH A. S. V. (RADAR)

Intelligence reports (AirBatFor Summary of Air Operations No. 6-41A) stated that British A. S. V. equipment in Coastal Command aircraft has the following performance:

“Forward antenna system

Range—30 miles.

Cone of search—60° in azimuth (30° on either side of the beam); directly ahead and almost vertically downward.

Lateral antennae system

Range—80 miles on both sides.

Cone of search—18° in azimuth (9° on either side of the beam); 30° in elevation; 30° in depression.”

(Weight 290 lbs)

From information received on the A. S. V. equipment being installed in our PBY airplanes, it is understood that the performance is adversely affected by lack of British-made cable and that the performance obtained, for this and other installation reasons, is reduced, actual results varying between 10 and 40 miles range. Equipment installed in PBM airplanes however is reported as effective up to 70 miles, and it is expected that somewhat better results may be expected from PBY airplanes when British cable, now on order is installed. (First shipment sunk) Assuming that A. S. V. equipment may be depended upon for an effective range of at least 40 miles, the following benefits would result from installation of A. S. V. in PBY aircraft:

For 40 mile A. S. V. “visibility”

1. Reduce number of planes required for daily search from 50 to 32.
2. Increase search effectiveness from an average of 50% to about 75%.
3. Reduce plane hours per month for search from 24,750 to 15,840; reduce fuel consumption for search from 1,980,000 to 1,287,000 gallons per month; reduce engine changes per month from 82.5 to 52.8.

[4] 4. Reduce total planes required from 150 to 100; spare engines required from 182 to 117.

5. Reduce crew fatigue and number of plan crews required.

Conclusions

1. *The immediate installation of A. S. V. in search aircraft is vital to successful protective aircraft search. It will greatly reduce the material and personnel required for any search.*

O. 150 KNOT 4 ENGINED AIRCRAFT

Assumptions as before, except for 150 knot ground speed of search aircraft.

Work	22 Dec	22 June
Launching radius.....	300	300
Enemy's night run (27×13).....	(27×10.4) 351	281
Enemy's daylight run before succeeding day's search reaches 300 mile circle $\frac{300}{150} \times 27$	54	54
Radius to cover effective at dark.....	705	635

705 80 27a=150 (11-a) 635 80 27a=150 (13.6-a)
a=4.87 a=7.5
Radius of search r=840 r=835

Conclusions

1. Radius of search 840 miles. Daily flight time 11.7 hours/plane.

[5] 2. With A. S. V. equipped planes, requires 34 search planes daily (40 mile A. S. V. visibility) and a total force of 12 planes; without A. S. V. 54 planes daily (25 mile visibility) and a total force of 162 planes.

3. Search effectiveness 100% with A. S. V.; 60% without.
4. Plane hrs/mo:
 With A. S. V.----- 11,934
 Without A. S. V.----- 19,415
5. Fuel consumption/mo: (at 150 gal/hr)
 With A. S. V.----- 1,790,100
 Without A. S. V.----- 2,912,250
6. Engine changes/mo: (at 600 hrs) (4 eng/pland)
 With A. S. V.----- 79.5
 Without A. S. V.----- 129.6
- Spare engines required: (220% of monthly changes)
 With A. S. V.----- 175
 Without A. S. V.----- 286

D. 200 KNOT 4 ENGINED AIRCRAFT

Assumptions as for A except for 200 knot ground speed of search aircraft.

	22 Dec.	22 June
Launching radius.....	300	300
Enemy's night run.....	351	281
Enemy's daylight run before succeeding day's search reaches 300-mile circle		
300		
200 x 27.....	41	41
Radius to cover <i>effective at dark</i>	692	622

$$692+80+27a = 200 (11-a)$$

$$\begin{array}{l} a \quad 6.3 \\ r \quad 860 \end{array}$$

$$622+80+27a = 200 (13.6-a)$$

$$\begin{array}{l} a \quad 8.9 \\ r \quad 862 \end{array}$$

[6] Conclusions

1. Radius of search 860 miles. Daily flight time 9 hours.
2. Requires 34 A. S. V. equipped planes daily; or 54 non-A. S. V.-equipped.
- Total force required:
 With A. S. V.----- 102 planes
 Without A. S. V.----- 162 planes
3. Search effectiveness 100% with A. S. V.; 60% without. All search made during daylight.
4. Plane hours/month.
 With A. S. V.----- 9,180
 Without A. S. V.----- 14,580
5. Fuel consumption/month (at 200 gallons/hour).
 With A. S. V.----- 1,836,000
 Without A. S. V.----- 2,916,000
6. Engine changes/month (at 600 hours).
 With A. S. V.----- 61.2
 Without A. S. V.----- 97.2
- Spare engines required: (220% of monthly changes)
 With A. S. V.----- 137
 Without A. S. V.----- 214

[7] E. DETERMINATION OF TOTAL NUMBER OF PLANES AND FLIGHT CREWS REQUIRED

1. Flight crews should not be required to fly more often than one day in three: i. e., fly one day, rest one day, stand-by one day.
2. Operating policy requires that all available planes not under maintenance be manned and ready for take-off from 30 minutes before to one hour after sunrise, and from one hour before to 30 minutes after sunset. All available planes are on one hour's notice otherwise during daylight, and on 4 hour's notice otherwise at night. This requires services of one crew to stand-by each available airplane on the ground.
3. To provide for special missions in addition to protective search, at least three times the number of aircraft required for daily search should be provided.
4. Initially a minimum of 150% plane crews will be required. The excess over one crew per plane will be utilized to provide a surplus for rest status one day in three and for conducting training until two crews per plane are available.

1340 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

PATROL WING TWO,
U. S. NAVAL AIR STATION,
Pearl Harbor, T. H., December 30, 1941.

Confidential

Memorandum to Lieutenant Commander COE, U. S. N.

From: Major W. J. Holzapfel, U. S. A.

The following information on the B-24 airplane is gathered from pilots on the ferry command in the United States and from mechanics who were on the ferry command to England who used this type of airplane:

B-24 is equipped with Pratt and Whitney Twin row engines Model R-1830 with two stage engine driven blowers and developing 1250 horsepower during take-off.

The gas capacity of these airplanes is 3,100 gallons divided into two 1,550 gallon wing tanks. These tanks are not bullet proof. The Consolidated Corporation however is planning on putting in bullet proof tanks which will cut down the gas capacity to 2,490 gallons.

On these trips the thought of fuel economy is never considered. The airplanes were cruised between 29 and 31 inches of mercury, 2,000 RPM at altitudes of 7-10,000 feet. Carburetor, mixture was set at lean. Fuel consumption at these altitudes at these settings, which is considered maximum cruising, was 150 gallons gasoline per hour and the indicated air speed was between 180-200 statute miles per hour.

This airplane has two bomb bays each with 10 bomb stations. Capacity of the bomb bays is 8,000 pounds of bombs. The armament is composed of 9 .50 cal. machine guns and 1 .30.

The weight empty of these airplanes is 30,000 pounds. The authorized gross weight of this airplane (maximum limit as set by manufacturer) is 57,000 pounds. However, conversations with a mechanic who made a trip to England brought out the fact that one such airplane was once loaded to 72,000 pounds and it is reported that the English have loaded one of these airplanes to 83,000 pounds. No difficulties were found in take-off or flying quality of this airplane.

/s/ W. J. HOLTZAPFEL

EXHIBIT No. 60

(Exhibit No. 60 is, in the main, a work sheet showing dispositions of vessels in Pearl Harbor on the morning of 7 December 1941, which will be found reproduced as Item No. 14. EXHIBITS-ILLUSTRATIONS, Navy Court of Inquiry. These illustrations are bound together following the printed exhibits of the Navy Court of Inquiry.)

FEBRUARY 15, 1942

REPORT OF JAPANESE RAID ON PEARL HARBOR, 7 DECEMBER 1941

DAMAGES SUSTAINED BY SHIPS AS A RESULT OF THE JAPANESE RAID DECEMBER 7, 1941

(a) **BATTLESHIPS**

ARIZONA sank at her berth as a result of one or more aircraft torpedoes and about eight heavy bomb hits. One of the bomb hits (estimated as 2,000 pounds) exploded the forward magazines. The ship is considered to be a total wreck except for material which can be salvaged and reassigned. A considerable amount of ordnance material has already been removed, and work is underway in removing the 12-inch guns from turrets three and four.

CALIFORNIA sank at her berth as a result of hits by two aircraft torpedoes and one or more near bomb misses. Also received one large bomb hit on starboard upper deck abreast of foremast, which caused a serious 5-inch powder fire. It sank gradually for about three or four days and is now resting rather solidly on a mud bottom. The quarterdeck is under about twelve feet of water, and the port side of forecastle is under about three feet of water.

NEVADA struck by one or more aircraft torpedoes and by at least five bombs and two near misses. Each of the near misses caused rupturing of the hull on the port and starboard bows, respectively. One bomb hit in way of foremast caused explosion and fire damage which wrecked the vertical area extending from the second deck to the bridge. Several bomb hits wrecked the forecastle from side to side forward of No. 1 turret, and this damage extended down to the second deck. Fragments from a bomb hit amidships caused considerable local damage to the mainmast, stack, and other structure, and caused many casualties to 5-inch gun crews.

OKLAHOMA capsized at her berth within eight to eleven minutes after receiving three or more hits by aircraft torpedoes. The hull is 20° to 30° to being up-side down, with a considerable portion of the bottom and starboard side above water.

Certified a true copy. H. Blesemeier, Captain U. S. N., Judge Advocate.

[2] **PENNSYLVANIA** one bomb hit in way of after 5-inch gun starboard side. The vessel was in drydock No. 1. The damage from bomb explosion was considerable but not of a vital nature, although there were a large number of casualties and one gun was put out of commission. The damage did not extend below the second deck.

MARYLAND two bomb hits on forecastle. One small bomb (probably 100 pounds) passed through the forecastle deck forward of the chain pipes and exploded on the maindeck causing only a small amount of damage. The second bomb, (probably 500 pounds) passed through port side of the ship about twelve feet under water and exploded in the C&R storeroom. This explosion wrecked flats and bulkheads in that area, and fragments caused numerous leaks through the sides and bottom. These leaks were temporarily patched without going into drydock.

TENNESSEE two bomb hits (probably 15-inch shell type). One of the bombs struck the center gun of No. 2 turret causing a large crack which necessitated replacement of the gun. This bomb exploded and did considerable local fragment damage. Another similar bomb struck the top of No. 3 turret and penetrated same in way of a riveted joint. This bomb was a dud and did no serious damage except for putting one rammer out of commission. The **TENNESSEE** suffered serious damage aft in officers' quarters due to fire resulting from the great heat caused by the oil fire starting from the **ARIZONA**. The shell plates around the stern were somewhat buckled and joints broken.

WEST VIRGINIA sank at her berth as a result of four or five aircraft torpedo hits and at least two bomb hits. The vessel rests on a hard bottom with all spaces flooded up to two or three feet below the main deck. Most of the damage from torpedoes is in the midship area, which is badly wrecked both below water and above water. A large bomb passed through the foretop and the boat deck and apparently exploded near the port side on the main or second deck. This explosion caused considerable wreckage and a terrific powder and oil fire, which burned out the whole area and extended to the foremast structure up to and including the bridge. A second bomb hit the top of turret III and passed through the 6-inch top. The nature of the penetration indicated defective material. This bomb did not explode but caused damage to the slide of the left gun. Recently another torpedo hole, and parts of the torpedo, have been located aft under the counter. The steering engine room appears to be wrecked and the rudder is lying on the bottom.

(b) **CRUISERS**

HELENA hit at frame 80 starboard side by aircraft torpedo [31] causing the flooding of No. 1 and 2 firerooms and the forward engineroom. The starboard engine was found to be seriously damaged. Temporary repairs to hull were completed at Pearl Harbor, T. H., and the vessel has proceeded to Mare Island under two shafts to await permanent repairs.

HONOLULU damaged by near miss of large bomb (probably 500 pounds) which passed through deck and exploded fifteen or twenty feet from the port side at frame 40. This explosion caused considerable damage to the hull and resulted in the flooding of storerooms and magazines in that area, and also drowned out the electric power cables of turret II. Most of the flooding resulted from rupture of a magazine flood seachest; the hull of the ship was not opened up but leaked some due to pulled joints and rivets. Permanent repairs were completed at Pearl Harbor, T. H.

RALEIGH hit by one aircraft torpedo amidships on port side which flooded out the forward half of the machinery plant. The ship was also hit by one bomb (probably 500 pounds) which passed through three decks and out the ship's side, and finally exploded about fifty feet away. The damage from the explosion was not extensive, but together with the hole made in the side, caused serious flooding on the port side aft. This flooding was out of all proportion to the extent of damage and resulted from inability to close armored hatches tightly against the water head. The bomb struck only a few feet abaft the gasoline stowage. Permanent repairs to the hull are being completed at Pearl Harbor, T. H. The vessel will return to Mare Island about the middle of February for permanent repairs to machinery and power leads, this being necessitated primarily by replacement of one boiler and the cast iron turbine casings of engine No. 4.

(c) **DESTROYERS**

SHAW hit by one bomb while docked on floating drydock; also hit by many fragments from another bomb which struck the drydock. The serious fire following bomb hits resulted in blowing up of forward magazine and heat damage to shell plating in the forward areas. The after part of the ship was not seriously damaged. The **SHAW** was re-docked on the same drydock on January 28, 1942, for installation of a false bow at about frame 50. The vessel will be ready to proceed to Mare Island under her own power between 10 and 15 February.

CASSIN and DOWNES: **CASSIN** was struck by one bomb and **DOWNES** by two (probably 500 pounds). These vessels were in drydock No. 1 ahead of the **PENNSYLVANIA**. One bomb explosion aft between the two vessels apparently knocked the **CASSIN** partly off the drydock blocking and caused her to fall over on the **DOWNES** when the dock was being flooded during the raid. This caused a serious structural [4] failure amidships and considerable local damage in way of the bridge. The torpedo warheads in the starboard tube of the **DOWNES** were set-off and blew out the maindeck and starboard side of the vessel in that area. This caused some damage to boilers and engines. A serious oil fire followed the explosion and caused extensive damage to the hull of both vessels. Fragments and explosions have caused over 200 holes in the hull of the **CASSIN** and probably well over 400 in the hull of the **DOWNES**.

Most of the machinery of both ships has been removed for examination and re-conditioning, and it now appears that the machinery of the **CASSIN** is 98% good and the **DOWNES** about 95% good. Permanent and temporary repairs have been made on the hull of the **CASSIN** to permit her re-floating about February 5, and similar work is proceeding on the **DOWNES**.

At present it appears inadvisable to count on the recommissioning of these two vessels as first-line destroyers, but it is likely that repairs can be effected within two to four months which will make the vessels entirely suitable for escort vessels, thus releasing two first-line destroyers from this duty. The Navy Yard, Pearl Harbor, T. H., is working up sketch plans covering suitable arrangements for deck houses, bridge, armament, etc., adequate for an escort vessel. It is generally believed that although the hull of the vessels have been considerably weakened, they will be entirely adequate to carry the considerable reduced load in armament and other topside weights required for an escort vessel.

(d) **AUXILIARY VESSELS**

OGALALA sunk by one aircraft torpedo which passed under the ship from the starboard side and exploded against the starboard side of the **HELENA**. Vessel sank slowly at ten-ten dock, capsized against the dock about 1½ hours after being struck. This vessel is probably not worth salvaging but plans are being made to remove her from the berth that she now occupies.

CURTISS struck on kingpost starboard crane by Japanese airplane out of control. This resulted in some wreckage and damage due to fire. Machinery of the crane was seriously damaged and the radio antennae were put out of commission. One bomb (probably 500 pounds) struck the forward end of the hangar on the port side off the center line, exploding on the second deck. The explosion and resulting fire caused a great amount of wreckage and loss of material. Temporary repairs have been completed and permanent repairs await availability of the ship at the Navy Yard, Pearl Harbor.

[5] **VESTAL** struck by two bombs (probably 500 pounds). One bomb hit forward and exploded in the steel shape storage, which stopped a large part of the fragments and minimized damage considerably. The other bomb struck aft and exploded in the hold, causing a large number of fragment holes through the shell. Flooding aft caused the after part of the vessel to submerge almost to the main deck. The vessel was alongside the **ARIZONA** when the raid commenced and was beached at Aiea to prevent further sinkage. Temporary repairs have been completed during a short stay in drydock, and permanent work will be completed when a dock is available.

UTAH struck by two, and possibly three, aerial torpedoes capsized at berth. Ship is within a few degrees of being exactly upside down.

EXHIBIT No. 62

I. General.—The meeting was called at the Information Center on Monday, 24 November, for the purpose of determining how quickly the Information Center could be made fully operative on a war-time basis, and to decide what additional personnel and equipment might be needed to do so.

Those present were:

Colonel Murphy	Acting Signal Officer, HHD
Lt. Comdr. Coe	Patrol Wing Two
Major Tindal	18th Bombardment Wing
Lt. Comdr. Taylor	U. S. Navy
Capt. Bergquist	14th Pursuit Wing
Lt. White	Signal Corps, Hawaiian Dept.
Lt. Harville	53rd Coast Artillery
Lt. Thomas	86th Obs. Sq. (Support Command)

The following points were discussed and generally agreed upon:

a. Function of the Information Center: It was agreed that Information Center, properly organized and run, would continually have complete information of all activities in the Hawaiian area, and that this information, properly disseminated, would be of great value to all military, naval and civilian activities, at the present time, during actual state of war, and during attacks on the island. It was further agreed that in order to obtain and disseminate all information, a very close liaison between all activities must be maintained, and that liaison watch officers from each activity would have to be trained and present at the Information Center.

In this connection it was pointed out that it would not be the function of the Information Center to order various activities (other than Pursuit Aviation) to carry out particular operations, but rather to give information and warning of imminent hostile raids to these activities so that they might take immediate action according to prearranged plan. As all information is immediately and visually available to all liaison officers, it would be their duty to pass the pertinent information on to their respective units. The duty Controller will be the representative of the Commanding General, Interceptor Command. His primary duty will be the direction of Pursuit activities, and he will act as coordinator of information when this is necessary.

b. Facilities: Although considerable equipment is on order and planned for the operation of the Information Center, this equipment will not be available for some time to come; it is obvious, therefore, that every effort should be made to make the best use of the equipment on hand by proper coordination of all various military, naval and civilian activities. It was felt that the Information Center could be made to function adequately within the next two weeks.

Information would have to be drawn from the following sources:

Detector Stations.

Anti-Aircraft Artillery Intelligence Service (a) GLRDF; (b) Observation Posts (Artillery).

[2] (5) Naval Aircraft, ships and stations.

(6) Lighthouses.

(7) Coast Guard.

(8) Army and Naval Intelligence.

(9) Bomber Command.

(10) Support Command.

(11) Civilian Agencies (PAA, Inter-Island, CAA, Police and civilians through Police).

(12) Civilian Air Raid Warning Service.

c. Operations.—(1) At the present time, the Information Center is operating from 0700 to 1130. It is desired to operate the Information Center on a full-time daily basis (0600 to 1800) as early as possible, and eventually, when personnel can be made available, on a 24-hour basis. An estimate of the number of personnel required to man the positions will be studied. It was decided that the following watch officers should man the Information Center at all times, in the numbers required to keep a continuous watch:

(a) Controller

(b) Pursuit Officer

(c) Gun Control Officer

(d) Naval Air Liaison Officer (including Coast Guard)

(e) Naval Surface Liaison (including Coast Guard)

(f) Bomber Command

- (g) Support Command
- (h) Department G-2 Liaison
- (i) CAA Liaison
- (j) CARW Officer
- (k) RDF Officer
- (l) Communications Officer

(2) It was agreed that the function of the Information Center was of sufficient importance that the above watch officers representing the various activities in this area should be carefully selected as principal, rather than excess officers, when assigned. It is felt that intelligence and training in the Information Center, rather than age, rank and experience, would be desirable in the selection of these officers.

(3) It is realized that a great deal of detail work is necessary to get the Information Center coordinated with outlying activities. It is therefore desirable to have the Information Center manned at the earliest possible moment so that all hands will be trained.

(4) It was brought out that the Naval Liaison Officer now assigned to the Information Center is attached to Patrol Wing Two. This is not a permanently shore-based unit, and therefore liaison personnel from Patrol Wing Two might be withdrawn at any time, leaving the Information Center without trained Naval Liaison. It is therefore suggested that the Commandant, 14th Naval District be approached with a view to obtaining naval liaison officers and coordinating the information for all naval activities, shore and afloat.

[3] (5) As the present mobile RDF equipment is not all that might be hoped for, it was agreed that the AA RDF might be tied in. This would permit information on heights of incoming raids sufficiently far from the coast to make interceptions. The AAA RDF equipment is already being tied in with the Information Center for this purpose.

(6) It was brought out that considerable confusion during recent exercises has been caused by the great number of airplanes operating around the islands at all times; however, after discussion it was felt that this could be brought under control in three ways:

(a) By having all aircraft flights reported to the Information Center by parent units through their operations rooms.

(b) By enforcing the Aircraft Approach Procedure.

(c) By requiring all planes approaching the island of Oahu to report their position at least 60 miles at sea, before coming in.

In this connection it was brought out that the Commander-in-Chief, U. S. Fleet, had ordered radio silence of all aircraft during joint exercises. It was suggested that this be discussed with the Commander-in-Chief, U. S. Fleet, for decision as to the value of radio silence as security.

(7) The question of IFF was raised as a possible solution to eliminate confusion in determining whether aircraft approaching the island were friend or foe. It would be a very long time before all aircraft could be equipped with IFF, in addition to which it was believed that the present IFF did not operate on all RDF frequencies; it was therefore decided that this is not a reliable solution for some time to come.

(8) It was brought out that considerable equipment had been withdrawn from the Interceptor Command and the Hawaiian Air Force for the use of the Ferry Command. It was decided of value to investigate the possibility of using the Information Center to operate Ferry Command, to eliminate any duplication and make available as much of this equipment as possible. Without knowing all of the details of the Ferry Command's problems, the possibility of using the Information Center for this purpose was not clear; however, it was felt that the Information Center was probably better equipped to handle Ferry Command flights. In this connection it was brought out that Ferry Command operations are carried on under conditions of great secrecy; this was held to be no obstacle, as the Information Center should be operated with the greatest degree of security at all times.

(9) The question of gun control of ships in the harbor during air raids was discussed, and it was decided that this question should be taken up with the Commander-in-Chief, U. S. Fleet.

(10) It was decided that in order to avoid dangerous time discrepancies, the Information Center should synchronize its clocks with the U. S. Navy time, and that all other clocks should be synchronized with the Information Center.

[4] Clocks will be synchronized to the second, and all times will be reported to the minute within the nearest 30 seconds.

1346 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(11) It was felt that the air-to-ground radio equipment at present available was not the best that could be hoped for, and it was therefore decided to investigate the possibility of utilizing other army, navy, coast guard or civilian radio facilities in the event of an emergency, if not at present.

(12) In view of the permanence of its location and operation on the island, and its bombproof position, the question was raised as to whether or not it might be important to use the Information Center as a joint Communications Center, or to have a joint Communications Center adjacent to the Information Center.

(13) The question of teletypes was brought up, and it was considered that in some cases it might be used to advantage but in most cases it was too slow. Direct lines should therefore be used between all manned positions in the Information Center and the various outlying units.

(14) As there has been some difficulty in the procedure for requesting telephone circuits to the Information Center, i. e., requests had to be made by each of the many activities on the far end of the circuits—this question was presented to Colonel Murphy. Colonel Murphy agreed that all requests for circuits should and could be made by the Information Center. Circuits to Kaneohe and Bellows Field are required, and Colonel Murphy agreed that these could be furnished.

(15) It was agreed that all air to ground and air to ship radio procedure, of Fighters at least, should be standardized. In view of a recent Bureau of Aeronautics Navy Department letter to this effect, it is believed that all naval Fighter squadrons are now using the British system. It was decided, therefore, that all Pursuit squadrons will also use this procedure. It was felt by all that further liaison should be done to insure that the procedure being used is the same.

(16) It was decided that Intercept Tables for use in interceptions are cumbersome and unnecessary, and that therefore interceptions would be accomplished by eye, direct from RDF plots, by the Controller or Pursuit Officer.

(17) It was considered desirable to point out to all aircraft activities that homing and rescue facilities are being made available to all aircraft within the next fourteen days. It was decided that the question of developing this to the highest degree would be worked out with the activities concerned. It was felt that if all information comes in to the Information Center, the Information Center could, with the minimum amount of delay, locate aircraft in distress and send out rescue aircraft or surface craft to the proper position.

(18) It was pointed out also that the Information Center can be used for dissemination of orders, change of policy, or recalling aircraft, immediately, through Information Center direct lines, when this is desired by the Officers commanding the particular activities.

(19) It was decided that communications liaison is vitally important and therefore all activities should be approached with a view of coordinating communications facilities to the best advantage of all concerned.

(d) It was decided to investigate the probability and possibility of using naval ship-board RDF (RADAR) to supplement the land-based RDF under various conditions of emergency; also to determine the most efficient method of communications between the Ships Warning Net and the Information Center.

(e) The facilities of the Information Center can be made available to Army, Navy and Marine Corps squadrons for interception, exercises, by arrangement either by telephone or letter to the Controller, Information Center.

EXHIBIT No. 69A

[1]

SECRET

PEARL HARBOR, T. H., 1200, 30 November, 1941.

Memorandum for the Commander in Chief

Steps to Be Taken in Case of American-Japanese War within the Next Twenty-Four Hours.

1. Despatch to Pacific Fleet that hostilities have commenced.
2. Despatch to Task Force Commanders:
 - (a) WPL 46 effective.
 - (b) Sweeping plan cancelled.
 - (c) Comairbatfor and units in company with him (Task Force 8) carry out present mission. Upon completion cover WAKE against enemy operations until joined by Task Force Three. Remainder of Task Force Two (now at sea in operating area) return to PEARL HARBOR.
 - (d) Raiding and Reconnaissance Plan effective, modified as follows: Cancel cruiser operations west of NANPO SHOTO; delay reconnaissance until Task Forces Two and Three are joined; Batdiv One join Task Force One; Task Force Three with units of Task Force Two present in PEARL HARBOR depart ----- and rendezvous with Comairbatfor at Point "A" at -----; Commander Base Force send two tankers to Point "A" with utmost despatch, report expected time of their arrival.
 - (e) Send one Marine Bombing Squadron to MIDWAY.
- [2] 3. (a) I would not modify the movements of the WRIGHT, now enroute WAKE to MIDWAY, nor REGULUS, enroute PEARL to MIDWAY, nor ships bound to CHRISTMAS and CANTON.
- (b) I would continue WILLIAM WARD BURROWS to WAKE, directing Comairbatfor (ComTask Force 8) to have two destroyers join her as escort.
- (c) I would not withdraw any civilian workmen from outlying islands.
- (d) I would provide two destroyers to escort SARATOGA from longitude 150° west to PEARL HARBOR. (Under present set-up, Commander Task Force Three has been directed to furnish this escort from his force which would be at sea on arrival of SARATOGA. Under the plan of paragraph 2, above, this order should be transferred to Com Task Force One. This note added by Good).
- (e) I would not direct any change in passage of shipping to and from MANILA, nor would I send any added escorts, nor dispose any cruisers toward CALIFORNIA or SAMOA until further developments occur.

EXHIBIT No. 69B

[1]

SECRET

PEARL HARBOR, T. H., 1200, December 5, 1941.

Memorandum for the Commander in Chief

Recommended Steps to be taken in case of American-Japanese War within the next forty-eight hours.

1. Send despatch to Pacific Fleet that hostilities have commenced.
2. Send despatch to Task Force Commanders:
 - (a) WPL 46 effective. (Execute O-1A R5 except as indicated in (b) and (c) below. (The SS and VP plans will become effective without special reference to them).

(b) Commerce sweeping plan, including cruiser operations west of Nanpo Shoto, cancelled.

(c) Raiding and Reconnaissance Plan effective, modified as follows: Delay reconnaissance until Task Forces Two and Three are joined; Batdiv One join Task Force One; Commander Base Force send two tankers with utmost despatch to rendezvous with Task Force Three to eastward of Wake at rendezvous to be designated.

(d) Comairbafor and units in company with him (Task for 8) return to Pearl at high speed, fuel and depart with remainder of Taskfor Two, less BBs, to joint Task Force Three.

(e) LEXINGTON land Marine aircraft at Midway as planned (p.m. 7 Dec) and proceed with ships now in company (Taskfor 12) to vicinity of Wake.

(f) Comtaskfor Three proceed to Join LEXINGTON group. Return DMS to Pearl.

[2] 3. (a) Do not modify the movements of REGULUS at MIDWAY (departing 9th), nor ships bound to CHRISTMAS and CANTON.

(b) Direct that WILLIAM WARD BURROWS continue to WAKE but delay arrival until 10th. Direct that LEXINGTON group send two destroyers to join BURROWS prior to her arrival at WAKE.

(c) Do not withdraw any civilian workmen from outlying islands.

(d) Provide two destroyers to escort SARATOGA from longitude 150° west to PEARL HARBOR.

(e) Do not change passage of shipping to and from MANILA nor send any added escorts, nor dispose any cruisers toward CALIFORNIA or SAMOA until further developments occur.

(S) C. H. McMorris.

EXHIBIT No. 70

[1]

SECRET

UNITED STATES FLEET

U. S. S. PENNSYLVANIA, *Flagship*

CinC File No. A16/0129

PEARL HARBOR, T. H., *January 25, 1941.*

From: Commander-in-Chief, U. S. Fleet.

To: The Chief of Naval Operations.

Subject: Chief of Naval Operations' Plan DOG.

References:

(a) Opnav secret despatch 212155 of January, 1941.

(b) Opnav memorandum for Secnav Op-12-CTB of November 12, 1940.

1. Reference (a) was received by the Commander-in-Chief, U. S. Fleet, one day prior to the arrival of Commander McCrea at Pearl Harbor en route to the Navy Department. It is considered desirable to take advantage of his return to inform the Chief of Naval Operations of the views of the Commander-in-Chief as to the new situation.

2. In view of reference (a) and some degree of urgency implied therein, it is considered that study of the new situation and the preparation of plans therefor should take priority over the preparation of plans for Rainbow No. 3. Unless advice to the contrary is received, this will be done.

3. The new situation, as visualized by the Commander-in-Chief, alters the assumptions and concepts of Rainbow No. 3, principally in that the major offensive effort of the United States is to be exerted in the Atlantic, rather than in the Pacific, and in that a "waiting attitude" will be taken in the Pacific, pending a determination of Japan's intentions. If Japan enters the war or commits an overt act against United States' interests or territory, our attitude in the Pacific will be primarily defensive, but opportunities will be seized to damage Japan as situations present themselves or can be created.

4. Under the foregoing general conception, it is deemed desirable to outline as briefly as possible, certain tentative assumptions, upon which the actions of the U. S. Fleet in the Pacific will be predicated. These are:

(a) The United States is at war with Germany and Italy.

[2] (b) War with Japan is imminent.

(c) Units of the Pacific Fleet may be detached to the Atlantic on short notice. The numbers and types of these units are at present unknown.

1350 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

- (d) At least three German raiders are in the Pacific.
 - (e) Japan may attack without warning, and these attacks may take any form—even to attacks by Japanese ships flying German or Italian flags or by submarines, under a doubtful presumption that they may be considered German or Italian.
 - (f) Japanese attacks may be expected against shipping, outlying possessions or naval units. Surprise raids on Pearl Harbor, or attempts to block the channel, are possible.
 - (g) Local sabotage is possible.
5. Under the foregoing assumptions, the U. S. Fleet in the Pacific will assume the tasks listed below. Where deemed appropriate, measures to be taken under the tasks will be included.

Waiting Attitude

(1) Take full security measures for the protection of Fleet units, at sea and in port.

[3] In the performance of this task, the Fleet is severely handicapped by the existence of certain marked deficiencies in the existing local defense forces and equipment both Army and Navy. These deficiencies will be set forth in detail later, but are mentioned here in order that certain measures listed below may be more clearly understood.

At present, the following measures, among others, will be required to accomplish the above task:

- (a) Expand patrol plane search to the maximum, reenforcing Patrol Wing Two with units from Patrol Wing One.
- (b) Establish inner air patrol over Pearl and Honolulu Harbor entrances and approaches, augmenting Army planes with naval and marine planes as necessary.
- (c) Arrange for alertness of a striking force of Army bombers and pursuit planes; supplemented by available Navy or Marine planes.
- (d) Augment Army A. A. defenses with A. A. batteries of Fleet units in Pearl Harbor.
- (2) Keep vessels of all types in constant readiness for distant service.
- (3) Assist in local defense of the Fourteenth Naval District.

This task will require augmentation of District forces by the assignment of Fleet units until suitable vessels, including those of the Coast Guard, become available to the Commandant.

- [4] (4) Protect United States' shipping. This will require the following:
 - (a) Provide escort for important ships.
 - (b) Route allied and United States' shipping in the Fleet Control Zone.
 - (c) Base cruisers on Samoa to cover shipping in the South Seas.
 - (d) Despatch the Southeastern Pacific Force.
 - (e) Establish escort and patrol group between Hawaii and the West Coast.
 - (f) Maintain striking group to operate against raiders (search for raiders might afford opportunity to reconnoiter the Marshall Islands without provoking Japan).
- (5) Protection of outlying islands. This will require the following:
 - (a) Establish defense battalions at Midway and Samoa and smaller units at Johnston, Wake, Palmyra and Canton.
 - (b) Maintain submarine patrols at all the above-mentioned islands, except Samoa.
 - (c) Despatch two submarines, plus the ORTOLAN, for the defense of Unalaska.
 - (6) Adjust U. S. Fleet training to war conditions.

Additional Measures if Japan enters War

- [5] (7) Make initial sweep for Japanese merchantmen and raiders in the Northern Pacific.
 - (8) Establish submarine patrols in the Marshall Islands, withdrawing them from own outlying islands as necessary.
 - (9) Make early reconnaissance in force of the Marshall Islands. Thereafter conduct a general surveillance of that area and make raids on forces, material installations, and communications therein.
 - (10) Make periodic sweeps toward the Marianas and Bonins.
6. It will, of course, be realized that the effectiveness with which the tasks set forth above can be prosecuted is dependent upon the forces available, especially after the withdrawal of the Atlantic reinforcements. If a carrier is to be included in the Atlantic reinforcement, one of the LEXINGTON class should be

selected due to difficulties of handling in Pearl Harbor. There is, however, definite need for all four carriers under the tasks assigned this fleet.

7. In connection with the execution of the foregoing tasks, and with particular reference to the early initiation of offensive operations, it must be pointed out that the existing deficiencies in the defenses of Oahu and in the Local Defense Forces of the Fourteenth Naval District impose a heavy burden on the Fleet for purely defensive purposes. Ideally, a Fleet Base should afford refuge and rest for personnel as well as opportunity for maintenance and upkeep of material installations. When Fleet planes; Fleet guns and Fleet personnel are required to be constantly ready for defense of its own Base, the wear and tear on both men and material can not but result in impaired readiness for active operations at sea. The most outstanding deficiencies affecting this readiness of the Fleet are:

[6] (a) The critical inadequacy of A. A. guns available for the defense of Pearl Harbor, necessitating constant manning of ships' A. A. guns while in port.

(b) The small number and obsolescent condition of land-based aircraft, necessitating constant readiness of striking groups of Fleet planes and use of Fleet planes for local patrols.

(c) Lack of suitable local defense vessels for the Fourteenth Naval District, necessitating detail of Fleet units to this duty. The detail of Fleet units to this duty not only results in loss, to the Fleet, of the availability of important vessels, but also results in the forced employment of ships whose more valuable characteristics will be largely wasted due to the nature of their tasks. This is particularly true where destroyers must be diverted to local A/S patrol, off-shore patrol and local escort. These duties could better be performed by submarine chasers, converted gunboats and converted escort vessels.

(d) Lack of aircraft detection devices ashore.

8. It is considered imperative that immediate measures be undertaken to correct the critical deficiencies enumerated above. It is further believed that these measures should take priority over the needs of continental districts, the training program, and material aid to Great Britain.

[7] 9. It is recommended that the Alaskan and Hawaiian reinforcements referred to in paragraph 2103 (a) (5) of W. P. L. 44 (advance copy) be dispatched as soon as possible in order that necessity for heavy escort may not embarrass the U. S. Pacific Fleet in its later operations.

10. This letter has been prepared in collaboration with the prospective Commander-in-Chief, U. S. Pacific Fleet, Rear Admiral H. E. Kimmel, U. S. N. It represents his, as well as my own, views.

J. O. RICHARDSON.

Copy to: Rear Admiral H. E. Kimmel.

Washington, 24 July 1941.

DEAR MUSTAPHA: Haven't much to write about; as a matter of fact the letter I dictated to Tommie Hart this morning contains what little I have and it is darned little I admit.

This is more just to let you know I am thinking about you than anything else. We are pushing recruiting just as hard as we can and for budgetary purposes you will be glad to know the President has okayed a figure of 533,000 enlisted men and 105,000 marines. Please give us a "not too badly done" on that. But what a struggle it has been. If we could only have gone full speed two years ago but that is water over the dam and I am only hoping and praying we can take care of what we have in sight to man.

I have asked Blandy to acquaint you with the trouble Tommie Hart has had with his mines firing after having been down several hours.

Believe it or not, except for a day or two of scorching heat, we are having delightful summer weather in Washington. However, my fingers are crossed as it is only July.

1352 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Am sending under separate cover a copy of the August number of "Coronet". Be sure and unfold the picture of the mountain mirror on page 88. Mrs. Hull said I should make sure you did not overlook it.

All good wishes

Sincerely,

BETTY.

Admiral H. E. KIMMEL,

*U. S. Navy, Commander in Chief, U. S. Pacific Fleet, "USS Pennsylvania,"
c/o Postmaster, San Francisco, California.*

[SECRET]

24 JULY 1941.

DEAR TOMMIE: Things are happening out your way and according to schedule from dope we have had in the last couple of weeks.

Yesterday, before Nomura went to the State Department, I had a two-hour talk with him; very interesting, as my previous talks with him have been, and of course he is worried. I believe him to be genuinely sincere in his desire that Japan and the United States do not come to an open rupture. Of course, I have that same desire, but there are many flies in the ointment, and in my talks with him I have not minced matters one particle, or minimized the difficulties, or in any way condoned Japan's present course of action, or hesitated to discuss perfectly frankly the shallowness of some of the reasons she is putting out in defense of her actions. We have had very plain talk. I like him and, as you know, he has many friends in our Navy. Nomura dwelt at length on his country's need for the rice and the minerals of Indo-China. My guess is that with the establishment of bases in Indo-China, they will stop for the time being, consolidate their positions, and await world reaction to their latest move. No doubt they will use their Indo-China bases from which to take early action against the Burma Road. Of course, there is the possibility that they will strike at Borneo. I doubt that this will be done in the near future, *unless* we embargo oil shipments to them. This question of embargo has been up many times and I have consistently opposed it just as strongly as I could. My further thought is that they will do nothing in regard to the Maritime provinces until the outcome of the German-Russian war on the continent is more certain. If Russians are well beaten down, I think it highly probable that they will move into Siberia. Meanwhile, they are merrily going their way and just where it all will end I do not know.

I had a talk with the President after the Cabinet meeting last Friday and again yesterday after my chat with Nomura, and have succeeded in securing an appointment with the President for him today. I hope no open rupture will come, particularly at this time, but it would be wishful thinking to eliminate such a possibility or to think that conditions are getting better rather than worse. However, we can still struggle for something better, and I want you to know that I am.

Your people who have been laying mines must have had an interesting time, but just about the trouble the cause is in a conundrum still. B—— went to work on it and did not stop for several hours. I hope the despatch case you might give some clue but, of course, we shall be very appreciative until we know. I mentioned it to Admiral Moore of the British Navy who was in here yesterday, and he said that they had the same trouble some time back and found the cause in a defective joint which permitted salt water to set up electrolytic action with sufficient current to fire the mine, and had to recall all the mines that were made in that particular lot. Of course, our mines had not probably had that trouble, and I hope the trouble will be found in faulty assembly which can be readily cured. Any way, here's hopin'.

I was disturbed no end to learn that some of your net equipment had not arrived at Cavite. As soon as we got your despatch, I immediately put Ray Spear on the job. We got in touch with Johnny Greenslade and found that eight (8) carloads of the flotation barrels had been loaded in the Navy Cargo Ship HERCULES (This ship is being operated by the Eastern Lines as agents for the Navy Department), due to depart from San Francisco July 20. He also found there were seven (7) carloads of barrels enroute, by rail, due to arrive in the San Francisco area on July 20. Arrangements were made to delay the sailing of the ship a day in order to load this additional shipment on board. This has been done, and the ship sailed on July 21 and is due to arrive at Cavite on August 10.

With the arrival of these barrels, you will have all but 250, which are destined for the 16th Naval District. The Bureau of Produce is doing its utmost to get these moving. The contractor (a firm in Conshohocken, Pennsylvania) has fallen down on deliveries. They undertook to deliver 100 per day. So far, they have only been able to deliver about half that number. Ordnance informs me that the 250 drums will leave Conshohocken some time this week.

You are now undoubtedly familiar with the Iceland situation, and I am glad to say the Force is back, and just when the next contingent will go has not yet been decided. In both the Far East and the Atlantic, there is plenty of potential dynamite.

I may say that the State Department still agrees about the gunboats remaining in China, but of course it is my understanding that they could not well be removed at this season anyway.

I wish I had more small craft to send you for District service, and that goes for practically every District we have. The small boat program was one of the most difficult I had to get authorized and to get money for. We have several hundred District craft under construction but, like everything else, time is a vital factor. We are just doing the best we can with this proposition. The craft we have converted have been expensive, costly of upkeep, and not too satisfactory, though I am hoping they will get by until replaced by better material.

I think I previously told you I have been pressing for months to take over the Coast Guard, but Morgenthau has successfully resisted until finally he has given way in certain spots; for example, he has just consented to turn over the Coast Guard in the Hawaiian Area to our control. Also, we hope to get seven of their large cutters, which will help a great deal in the Atlantic where King is pressed to the limit to perform the tasks given him. I am trying to get their 165-foot craft which also should be of assistance in the 14th Naval District. Waesche, Head of the Coast Guard, sees everything from our standpoint and is a great help. Mr. Morgenthau in many ways has been more than helpful to the Navy Department, but when it comes to letting go of the Coast Guard, he draws in. However, we shall keep on trying.

I am late now for a conference, and I don't know if I had a lot of time I could really give you anything worth while, but I feel a little remiss if I don't drop you a line.

Harry Yarnell is here and said he saw Caroline recently and that she is fine. My little brood are all well.

With every good wish in the wide world to you as always.

Sincerely,

Admiral T. C. HART, USN,
Commander in Chief, Asiatic Fleet,
USS "HOUSTON",
% Postmaster, San Francisco, California.

OP-10 Hu

NAVY DEPARTMENT,
OFFICE OF THE CHIEF OF NAVAL OPERATIONS,
Washington, 2 August 1941.

DEAR KIMMEL: I am grateful for your letter of the 26th of July. We shall go after it paragraph by paragraph but it may take a little time. It is a good summary and we are glad to get an occasional check of this sort.

Also would be glad if you could give us occasionally a little personnel interest as well as material and I would more than welcome a little conversational "thinking out loud" on how the morale of the Fleet is holding, how the visits to the West Coast are working out from that standpoint, how the target practices are coming along, etc., etc.

We have no one at the front in the Russian-German war though both the Army and Navy have made every effort to this end. From the press, therefore,

1354 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

you have about as much information as we have. There is no doubt that the Germans are behind schedule and there is no doubt they are willing to pay the price where the stakes are worth it. The next month or six weeks should clarify the picture.

I have written to Savvy Cooke who has been good enough to write me occasionally giving me his ideas which, as you know, I value so highly, having gotten the habit when he was heading War Plans here. I am always glad to hear from him. I have asked Savvy to show you my letter if he thinks there is anything in it worth while.

Keep cheerful.

Admiral H. E. KIMMEL,

*U. S. Navy, Commander in Chief, U. S. Fleet,
USS "Pennsylvania,"
Pearl Harbor, T. H.*

[SECRET]

Op-10 Hu

31 JULY 1941.

DEAR SAVVY: I am grateful to you for your letters and hope that regardless of the unsatisfactoriness of my answers or my failure to answer, you will continue to write;—it seems like old times.

This is going to be short and general. I think you should burn it after showing it to Kimmel.

Some of the things that you have asked, and some of the things which Kimmel has recently asked, and which I will answer as soon as I can, are things for which I have been striving to get answers in Washington. The press on many of these points really gives you as much information as I have.

Within forty-eight hours after the Russian situation broke, I went to the President, with the Secretary's approval, and stated that on the assumption that the country's decision is not to let England fall, we should immediately seize the psychological opportunity presented by the Russian-German clash and announce and start escorting immediately, and protecting the Western Atlantic on a large scale; that such a declaration, followed by immediate action on our part, would almost certainly involve us in the war and that I considered every day of delay in our getting into the war as dangerous, and that much more delay might be fatal to Britain's survival. I reminded him that I had been asking this for months in the State Department and elsewhere, etc, etc, etc. I have been maintaining that only a war psychology could or would speed things up the way they should be speeded up; that strive as we would it just isn't in the nature of things to get the results in peace that we would, were we at war.

The Iceland situation may produce an "incident". You are as familiar with that and the President's statements and answers at press conferences as I am. Whether or not we will get an "incident" because of the protection we are giving Iceland and the shipping which we must send in support of Iceland and our troops, I do not know. Only Hitler can answer.

The Far Eastern situation has been considerably changed because of the entrance of Russia into the picture.

Personally, I threw into the arena that we consider along with the British a joint protectorate over the Dutch East Indies, as a move calculated to prevent further spread of war in the Far East. It is a debatable question. Certainly there can be no joy in our camp over the occupation of Indo-China. I think it is fairly safe to say opinion here in general holds that Japan will not go into the N. E. I. Incidentally, we are not nearly so dependent on raw materials from the Near East as the Public envisages. The real problem is a British one and hence our consideration.

As you probably know from our despatches, and from my letters, we have felt that the Maritime Provinces are now definitely Japanese objectives. Turner thinks Japan will go up there in August. He may be right. He usually is. My thought has been that while Japan would ultimately go to Siberia, she would delay going until she had the Indo-China-Thailand situation more or less to her liking and until there is some clarification of the Russian-German clash. Also she may concentrate on the China "incident". Of course, embargoes or near embargoes may cause any old kind of an upset and make a reestimate of the situation necessary.

Regarding the Philippines, as you know, even since I came here I have urged increasing their defenses. The Navy's contribution has not been great, but it has been about all Hart can handle with the facilities he has or which we have been able to make available. Still, the increase is a factor, namely 26 PBYS and 11 modern submarines.

We are delighted with the Army move putting the Filipinos in harness; we recommended this. Also it is being supplemented by a considerable number of planes, fighters and bombers. The Philippines are not too easy a proposition to crack right now, and in a couple of months the Army will have 50,000 odd men there under arms. But that is two months away.

As for sending the Fleet to the Far East, I still have literally to fight for every auxiliary ship I get. Tonnage now making the British Isles is less than they need for their maximum effort. There just isn't enough shipping in the world to go around. If we cannot properly support the Near East and the British Isles, it is obvious we could not support our Fleet in the Far East, unless we very greatly slowed up in the Atlantic.

Our trade with South America has been greatly restricted and the pressure from there is another thing I have to contend with.

Recently we asked for some small ships of very moderate draft to supply our forces in Iceland. We simply had to get them, but were told we would have to give up an equivalent tonnage from our recent acquisitions with which I think you and Kimmel are familiar and among which, for example, are the four transports to train marines on the West Coast plus AKs, AEs, AFs, etc. etc. Thank the good Lord, I was able to get the President to hold this in abeyance pending a chance for Jerry Land and me somehow or other, to work it out without taking anything away from the Navy.

Whenever we have a tanker available for ten days or so, we immediately try and help Maritime out. If we send something anywhere and the ship is coming back with any space available we offer Maritime the spare cargo space. The world shipping situation is plain rotten. Sometimes I wonder that with the opposition we have had, (and it is good, intelligent opposition) that we have gotten as far as we have. If any of our cargo ships are coming from Hawaii to the Coast light, we should offer the space to Maritime.

The pressure, incidentally, to give what we have in ships, guns, ammunition, material, and whatnot, to those actually fighting is constant, and increasing. Several times recently I have been approached for destroyers and the Lord knows whatnot. Marshall's troubles in this respect are legion and of course the fellow at the front wants frequently what we most lack, particularly such things as 50 caliber ammunition, anti-aircraft weapons, patrol vessels, fire control, guns for merchant ships, etc. etc.

Do not think for a minute that I am not terribly disturbed about our lack of Radar on which I started pushing the scientific gang before I had been here a month, and also the production gang, so that I should think they would hate to hear me mention the subject.

Mike Robinson called me up this morning and said he was sending me a twelve page explanation of what they have done in the last year. From the Fleet standpoint and mine, and of course from Mike's too, we all want more tangible evidence. The fact that our new aircraft carriers will not be available until 1944 is something that is awfully hard to stomach, and I confess to considerable indigestion because of it, but whether or not there is a suitable remedy, I do not know.

The converted LONG ISLAND is promising for her size, in fact better than we had hoped for. We have six more converting which will have much longer decks and be superior in every way. We are keeping at this as a stop-gap but here again it was not easy to get the ships. They will, in all probability, go to the British, if we are not in the war when they are completed. In fact we are doing the work on Lend-lease.

I have been much distressed over the operating troubles we have had with our new planes. Of course they are gradually being eliminated but it takes time. I still am glad for the 200 PBY repeats we early made and which are coming along. Of course they haven't got what the later ones will have in range and performance, etc. Also, performance will be handicapped by armor and protective features; but we will have them, and they have not delayed the newer models.

Towers will have given you all the picture on the air game. He went out a good deal at my insistence. With regard to the air, I know also that the

training situation has been a good deal of a nightmare. If anybody can convince us of a better solution than the one we recently sent out, we would be glad to get it.

To some of my very pointed questions, which all of us would like to have answered, I get a smile or a "Betty, please don't ask me that." Policy seems to be something never fixed, always fluid and changing. There is no use kicking on what you can't get definite answers. God knows I would surrender this job quickly if somebody else wants to take it up and I have offered to, more than once. Some generous souls have been charitable enough to ask me to stick. I shall, as long as I think I can be of use, or rather that they think so.

We are doing what we can for China and taking unheard of chances on neutrality; or rather unneutrality. This along with sanctions on Japan make her road certainly not less easy.

Reverting to Japan again and to her holding off in Siberia until the Russian-German situation somewhat clarifies, I also think it possible, if not probable, that one of the reasons for Indo-China, and her pressure on Thailand, is a better position for an "all out" to clean up in China. I take my hat off to the Chinks.

As to the war and what people in this country are thinking; I hesitate to say. However, I believe that the proportion of our population which feels we should enter this war is relatively small, and that with the majority it is still more or less an academic question, perhaps largely because of its distance from us. Whether or not that sentiment might change over night, I don't know.

We are somewhat of a volatile people but I am afraid that the many events which have happened with no resultant definite action on our part, are having their effect. Had the Tutulla been hit and sunk it might have created a wave of public opinion which would have meant something. As it is, nobody seems to give much of a damn about it, although the principle involved is the same, even though there was no loss of life, or sinking. On the other hand, I believe the people would follow the President in any positive action—such as escort—which he might take.

We shall give aid to Russia. I hope she and Germany may break upon each other. Europe dominated by the Communists is no more an attractive picture, and in fact less so, than a Europe dominated by the Nazis. Here's hoping we have neither, but rather that they both exhaust themselves. However, nothing, to date, has shaken my original estimate that the Germans will take their limited objectives. She is having much more difficulty than she anticipated. Of course I could hope the cost will be crippling. Only time will tell.

I have urged propaganda whenever we could use it, particularly in South America, in France and in Africa. French Africa still has a semblance of independence against anyone who may attack it. There is no doubt in my mind that the Germans could have cleared up in the Near East had they gone in that direction instead of to Russia. What will follow the Russian campaign is still a question mark. Certainly British strength is far from what it should be in the Near East area.

Believe it or not, I am still keeping cheerful, doing the best I can; chafing that I can not do more and wide open to suggestion.

Before you destroy this letter I would be glad, if you think there is anything of interest in it, to have Admiral Bloch as well as Admiral Kimmel look over it; in fact I was going to write Kimmel, so will let this partly serve.

Will not attempt to edit this "thinking out loud" on a busy morning. Please be charitable as to its lack of continuity, etc. etc.

With all good wishes— and good luck.

Sincerely,

Captain CHARLES M. COOKE, Jr., USN,

USS "PENNSYLVANIA," c/o Postmaster San Francisco, California.

P. S. I apologize for the "short" in the second paragraph. Just got to rambling.

P. S. #2. On second thought, I am enclosing an extra copy of this for Kimmel which he can show to Admiral Bloch, though I confess one fellow's estimate is as good as another and I really wonder whether this letter is worth while, but anyway, as you know, it comes with all good wishes and good luck to you all.

Obviously, the situation in the Far East continues to deteriorate; this is one thing that is factual.

Keep cheerful.

One more P. S.—I am sending Kimmel the copy of this letter. When I got to thinking out loud I was really talking to you all including Admiral Hart, to whom I am also sending a copy.

H. R. S.

[NOTE.—The interested party, Admiral Harold R. Stark, U. S. N., respectfully directs the attention of the Court to Exhibit 72, which is a personal letter dated 2 August 1941 from Admiral Harold R. Stark, U. S. Navy, to Admiral Husband E. Kimmel, U. S. Navy, enclosing a copy of a letter to Captain Charles M. Cooke, Jr., U. S. N. The interested party considers that this letter contains certain matters coming within the purview of Section 261 (a) of Naval Courts and Boards, which provides that a witness may be privileged with respect to certain testimony, among the principal cases of privilege being:

"(a) *State secrets*.—This class of privilege covers all the departments of the Government, and its immunity rests upon the belief that the public interests would suffer by a disclosure of state affairs. The scope of this class is very extended, and the question of the inclusion of a given matter therein is decided by a consideration of the requirements of public policy with reference to such matter."

If the interested party had been asked to read this letter into his testimony, he would have declined as a matter of personal privilege involving the disclosure of state secrets to read the following:

The second, third and fourth sentences in the fifth paragraph on page 4 of the enclosure to Captain Cooke.

The interested party respectfully requests that this statement be conspicuously attached to the copy of Exhibit 11, which the Judge Advocate proposes to place in the secret files of the Navy Department.

The interested party considers that the disclosure of the parts of this letter mentioned above would be detrimental to the interests of the United States and contrary to public policy.]

EXHIBIT No. 73

SECRET

NAVY DEPARTMENT,
OFFICE OF THE CHIEF OF NAVAL OPERATIONS,
Washington, April 3, 1941.

In reply refer to Initials
and No.

Serial 038612.

From: The Chief of Naval Operations.

To: The Commander in Chief, U. S. Pacific Fleet.

The Commander in Chief, U. S. Asiatic Fleet.

The Commander in Chief, U. S. Atlantic Fleet.

Subject: Observations on the present international situation.

1. You are requested to disclose the contents of this letter to your seconds in command and to your chiefs of staff, and to no other persons.

2. Staff conversations with the British have been completed and a joint United States-British war plan drawn up. Two copies of the Report (Short title ABC-1) of these conversations are being supplied each addressee by officer messenger. Navy Basic War Plan Rainbow No. 5, founded on the United States-British plan, is in preparation and will be distributed at an early date. The general nature of Rainbow No. 5 will become evident to you upon perusal of the joint Report. This Report has been approved by the Chief of Staff of the Army and by myself, and, at an appropriate time, is expected to receive the approval of the President. You are authorized to discuss matters pertaining to Rainbow No. 5 with other officers of the Army and the Navy, as may be appropriate.

3. The basic idea of the United States-British plan is that the United States will draw forces from the Pacific Fleet to reenforce the Atlantic Fleet, and that the British will, if necessary, transfer naval forces to the Far East to attempt to hold the Japanese north of the Malay Barrier. The U. S. Asiatic Fleet would not be reenforced, but would be supported by offensive operations by the U. S. Pacific Fleet.

4. From the viewpoint of the defense of the United States national position, the proposed naval development gives adequate security in case the British Isles

should fall. From the viewpoint of bringing immediate heavy pressure in the Atlantic, which we consider the decisive theater, the plan leaves something to be desired in the initial stages of the war.

5. The difficulties are our present uncertainty as to Japanese action, and British insistence on the vital importance of holding Singapore, and of supporting Australia, New Zealand, and India. Their proposals, which I rejected, were to transfer almost the whole of the Pacific Fleet to Singapore to hold that position against the Japanese. In my opinion, the result of such a move on our part would almost surely be a British defeat in the Atlantic, and, thereafter, a difficult period for the United States. I have agreed to the present plan for the initial stages, but have insisted that the deployment at any one time must depend upon the situation which exists at that time. Elasticity and fluidity of planning are therefore assured.

6. There seem to be two principal dangers which immediately threaten the United Kingdom. The first is the very grave threat to its sea communications from submarines, aircraft, and raiders. The recent activity of the large German naval raiders foreshadows a wider, and even weaker, deployment of British surface forces capable of dealing with such raiders. The British are badly deficient in anti-submarine escort craft, and have as yet devised little defense of convoys and single ships against heavy bombers. Shipping is now being lost about three times as fast as it can be replaced. The only remedy, in my opinion, is a radical strengthening of the defense against all three forms of shipping attack, by greater forces and new ideas, to such an extent that the hazard to the attackers will be too great for them to overcome. The entire United States naval strength could be usefully employed in the Atlantic, were it to become possible to send it there.

7. The second great danger is the continued deterioration of British production and morale through heavy bombing. This will become more serious as shipping losses become greater. At the same time the situation in the Mediterranean might become dangerous at any time; on the other hand, in spite of uncertainties, favorable elements are visible in that theater.

8. The Japanese attitude will continue to have an extremely important bearing on the future of the war in the Atlantic. For some time past, Japan has shown less and less inclination to attack the British, Dutch, and ourselves in the Far East. Her people are distinctly tired of the war in China and of the privations they now must undergo. Whether Matsuoka's visit to Berlin and Rome will strengthen the wish of some of them to help Germany, or will deepen their caution against rash action, may be disclosed within the next month. I advise you to watch this situation keenly.

9. Unquestionably the concentration of the U. S. Pacific Fleet in Hawaii has had a stabilizing effect in the Far East. I am more and more of opinion that Japan will hesitate to take further steps, perhaps even against Indo-China, so long as affairs do not go too badly for Britain. What the effect on her would be were the United States to transfer a large part of the Pacific Fleet to the Atlantic can, as yet, be only surmised. In any case, we shall rigidly avoid making any indication that we contemplate such a transfer until the last possible moment.

10. The question as to our entry into the war now seems to be *when*, and not *whether*. Public opinion, which now is slowly turning in that direction, may or may not be accelerated. My own personal view is that we may be in the war (possibly undeclared) against Germany and Italy in about two months, but that there is a reasonable possibility that Japan may remain out altogether. However, we can not at present act on that possibility.

11. Your Operating Plans for Navy Basic War Plan Rainbow No. 3 will, with little change, be equally effective for Rainbow No. 5. I advise you to study the Report of the staff conversations in order that you will be in a position to issue your new plans as soon as practicable after receipt of the new Basic Plan, and, if war comes before you receive it, so that you can promptly modify your present orders.

12. In the meantime, I advise that you devote as much time as may be available to training your forces in the particular duties which the various units may be called upon to perform under your operating plans. The time has arrived, I believe, to perfect the technique and the methods that will be required by the special operations which you envisage immediately after the entry of the United States into war.

H. R. Stark.
H. R. STARK.

cc: Rear Admiral Ghormley.

EXHIBIT No. 74

In reply refer to Initials and No. Op-10D-MD

NAVY DEPARTMENT,
OFFICE OF THE CHIEF OF NAVAL OPERATIONS,
Washington, November 7, 1941.

DEAR MUSTAPHA: This is in reply to your letter of October 22, 1941. It was fine to hear from you and to learn that you are in fine fettle.

Ok on the dispositions which you made in connection with the recent change in the Japanese Cabinet. The big question is—What next?

I note the great desirability of *many* things for the Pacific Fleet—particularly destroyers and cruisers. We *just* haven't *any* destroyers or cruisers to give you at the moment, nor is the prospect bright for getting any for you in the near future. I fully appreciate your need for them. We could profitably employ twice the number we now have if they were available. I will not burden you with a recital of King's troubles, but he is up against it for DDs for escort—and defense against raiders.

The NORTH CAROLINA and WASHINGTON are not expected to be available before March. As pointed out in my letter of September 23, 1941, I do not think any *permanent* assignment of either, or both of these ships can be made at this time. *We are assigning them to King now in the interest of training—servicing, etc.*

With the possible exception of one division, it is our intention to send the long-range submarines to the Pacific as they come along. As you no doubt know, twenty-seven (27) of the 1525-ton SS are due for completion in calendar 1942.

Due to the urgency for providing the destroyers of the Atlantic Fleet with high-speed anti-submarine searching equipment, 27 of the 29 Model QC retractile domes and projectors have been diverted from mine craft of the Pacific Fleet and Local Defense Force destroyers in the Pacific to the Atlantic Fleet. Inasmuch as the power stacks, controls, etc., for the 29 QC equipments need not be installed in the Atlantic Fleet, it will be necessary for the manufacturer to produce only 27 additional retractile domes and projectors in order to complete the QC equipments required for the ships from which the equipment has been diverted. The Bureau of Ships is being requested to expedite procurement of the additional domes and projectors. This additional procurement should not require a great deal of time since the manufacturer is tooled for this production.

Two of the original order of 29 complete QC equipments will be delivered to the Pacific Fleet. Additionally, two preliminary models (one at Mare Island and one at Norfolk) can be made available to Commander-in-Chief, Pacific Fleet, as soon as installation plans for this new type of retractile dome equipment can be completed by the Navy Yards concerned.

I note your criticism of the Gunnery Radar. The Model FA fire control RADAR is the first production equipment for the Navy. This equipment is unsatisfactory because of its low-power output and the short life of the vacuum tubes. Only ten production models were manufactured; these were manufactured for the purpose of tooling the shops for later and improved models and to act as "stop-gap" equipment until an improved model could be developed and manufactured. The FA equipment was installed in eight HONOLULU Class CLs, WICHITA, and Radio Materiel School, Bellevue.

The improved fire control equipment is the Model FC. This equipment employs magnetron generators and has a very much higher powered output. It should be understood, however, that because of the high frequencies used by fire control RADAR, long ranges on aircraft cannot be obtained. The long range aircraft detection equipment is intended to be used for the purpose of tracking aircraft until the aircraft are within range of the fire control RADAR. Fire control RADAR will detect and range on aircraft at ranges greatly in excess of the ranges of the antiaircraft guns.

Relative to the two Seatrain vessels which we recently acquired and which are now undergoing conversion for use in transporting aircraft, they now have readiness dates of December 2nd and December 16th. It is our present intention to assign one to the Train of the Atlantic Fleet and one to the Base Force, Pacific, but if we have to send planes to the Near East, we may have to use these ships for this purpose. *We are also going to take over the remaining other 3 vessels of this type and propose to use them un-converted for anticipated transport of*

1360 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

planes to Europe—Russia—China—? May have to charter them rather than take them over—in order conserve Navy personnel.

Your study of the installations and defenses of Wake, Midway, Johnston, and Palmyra arrived in the Department yesterday. It is being routed to War Plans for study. I had an opportunity to skim through it hurriedly, and it looked like a very good paper. It will be of such help to us.

In connection with the aircraft routes to the Orient via a southerly detour, I am enclosing a copy of a letter which I wrote to Admiral Bloch.

Admiral Lyster, the Fifth Sea Lord, recently visited us. He is quite a chap and impressed us as knowing his job, and being a very able officer. I am enclosing, as being of possible interest to you, copies of the notes which he gave to us as a result of his observations on the manner in which we employ our aircraft.

In addition, I am sending a copy of the notes made by Captain Lord Louis Mountbatten as the result of his observations in the fleet. He, too, impressed me as being a very capable officer. I am sure much good will result from the observations of both of these officers.

Things seem to be moving steadily towards a crisis in the Pacific. Just when it will break, no one can tell. The principle reaction I have to it all is what I have written you before; it continually gets "worse and worse"! A month may see, literally, most anything. Two irreconcilable policies can not go on forever—particularly if one party can not live with the set up. It doesn't look good.

All good wishes.

Sincerely,

BETTY.

Admiral H. E. Kimmel, U. S. N.,

USS PENNSYLVANIA

c/o Postmaster, San Francisco, California.

British movement of BB to far east area—I hope—will be completed in December.

Apparently Admiral Pratt had put in a good word for me to the Chief of (Naval) Operations, for ever since I assumed this post, I have been shown many courtesies by him. His opinions concerning U. S.-Japanese relations coincide with mine; he once told me that the only result of a war between the two countries would be mutual exhaustion.

Once while conversing with the Admiral (Stark) I happened to mention that it seemed to me that the higher officials in the Navy Department here seemed to be men of excellent character and qualifications.

To this, the Admiral replied that both the Assistant to the Chief of Naval Operations and the Director of War Plans were exceedingly able men. The same is true of the Chief of the Bureau of Aeronautics. As for the fleets, he continued, both Kimmel and King were recommended by him, and both are of the highest caliber. Although Hart had reached the age of retirement, he had been kept on in active duty because of the critical times, he added.

Please relay this information to the Navy.

I had an interview with Rear Admiral TURNER. If I sum up what he told me, it is this:

"What the United States wants is not just a pretense but a definite promise. Should a conference of the leaders of the two governments be held without a definite preliminary agreement, and should, in the meantime, an advance be made into Siberia, the President would be placed in a terrible predicament. Japan speaks of peace in the Pacific and talks as if she can decide matters independently, and so it would seem to me that Japan could set aside most of her obligations toward the Three-Power Alliance. As to the question of withdrawing or stationing troops, since it is impossible to withdraw troops all at once, it would seem that a detailed agreement could be arranged between Japan and China for a gradual withdrawal."

He speculated on the various difficulties which Japan had to face internally. It seems that this opinion of his has also been given to the Secretary of State.

From: Tokyo (Toyode).**To: Washington.****October 16, 1941.****Purple (CA).****#671.**

Although I have been requested by both the German and Italian Ambassadors in Tokyo to give them confidential information on the Japanese-American negotiations, I have, in consideration of the nature of the negotiations, been declining to do so. However, early this month, following the German attacks on American merchant ships and the consequent (revival?) of the movement for the revision of the Neutrality Act, the German authorities demanded that the Japanese Government submit to the American Government a message to the effect that the Japanese Government observes that if the ROOSEVELT Administration continues to attack the Axis Powers increasingly, a belligerent situation would inevitably arise between Germany and Italy on the one hand and the United States on the other, and this would provide the reasons for the convocation of the duties envisioned in the Three Power agreement and might lead Japan to join immediately the war in opposition to the United States. We have not, as yet, submitted this message because, in view of the Japanese-American negotiations, we found it necessary to consider carefully the proper timing as well as wording of the message. The German authorities have been repeatedly making the same request and there are reasons which do not permit this matter to be postponed.

From: Berlin.**To: Tokyo.****1 October 1941.****(Purple).****#1198.**

On this the occasion of the first anniversary of the Tripartite Pact, Foreign Minister Ribbentrop has come to Berlin from the Imperial Headquarters especially and I have had several visits with him. Using this opportunity I, and the other members of the staff, have mingled with people from all classes of society and visited with them. I am endeavoring to sum up all these experiences and analyze the present state of feeling toward Japan held by Germany in this report to you.

1364 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

1. Ribbentrop said that he had absolute proof that, while reports of the content of the Japanese-American negotiations were withheld from Ambassador Ott, America was in secret communication with England in regard to the Japanese-American negotiations. Even Ribbentrop who is supposed to understand Japan's position, expressed great dissatisfaction regarding Japan's attitude.

2. That the Foreign Office staff from Weizsacker down and also everyone in general were thoroughly disgusted with Japan was very apparent from their attitude toward myself and other members of the staff. Everyone who feels kindly disposed toward Japan is deeply concerned over this state of affairs. Even those who do not come to the same conclusion that Ambassador Ott did in his telegram are outspoken in their dissatisfaction and expression of pessimistic views. I am trying to take the position in interviews with newspaper correspondents and others concerned with the outside that Germany is cognizant of the Japanese-American negotiations and that they are no indication of an alienation between Japan and Germany.

3. Foreign diplomats and newspaper correspondents of third countries show great interest in the Japanese attitude and seem to consider it in a certain sense as a barometer by which the course of the European war can be judged. However we receive the impression that the greater number feel that Japan is avoiding war because of the impoverishment resulting from the China incident and is taking a pessimistic attitude toward the course of the European war.

4. Even though it might be said that Germany is prepared for these machinations of estrangement by third countries and that she is keeping up the pretence that there is no change in her feelings toward Japan, the fact that the feeling of German leaders and the people in general toward Japan is getting bad is one that cannot be covered. Please bear this fact in mind. If Japan takes a wishy-washy attitude and goes ahead with her negotiations without consulting Germany there is no telling what steps Germany may take without consulting Japan.

Please convey this to the army and navy.

Relayed to Rome.

I have already wired you something about my present psychology. I am sure that I, too, should go out with the former cabinet. I know that for some time the Secretary of State has known how sincere your humble servant is, yet how little influence I have in Japan. I am ashamed to say that it has come to my ears that this is the case. There are some Americans who trust this poor novice and who say that things will get better for me, but, alas, their encouragement is not enough. Among my confreres here in the United States there are also some who feel the same way, but, alas, they are all poor deluded souls. As for Your Excellency's instruction, WAKASUGI can carry them out fully. Nor do I imagine that you all have any objections. I don't want to be the bones of a dead horse. I don't want to continue this hypocritical existence, deceiving other people. No, don't think I am trying to flee from the field of battle, but as a man of honor this is the only way that is open for me to tread. Please send me your permission to return to Japan. Most humbly do I beseech your forgiveness if I have injured your dignity and I prostrate myself before you in the depth of my rudeness.

(Part 1 of 2)

1. I sent MOORE* to contact Senator THOMAS of the Senate Foreign Relations Committee and HULL. His report reads as follows:

"The United States is not bluffing. If Japan invades again, the United States will fight with Japan. Psychologically the American people are ready. The Navy is prepared and ready for action."

2. Yesterday evening, Sunday, a certain Cabinet member, discarding all quibbling, began by saying to me:

"You are indeed a dear friend of mine and I tell this to you alone." Then he continued: "The American Government is receiving a number of reliable reports that Japan will be on the move soon. The American Government does not believe that your visit on Monday to the President or the coming of Mr. KURUSU will have any effect on the general situation."

I took pains to explain in detail how impatient the Japanese have grown since the freezing; how they are eager for a quick understanding; how both the Government and the people do not desire a Japanese-American war; and how we will hope for peace until the end.

He replied, however:

"Well, our boss, the President, believes those reports and so does the Secretary of State."

* Frederick Moore—Legal Adviser to the Japanese Embassy in Washington.

SECRET

(Part 2 of 2)

In the newspapers and magazines, with the exception of the Daily News and the Hearst Papers, it is reported that the Americans are much more eager for a war with Japan than they are for one with Germany. It is said that some of the British are using this inclination for their own advantage and that already parleys have been started for joint Anglo-American action. Suggestions have already been made to the effect that it is necessary for some of the British fleet to be located in the Pacific. Now even if the President and other statesmen do not follow this trend, who can say how it will be? The friend I just spoke of told me that the United States cannot stop now because if Japan moves something will have to be done since it is a question of the United States saving its face.

1366 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

3. Well, in any case, I am going to see the President today and talk with him on the basis of your instructions. You may be sure that I will do my very best.

From NOMURA and KURUSU.

As we have wired you several times, there is hardly any possibility of having them consider our "B" proposal in toto. On the other hand, if we let the situation remain tense as it is now, sorry as we are to say so, the negotiations will inevitably be ruptured, if indeed they may not already be called so. Our failure and humiliation are complete. We might suggest one thing for saving the situation. Although we have grave misgivings, we might propose, first, that President ROOSEVELT wire you that for the sake of posterity he hopes that Japan and the United States will cooperate for the maintenance of peace in the Pacific (just as soon as you wire us what you think of this, we will negotiate for this sort of an arrangement with all we have in us), and that you in return reply with a cordial message, thereby not only clearing the atmosphere, but also gaining a little time. Considering the possibility that England and the United States are scheming to bring the Netherlands Indies under their protection through military occupation, in order to forestall this, I think we should propose the establishment of neutral nations, including French Indo-China, Netherlands India and Thai. (As you know, last September President ROOSEVELT proposed the neutrality of French Indo-China and Thai.)

Purple (Extremely urgent).

#1180. (Part 2 of 2)

We suppose that the rupture of the present negotiations does not necessarily mean war between Japan and the United States, but after we break off, as we said, the military occupation of Netherlands India is to be expected of England and the United States. Then we would attack them and a clash with them would be inevitable. Now, the question is whether or not Germany would feel duty bound by the third article of the treaty to help us. We doubt if she would. Again, you must remember that the Sino-Japanese incident would have to wait until the end of this world war before it could possibly be settled.

In this telegram we are expressing the last personal opinions we will have to express, so will Your Excellency please be good enough at least to show it to the Minister of the Navy, if only to him; then we hope that you will wire us back instantly.

#1189. (Part 1 of 2)

At 4:45 on the afternoon of the 26th I and Ambassador KURUSU met with Secretary HULL and we talked for about two hours.

HULL said, "For the last several days the American Government has been getting the ideas of various quarters, as well as conferring carefully with the nations concerned, on the provisional treaty proposal presented by Japan on the 20th of this month, and I am sorry to tell you that we cannot agree to it. At length, however, we feel compelled to propose a plan, tentative and without commitment, reconciling the points of difference between our proposal of June 21st and yours of September 25th." So saying, he presented us with the following two proposals:

A. One which seeks our recognition of his so-called "four principles."

B. (1) The conclusion of a mutual non-aggression treaty between Tokyo, Washington, Moscow, the Netherlands, Chungking and Bangkok.

(2) Agreement between Japan, the United States, England, the Netherlands, China and Thai on the inviolability of French Indo-China and equality of economic treatment in French Indo-China.

(3) The complete evacuation of Japanese forces from China and all French Indo-China.

(4) Japan and the United States both definitely promise to support no regime in China but that of CHIANG KAI-SHEK.

(5) The abolition of extra-territoriality and concessions in China.

SECRET

From: Washington (Nomura).
To: Tokyo.
November 26, 1941.
Purple. (Extremely urgent.)
#1189. (Part 2 of 2.)

(6) The conclusion of a reciprocal trade treaty between Japan and the United States on the basis of most favored nation treatment.

(7) The mutual rescinding of the Japanese and American freezing orders.

(8) Stabilization of yen-dollar exchange.

1370 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(9) No matter what sort of treaties either Japan or the United States has contracted with third countries, they both definitely promise that these treaties will not be interpreted as hostile to the objectives of this treaty or to the maintenance of peace in the Pacific. (This is, of course, supposed to emasculate the Three-Power Pact.)

In view of our negotiations all along, we were both dumbfounded and said we could not even cooperate to the extent of reporting this to Tokyo. We argued back furiously, but HULL remained solid as a rock. Why did the United States have to propose such hard terms as these? Well, England, the Netherlands and China doubtless put her up to it. Then, too, we have been urging them to quit helping CHIANG, and lately a number of important Japanese in speeches have been urging that we strike at England and the United States. Moreover, there have been rumors that we are demanding of Thai that she give us complete control over her national defense. All that is reflected in these two hard proposals, or we think so.

Re your #1189.*

Well, you two Ambassadors have exerted superhuman efforts but, in spite of this, the United States has gone ahead and presented this humiliating proposal. This was quite unexpected and extremely regrettable. The Imperial Government can by no means use it as a basis for negotiations. Therefore, with a report of the views of the Imperial Government on this American proposal which I will send you in two or three days, the negotiations will be de facto ruptured. This is inevitable. However, I do not wish you to give the impression that the negotiations are broken off. Merely say to them that you are awaiting instructions and that, although the opinions of your Government are not yet clear to you, to your own way of thinking the Imperial Government has always made just claims and has borne great sacrifices for the sake of peace in the Pacific. Say that we have always demonstrated a long-suffering and conciliatory attitude, but that, on the other hand, the United States has been unbending, making it impossible for Japan to establish negotiations. Since things have come to this pass, I contacted the man you told me to in your #1180^b and he said that under the present circumstances what you suggest is entirely unsuitable. From now on do the best you can.

Re my #844*.

We wish you would make one more attempt verbally along the following lines:

The United States government has (always?) taken a fair and judicial position and has formulated its policies after full consideration of the claims of both sides.

However, the Imperial Government is at a loss to understand why it has now taken the attitude that the new proposals we have made cannot be made the basis of discussion, but instead has made new proposals which ignore actual conditions in East Asia and would greatly injure the prestige of the Imperial Government.

With such a change of front in their attitude toward the China problem, what has become of the basic objectives that the U. S. government has made the basis of our negotiations during these seven months? On these points we would request careful self-reflection on the part of the United States government.

(In carrying out this instruction, please be careful that this does not lead to anything like a breaking off of negotiations.)

JD-1: 6921 SECRET (F) Navy trans. 30 Nov. 1941 (S-TT)

*JD-1: 6898 (SIS 25445) dated 28 Nov., in which Tokyo's first reaction to the new U. S. proposals castigates them as humiliating. When Japan sends a reply in 2 or 3 days giving its views on them the negotiations will be 'de facto' ruptured. However, do not give the impression that negotiations are broken off.

(NOTE: Following is a preliminary, condensed version of conversation between Ambassador Kurusu and the Japanese Foreign Office American Division Chief Yamamoto on Sunday night.)

KURUSU. "It is all arranged for us to meet Hull tomorrow. We received a short one from you, didn't we? Well, we will meet him in regard to that. There is a longer one coming isn't there? In any case we are going to see him about the short one." (i. e. telegram. The longer one is probably Tokyo's reply to Mr. Hull's proposals.)

YAMAMOTO. "Yes. I see."

KURUSU. "The President is returning tomorrow. He is hurrying home."

Y. "Is there any special significance to this?"

K. "The newspapers have made much of the Premier's speech, and it is having strong repercussions here."

Y. "Is that so?"

K. "Yes. It was a drastic statement he made. The newspapers carried large headlines over it; and the President seems to be returning because of it. There no doubt are other reasons, but this is the reason the newspapers are giving."

(Pause)

"Unless greater caution is exercised in speeches by the Premier and others, it puts us in a very difficult position. All of you over there must watch out about these ill-advised statements. Please tell Mr. Tani."

Y. "We are being careful."

K. "We here are doing our best, but these reports are seized upon by the correspondents and the worst features enlarged upon. Please caution the Premier, the Foreign Minister, and others. Tell the Foreign Minister that we had expected to hear something different, some good word, but instead we get this." (i. e. Premier's speech)

(After a pause, Kurusu continues, using voice code.)

K. "What about the internal situation?" (In Japan)

Y. "No particular—(one or two words faded out)—"

K. "Are the Japanese-American negotiations to continue?"

Y. "Yes."

K. "You were very urgent about them before, weren't you; but now you want them to stretch out. We will need your help. Both the Premier and the Foreign Minister will need to change the tone of their speeches!!!! Do you understand? Please all use more discretion."

Y. "When will you see them. The 2nd?"

K. "Let's see . . . this is Sunday midnight here. Tomorrow morning at ten. That will be Monday morning here."

(Pause)

"Actually the real problem we are up against is the effects of happenings in the South. You understand don't you?"

K. "Yes. Yes. How long will it be before the President gets back?"

K. "I don't know exactly. According to news reports he started at 4:00 this afternoon. He should be here tomorrow morning sometime."

Y. "Well then—Goodbye."

#986 (Strictly Secret) (To be handled in Government Code) (Part 1 of 2)
(Secret outside the Department).

1. Japan-American negotiations were commenced the middle of April of this year. Over a period of half a year they have been continued. Within that period the Imperial Government adamantly stuck to the Tri-Partite Alliance as the cornerstone of its national policy regardless of the vicissitudes of the international situation. In the adjustment of diplomatic relations between Japan and the United States, she has based her hopes for a solution definitely within the scope of that alliance. With the intent of restraining the United States from participating in the war, she boldly assumed the attitude of carrying through these negotiations.

2. Therefore, the present cabinet, in line with your message, with the view of defending the Empire's existence and integrity on a just and equitable basis, has continued the negotiations carried on in the past. However, their views and ours on the question of the evacuation of troops, upon which the negotiations rested (they demanded the evacuation of Imperial troops from China and French Indo-China), were completely in opposition to each other.

Judging from the course of the negotiations that have been going on, we first come to loggerheads with the United States, in keeping with its traditional ideological tendency of managing international relations, re-emphasized her fundamental reliance upon this traditional policy in the conversations carried on between the United States and England in the Atlantic Ocean. The motive of the United States in all this was brought out by her desire to prevent the establishment of a new order by Japan, Germany, and Italy in Europe and in the Far East (that is to say, the aims of the Tri-Partite Alliance). As long as the Empire of Japan was in alliance with Germany and Italy, there could be no maintenance of friendly relations between Japan and the United States was the stand they took. From this point of view, they began to demonstrate a tendency to demand the divorce of the Imperial Government from the Tri-Partite Alliance. This was brought out at the last meeting. That is to say that it has only been in the negotiations of the last few days that it has become gradually more and more clear that the Imperial Government could no longer continue negotiations with the United States. It became clear, too, that a continuation of negotiations would inevitably be detrimental to our cause.

(Part 2 of 2)

3. The proposal presented by the United States on the 26th made this attitude of theirs clearer than ever. In it there is one insulting clause which says that no matter what treaty either party enters into with a third power it will not be interpreted as having any bearing upon the basic object of this treaty, namely the maintenance of peace in the Pacific. This means specifically the Three-Power Pact. It means that in case the United States enters the European war at any time the Japanese Empire will not be allowed to give assistance to Germany and Italy. It is clearly a trick. This clause alone, let alone others, makes it impossible to find any basis in the American proposal for negotiations. What is more, before the United States brought forth this plan, they conferred with England, Australia, the Netherlands, and China—they did so repeatedly. Therefore, it is clear that the United States is now in collusion with those nations and has decided to regard Japan, along with Germany and Italy, as an enemy.

So far silence has been maintained here concerning our talks with the United States; however, now the results of our conference of the 26th are out and headlines like this are appearing in the papers: "Hull Hands Peace Plan to Japanese," and "America Scorns a Second Munich." The papers say that it is up to Japan either to accept the American proposal with its four principles, or face war, in which latter case the responsibility would be upon Japan.

This we must carefully note.

Furthermore, I would have you know that in replying to the recent American proposals, the Imperial Government is giving the most profound consideration to this important question which has to do with our national destiny." Under-Secretary of State WELLES said: "I am well aware of that." I continued: "We cannot overemphasize the fact that, insofar as Japan is concerned, it is virtually impossible for her to accept the new American proposals as they now stand.

Our proposals proffered on the 21st of June and the proposals of September 25th, representing our greatest conciliations based on the previous proposal, still stand. In spite of the fact that the agreement of both sides was in the offing, it has come to naught. At this late juncture to give thoughtful consideration to the new proposals certainly will not make for a smooth and speedy settlement of the negotiations. Recently, we promised to evacuate our troops from French Indo-China in the event of a settlement of the Sino-Japanese incident and the establishment of a just peace in the Far East. In anticipating the settlement of fundamental questions, the question of the representations of this date would naturally dissolve." The Under-Secretary assiduously heard us out and then said: "The American proposals of the 26th were brought about by the necessity to clarify the position of the United States because of the internal situation here." Then he continued: "In regard to the opinions that you have expressed, I will make it a point immediately to confer with the Secretary."

I got the impression from the manner in which he spoke that he hoped Japan in her reply to the American proposals of the 26th would leave this much room.

Judging by my interview with Secretary of State HULL on the 1st and my conversations of today, it is clear that the United States, too, is anxious to peacefully conclude the current difficult situation. I am convinced that they would like to bring about a speedy settlement. Therefore, please bear well in mind this fact in your considerations of our reply to the new American proposals and to my separate wire #1233*.

Indications are that the United States desires to continue the negotiations even if it is necessary to go beyond their stands on the so-called basic principles. However, if we keep quibbling on the critical points, and continue to get stuck in the middle as we have been in the past, it is impossible to

1376 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

expect any further developments. If it is impossible from the broad political viewpoint, to conduct a leaders' meeting at this time, would it not be possible to arrange a conference between persons in whom the leaders have complete confidence, (for example, Vice President Wallace or Hopkins from the United States and the former Premier Konoye, who is on friendly terms with the President, or Advisor to the Imperial Privy Council Ishii). The meeting could be arranged for some midway point, such as Honolulu. High army and navy officers should accompany these representatives. Have them make one final effort to reach some agreement, using as the basis of their discussion the latest proposals submitted by each.

We feel that this last effort may facilitate the final decision as to war or peace.

We realize of course that an attempt to have President Roosevelt and former Premier Konoye meet, failed, Bearing in mind the reaction to that in our nation, it may be to our interest to first ascertain the U. S. attitude on this possibility. Moreover, since we have no guarantee either of success or failure of the objectives even if the meeting is held, careful consideration should first be given this matter.

We feel, however, that to surmount the crisis with which we are faced, it is not wasting our efforts to pursue every path open to us. It is our opinion that it would be most effective to feel out and ascertain the U. S. attitude regarding this matter, in the name of the Japanese Government. However, if this procedure does not seem practical to you in view of some internal condition, then how would it be if I were to bring up the subject as purely of my own origin and in that manner feel out their attitude. Then if they seem receptive to it the government could make the official proposal.

Please advise me of your opinion on this matter.

Re your #1232*

Please explain the matter to the United States along the following lines:

There seem to be rumors to the effect that our military garrisons in French Indo-China are being strengthened. The fact is that recently there has been an unusual amount of activity by the Chinese forces in the vicinity of the Sino-French Indo-China border. In view of this, we have increased our forces in parts of northern French Indo-China. There would naturally be some movement of troops in the southern part as a result of this. We presume that the source of the rumors is in the exaggerated reports of these movements. In doing so, we have in no way violated the limitations contained in the Japanese-French joint defense agreement.

#1225. (Part 1 of 3.)

When I and Ambassador Kurusu called on Secretary Hull on the 1st, we conveyed to him the matter contained in your message #857*. Roughly speaking, Hull's reply stayed within the bounds of his earlier explanations. He placed the most emphasis on two points, namely, the tone and trend of the Japanese Government's expressions and movements and that of the general public opinion organs; and, the increase in strength of the garrisons in French Indo-China.

From the beginning of today's conference, Secretary Hull wore a deeply pained expression. Without wasting any time, he brought up the subject of the Premier's statement, (see my message #1222**), and said that that was one of the reasons for the President's sudden return to Washington. (Upon our arrival at the State Department, we found not only newspaper men, but even some members of the Departmental staff crowding the corridors. Some of these speculators were of the opinion that the issue of war or peace was to be immediately decided upon. In general, the scene was highly dramatic.)

We, therefore, replied that we were convinced that the Premier's statement had been erroneously and exaggeratedly reported in the vernacular. We pointed out that regardless of who the speaker may be if only an excerpt from his speech is reported, without having the entire text available, it is quite possible that the reader will get exactly the opposite meaning from that intended by the speaker.

We went on to advise the Secretary that we were at present awaiting the delivery of the entire text.

During the course of our explanations, the Secretary showed visible signs of relief.

He said: "Since our talks were begun recently, there has not been a single indication of endorsement and support from Japan. I have not heard of any steps being taken in Japan aimed at facilitating these conversations, all of which is exceedingly regrettable."

#1225 (Part 2 of 3) (Parts 1 and 3 not available).

(Message having the indicator 20803* is part one of three.)

For this reason CHA has been the target of considerable attack and dissatisfaction. It was admitted that he was in a very tight spot. As the President recently said, it is clearly understood that the people of Japan, after over four years of the Japanese-Chinese incident, are very tense.

Japan, too, is highly desirous of having peace on the Pacific assured by successfully concluding these negotiations. It is our hope that he would give his support and encouragement to the efforts that Hull and we are making in this direction.

With regard to the matters pertaining to French Indo-China ----- the government of the United States, too, cannot help but feel concern since it has been receiving report after report during the past few days, from U. S. officials stationed in that area, of unusual movements of the Japanese army and navy; the landing of various types of arms; and the movements of transport vessels. Concern is felt as to the goal of all these activities (the implication was that they feared that they were going to be used not only against Thailand but in the southwestern Pacific area).

As to what plans the responsible persons in the Japanese army and navy are planning are not difficult to guess if one goes on the assumption that the Japanese army and navy joins forces with the Germans; even if, in actuality, that is not what is taking place, preparations must be made for this possible eventuality, and all nations concerned must concentrate their fighting forces in that area.

JD-1: 7042 SECRET (D) Navy Trans. 12-4-41 (7)

*Not available, probably is Part 1 of this message.

(Part 3 of 3)

Hull: "In the final analysis, that means that Hitlerism is being given indirect support, and for this reason please exercise the utmost of caution.

"In view of the fact that Japan is acting in the manner described above, there is absolutely no way of bringing about a settlement of the situation.

"Disruptions in Japanese-U. S. relations is exceedingly unfortunate, not only for our two countries, but to the world in general. There shall be nothing constructive about a Japanese-U. S. war. We fully realize that it can be nothing other than destructive. For this reason, we are still highly desirous of bringing these conversations to a successful conclusion.

"However, with the existence of the above described conditions, and because of the nature of this country, the Secretary of State and the President are placed in an exceedingly difficult position."

I: "It seems mutually regrettable that all of our efforts which lead to the 21 June and 25 September proposals, should have been in vain."

In general he expressed his agreement to this.

Hull: "The recent situation in Japan and the U. S. public opinion made it necessary for us to return to the most recent proposal."

We then said that behind the problems at hand, there has always been the China problem.

"As I have pointed out on several occasions", I said, "this has been the bitterest experience since the Washington Conference. Peace between Japan and China could not be attained through any such terms as were contained in your most recent proposal. We hear your argument to the effect that you cannot stand by and do nothing while China dies. The converse of that argument should be even stronger. That is, that it is of the utmost importance for us to avoid standing by and watching our own respective countries die, just because of the China problem."

Hull indicated his agreement with this, but went on to say:

"Because the situation is as I have already described, I hope that Japan will take steps to bring about order through her public organs."

Separate telegram

MEMORANDUM

1. The Government of Japan, prompted by a genuine desire to come to an amicable understanding with the Government of the United States in order that the two countries by their joint efforts may secure the peace of the Pacific area and thereby contribute toward the realization of world peace, has continued negotiations with the utmost sincerity since April last with the Government of the United States regarding the adjustment and advancement of Japanese-American relations and the stabilization of the Pacific area.

The Japanese Government has the honor to state frankly its views concerning the claims the American Government has persistently maintained as well as the measures the United States and Great Britain have taken toward Japan during these eight months.

2. It is the immutable policy of the Japanese Government to insure the stability of East Asia and to promote world peace, and thereby to enable all nations to find each BOAMPYQBR place in the world.

Ever since the China Affair broke out owing to the failure on the part of China to comprehend Japan's true intentions, the Japanese Government has striven for the restoration of peace and it has consistently exerted its best efforts to prevent the extension of war-like disturbances. It was also to that end that in September last year Japan concluded the Tri Partite Pact with Germany and Italy.

JD-1: 7143 SECRET Navy Trans. 12-6-41 (S)

(Part 2 of 14)

However, both the United States and Great Britain have resorted to every possible measure to assist the Chungking regime so as to obstruct the establishment of a general peace between Japan and China, interfering with Japan's constructive endeavours toward the stabilization of East Asia, exerting pressure on The Netherlands East Indies, or menacing French Indo-China, they have attempted to frustrate Japan's aspiration to realize the ideal of common prosperity in cooperation with these regions. Furthermore, when Japan in accordance with its protocol with France took measures of joint defense of French Indo-China, both American and British governments, wilfully misinterpreted it as a threat to their own possession and inducing the Netherlands government to follow suit, they enforced the assets freezing order, thus severing economic relations with Japan. While manifesting thus an obviously hostile attitude, these countries have strengthened their military preparations perfecting an encirclement of Japan, and have brought about a situation which endangers the very existence of the empire.

JD-1: 7143 SECRET Navy Trans. 12-6-41 (S)

(Part 3 of 14)

Nevertheless, facilitate a speedy settlement, the Premier of Japan proposed, in August last, to meet the President of the United States for a discussion of important problems between the two countries covering the entire Pacific area. However, while accepting in principle the Japanese proposal, insisted that the meeting should take place after an agreement of view had been reached on fundamental—(75 letters garbled)—The Japanese government submitted a proposal based on the formula proposed by the American government, taking fully into consideration past American claims and also incorporating Japanese views. Repeated discussions proved of no avail in producing readily an agreement of view. The present cabinet, therefore, submitted a revised proposal, moderating still further the Japanese claims regarding the principal points of difficulty in the negotiation and endeavoured strenuously to reach a settlement. But the American government, adhering steadfastly to its original proposal, failed to display in the slightest degree a spirit of conciliation. The negotiation made no progress.

JD-1: 7143 SECRET Navy Trans. 12-6-41 (S)

(Part 4 of 14)

Thereupon, the Japanese Government, with a view to doing its utmost for averting a crises in Japanese-American relations, submitted on November 20th still another proposal in order to arrive at an equitable solution of the more essential and urgent questions which, simplifying its previous proposal, stipulated the following points:

(1) The Governments of Japan and the United States undertake not to dispatch armed forces into any of the regions, excepting French Indo-China, in the South-eastern Asia and the Southern Pacific area.

(2) Both Governments shall cooperate with a view to securing the acquisition in the Netherlands East Indies of those goods and commodities of which the two countries are in need.

(3) Both Governments mutually undertake to restore commercial relations to those prevailing prior to the freezing of assets.

The Government of the United States shall supply Japan the required quantity of oil.

(4) The Government of the United States undertakes not to resort to measures and actions prejudicial to the endeavours for the restoration of general peace between Japan and China.

(5) The Japanese Government undertakes to withdraw troops now stationed in French Indo-China upon either the restoration of peace between Japan and China

1382 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

or the establishment of an equitable peace in the Pacific area ; and it is prepared to remove the Japanese troops in the southern part of French Indo-China to the northern part upon the conclusion of the present agreement.

JD-1: 7143 SECRET Navy Trans. 12-6-41 (S)

(Part 5 of 14)

As regards China, the Japanese Government, while expressing its readiness to accept the offer of the President of the United States to act as "Introducer" of peace between Japan and China as was previously suggested, asked for an undertaking on the part of the United States to do nothing prejudicial to the restoration of Sino-Japanese peace when the two parties have commenced direct negotiations.

The American government not only rejected the above-mentioned new proposal, but made known its intention to continue its aid to Chiang Kai-Shek ; and in spite of its suggestion mentioned above, withdrew the offer of the President to act as the so-called "Introducer" of peace between Japan and China, pleading that time was not yet ripe for it. Finally, on November 26th, in an attitude to impose upon the Japanese government those principles it has persistently maintained, the American government made a proposal totally ignoring Japanese claims, which is a source of profound regret to the Japanese Government.

JD:1 7143 SECRET Navy Trans. 12-6-41 (S)

(Part 6 of 14)

4. From the beginning of the present negotiation the Japanese Government has always maintained an attitude of fairness and moderation, and did its best to reach a settlement, for which it made all possible concessions often in spite of great difficulties.

As for the China question which constituted an important subject of the negotiation, the Japanese Government showed a most conciliatory attitude.

As for the principle of Non-Discrimination in International Commerce, advocated by the American Government, the Japanese Government expressed its desire to see the said principle applied throughout the world, and declared that along with the actual practice of this principle in the world, the Japanese Government would endeavour to apply the same in the Pacific area, including China, and made it clear that Japan had no intention of excluding from China economic activities of third powers pursued on an equitable basis.

Furthermore, as regards the question of withdrawing troops from French Indo-China, the Japanese government even volunteered, as mentioned above, to carry out an immediate evacuation of troops from Southern French Indo-China as a measure of easing the situation.

JD:1 7143 SECRET Navy Trans. 12-6-41 (S)

(December 4, 1941—Part 7 of 14)

It is presumed that the spirit of conciliation exhibited to the utmost degree by the Japanese Government in all these matters is fully appreciated by the American government.

On the other hand, the American government, always holding fast to theories in disregard of realities, and refusing to yield an inch on its impractical principles, caused undue delays in the negotiation. It is difficult to understand this attitude of the American government and the Japanese government desires to call the attention of the American government especially to the following points:

1. The American government advocates in the name of world peace those principles favorable to it and urges upon the Japanese government the acceptance thereof. The peace of the world may be brought about only by discovering a mutually acceptable formula through recognition of the reality of the situation and mutual appreciation of one another's position. An attitude such as ignores realities and imposes one's selfish views upon others will scarcely serve the purpose of facilitating the consummation of negotiations.

7143 SECRET

(December 6, 1941—Part 8 of 14)

Of the various principles put forward by the American government as a basis of the Japanese-American agreement, there are some which the Japanese government is ready to accept in principle, but in view of the world's actual conditions,

it seems only a Utopian ideal, on the part of the American government, to attempt to force their immediate adoption.

Again, the proposal to conclude a multilateral non-aggression pact between Japan, the United States, Great Britain, China, the Soviet Union, The Netherlands, and Thailand, which is patterned after the old concept of collective security, is far removed from the realities of East Asia.

The American proposal contains a stipulation which states: "Both governments will agree that no agreement, which either has concluded with any third powers, shall be interpreted by it in such a way as to conflict with the fundamental purpose of this agreement, the establishment and preservation of peace throughout the Pacific area." It is presumed that the above provision has been proposed with a view to restrain Japan from fulfilling its obligations under the Tripartite Pact when the United States participates in the war in Europe, and, as such, it cannot be accepted by the Japanese Government.

JD: 1 7143 SECRET Army Trans. 12-6-41 (S)

(Part 9 of 14)

The American Government, obsessed with its own views and opinions, may be said to be scheming for the extension of the war. While it seeks, on the one hand, to secure its rear by stabilizing the Pacific area, it is engaged, on the other hand, in aiding Great Britain and preparing to attack, in the name of self-defense, Germany and Italy two powers that are striving to establish a new order in Europe. Such a policy is totally at variance with the many principles upon which the American Government proposes to found the stability of the Pacific area through peaceful means.

3. Where as the American Government, under the principles it rigidly upholds, objects to settling international issues through military pressure, it is exercising in conjunction with Great Britain and other nations pressure by economic power. Recourse to such pressure as a means of dealing with international relations should be condemned as it is at times more inhuman than military pressure.

JD-1: 7143 Army Trans. 12-6-41 (S)

(Part 10 of 14)

4. It is impossible not to reach the conclusion that the American Government desires to maintain and strengthen, in collusion with Great Britain and other powers, its dominant position it has hitherto occupied not only in China but in other areas of East Asia. It is a fact of history that one country— (45 letters garbled or missing)—been compelled to observe the status quo under the Anglo-American policy of imperialistic exploitation and to sacrifice the—es to the prosperity of the two nations. The Japanese Government cannot tolerate the perpetuation of such a situation since it directly runs counter to Japan's fundamental policy to enable all nations to enjoy each its proper place in the world.

JD-1: 7143 Navy Trans. 12-6-41 (S)

(Part 11 of 14)

The stipulation proposed by the American Government relative to French Indo-China is a good exemplification of the above-mentioned American policy. That the six countries,—Japan, the United States, Great Britain, The Netherlands, China and Thailand,—excepting France, should undertake among themselves to respect the territorial integrity and sovereignty of French Indo-China and equality of treatment in trade and commerce would be tantamount to placing that territory under the joint guarantee of the governments of those six countries. Apart from the fact that such a proposal totally ignores the position of France, it is unacceptable to the Japanese government in that such an arrangement cannot but be considered as an extension to French Indo-China of a system similar to the n— (50 letters missed) —sible for the present predicament of East Asia.

JD: 1: 7143 SECRET Navy Trans. 12-6-41 (S)

(Part 12 of 14)

5. All the items demanded of Japan by the American government regarding China such as wholesale evacuation of troops or unconditional application of the

1384 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

principle of Non-Discrimination in International Commerce ignore the actual conditions of China, and are calculated to destroy Japan's position as the stabilizing factor of East Asia. The attitude of the American government in demanding Japan not to support militarily, politically or economically any regime other than the regime at Chungking, disregarding thereby the existence of the Nanking government, shatters the very basis of the present negotiation. This demand the American government failing, as it does, in line with its above-mentioned refusal to cease from aiding the Chungking regime, demonstrates clearly the intention of the American government to obstruct the restoration of normal relations between Japan and China and the return of peace to East Asia.

JD::1 7143 SECRET Navy Trans. 12-6-41 (S)

(Part 13 of 14)

5. In brief, the American proposal contains certain acceptable items such as those concerning commerce, including the conclusion of a trade agreement, the mutual removal of the freezing restrictions, and stabilization of the Yen and Dollar exchange, or the abolition of extra-territorial rights in China. On the other hand, however, the proposal in question ignores Japan's sacrifices in the four years of the China Affair, menaces the empire's existence itself and damages its honour and prestige. Therefore, viewed in its entirety, the Japanese government regrets that it cannot accept the proposal as a basis of negotiation.

6. The Japanese government, in its desire for an early conclusion of the negotiation, proposed that simultaneously with the conclusion of the Japanese-American negotiation, agreements be signed with Great Britain and other interested countries. The proposal was accepted by the American government. However, since the American government has made the proposal of November 26th a result of frequent consultations with Great Britain, Australia, The Netherlands and Chungking, ANDND* presumably by catering to the wishes of the Chungking regime on the questions of *CHTUAL YLOKMMTT*** be concluded that these countries are at one with the United States in ignoring Japan's position.

JD:1 7143 SECRET Navy Trans. 12-6-41 (S)

*Probably "and as".

**Probably "China, can but".

(7 December 1941—Part 14 of 14)

(Note: In the forwarding instructions to the radio station handling this part, appeared the plain English phrase "VERY IMPORTANT")

7. Obviously it is the intention of the American Government to conspire with Great Britain and other countries to obstruct Japan's efforts toward the establishment of peace through the creation of a New Order in East Asia, and especially to preserve Anglo-American rights and interests by keeping Japan and China at war. This intention has been revealed clearly during the course of the present negotiations. Thus, the earnest hope of the Japanese Government to adjust Japanese-American relations and to preserve and promote the peace in the Pacific through cooperation with the American Government has finally been lost.

The Japanese Government regrets to have to notify hereby the American Government that in view of the attitude of the American Government it cannot but consider that it is impossible to reach an agreement through further negotiations.

Re your #875*.

I received your reply immediately. I presume, of course, that this reply was a result of consultations and profound consideration. The United States' Government is attaching a great deal of importance on this reply. Especially since the President issued his statement yesterday, it is being rumored among the journalists that this reply is to be the key deciding whether there will be war or peace between Japan and the United States. There is no saying but what the United States Government will take a bold step depending upon how our reply is made. If it is really the intention of our government to arrive at a settlement, the explanation you give, I am afraid, would neither satisfy them nor prevent them taking the bold step referred to—even if your reply is made for the mere purpose of keeping the negotiations going. Therefore, in view of what has been elucidated in our proposal which I submitted to the President on November 10th, I would like to get a reply which gives a clearer impression of our peaceful intentions. Will you, therefore, reconsider this question with this in mind and wire me at once.

TOP SECRET

UNITED STATES OF AMERICA,
FEDERAL COMMUNICATIONS COMMISSION,
Washington, D. C., August 18, 1944.

I hereby certify that the attached are true copies of documents described as follows:

Document No. 1 is a true copy of the weather messages which Major Wesley T. Guest (now Colonel), U. S. Army Signal Corps, requested the Commission's monitors to be on the lookout for in Tokyo broadcasts and to advise Colonel Bratton, Army Military Intelligence, if any such message was intercepted. This request was made on November 28, 1941 at approximately 2140 GMT.

Document No. 2 is a true copy of a weather message from Tokyo station JYW3, intercepted by Commission monitors at approximately 22 GMT, December 4, 1941, which at 9:05 p. m. EST, December 4, 1941, having been unable to contact Colonel Bratton's office, was telephoned to Lieutenant Brotherhood, 20-G, Watch Officer, Navy Department, who stated that he was authorized to accept messages of interest to Colonel Bratton's office.

Document No. 3 is a true copy of a weather message from Tokyo station JYW3, intercepted by Commission monitors at 2130 GMT, December 5, 1941,

which was telephoned to Colonel Bratton at his residence at 7:50 p. m. EST, December 5, 1941.

Document No. 4 is a true copy of two weather messages intercepted by Commission monitors from Tokyo stations JLG 4 and JZJ between 0002 and 0035 GMT, December 8, 1941, and telephoned to Lt. Colonel C. C. Dusenbury, U. S. Army Service Corps, at the request of Colonel Bratton's office at approximately 8 p. m. EST, December 7, 1941. Document No. 4 also contains the Rómaji version of these messages.

On file in this Commission, and that I am the proper custodian of the same.

IN WITNESS WHEREOF, I have hereunto set my hand, and caused the seal of the Federal Communications Commission to be affixed, this twenty-first day of August, 1944.

OFFICE OF THE CHIEF OF NAVAL OPERATIONS,

Feb. 1, 1941

Op16-F-2

(SC) A16-3/EF37

Serial No. 09716

Confidential

10465

From: Chief of Naval Operations

To: Commander-in-Chief, Pacific Fleet

Subject: Rumored Japanese attack on Pearl Harbor.

1. The following is forwarded for your information. Under date of 27 January the American Ambassador at Tokyo telegraphed the State Department to the following effect:

"The Peruvian Minister has informed a member of my staff that he has heard from many sources, including a Japanese source, that in the event of trouble breaking out between the United States and Japan, the Japanese intend to make a surprise attack against Pearl Harbor with all of their strength and employing all of their equipment. The Peruvian Minister considered the rumors fantastic. Nevertheless he considered them of sufficient importance to convey this information to a member of my staff."

2. The Division of Naval Intelligences places no credence in these rumors. Furthermore, based on known data regarding the present disposition and employment of Japanese naval and army forces, no move against Pearl Harbor appears imminent or planned for in the foreseeable future.

JULES JAMES,
By direction.

Dictated Jan. 31, 1941

For Secretary Yuki.

The Naval General Staff has requested that investigation be made on the following items. Please arrange as you think best for the same:

These items in regard to each port of call:

- (1) Conditions at air ports on land.
- (2) Types of planes at each, and number of planes.
- (3) Warships; also machinery belonging to land forces.
- (4) State of progress being made on all equipment and establishments.

 #723.

-(Re your #318)*

Strict guard is being maintained, hence the gathering of information is extremely difficult. We are making secret investigations but I will wire you the following newspaper and foreign office reports for the present.

1. The incorporation of the Philippine Army into the Far Eastern Army is progressing slowly but surely and it is reported that by the end of the year the incorporation of 120,000 will be completed. Additions to the barracks at the various camps are being rushed to completion. It seems that particular emphasis is being placed on the concentration of military strength.

Localities are as follows:

Kabanatuan, San Marcelino
 (several groups missing).

Furthermore there is to be a great increase in the number of soldiers stationed in the vicinity Lingayen during the month of November. Army maneuvers are to be carried out during the middle of the month. This may be a temporary measure.

2. In the vicinity of Mariveles more than 3000 workmen are being used to rush the work on the various projects. However, there are not more than 300 infantry and cavalry troops stationed there.

On the 27th, what I estimated to be between 2000 and 3000 infantry troops left Manila by bus headed north. Their destination may have been the above

1396 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

place. It is being investigated at present. It appears that three airports are being built there and the docks are being enlarged.

In the Bataan area the surveillance is particularly strict and it is said that even the entry of Filipinos is prohibited.

3. Work is being rushed on the road between Dingalan and RAARU (Laur?) and by the middle of October there were less than two kilometers that had not been completed and this will be finished in the near future. The road between Infanta and Manila is being widened to 5 meters. Work is being carried on day and night and the progress is amazing.

4. In Iba there are 30 or 40 fighter planes, 20 or 30 light bombers and several score of *altitude planes* (?) it is said.

Details by mail.

JD-1: 6270 SECRET (H) Navy Trans. 11-4-41 (S-TT)

*JD-1: 5681. "I want you to make a reconnaissance of the new defense works along the east, west and southern coasts of the island of Luzon, reporting their progress, strength, etc. Also please investigate anything else which may seem of interest."

JOINT COMMITTEE EXHIBIT NO. 147

**PART I OF PEARL HARBOR INVESTIGATION
CONDUCTED BY
COLONEL CARTER W. CLARKE, PURSUANT TO ORAL IN-
STRUCTIONS OF THE CHIEF OF STAFF, U. S. ARMY
TESTIMONY AND FINDINGS CONCERNING HANDLING OF
CERTAIN TOP SECRET DOCUMENTS**

Top Secret

MIS/DC/CWC/EWG/dc 74195

Memorandum for the Chief of Staff

20 SEPTEMBER 1944

Subject: Investigation regarding the manner in which certain Top Secret communications were handled.

The report of the investigation regarding the manner in which certain Top Secret communications were handled is attached hereto as Tab. A. Briefly summarized, the findings disclose the following:

a. That between 1 October 1941 and the attack on Pearl Harbor the Secretary of State, Chief of Staff, the Secretary of War, the Chief of War Plans Division and the A. C. of S., G-2 each received identical copies of the daily Magic material that had been screened out by Col. Bratton, and each received a copy of all of the Top Secret documents that are exhibits in this investigation.

b. During the same period the Navy Department was furnishing similar material to the President through the President's naval aide.

c. On 28 November 1941 the so-called "Winds Code" was decoded. This code provided for the warning of Japanese embassies and consulates throughout the world in a voice broadcast that relations between Japan and the United States, Japan and Russia or Japan and Great Britain, as the case might be, were to be severed and that when this word was received all code papers were to be destroyed. Arrangements were immediately made both by the Army Signal Corps and, through the Army Signal Corps, with Federal Communications Commission for listening for a message that would implement this code. However, prior to Pearl Harbor neither the F. C. C. nor the Army Signal Corps intercepted an implementing message.

d. Thirteen of the fourteen parts of Tokyo's reply to the American counter proposals were received by the War Department in the evening of 6 December and were delivered to the Department of State late that evening. The fourteenth section, which was the concluding section of the Japanese reply, and a message from Tokyo to the Japanese

ambassadors in Washington instructing that this reply be presented to the Secretary of State at one p. m., Washington time, were received in the War Department before 0900 E. S. T., 7 December 1941. As soon as possible thereafter Gen. Marshall, Gen. Gerow, Gen. Miles, Col. Bratton and Col. Bundy met in Gen. Marshall's office at the War Department and at that time Gen. Marshall decided to send a further warning message to the commanders in the Pacific area. This information was conveyed by Gen. Marshall to Adm. Stark, who concurred therein and asked that the Navy commanders be informed of the Army message. This message was filed in the War Department Message Center at 1200 noon E. S. T., received R. C. A. Honolulu 33 minutes later but not delivered to the Hawaiian Department until 7 hours and 25 minutes after its receipt by R. C. A. Honolulu.

CLAYTON BISSELL,
Major General,
A. C. of S., G-2.

Memorandum for the Assistant Chief of Staff, G-2:

Subject: Investigation regarding the manner in which certain Top Secret communications were handled.

1. The undersigned was appointed by the A. C. of S., G-2 to conduct an investigation regarding the manner in which certain Top Secret communications were handled. Under authority of a letter of 9 September 1944 (AGPO-M-B 333.5 (7 Sep 44)) from The Adjutant General, which read as follows:

It is desired that you designate officers of your Division to conduct an investigation and interrogations, in accordance with the oral instructions issued to you by the Chief of Staff regarding the manner in which certain Top Secret communications were handled.

The officers designated to conduct this investigation will be authorized to administer oaths for this purpose.

the investigation was conducted on 14, 15 and 16 September, in Room 2C637 of the Pentagon Building. Testimony under oath was taken of Major General Sherman Miles, Acting A. C. of S., G-2 during the year 1941; Brigadier General Hayes A. Kroner, Chief of the Intelligence Branch of the Military Intelligence Division during the last half of 1941; Colonel Rufus Bratton, Chief of the Far Eastern Section of the Military Intelligence Division during the latter half of 1941; Colonel John T. Bissell, head of the Counter Intelligence Branch of the Military Intelligence Division during the latter part of 1941; Colonel O. K. Sadtler, Chief of the Army Communications Service during the latter part of 1941; and Mr. William F. Friedman, principal cryptanalyst of the Signal Intelligence Service during the latter part of 1941. Documentary evidence in the nature of copies of 38 Top Secret decoded Japanese messages passing between the Toyko Government and various Japanese embassies in many parts of the world in October, November and early December, 1941 were also introduced into evidence.

[2] 2. There were also introduced into evidence memoranda for the Chief of Staff in the nature of Estimates of the Situation which were made by the then Acting A. C. of S., G-2 the latter part of November and early December, 1941, all of them immediately prior to Pearl Harbor day; the findings of fact of the Roberts Report of January 1942; a telegram to the G-2, Hawaiian Department of 5 December 1941, signed Miles; a telegram signed Brink received in the War Department 6 December 1941 at 1629 E. S. T.; a memorandum of 6 December 1941 signed Perry regarding Jap Washington Embassy burning code books the night of 5 December; telegram from Melbourne, Australia from Merlesmith received in the War Department 7 December at 1950 E. S. T.; M. I. D. form containing information received from the Orient dated 3 November 1941 containing information purporting to have come from a Mr. Hirota; report of Headquarters, Third Corps Area, dated 18 December 1941 entitled, "Report of Rumors Concerning Japanese Attack on Hawaii"; secret radiogram dated 7 July 1941 to the Commanding Generals, the Caribbean Defense Command, Philippine Department, Hawaiian Department and Fourth Army; radio message dated 27 October 1941 from Manila, signed Brink; radiogram dated 29 October 1941 from Manila signed Evans; copies of 5 radiograms sent from Tokyo to MILID between 12 July and 27 July 1941; and the following messages flowing between Commanding General, Hawaii and the War Department: 27 November 1941 Chief of Staff to Commanding General, Hawaii; 27 November 1941 G-2 War Department to G-2 Hawaii; 27 November 1941 Commanding General, Hawaii to Chief of Staff; 28 November 1941 The Adjutant General to Commanding General, Hawaii; 29 November 1941 Commanding General, Hawaii to The Adjutant General; 7 December, Chief of Staff to Commanding General, Hawaii et al.

3. All the testimony taken was stenographically reported and transcribed.

4. All the testimony and evidence received have been considered and as a result of this consideration I find the following facts:

a. That between 1 October and the afternoon of 7 December 1941 there were at least 37 coded messages that were flowing between the Tokyo Government and their embassies in various parts of the world which were intercepted by the Signal Intelligence Service and were decoded. In addition there was at least one copy of a telephone conversation between the Tokyo Government and the Japanese Embassy in Washington. These intercepted and decoded messages were Top Secret material that was designated as "Magic" in the latter part of 1941. (Ex. #1, Bratton, p. 10. Sadtler, p. 1.)

b. At all times between 1 October 1941 and the time of the attack on Pearl Harbor on 7 December 1941, the Top Secret material that is involved in this investigation was handled as follows (Bratton p. 24; Miles p. —):

It was delivered daily by the Signal Intelligence Service by hand of an officer to the office of Colonel Rufus Bratton who was then Chief of the Far Eastern Section of the Intelligence Branch of M. I. D. Col. Bratton then read all of the material, screening out that which had intelligence value. The other material he then burned. The screened material was then arranged by Col. Bratton in separate piles, one for

the Chief of Staff, one for the Secretary of War, one for the A. C. of S., G-2, one for the Chief, War Plans Division and one for the Secretary of State. Col. Bratton then bound each pile in a cardboard folder, inserted the folder in the proper leather dispatch case, locked each dispatch case and delivered it to the proper office, collecting at that time the bags containing the previous day's output. These bags were brought by Col. Bratton back to his office, opened and the material therein checked prior to destruction by burning.

c. Between 1 October 1941 and the time of the attack on Pearl Harbor the Secretary of State, the Chief of Staff, the Secretary of War, the Chief of War Plans Division and the A. C. of S., G-2 each received identical copies of the daily Magic material that had been screened out by Col. Bratton, and each received a copy of each of the 38 Top Secret documents that are exhibits in this investigation. In addition, for a short time immediately prior to Pearl Harbor and for a short time thereafter, Gen. McNair, Commanding General of the Army Ground Forces, also received daily copies of this Top Secret material. (Bratton p. 7, 24, 25; Miles p. —)

d. During this identical period the Navy Department was furnishing similar material to various officers in the Navy Department and to the President through the President's naval aide. (Bratton, p. 4—Miles p. —)

e. From time to time during this period the Chief of Staff questioned Col. Bratton as to his evaluation of certain of the Top Secret reports that are exhibits in this investigation. (Bratton p. 5 and 12)

f. That on 28 November 1941 Top Secret Army message No. 25432 was decoded. The decoding of this message read as follows (Ex. #2):

From Tokyo
To Washington
19 November 1941

Regarding the broadcast of a special message in an emergency.

In case of emergency (danger of cutting off our diplomatic relations) and the cutting off of international communications, the following warning will be added in the middle of the daily Japanese language short wave news broadcast:

(1) In case of a Japan-U. S. relations in danger:

HIGASHI NO KAZEAME (EAST WIND RAIN)

(2) Japan-U. S. S. R. relations:

KITANOKAZE KUMORI (NORTH WIND CLOUDY)

(3) Japan-British relations:

NISHI NO KAZE HARE (WEST WIND CLEAR)

This signal will be given in the middle and at the end as a weather forecast and each sentence will be repeated twice. When this is heard, please destroy all code papers, etc. This is as yet to be a completely secret arrangement.

Forward as urgent intelligence.

On 28 November 1941 Col. Bratton made arrangements for listening for Japanese broadcasts that might include this code. These arrangements were made through Col. Sadtler, then in the office of the Chief Signal Officer, who put Col. Bratton in touch with a Mr. G. E. Sterling, then Chief of the National Defense Operations Section of the Federal Communications Commission. The F. C. C. did thereafter monitor Japanese broadcasts for the purpose of determining if

the Japanese sent a message using the "Winds" code. I am unable to find that a Japanese message using the "Winds" code was intercepted by the F. C. C. or the Army Signal Corps until after Pearl Harbor. (Bratton p. 10, 11; Miles p. —; Sadtler, p. 2; Friedman, p. 7; Ex. #3)

I find that on 5 December 1941, Col. Sadtler was informed by Adm. Noyes, Naval Communications Officer, that a Japanese message using the "Winds" code had been intercepted the previous night, and that the message, decoded, meant that Japanese-Great Britain relations were to be broken; that on 5 December 1941 Col. Sadtler so informed Gen. Miles, Col. Bratton, Gen. Gerow, Col. Gaily and Gen. Bedell Smith, then Secretary of the General Staff, but that Gen. Miles or Col. Bratton never informed Gen. Marshall personally of the Sadtler information. I do find, however, that Col. Bratton prior to this time had been informed by the Navy that Commander Rochefort of the 14th Naval [5] District knew all that our own Navy Department knew about the "Winds Code" message and that on 5 December he caused the following message to be sent the Commanding General, Hawaiian Department (Sadtler p. 2, 3; Bratton p. 17, 18; Miles p. —: Ex. #4):

CONTACT COMMANDER ROCHEFORT IMMEDIATELY THRU COMMANDANT FOURTEEN NAVAL DISTRICT REGARDING BROADCASTS FROM TOKIO REFERENCE WEATHER.

I further find that Gen. Miles and Col. Bratton were on 5 December 1941, and had been for some time prior thereto, expecting a break in Jap-Great Britain relations. I further find that no officer of the Navy ever advised Gen. Miles or Col. Bratton that any message implementing the Winds Code had been received by the Navy. I find that if in fact such a message was intercepted, it was not intercepted by the Army Signal Corps or F. C. C. (Bratton p. 11, 12, 13, Roundtable; Miles p. —).

g. I find that 13 of the 14 sections of the Japanese reply, Top Secret Army No. 25843 were received by the evening of 6 December and one copy of that part of the Japanese reply was delivered by Col. Bratton to the watch officer on duty at the Department of State late in the evening of 6 December, with instructions to see that the document was delivered to the Secretary of State immediately. (Bratton p. 17; Miles p. —, Ex. #5)

h. I find that between 0830 and 0900 E. S. T. 7 December 1941 Col. Bratton was at his office in the War Department and at that time received copies of section 14 of the Japanese reply, Top Secret Army No. 25843, and also received copies of Tokyo's instructions to deliver the reply at 1:00 p. m. 7 December 1941. Top Secret Army No. 25850; that Col. Bratton then immediately attempted to contact the Chief of Staff and the Chief, War Plans Division at their offices in the War Department but these officers were not in their offices at that time; that Col. Bratton then telephoned Gen. Marshall's quarters and was informed that Gen. Marshall had gone horseback riding; that Col. Bratton requested Gen. Marshall's orderly to go out and find him at once and to ask Gen. Marshall to call Col. Bratton on the telephone as soon as practicable as Col. Bratton had an important message to

deliver to him; that Col. Bratton then called Gen. Miles, reporting what steps he, Col. Bratton, had taken and recommending that Gen. Miles come to the office at once; that either Gen. Miles or Col. Bratton thereafter called Gen. Gerow, then Chief of War Plans Division; that sometime between 1000 and 1100 E. S. T. Col. Bratton received a telephone call from Gen. Marshall and then informed Gen. Marshall that [6] he, Col. Bratton, had a message of extreme importance which Gen. Marshall should see at once and advised Gen. Marshall that Col. Bratton would bring the message to Gen. Marshall's quarters if Gen. Marshall so desired; that Gen. Marshall instructed Col. Bratton to report to Gen. Marshall in Gen. Marshall's office in the War Department as the General was on his way there; that Col. Bratton reported to Gen. Marshall in Gen. Marshall's office in the War Department at about 1125 E. S. T., which was shortly after Gen. Marshall's arrival; that shortly thereafter Gen. Miles arrived; that the message, Top Secret Army No. 25850, instructing the Japanese ambassadors to present Japanese reply, Top Secret Army No. 25843, to the Department of State at 1300 E. S. T. that afternoon was laid before Gen. Marshall and discussed; that the Chief of Staff then had on his desk the lengthy Japanese reply, Top Secret Army No. 25843, which he read aloud to those officers present; that the Chief of Staff asked all officers present for an expression of opinion as to the meaning or significance of the message, Top Secret Army No. 25850; that Gen. Miles and Col. Bratton both stated that they believed there was important significance in the time of the delivery of the reply, namely 1:00 p. m., that this was an indication that some military action would be undertaken by the Japanese at that time, that they thought it probable that the Japanese line of action would be into Thailand but that it might be into any one or more of a number of other areas; that Gen. Miles urged that the Philippines, Hawaii, Panama and the West Coast be informed immediately that the Japanese reply would be delivered at one o'clock that afternoon, Washington time, and that the commanders in the areas, indicated should be on the alert; that Gen. Marshall then called Adm. Stark on the telephone and told Adm. Stark over the telephone that he thought the Army should send out a warning substantially as Gen. Miles urged; that after Adm. Stark replied Gen. Marshall put down the telephone and stated that Adm. Stark did not think any further warning necessary since all the forces had been several times alerted; that Gen. Miles and Col. Bratton nevertheless continued to urge Gen. Marshall to send the warning; that Gen. Marshall then wrote out in pencil the warning message and there was some discussion at this particular time as to whether or not the Philippines should be included; that Gen. Marshall again got Adm. Stark on the telephone and read to Adm. Stark the message he, Gen. Marshall, had just written; that Adm. Stark apparently concurred and asked that the naval forces be also informed and Gen. Marshall added a request to that effect at the bottom of his penciled [7] warning; that about this time Gen. Gerow and Col. Bundy arrived and Gen. Marshall again asked each officer present, in succession beginning with Gen. Miles, their opinion as to the significance of the Japanese message, Army Top Secret No. 25850; that Gen. Miles said he thought it probably meant an attack on Thailand but that the timing had some significance and that warning messages to our people should be sent; that

Gen. Gerow, Col. Bundy and Col. Bratton concurred; that Gen. Marshall then gave Col. Bratton the message in Gen. Marshall's handwriting and instructed Col. Bratton to take it immediately to the Message Center for transmittal; that as Col. Bratton was about to leave there was some discussion as to whether the penciled message should go to Gen. Gerow's office for typing first but it was decided that as time was an important factor Col. Bratton should take it in its draft form to the Message Center; that as Col. Bratton left the room Gen. Gerow made a statement to the effect that if there was any question of priority involved to give first priority to the Philippines; that Col. Bratton took the message to Col. French, a Signal Corps officer then in charge of the Message Center, explained to Col. French that it was Gen. Marshall's desire that the message be transmitted to the addressees by the fastest possible safe means, giving the Philippines first priority; that Col. French then said he would give it his personal attention and that processing of the message would commence immediately; that Col. Bratton then returned to the office of the Chief of Staff and Gen. Marshall then directed Col. Bratton to find out how long it would take for the delivery of the message to the addressees; that Col. Bratton returned to the Message Center, talked the matter over with Col. French, who informed Col. Bratton that the message would be encoded in about three minutes, on the air in about eight minutes, and in the hands of the addressees in about thirty minutes; that it was then 1150 E. S. T.; that Col. Bratton returned to the Chief of Staff's office and so reported to him. Bratton p. 14, 15, 16, 17 and 23; Miles p. —, Ex. #6, Ex. #7).

i. I find that the log of the warning message sent by the Chief of Staff to the Commanding General, Hawaiian Department, is as follows (Ex. #8):

	E. S. T.	Honolulu time
Filed War Department Message Center-----	12:00 noon	6:30 AM
Sent Western Union-----	12:17 PM	6:47 AM
Received RCA, Honolulu-----		7:33 AM
Delivered to Signal Officer, Honolulu-----		11:45 AM
Delivered to AGO, Hawaiian Department-----		2:58 PM

CARTER W. CLARKE,
Colonel, General Staff Corps,
Deputy Chief, Military Intelligence Service.

TESTIMONY OF COLONEL JOHN T. BISSELL

[1] Place: Room 2C637 Pentagon Building, Washington, D. C.

Date: 14 September 1944.

Time: 1310-1330.

Present:

Colonel Carter W. Clarke.

Colonel John T. Bissell.

Lt. Col. E. W. Gibson.

Colonel John T. Bissell, having been sworn and warned of his rights by Colonel Carter W. Clarke, gave the following sworn testimony:

Col. CLARKE. State your name, rank, organization and station please.

Col. BISSELL. John T. Bissell, Colonel, Field Artillery, Headquarters 89th Division Artillery, Camp Butner, North Carolina.

Col. CLARKE. On what date did you become a member of G-2 Division, War Department General Staff?

Col. BISSELL. I believe it was on the 25th day of May 1940.

Col. CLARKE. What were your duties at that time?

Col. BISSELL. I was assigned to the Counter Intelligence Group of the Military Intelligence Division.

Col. CLARKE. In what position?

Col. BISSELL. I was Executive Officer of that Group.

Col. CLARKE. How long did you remain on those duties?

Col. BISSELL. I remained as Executive Officer until, I think July 1, 1941, when I became the senior member of that Group.

Col. CLARKE. As Chief of the Counter Intelligence Group of M. I. D., what were your principal duties?

Col. BISSELL. The principal duties that I had were the collection, evaluation and dissemination of counter intelligence information.

Col. CLARKE. Would it be correct to state that your principal duties then dealt with what we might call domestic intelligence rather than any foreign intelligence?

Col. BISSELL. That is correct.

[2] Col. CLARKE. Did you focus your attention on any particular enemy or potential enemy?

Col. BISSELL. Yes, on the Germans and Japanese.

Col. CLARKE. By that I mean their agents in this country.

Col. BISSELL. Yes, and in our possessions.

Col. CLARKE. Were Honolulu and the Philippines included?

Col. BISSELL. They were.

Col. CLARKE. What was your chief source of information with regard to the Japanese prior to Pearl Harbor?

Col. BISSELL. At that time it was from reports we got from the Philippines and the F. B. I., principally.

Col. CLARKE. Did you have any knowledge of or access to any material which was known as Magic or Ultra during that period prior to Pearl Harbor?

Col. BISSELL. Prior to Pearl Harbor I did not.

Col. CLARKE. Did you know of its existence?

Col. BISSELL. I did.

Col. CLARKE. But you had no knowledge of the contents of any of the material produced?

Col. BISSELL. I never read any of it in the raw. I did receive summaries pertaining to Japanese agents in this country.

Col. CLARKE. Did you ever discuss the contents of it with either the A. C. of S., G-2 or the Chief of the Intelligence Group?

Col. BISSELL. I don't recall that I ever did.

Col. CLARKE. Did you ever discuss the Japanese situation with the Chief of the Far Eastern Branch of the Intelligence Group?

Col. BISSELL. Only on one or two occasions prior to Pearl Harbor.

[3] Col. CLARKE. Did you receive any information from F. B. I. at any time which would indicate that they had knowledge of any of this material or access to it?

Col. BISSELL. No. Of course I did receive reports on the activities of Japanese agents and attaches in the United States, but that was

obtained by following those individuals, not from any translated codes.

Col. CLARKE. Did any of this information come from wire tapping sources, to your knowledge?

Col. BISSELL. I don't believe so.

Col. CLARKE. In what form did you make available to the A. C. of S., G-2 and to the Chief of Staff such information that you did receive?

Col. BISSELL. As I recall it, we prepared in the Group daily a short memorandum if there was anything of any value.

Col. CLARKE. Was that sent to the Chief of Staff or just to the A. C. of S., G-2?

Col. BISSELL. It went to G-2. I am not absolutely certain in my own mind at that time whether I had that system in operation or not, but when I left here I had it going.

Col. CLARKE. Then you had no channels of contact with either the Chief of Staff or the Chief of the War Plans Division except through the person of the A. C. of S., G-2?

Col. BISSELL. That is correct.

Col. CLARKE. Did you ever receive from F. B. I. any information which would lead you to believe that there was a possibility of any attack by the Japanese on the U. S. or any of its possessions prior to Pearl Harbor?

Col. BISSELL. No.

Lt. Col. GIBSON. Did it ever come to your knowledge that certain Japanese consulates were destroying codes and burning secret documents early in December 1941?

Col. BISSELL. Yes I knew that.

Lt. Col. GIBSON. Did you know it at the time?

[4] Col. BISSELL. Yes I knew it at the time.

Lt. Col. GIBSON. That was before Pearl Harbor?

Col. BISSELL. It was, I believe, the day of Pearl Harbor that the codes were destroyed. They were burned in the Japanese Embassy here in Washington.

Lt. Col. GIBSON. Did you know of any other places they were burning codes?

Col. BISSELL. No.

Lt. Col. GIBSON. Did you ever hear or know, prior to Pearl Harbor, that the Navy Department sent a message to the Commander-in-Chief of the Pacific Fleet on December 3, 1941 stating that it was believed certain Japanese consulates were destroying their codes and burning secret documents?

Col. BISSELL. I did not know that.

Col. CLARKE. Did you ever initiate any warning message to the corps areas or department commanders with respect to sabotage prior to Pearl Harbor?

Col. BISSELL. Yes I did.

Col. CLARKE. What did you base that on?

Col. BISSELL. I based that upon a directive that I got from the A. C. of S., G-2.

Col. CLARKE. In other words, you wrote the message at his direction.

Col. BISSELL. I did, and took it to him for correction and editing.

Col. CLARKE. Then you did not initiate it?

Col. BISSELL. I executed it and carried it out. It was initiated by the A. C. of S., G-2.

Col. CLARKE. Did you know of any message which was initiated by the Chief of the Army Air Forces to the same effect?

Col. BISSELL. No I did not.

Col. CLARKE. Will you state briefly what your actions and activities were on December 7.

Col. BISSELL. On that particular date I was at my house in Washington [5] and happened to be listening to the radio in the afternoon. I heard the commentator discuss the attack on Pearl Harbor. I went to the office immediately and was there until sometime that evening.

Col. CLARKE. Did you have any knowledge of any warning message which was sent to the commanders on the morning of December 7?

Col. BISSELL. At that time, no.

Lt. Col. GIBSON. Were you ever alerted to be watching for a Jap message in code that might be given during a news broadcast?

Col. BISSELL. No. I knew about it after December 7th but not at the time.

TESTIMONY OF RUFUS S. BRATTON

PART I

[1] Place: Room 2C637 Pentagon Building, Washington, D. C.
Date: 14 September 1944.

Time: 1045-1200.

Present:

Colonel Rufus S. Bratton.

Colonel Carter W. Clarke.

Lt. Col. E. W. Gibson.

Colonel Rufus S. Bratton, having been sworn and warned of his rights by Colonel Carter W. Clarke, gave the following sworn testimony:

Col. CLARKE. Will you state your name, rank, organization and station please.

Col. BRATTON. Rufus S. Bratton, O-3726. Headquarters, Commandant, Headquarters 3rd U. S. Army ETO.

Col. CLARKE. When were you first assigned to duty in the G-2 section of the War Department General Staff?

Col. BRATTON. In the fall of 1936.

Col. CLARKE. And you continued in that duty until when?

Col. BRATTON. I continued on duty in one capacity or another in G-2 until the fall of 1943.

Col. CLARKE. From the time you arrived here until Pearl Harbor on December 7, 1941 what were your duties?

Col. BRATTON. I was at first assistant to the Chief of the Far Eastern Section of the Intelligence Branch and later succeeded him to that office.

Col. CLARKE. Who was that? Mason?

Col. BRATTON. Col. Homer Slaughter. I later succeeded him to that office as Chief of the Far Eastern Section. At that time my immediate superior was Col. Faye Brabson. He was later succeeded by Col. Charles Mason; he in turn by Col. Hayes Kroner. Upon

the latter's designation as Chief of M. I. S. I became Chief of the Intelligence Branch. I think that is accurate.

Col. CLARKE. Was one of your duties both as the Assistant and as Chief of the Far Eastern Section, the handling of this so-called Magic or Ultra material?

[2] Col. BRATTON. That is correct. When I first arrived in G-2 a copy of the day's output was placed on my desk for such information and action as was necessary or advisable. At that time the production of Magic was on a very limited scale and it was a combined product of naval communications, I believe, and the Army SIS. As we progressed in solving various codes and ciphers the quantity and quality of this material naturally improved and it became quite voluminous, and its study and evaluation occupied a large part of my time as Chief of the Far Eastern Section.

Col. CLARKE. Will you state how this material was handled from the time it was received from the Signal Corps, who saw it besides yourself, and what selections were made to go to your immediate chief, also to the A. C. of S., G-2 and to the Chief of Staff.

Col. BRATTON. Initially this material reached me through the Chief of the Operations & Training Branch of G-2. Later on this office was eliminated as a transmitter of this material and I dealt directly with the SIS and their counterpart in Navy communications. The material in later years was broken down as to source or type of code by the Army and Navy so that the Army worked on one type and the Navy on another. Normally the material was collected and coordinated by the Army SIS before it was presented to me. Occasionally, in matters of great interest or importance, an officer of the Navy would bring me a message direct, to save time.

Col. CLARKE. How many copies of this did you receive of each message?

Col. BRATTON. Initially I received no copy of any message. I simply received a statement showing that a message had been sent from one diplomatic post to another diplomatic post on such and such a date, followed by a brief summary of its contents. Later on, to further develop this very valuable source of intelligence, arrangements were made whereby I received exact copies of the decoded or deciphered message.

Col. CLARKE. Do you remember about what date that was, sir?

Col. BRATTON. We started this latter practice, to the best of my knowledge and belief, early in 1941 or late in 1940. It then became my duty to see that the proper officials of the War Department had access to the intelligence contained in these decoded and deciphered messages. This entailed so much traveling around on my part from one office to another that it was a waste of time. So at the direction of the Chief [3] of Staff, transmitted to me through the A. C. of S., G-2. I started the system of having copies made—my office having a very limited number of officers—and instituted a check system whereby all copies were returned to me for destruction. This subsequently proved impracticable because of lack of clerical help and other assistance in the Far Eastern Section, and arrangements were made with the SIS and their counterpart in naval communications to have some six copies of each decoded or deciphered message delivered to me daily for study and evaluation. By this time the volume of

this work had increased tremendously. Many of the messages were purely administrative in character and were of no interest from an intelligence point of view. They were all gone over carefully, however, to make sure that I missed no item which would be of intelligence value. Those that had no intelligence value I destroyed by burning. The others were variously processed.

Col. CLARKE. Were you assigned the duty of selecting the material that went to the A. C. of S., G-2 and to the Chief of Staff and Secretary of War?

Col. BRATTON. I was.

Col. CLARKE. By whom?

Col. BRATTON. By the A. C. of S., G-2.

Col. CLARKE. Then you personally made the selection of what part of this material he saw and the Chief of Staff saw?

Col. BRATTON. Yes, they both saw the same material.

Col. CLARKE. In other words, if you decided that a message was of sufficient importance to be seen by the A. C. of S., G-2, it was also of sufficient importance to be seen by the Chief of Staff and Secretary of War. Is that correct?

Col. BRATTON. Not always, but the reverse was always true. If the message was important enough to be seen by the Chief of Staff and Secretary of War, I of course saw to it that the A. C. of S., G-2 saw the same message so that he could talk to the Chief of Staff intelligently about it.

Col. CLARKE. Did anyone else in G-2 see this material besides you and the A. C. of S., G-2?

[4] Col. BRATTON. Initially no, but as the volume increased it became necessary for me to have assistance in handling it, and with the knowledge and consent of the A. C. of S., G-2, certain trusted clerical help and certain of my officer assistants helped me in handling it.

Col. CLARKE. Who made the selection of the material that went to the State Department?

Col. BRATTON. Initially there was no agreement on this. Frequently the Navy Department would take the same message to the State Department that we thought would be of value to them. As it was a duplication of effort we finally came to an agreement that the Army would furnish the Secretary of State with material thought to be of interest to the State Department and that the Navy would serve the President likewise.

Col. CLARKE. Do you recall about what date that arrangement became effective?

Col. BRATTON. Not exactly, but it was sometime early in 1941 when a written agreement was drawn up between the A. C. of S., G-2 and the Chief of Naval Intelligence, a copy of which was placed in the G-2 files.

[5] Col. CLARKE. Initially you made a selection of what was to go to the State Department or the President and the Navy made a similar selection. Is that correct?

Col. BRATTON. That is correct.

Col. CLARKE. When did you start giving all the material produced to the State Department and to the President?

Col. BRATTON. I am quite positive that at no time was all of the material given to the President for the simple reason that the bulk

of it would have been of no interest or value to him. To the best of my knowledge and belief, the State Department was never given all of the material when I was responsible for its transmission. In other words, I made the selection of what was to go to the Secretary of State and it was left to my discretion to determine the material that would be of interest to him.

Col. CLARKE. In the period from July 1, 1941 up to and including Pearl Harbor, did you ever discuss any individual message or group of messages with either the A. C. of S., G-2 or the Chief of Staff?

Col. BRATTON. Oh yes, on innumerable occasions, with both.

Col. CLARKE. Was the Chief of Staff inclined to take your evaluation on this material or did he want to act on it and place his own interpretation on it?

Col. BRATTON. He almost invariably asked me for my interpretation and evaluation.

Col. CLARKE. What were your relationships with what was then known as War Plans Division? Did you ever discuss this material with the Chief of that Division?

Col. BRATTON. Yes, by direction of the Chief of Staff. They had access in the latter stages of this production and dissemination to exactly the same material that went to the A. C. of S., G-2, to the Chief of Staff and to the Secretary of War.

Col. CLARKE. Who in that Division had that besides the Chief, do you recall?

Col. BRATTON. Initially, at the direction of the Chief of Staff, I took the message that I wanted the Chief of the War Plans Division to read, directly to him, and when he had read it and after discussing it with him—if there was any discussion—removed the message from his desk, took it back to my office and destroyed it. Later on the Chief of the War Plans Division insisted that certain of his section chiefs should have access to the material also. This was approved by the Chief of Staff, and I then made it a practice to deliver this material in a padlocked leather case to the Executive Officer of WPD, obtaining a receipt from him for certain numbered messages. After they had been read by the proper officers in WPD they were returned to me either the same day, in the locked bag, or on the following day when I delivered that day's messages.

Col. CLARKE. Was there ever prepared in the Far Eastern Section of G-2 any summary or evaluation which was based exclusively on the contents of this material?

Col. BRATTON. Yes.

Col. CLARKE. Do you recall any particular one?

Col. BRATTON. I don't recall any particular one but in the early stages of this work I very frequently submitted to the Chief of Staff, through the A. C. of S., G-2, a staff memorandum [6] based upon one or more messages that I had received, concealing the source by some agreed upon code word, so that the reader would know where I had secured the information which I was evaluating. Later on, as this material became of increasing value, the recipients, that is the Secretary of War, the Chief of Staff, the A. C. of S., G-2 and the Chief of the War Plans Division, deemed it advisable to have access to the raw material themselves so that they could arrive at their own independent conclusions as to its meaning. This was how the practice developed of delivering the raw material to certain officers desig-

nated by the Chief of Staff. Frequently, even after this practice was instituted, I submitted memoranda to various officers in connection with such and such a message, calling their attention to certain implications or trends indicated therein.

Col. CLARKE. From the period November 1, 1941, when the tension increased between the United States and Japan, was there any special handling of this material?

Col. BRATTON. As the tension between Japan and the United States grew we all took much greater precautions in processing and in otherwise handling the material.

Col. CLARKE. Did you have conferences with your opposite numbers in the Navy and in the War Plans Division regarding the interpretation and evaluation of this material?

Col. BRATTON. Yes. I had almost daily conferences with my opposite number in ONI and with the Chief of the War Plans Division as to the true significance of the material under study. I may say at this point that there was complete cooperation and collaboration between my opposite number in ONI, Commander McCullem, and myself.

Col. CLARKE. Did you agree on the interpretation of this material? In other words, was your evaluation agreed upon?

Col. BRATTON. We were for the most part in complete agreement in our evaluations of the material. Where there were differences of opinion we always consulted and came to an understanding as to how we would present these opinions to our respective chiefs. In the event of any major difference of opinion as to interpretation I always gave the A. C. of S., G-2 a summary of the Navy's viewpoint along with my own, and I believe that my opposite number in ONI did likewise.

Col. CLARKE. In the handling of this material, both in evaluation and [7] safeguarding and what not, did you deal directly with the A. C. of S., G-2 or did you go through the Chief of the Intelligence Group?

Col. BRATTON. Initially I went through the Chief of the Intelligence Group, but as tension grew and time became the important factor, at his direction I went straight to the A. C. of S., G-2 first and informed the Chief of Intelligence Branch afterward of my action and the nature of the information that I had transmitted.

Col. CLARKE. To the best of your knowledge and belief, the Chief of Staff was kept completely informed of all information and intelligence which was available to G-2 from this source. Is that correct?

Col. BRATTON. Completely.

Col. CLARK. I wish also to clear this one point up. I understood you to say that it was at the direction of the Chief of Staff that this raw material we served to him and to the Chief of the War Plans Division.

Col. BRATTON. That is correct.

Lt. Col. GIBSON. Colonel, you used the term "early stages" of this thing—I wish we could put an approximate date to "early stages" as you referred to early stages.

Col. BRATTON. Well, by early stages I mean during the years 1936 and 1937 before the quantity and quality of the material materially increased.

Lt. Col. GIBSON. May I interrupt? Wouldn't you say that your early stages was from the time you came in, in 1936, up to the bombing of the Panay?

Col. BRATTON. Well I wouldn't extend the early stages to as late a date as the bombing of the Panay—earlier than that.

Col. CLARKE. In other words, you would say from the summer of 1936 to the summer of 1937 would be the early stages?

Col. BRATTON. Let me put it this way. By early stages I mean the period before our relations with Japan became strained.

Lt. Col. GIBSON. Approximately when was it that the War Plans Division started getting this Top Secret material?

Col. BRATTON. You mean copies of the raw material?

[8] Lt. Col. GIBSON. Yes.

Col. BRATTON. I am sorry, sir, I can't answer that definitely. My memory won't permit a definite answer. I would say not earlier than the summer of 1941. I would like to amplify that, however, with the statement that prior to the summer of 1941 various memoranda, written by me or by the A. C. of S., G-2, based upon this material were submitted to WPD.

Lt. Col. GIBSON. When these copies went to the State Department or War Plans they were not allowed to keep them on file? You went around and got them?

Col. BRATTON. They were returned to me as soon as the proper officials of the State Department and WPD had seen and initialed them. They did not remain in the files of either office.

Lt. Col. GIBSON. Were they allowed to make copies of this?

Col. BRATTON. Not by me or any other officer of the War Department that I know of.

Lt. Col. GIBSON. You as Chief of the Intelligence Branch or your Chief of the Far Eastern Unit knew generally, did you not, that the United States policy in the Pacific in 1941 was in conflict with policies of the Japanese Government?

Col. BRATTON. Of course.

Lt. Col. GIBSON. Did you ever have any knowledge of a letter from the Secretary of the Navy addressed to the Secretary of War on or about 24 January 1941 wherein the Secretary of War was warned that hostilities might be initiated at any time by the Japanese by an attack on Pearl Harbor, or that in substance? Did you ever hear of any such letter at that time?

Col. BRATTON. To the best of my knowledge and belief I have never seen or heard of any such letter.

Lt. Col. GIBSON. The Chief of Staff never advised you of the existence of any such letter?

Col. BRATTON. I have no recollection of any such advice.

Lt. Col. GIBSON. Did you ever attend any of the what were then termed War Council meetings?

Col. BRATTON. No, I did not.

[9] Lt. Col. GIBSON. In any of your conversations with the Chief of Staff did he ever discuss anything that went on at any conferences he had with his counterpart of the Navy or regarding the Japanese situation?

Col. BRATTON. Not that I recall.

Lt. Col. GIBSON. Were you ever told, or did you know, in the latter part of November, of a message sent by the Chief of Naval Operations to Admiral Kimmel, which was concurred in by General Marshall, to the effect that we might anticipate a surprise and an aggressive Japa-

nese attack, or to be prepared for such a thing, or anything of that substance?

Col. BRATTON. Yes, I saw such a message. It was dispatched, to the best of my recollection, on or about the 24th of November.

Lt. Col. GIBSON. From the Chief of Naval Operations to Admiral Kimmel?

Col. BRATTON. That is right.

Lt. Col. GIBSON. Was that message brought to the attention of General Miles at that time or General Kroner?

Col. BRATTON. I think so. I have no way of—

Lt. Col. GIBSON. Do you recall how you acquired your knowledge of the existence of such a message?

Col. BRATTON. I believe that I first learned of the message through my opposite number in ONI, the Chief of the Far Eastern Division. I later saw and read a copy of the message.

Lt. Col. GIBSON. Did you know of General Marshall's message of the 27th of November to General Short and other commanders in that general area? A warning message so-called?

Col. BRATTON. Yes.

Lt. Col. GIBSON. Did you receive at any time during the first week of December 1941 any information either from the Navy or from our own military attaches to the effect that Jap consulates were burning documents and codes on or about the third of December?

Col. BRATTON. I can't recall receiving this information from any local source. I do remember, however, that in various Japanese messages detailed instructions were issued from Tokyo to their consulate and diplomatic officials as to the methods to be used by the latter in destroying their [10] codes and ciphers when directed to do so.

Lt. Col. GIBSON. The Roberts report states that on December 3, 1941 the Navy Department sent a message to the Commander-in-Chief of the Pacific Fleet that it was believed certain Japanese consulates were destroying their codes and burning secret documents. Did you at that time ever know of such a message being sent by the Navy?

Col. BRATTON. No, to the best of my knowledge and belief this is the first time I have heard of it.

Lt. Col. GIBSON. Were you aware of the bulletin of December 1, 1941 dealing with the Japanese naval situation, issued by the Director of Naval Intelligence?

Col. BRATTON. Yes, this looks very familiar. I believe that I had access to this or a similar document and used it as the basis of a memorandum for the Chief of Staff, the A. C. of S., G-2 and the Chief of WPD to keep them informed as to where the Navy thought the bulk of the Japanese naval forces were located.

Lt. Col. GIBSON. Colonel, I have here a whole series of these Top Secret messages, or copies of them rather, and I just want to get in the record whether you knew of these at the time. They are Army Nos. 23570, 23631, 23673, 23859, 24373, 24655, 24656, 24878, 25138, 25344, 25390, 25392, 25432, 25435, 25441, 25445, 25446, 25496, 25497, 25548, 25554, 25605, 25644, 25659, 25715, 25725, 25727, 25730, 25731, 25762, 25773, 25783, 25785, 25807, 25817, 25823, 25843, 25850. Have you seen these communications?

Col. BRATTON. Yes I have seen all of these communications before.

Lt. Col. GIBSON. Calling your attention to this No. 25432, after you received that did you make some arrangements for listening for broadcasts?

Col. BRATTON. Yes, I did, through Col. Sadtler, then in the office of the Chief Signal Officer, who put me in touch with an official of the FCC, a Mr. Sterling, I believe.

Lt. Col. GIBSON. Did you ever receive, prior to Pearl Harbor, word from the FCC that such a code message had been put out by the Japanese?

Col. BRATTON. I did not, though I was in daily telephone communication with Mr. Sterling or his assistant in connection with this matter. Their understanding was that immediately upon [11] receipt of any such message I was to be informed by telephone, day or night. They had my office phone number and my house phone number. I did get from them on one or two occasions messages resembling the Wind Code, but which upon examination proved to be not in that code.

Lt. Col. GIBSON. Did the Navy ever give you any information of any such code message being put out?

Col. BRATTON. No, although I did discuss with them certain code messages that had been received which resembled the expected Wind Code messages.

Col. CLARKE. Did Col. Sadtler ever tell you that it was in?

Col. BRATTON. I cannot remember that he did. I have a vague recollection of a conversation with him about a code message indicating a break in relations between Japan and Great Britain. This, however, was beside the point. Such a break had been expected by all of us for some time. The code message we were waiting for was one indicating a break between Japan and the U. S. It never came through that I know of.

Lt. Col. GIBSON. Did you know of any message being sent by G-2 to the 14th Naval District to check up on some such alleged message prior to Pearl Harbor?

Col. BRATTON. No, I do know, however, that Gen. Miles sent a message to Gen. Short, or to Gen. Short's G-2 directing him to get in touch with Commander Rochefort of the Navy with respect to this type of message as the Navy was completely aware of all the facts in the case.

Col. CLARKE. Well that message actually went to G-2 in Hawaii.

Lt. Col. GIBSON. I show you No. 25138 and ask what your evaluation of that message was, if you remember.

Col. BRATTON. My evaluation of this message at the time I read it was that Japan intended taking military and/or naval action in the Pacific on or after the dates indicated.

Lt. Col. GIBSON. And was that evaluation given by you to Gen. Miles?

Col. BRATTON. I believe so. I remember that during this period Gen. Miles and I discussed at some length the meaning or implication of each and all of these messages.

[12] Lt. Col. GIBSON. Was that true also of you and the Chief of Staff?

Col. BRATTON. Not in every case.

Lt. Col. GIBSON. Do you recollect whether it was true or not in this particular case, referring to No. 25138?

Col. BRATTON. I don't remember definitely. I am under the impression that I discussed this particular message both with Gen. Miles and Gen. Marshall, and Gen. Gerow.

It. Col. GIBSON. Would you say the same is true of message No. 25644?

Col. BRATTON. No, but I can state that all three of the officers just mentioned were given copies of this in the present form.

Lt. Col. GIBSON. Also on No. 25390. What interpretation or evaluation did you place on that particular message?

Col. BRATTON. I at this time do not recall the evaluation I gave that message.

Lt. Col. GIBSON. I call your attention also to No. 25554 and 25555. What was your interpretation of this message? Particularly I call your attention to the last sentence thereof.

Col. BRATTON. This message, as is indicated in the text thereof, is an effort on the part of the Japanese Government to inform their diplomatic representative in Germany as to Japanese inability to successfully negotiate a pact with the United States and is an expression of the opinion of the Japanese Government that the United States was and would be allied with England, Australia, the Netherlands and China against Japan.

Lt. Col. GIBSON. Did you at this time, Colonel, consider it a capability of the Japanese to attack Pearl Harbor?

Col. BRATTON. Yes. Many of us considered and discussed the feasibility of such an attack—an attack on our West Coast, an attack on Alaska, an attack on the Canal Zone, an attack on Hawaii and other Pacific installations of ours, the Dutch or the British governments.

Lt. Col. GIBSON. From a reading of these messages at that time did you come to the conclusion that the Japs were about to undertake an attack on some of the United States installations?

Col. BRATTON. It was apparent that there was strong likelihood of some such attack. It was also apparent that the Japanese immediate major objective would be the British and Dutch [13] possessions in the west Pacific. I believed at that time that any attack on any American installation would be in the nature of a diversion or have for its purpose the prevention of our going to the assistance of the Dutch or British.

Lt. Col. GIBSON. Had you talked that thought over with Gen. Miles?

Col. BRATTON. I did.

Lt. Col. GIBSON. General Kroner?

Col. BRATTON. As to Gen. Kroner, my memory is faulty, but I discussed this feature on many occasions with Gen. Miles, with Gen. Gerow and with the Chief of Staff when asked my opinion in the matter.

Lt. Col. GIBSON. Did you inform the Chief of Staff that it was a capability of the Japs to attack Pearl Harbor?

Col. BRATTON. In various G-2 estimates submitted to the Chief of Staff over a period of many months an attack on Hawaii had always been listed as one of the Japanese capabilities against us.

Lt. Col. GIBSON. I notice in the estimate dated 29 November 1941 that the capability of the attack on Pearl Harbor wasn't included. I wonder how that happened, if you have any recollection of it?

Col. BRATTON. In reply to that I can only say that those of us in the Army who were studying this situation always listed, mentally at least, an attack on Hawaii as a capability, but in our discussions of the situation with our counterparts in the Navy it was always emphasized by the latter that their forces in the Pacific were alert and so stationed as to make such a Japanese attack impracticable or suicidal, and we therefore relegated such an attack to the realm of remote possibility.

Lt. Col. GIBSON. At that time did you feel that there was a fairly reasonable probability that Japan was going to attack the United States in the reasonably near future, I mean at the last of November or the first of December 1941?

Col. BRATTON. Yes, and I had felt for some time—that is over a period of several years—that war between Japan and the United States was inevitable.

Lt. Col. GIBSON. Had you so informed Gen. Miles and the Chief of Staff [14] that you, in the last of November or first of December 1941, felt it was probable that the Japs were going to attack the United States in the near future?

Col. BRATTON. Not in that form, but I repeatedly expressed the opinion to my superiors that Japan intended to take some form of aggressive action which would involve her in a war with us.

Col. CLARKE. I would like to ask one question here before we get these people back. On the morning of December 7 when you got the famous message that they were going to deliver their note at one o'clock, will you recount briefly the actions which you took with reference to that message and also the actions of Gen. Miles and Gen. Marshall?

Col. BRATTON. Will you permit me to refer to a memorandum which I made at the time for the record?

Col. CLARKE. Sure.

Col. BRATTON. The message in question, that is the deciphered message in question, was delivered to me from the Navy sometime between 0830 and 9000 that morning. It was immediately apparent that it was of such importance that it had to be communicated to the Chief of Staff, the A. C. of S., G-2 and the Chief, WPD with the least practicable delay. Neither of these officers were in their offices at that time. I called Gen. Marshall's quarters by telephone and was informed that he had gone horseback riding. I requested his orderly to go out and find him at once and ask him to call me on the telephone as soon as practicable as I had an important message to deliver to him. I then called Gen. Miles and reported the step that I had taken to him and recommended that he come down to the office at once. I do not remember whether I called Gen. Gerow or whether Gen. Miles called him, but we had some discussion as to which one of us would do it and I don't remember now which of us did, but in any event Gen. Gerow was summoned to the office. I waited for the telephone call from Gen. Marshall, which I received some time between ten and eleven. I informed him that I had a message of extreme importance which he should see at once and told him that I would bring it to his quarters if he so desired. He said to report to him in his office as he was on his way there. I reported to him in his office at about 1125 immediately upon his arrival. Shortly thereafter Gen. Miles arrived. The message was laid before Gen. Marshall and discussed. We were all asked by the

Chief of Staff for an expression of opinion as to the meaning or significance of the message, in connection with [15] the lengthy Japanese ultimatum which the Chief of Staff had on his desk and read aloud to us at this time. Gen. Miles and I stated that we believed there was important significance in the time of the delivery of the reply, one p. m., an indication that some military action would be undertaken by the Japanese at that time. We thought it probable that the Japanese line of action would be into Thailand but that it might be into any one or more of a number of other areas. Gen. Miles urged that the Philippines, Hawaii, Panama and the West Coast be informed immediately that the Japanese reply would be delivered at one o'clock that afternoon, Washington time, and that they, the commanders in the areas indicated, should be on the alert.

PART II

Place: Room 2C637 Pentagon Building, Washington, D. C.

Date: 15 September 1944.

Time: 1130-1200 and 1340-1455.

Present:

Colonel Rufus S. Bratton.

Colonel Carter W. Clarke.

Lt. Col. E. W. Gibson.

[16] Col. BRATTON. General Marshall then called Adm. Stark on the telephone and told him over the phone that he thought we should send out a warning as indicated above. After Adm. Stark replied, Gen. Marshall put down the telephone and stated that the Admiral did not think any further warning necessary since all the forces had already been several times alerted. Gen. Miles and I nevertheless urged Gen. Marshall to send the warnings. Gen. Marshall then wrote out in pencil the warning message. There was some discussion at this time, I believe, as to whether or not the Philippines should be included. Gen. Marshall again got Adm. Stark on the telephone and read to him the message he had just written out. Adm. Stark apparently concurred and asked that the naval forces be also informed. Gen. Marshall added a request to that effect at the bottom of his penciled warning. At about this time Gen. Gerow and Col. Bundy arrived. Gen. Marshall again asked us, in succession beginning with Gen. Miles, our opinion as to the significance of the Japanese message. Gen. Miles said he thought it probably meant an attack on Thailand but that the timing had some significance and that warning messages to our people should be sent. Gen. Gerow, Col. Bundy and I concurred. Gen. Marshall then gave me the message in his handwriting and instructed me to take it immediately to the Message Center for transmittal. As I was about to go out of the door there was some discussion as to whether it should go to Gen. Gerow's office for typing first, but it was decided that as time was an important factor, I was to take it in its draft form to the Message Center. As I left the room Gen. Gerow made a statement to the effect that if there was any question of priority involved, to give first priority to the Philippines. I took the message to Col. French, the Signal Corps officer in charge of the Message Center, explained to him that it was Gen. Marshall's desire that the message be transmitted to the addressees by the fastest possible safe means, giving the Philippines first priority. Col. French said that

he would give it his personal attention and processing of the message would commence immediately. I then returned to the office of the Chief of Staff. The latter directed me to find out how long it would take for the delivery of the [17] message to the addressees. I returned to the Message Center and talked the matter over with Col. French who informed me that the messages would be encoded in about three minutes, on the air in about eight minutes, and in the hands of the addressees in about 30 minutes. I looked at my watch at this time and saw that it was 1150 a. m. I returned to the Chief of Staff's office and reported to him the information as to speed of delivery that had been given me by Col. French.

Lt. Col. GIBSON. Did this reply from Japan (No. 25843) start coming in on the 6th of December, do you have any recollection as to that?

Col. BRATTON. I believe that the message started coming in to the Navy on the 6th. My recollection is that I transmitted a copy to the Secretary of State that night.

Lt. Col. GIBSON. Had you conferred with Gen. Miles or the Chief of Staff previously as to when the Japanese reply might be expected?

Col. BRATTON. We knew that some such message was coming. We of course had no way of telling when it would be forthcoming; it might have been a question of hours, it might be a question of days.

Lt. Col. GIBSON. Calling your attention to message No. 25445, which apparently was received by you the 28th or 29th of November, you then had some knowledge that a reply might be expected within two or three days from that time. Is that correct?

Col. BRATTON. That is correct.

Lt. Col. GIBSON. Anyway, the first thing you did when you got the message on December 7 was to phone Gen. Marshall?

Col. BRATTON. Yes, I called Gen. Marshall at his quarters.

Lt. Col. GIBSON. I call your attention to the message sent to the G-2, Hawaiian Department on 5 December, signed Miles, requesting that Commander Rochefort, 14th Naval District, be contacted regarding broadcasts from Tokyo reference weather. How was it that this telegram happened to be sent?

Col. BRATTON. When we received the Japanese message concerning the code to be used in weather broadcasts, I discussed the matter with my opposite number in the Navy, Commander McCullom, and his assistant, Lt. Kramer. They informed me that Commander Rochefort was their man in Hawaii, that he had [18] all the information that we had and the same intercepts. They stated that he could explain in detail to the commanding general or his G-2 the significance of the code and suggested that I have our G-2 in Hawaii get in touch with Commander Rochefort immediately as a means of saving time. In other words, we could get the desired information to the commanding general in Hawaii or his G-2 much faster and in much greater detail and with far greater security than by means of a long and involved explanatory message which we would have been forced to send through the Army communication system.

Lt. Col. GIBSON. I want to refer to this so-called Winds message. Did Col. Otis K. Sadtler of the Signal Corps ever, prior to Pearl Harbor, notify you that the Japanese had implemented the Wind Code by broadcasting a message in accordance with that code?

Col. BRATTON. As I have stated before, I cannot remember that he did, although I believe he did speak about one indicating a break between Japan and Great Britain.

Lt. Col. GIBSON. Did you know a naval officer by the name of Kramer who at the time of Early December 1941 was an assistant to Commander McCullom of ONI particularly being interested in communications work?

Col. BRATTON. Yes, I knew him well and was in constant communication with him at this time both orally, in person and by telephone.

Lt. Col. GIBSON. Did Lt. Kramer at this time ever notify you that the Navy had been advised by the FCC that a so-called Winds message had been intercepted by the FCC monitoring station?

Col. BRATTON. No. We discussed on one or two occasions messages resembling those in the Wind Code but as far as I know no actual Wind Code message ever came through prior to Pearl Harbor.

Lt. Col. GIBSON. I show you a copy of a cable sent 27 November to Commanding General, Hawaiian Dept., containing instructions of how to act in case hostilities between Japan and the United States occur and notifying him that negotiations with Japan appear to be terminated. Did you know of such a cable being sent?

Col. BRATTON. Not prior to the outbreak of hostilities. However, I have seen a copy of the message since that date.

Lt. Col. GIBSON. I show you now paraphrase of a cable dated November 27, [19] 1941 sent to the G-2's of corps areas, Caribbean Defense Command, Hawaiian Department, signed Miles. Did you know of that being sent?

Col. BRATTON. Yes, I did know of this message and was shown a copy of it on or about the date of dispatch.

Lt. Col. GIBSON. Prior to Pearl Harbor did you ever see any reply from Gen. Short to that message?

Col. BRATTON. No, prior to Pearl Harbor I have never seen any reply from Gen. Short to any of these messages.

Lt. Col. GIBSON. Did you know of the sending of this message to the Adjutant General of November 28 warning your corps area and overseas department commanders?

Col. BRATTON. Yes I knew of this message. I am under the impression that I was shown a copy of it on or about the date of its dispatch.

Lt. Col. GIBSON. You had nothing to do with the sending of either that message or the other message G-2 sent out of November 27?

Col. BRATTON. I did not. My recollection is that they were both drafted in the office of the A. C. of S., G-2 or that of his executive.

Lt. Col. GIBSON. I now show you a copy of a telegram from Melbourne, Australia via Honolulu to the War Department and Commanding General, Hawaiian Department, date of sending of the message the 6th, date received December 7, 7:50 p.m. Do you recall seeing such a message?

Col. BRATTON. I can make no positive statement in reply to that question. The message, however, looks vaguely familiar.

Lt. Col. GIBSON. Did you have any of the information contained in this particular message prior to one o'clock the afternoon of 7 December 1941?

Col. BRATTON. No.

Lt. Col. GIBSON. I show you an MID form, subject: Information received from the Orient, dated 3 November 1941, which is information purporting to come from a Mr. Hirota, a presiding officer at a directors meeting of the Black Dragon Society. I ask if you remember receiving this information approximately at that time or shortly before.

[20] Col. BRATTON. I do not recall ever having seen this document, nor can I recall being advised as to its subject matter.

Lt. Col. GIBSON. Information such as that, in the ordinary course of routine back in the summer and fall of 1941, would be routed through you as an ordinary matter, would it Col. Bratton?

Col. BRATTON. Yes, if this is a report from the Counter Intelligence Branch, which I believe it to be, I received information of this nature from the Chief of that Branch as a matter of routine.

Lt. Col. GIBSON. I call your attention to a report of the headquarters, Third Corps Area, dated 18 December 1941, subject: Report of Rumors Concerning Japanese Attack on Hawaii. This report is signed by Philip L. Thurber, Colonel, GSC. First I ask if you have any recollection of this particular report.

Col. BRATTON. I have never seen this document before.

Lt. Col. GIBSON. The document last referred to of Headquarters, Third Corps Area, of December 18, 1941, on Rumors Concerning Japanese Attack on Hawaii, states in substance that Senator Gillette at Washington warned officials what was going to happen, stating to officials that Japan would declare war on the United States December 19 and would attack Hawaii. This information was alleged to have been conveyed about 3 weeks prior to December 18. Did you ever receive such information from Senator Gillette or from any other source?

Col. BRATTON. I did not.

Lt. Col. GIBSON. I show you copy of a secret radiogram dated 7 July 1941 sent to Commanding Generals of the Caribbean Defense Command, Philippine Department, Hawaiian Department, Fourth Army, which in substance was an estimate of the Jap probable course in the near future, and ask if you are familiar with that radiogram.

Col. BRATTON. I do not recall having seen this message prior to or on the date of its dispatch. However from its context I assume that it was based upon an estimate prepared either in my office or at my direction by one of my assistants as it expresses the views we entertained at that time.

Lt. Col. GIBSON. I show you a copy of a radio message dated Oct. 27, 1941 from Manila, P. I. to MILID, signed Brink, relative to movement of Japanese shipping in Western Pacific and ask if you saw that message at or about that time.

Col. BRATTON. I can make no positive statement in reply to that question, [21] but the message looks familiar to me. I have seen this or one like it containing similar information.

Lt. Col. GIBSON. I show you a copy of a radiogram dated October 29, 1941 from Manila to MILID, signed Evans, relative to the movement of Jap aircraft carriers and other seacraft. I ask if you had knowledge of that message at or about that time.

Col. BRATTON. This message also looks familiar. I would like to say at this time that during this period messages of this type came over my desk in considerable volume as all of our military attaches, ob-

servers and agents were under instructions to assist us in following the movements of Japanese naval craft and land forces.

Lt. Col. GIBSON. I show you a copy of a paraphrase of secret message dated November 29, 1941, No. 986, from Ft. Shafter to TAG, signed Short, which answers secret radiogram No. 4820 of November 28, 1941, and gives other data relative to the sabotage situation in Hawaii. I ask if you had ever seen that message prior to December 7, 1941.

Col. BRATTON. No. I have not seen this message before. As the subject matter deals largely with counter espionage and counter sabotage measures the message would not, in the ordinary course of events, have come over my desk but rather over the desk of the Chief of the Counter Intelligence Branch.

Lt. Col. GIBSON. I show you now copies of 5 radiograms sent from Tokyo to MILID, those of July 12, July 14, July 23, 11:32 p. m. and July 27 being signed Creswell, and the one of July 23, 3:21 p. m. being signed Orear. I ask if you have recollection of seeing those cablegrams at about that time.

Col. BRATTON. Yes, all of these messages passed over my desk on or about the date of their arrival in MID.

Lt. Col. GIBSON. Earlier I asked you about a brief periodic estimate of the situation December 1, 1941 to March 31, 1942, dated 29 November 1941, for the Chief of Staff. I now call your attention to a memorandum for the Chief of Staff entitled: Supplementary Brief Period Estimate of the Situation December 1, 1941-March 31, 1942, dated December 5, 1941. What occasioned issuing a supplementary report as soon after the November 29th report, if you recall.

Col. BRATTON. I do not recall what the occasion was which demanded [22] the issuance of this supplementary estimate, but I believe that, as is stated in paragraph 1, the supplemental estimate is arranged in a form more suitable for the Operations Division for use in planning.

Lt. Col. GIBSON. Did this supplemental report of December 5 correctly represent your evaluation of the Japanese situation at that time?

Col. BRATTON. It did.

Lt. Col. GIBSON. I show you now copies of memorandums for the Chief of Staff of November 25, 26 and 27 dealing with the Far Eastern situation, Japanese Naval Task Force and Recent Developments in the Far East, respectively. Those reports correctly represent your evaluation of the various situations as outlined therein, did they?

Col. BRATTON. They did. I wrote them.

Lt. Col. GIBSON. I also call your attention to an undated memorandum of November 1941 for the Assistant Chief of Staff, WPD, on the subject of G-2 Estimate of the Far Eastern Situation (for situation and communication maps) with tabs b, c, and d. Did this at that time correctly represent your evaluation of the facts?

Col. BRATTON. It did. I wrote it.

Lt. Col. GIBSON. Did you actually have any knowledge yourself as of early December 1941 of exactly what of our naval forces were at Pearl Harbor?

Col. BRATTON. Only in a general way.

Lt. Col. GIBSON. Did you know at that time that the Navy, or a substantial part of it was tying up for weekends at Pearl Harbor?

Col. BRATTON. I did not and had I been in possession of that knowledge I would have urged, through the A. C. of S., G-2, that immediate action be taken to prevent such an assemblage in the Harbor.

Lt. Col. GIBSON. At about this time, the first week of December 1941, had you heard from any source that the Fleet was ordered to stay in Pearl Harbor?

Col. BRATTON. No. I was under the impression, gained from conversations [23] with my opposite number in ONI that the Fleet in Hawaiian waters had been alerted and all components were at their battle stations.

Lt. Col. GIBSON. I wish to say in asking this question that I don't have any knowledge that it had been ordered to stay in harbor; I had heard rumors of that, and that is the reason I asked the question.

Lt. Col. GIBSON. At that time, the first week of December 1941, were you under the impression that extensive air reconnaissance was being maintained from Hawaii?

Col. BRATTON. I was under that impression.

Lt. Col. GIBSON. These estimates of the situation or summaries of the situation that I have referred to, do you know what their actual dissemination was?

Col. BRATTON. I believe that in each case you will find at the bottom or lower left hand corner of the last page a distribution list which indicates to whom the carbon copies were routed.

Lt. Col. GIBSON. Do you have any recollection on the morning of December 7 at what time it was that you received the intercept message which in effect instructed the Japanese Ambassador to deliver Tokyo's reply to the Secretary of State if possible at one o'clock in the afternoon?

Col. BRATTON. I received a copy of this intercept from the Navy at about 9 a. m.

Lt. Col. GIBSON. Could you say you received it at about the same time as you received the reply itself?

Col. BRATTON. No. The reply itself was received the day before. It was a very long one and took considerable time to decipher and typewrite. It came to me as fast as the various sections could be typed.

Lt. Col. GIBSON. Col. Bratton, if on or about December 5, or at any time prior to an attack on Pearl Harbor you had been informed that the Japanese had broadcast a code message which implemented message No. 25432, which was the Winds Code message, and had been advised that such message, decoded, in substance meant U. S.-Japanese relations are in danger of being ruptured and their consulates were to burn their codes, what would have been your evaluation and action?

[24] Col. BRATTON. My evaluation would have been that Japan would immediately sever diplomatic relations with the United States and that hostilities against our country would ensue forthwith. Had I received such a report I would have taken immediate and vigorous action, through the A. C. of S., G-2, to see that the proper officials were alerted and warned to be on guard against any and all eventualities.

Lt. Col. GIBSON. Will you once more describe in detail how this Top Secret material was handled between 1 October 1941 and the time of the attack on Pearl Harbor.

Col. BRATTON. It was delivered daily by the Signal Intelligence Service by hand of an officer to my office. I read all of the material, screening out that which had intelligence value. The other material I then burned. Indeed much that was daily brought in to me did not have intelligence value but was merely routine and administrative in nature. The screened material was then arranged by me in separate piles, one for the Chief of Staff, one for the Secretary of War, one for the A. C. of S., G-2, one for the Secretary of State, and one for the Chief of War Plans Division. I then bound each pile in a cardboard folder, inserted the folder in the proper leather dispatch case, locked each dispatch case and delivered it to the proper office, collecting at that time the bags containing the previous day's output. These bags were brought back by me to my office, opened and the material therein checked prior to destruction by burning.

Lt. Col. GIBSON. It is also your recollection that it was shortly before Pearl Harbor that copies of this Top Secret material were to go also to Gen. McNair, Commanding General of the Army Ground Forces, and it was so delivered to him by officer messenger daily for a short time prior to Pearl Harbor and a short time after Pearl Harbor.

Col. BRATTON. That is correct.

Lt. Col. GIBSON. I show you a memorandum dated 6 December signed by James F. Perry and ask if you ever had that called to your attention at that time.

Col. BRATTON. No I have never seen this paper before.

Lt. Col. GIBSON. Was any of the information contained in that paper ever relayed to you as you recollect at that time?

[25] Col. BRATTON. Not that I recall.

Lt. Col. GIBSON. Were you ever notified by anybody from the Navy that the Navy had intercepted a message which was an implementation of the Winds Code prior to Pearl Harbor?

Col. BRATTON. No, and by Winds Code I mean that phrase which would indicate a rupture of diplomatic relations between Japan and the United States. My recollection is that Lt. Kramer and Commander McCullom had received what appeared to be garbles of variations of this Winds Codes message on one or two occasions, but to the best of my knowledge and belief no clear cut Winds Code message was received prior to Pearl Harbor indicating that relations between Japan and the United States or Japan and Great Britain or Japan and Russia had been or were about to be severed.

Lt. Col. GIBSON. Did Commander McCullom ever tell you of drafting a warning message of several hundred words long warning the commanders in the Pacific area that war was imminent and that such message was not sent out because his superiors deemed it unnecessary?

Col. BRATTON. No, this is the first I have heard of this matter.

Lt. Col. GIBSON. Colonel, to make sure to tie in all loose ends, let me ask you this. All of the Top Secret material that you have here identified the carrying dates of translation between October 1 and instant of Pearl Harbor and which are in this case Exhibit 1, were delivered by you or an officer working for you to the Chief of Staff, Secretary of War, Chief of War Plans Division, A. C. of S., G-2 and

the Department of State, were they not? And delivered at times relatively close to the date of the translation thereof as shown on the bottom of each Top Secret document?

Col. BRATTON. That is correct.

[26]

PART III

Place: Room 2C637 Pentagon Building, Washington, D. C.

Date: 20 September 1944

Time: 1500-1600

Present:

Colonel Rufus S. Bratton

Colonel Carter W. Clarke

Lt. Col. E. W. Gibson

Col. BRATTON. I have a statement to make and I request that it be made a part of the record of this investigation. The allegation has been made, in the press and elsewhere in connection with the disaster at Pearl Harbor, that if G-2 had been "on the job" we would not have been caught so unprepared for our war with Japan. In point of fact, G-2 in general and the Far Eastern Section in particular were very much "on the job," as evidenced by the written record of Estimates, Staff Studies, Memoranda, etc. with which G-2 served the Chief of Staff, the A. C. of S., G-2, WPD, ONI, the State Department and other interested planning and policy making agencies of the Government, to warn them of the increasing menace of Japanese war potential and intentions. G-2 can stand on this record and needs no defense from me. I feel, however, that a part of this record, as presented in the documents I now lay before you, should be taken cognizance of by this investigating committee and made a part of its proceedings if for no other reason than that the documents include some Top Secret papers heretofore known as Magic and many references to others.

Lt. Col. GIBSON. Do I understand, Col. Bratton, that many of the documents contained in the summaries now being introduced into this investigation, most of which were in the nature of Estimates of the Situation, contain conclusions based upon your knowledge of the material contained in the so-called Magic material?

Col. BRATTON. That is correct. The principal document I show you I secured from the G-2 files. It is labeled, "Summary of Far Eastern Documents." It came into being as a result of a letter from the President to the Chief of Staff, dated July 14, 1943, in which the former requested copies of the dispatches of our military attaches which estimate or express any opinion regarding the probability or improbability of an outbreak of war, or which refer in any way to the estimates of potential military strength of any of the countries involved. The countries which [27] concerned the President were Germany, Japan, Italy, Bulgaria, Austria, Occupied France, Belgium, England and Russia. He indicated his interest in dispatches from January 1, 1937 until such time as our military attaches left the first seven named countries; his interest in similar dispatches from England dated from January 1, 1937 to the outbreak of the war in September 1939; and his interest in dispatches bearing on this subject from Russia from January 1, 1937 until the present time (that is, the time of his letter of July 14, 1943). This letter of the President was transmitted to me by the

then A. C. of S., G-2, General Strong, who instructed me to start work on a compilation of the desired documents. I was at that time the Chief of the Intelligence Branch, MIS, G-2. I detailed Col. Maguire to exercise general supervision over the assembly of European documents and Col. Pettigrew over the Far Eastern documents. As stated in the explanatory note which you will find on page 1 of the Summary of Far Eastern Documents, the yearly summaries which follow on successive pages are based on information contained in intelligence documents consisting of reports, memoranda, estimates, etc. The summary itself was written in a chronologically arranged narrative form supported by photostats of the original documents in the files of G-2. It was arranged in this way to facilitate the use of the document by historical researchers. The European summaries were similarly compiled and supported by photostats of the original documents. All summaries were transmitted to the Chief of Staff by a covering memorandum signed by the A. C. of S., G-2, General Strong, 20 August 1943. With the covering memorandum was transmitted a memorandum for the President, subject: Axis War Potential, for the signature of the Chief of Staff, which read as follows:

There are forwarded herewith, in accordance with the request of the President dated July 14, 1943, copies of numerous Military Attache dispatches, memoranda, estimates and handbooks dealing with the preparations for war by Germany, Italy and Japan, and their aggressive intentions on the continents of Europe and Asia from January 1, 1937. Similar documents bearing on Bulgaria, Austria, Occupied France, Belgium, England, and Russia are also included.

These photostatic, carbon, or "true" copies [28] of G-2 dispatches, memoranda, etc., have been arranged in chronological order for each of the above-named countries. To assist the White House Secretariat in studying this material, a brief summary of the contents of each file has been prepared by G-2 and these summaries have also been arranged in chronological order in two volumes. Far Eastern and European, enclosed herewith as Tabs A and B respectively.

It has not been thought advisable to submit all documents on the subject of Axis war preparations to the White House. There are thousands of miscellaneous dispatches and other documents which touch incidentally on German, Italian and Japanese war preparations, but which are only slightly germane to an historical analysis of the information possessed by G-2 on Axis preparations and aggressive intentions.

Furthermore, as the President is aware, during the summer and fall of 1941. G-2 secured from highly secret sources considerable information indicating Japan's determination to resort to armed force in the event that the negotiations between Secretary Hull and Ambassador Nomura, then being conducted, did not result in an agreement satisfactory to Japan. It is presumed that the President does not desire to have documents from this source included in this compilation because of the danger to security involved.

Great care has been taken by G-2 to include in this compilation copies of mis-estimates by Military Attaches or other persons as regards strength and intentions. A few such mis-estimates actually occurred, but on the whole, false conclusions were rare and pertained not so much to the strength and ultimate aggressive intentions of the Axis as they did to the timing of the aggression.

In the case of the document collection pertaining to Germany, a few very important dispatches have been included dealing with the period 1935-1936, inasmuch as these were the years of the largest and most rapid military expansion.

It is thought probable that, after the White House Secretariat commences to study these documents, it will feel the need for examining still further [29] dispatches on matters correlated to the Axis rearmament program. They can be promptly furnished by G-2 in case they are desired.

Col. BRATTON. On August 26, 1943, the A. C. of S., G-2 received a memorandum from the Secretary, General Staff, which read as follows:

The attached tab does not comply with the directive in that it contains much material other than MA reports. The Chief of Staff desires that it be revised to contain *only* MA reports.

This memorandum and Tab A, the Summary of Far Eastern Documents, were given to me by Gen. Strong at approximately 2:00 p. m. 26 August 1943, with instructions to revise Tab A as directed. Tab B, the Summary of European Documents, although prepared in the same manner as Tab A, that is, containing estimates by G-2, Staff Studies, memoranda and other entries of evaluated intelligence, was not returned to Gen. Strong. I inferred that it would be forwarded to the President as compiled and that Tab A was to contain only raw, unevaluated military attache reports. I instructed the Chief, Far Eastern Unit, to revise Tab A as quickly as possible as directed in Col. Sexton's memorandum. At about 2:45 p. m. 26 August 1943, Gen. Strong directed me to include military observer reports with military attache reports in Tab A. The revised Tab A, revised as directed in memorandum from the Secretary, General Staff, dated 26 August 1943, was forwarded to the Chief of Staff on 1 September 1943. The Summary as then written and its supporting file of 15 volumes were based only upon reports received from military attaches and military observers. The Summary of Far Eastern Documents which went forward to the President did not contain any references to Magic or any summaries, estimates or Staff Studies based thereon wholly or in part. It is to the first edition or unrevised Summary of Far Eastern Documents that I wish to call the attention of this committee.

It will be noted that many of the documents have a "distribution list" written or printed on the document itself indicating the offices or officers to whom copies were given. Where no "distribution list" appears it may be assumed that the War Plans Division was given a copy, as was the Office of Naval Intelligence, as that was our standard operating procedure. The State Department was given copies when the subject matter would be of interest to that department. Occasionally, when considered of sufficient importance, copies went to the President.

[30]

TOP SECRET

PART IV

Place: Room 20637 Pentagon Building, Washington, D. C.

Date: 23 September 1944.

Time: 0950-1005.

Present:

Colonel Rufus S. Bratton.

Colonel Carter W. Clarke.

Lt. Col. E. W. Gibson.

Lt. Col. GIBSON. Colonel, while you were testifying about this meeting in the office of General Marshall on Sunday morning, 7 December 1941, you were using a memorandum to refresh your recollection. When was that memorandum prepared and by whom?

Col. BRATTON. On or about the 8th of December 1941, by General Miles with my help.

Lt. Col. GIBSON. Is the above paper a true copy of that memorandum?

Col. BRATTON. Yes.

Lt. Col. GIBSON. I want to get a few more details about this Sunday morning meeting. After your telephone conversation with General

Marshall in which he told you to meet him at his (General Marshall's) office and that he was on his way there, what did you do?

Col. BRATTON. I called General Miles on the telephone and reported to him the gist of my conversation with General Marshall and recommended to General Miles that he come to the office too as General Marshall would no doubt want to see him also. Either General Miles or I, I have forgotten which, then called General Gerow and asked him to come to the office also as we felt General Marshall would wish to see him also. I then proceeded to General Marshall's office and waited for him either in the anteroom, that is, the office of the Secretary of the General Staff, or in the hallway where I could see the Chief of Staff immediately upon his arrival on that floor. My recollection is that General Marshall and General Miles arrived at about the same time and that I followed the two of them into the latter's office, carrying a copy of the message I wished him to see.

[31] Lt. Col. GIBSON. Was that message the message of instructions to the Japanese Ambassadors to deliver the Japanese reply to the Department of State at one p. m. Washington time?

Col. BRATTON. Yes.

Lt. Col. GIBSON. I want to ask another question to clear up another point. When, to the best of your recollection, was the Japanese reply, Top. Secret Army No. 25843, delivered to General Marshall's office?

Col. BRATTON. Either on the night of 6 December or early in the morning of the 7th, prior to his arrival at his office.

Lt. Col. GIBSON. When you walked into General Marshall's office, following General Marshall and General Miles, on the morning of 7 December, what did you do?

Col. BRATTON. I handed him the message referring to the time of delivery to the Secretary of State of the Japanese long reply.

Lt. Col. GIBSON. Did he read it that time or did he read the long Japanese reply first, as far as you recollect?

Col. BRATTON. As far as I recollect, he read the message that I handed to him first, then read the long reply.

Lt. Col. GIBSON. Colonel, is it possible that the second telephone conversation on that Sunday morning between General Marshall and Admiral Stark was as a result of Admiral Stark's calling General Marshall, rather than General Marshall calling Admiral Stark?

Col. BRATTON. Yes, it is quite possible.

Lt. Col. GIBSON. Did you make two or three trips to the message center with the message penciled by General Marshall on that forenoon of 7 December?

Col. BRATTON. I made only two trips to the message center, carrying General Marshall's penciled memorandum with me for delivery to the officer in charge of the message center on the first trip.

Lt. Col. GIBSON. Did Colonel Bundy go with you on either trip to the message center on that Sunday morning?

Col. BRATTON. He did not.

[32] Lt. Col. GIBSON. This 11:25 a. m. when you first saw General Marshall on that Sunday morning, that time is the time as you and General Miles recalled it when you drew up this Memorandum for the Record, is it not?

Col. BRATTON. Yes.

TESTIMONY OF COL. EDWARD F. FRENCH

[1] Place: Room 2C637 Pentagon Building, Washington, D. C.

Date: 28 September 1944.

Time: 1015-1045.

Present:

Colonel Carter W. Clarke.

Colonel Edward F. French.

Lt. Col. E. W. Gibson.

Colonel Edward F. French, having been sworn and warned of his rights by Colonel Carter W. Clarke, gave the following sworn testimony:

Lt. Col. GIBSON. Will you state your name, rank and serial number and present position, please.

Col. FRENCH. Colonel Edward F. French, O8935, officer in charge of Traffic Operation Branch, Army Communications Service, Office Chief Signal Officer, Washington, D. C.

Lt. Col. GIBSON. Were you on duty in the War Department in Washington in that position the first week of December 1941?

Col. FRENCH. I was.

Lt. Col. GIBSON. As such, did you have immediate supervision over the War Department message center?

Col. FRENCH. I did.

Lt. Col. GIBSON. I show you now telegram dated 5 December 1941 signed Miles, addressed to Assistant Chief of Staff, Headquarters G-2, Hawaiian Department, Honolulu, Territory of Hawaii, and ask if this telegram passed through your message center for delivery to the addressee on that particular day.

Col. FRENCH. This message was received in the code section of the War Department message center at 11:47 a. m. on the 5th of December 1941, as indicated by the stamp on the reverse side. This message was given a code serial number of 519 and its transmission evidenced by the "Sent No. 519 12-5," as typed on the face of the message.

Lt. Col. GIBSON. Was that typed by the message center, that particular typing?

[2] Col. FRENCH. No. This clear text message never left the code room but that number and date was typed on there after the return of the coded copy of the coded text itself from the Signal Center.

Lt. Col. GIBSON. Who actually did the typing of the words "Sent No. 519 12-5"?

Col. FRENCH. That was typed on there by a clerk in the code room after the return of the message from the Signal Center.

Lt. Col. GIBSON. After the message had actually been sent?

Col. FRENCH. After the message had actually been received by the Signal Center for transmission. Then this copy, as provided for under the routine, was returned to G-2. We do not keep any copies of the original texts in our office; they were returned to the writer within 24 hours.

Lt. Col. GIBSON. Will you explain the routine that then existed between Hawaii and the War Department which was set up to insure that all messages sent were received?

Col. FRENCH. To assure that all messages were received, we had a separate set of serial numbers that was utilized to identify the classified message. These numbers were assigned in sequence and were frequently checked to assure that the message assigned that number reached its destination. In some instances messages have been delayed in transmission or in office routine so that a message would be received in a code room out of sequence. In such instances a service message would be instituted to check for the message not in sequence that was evidently delayed or possibly lost.

Lt. Col. GIBSON. In other words, Colonel, if message No. 519, being the telegram in question in this investigation, had not been received by Hawaii, what would have happened?

Col. FRENCH. In checking their numbers off in Hawaii, when Hawaii would receive No. 520 and No. 419 did not appear in a reasonable time, they would query the War Department message center relative to No. 519, and the War Department message center would check the files, verify its transmission and repeat the message.

Lt. Col. GIBSON. Do you believe this message No. 519 on 5 December 1941 went by cable or by radio?

[3] Col. FRENCH. I believe that that message went via radio as it was a "routine" message and our normal transmitting would be via radio. In the event that our radio was out of service, due to atmospheric conditions, the message would have been transmitted via cable.

Lt. Col. GIBSON. Your records of messages sent in December 1941 were kept for how long?

Col. FRENCH. As I recall it, at the time it was 6 months. However, the regulations have since been changed and the messages are now retained for a period of 3 months. The War Department code room is not an office of records, under the provisions of Army regulations. All records pertaining to classified messages rest with the office of origin.

Lt. Col. GIBSON. Then as far as you know the Signal Corps have no existing records in Washington that would show any more about the fate of message No. 519 of 5 December 1941?

Col. FRENCH. The only actual record of this message is as indicated on the message itself. The files of the coded text have all been destroyed by burning, as provided for in Army regulations.

Lt. Col. GIBSON. I want to go to the morning of 7 December 1941. Were you on duty in the message center on that morning?

Col. FRENCH. I placed myself on duty on Sunday morning, 7 December.

Lt. Col. GIBSON. Were you there when Colonel Rufus Bratton brought a penciled message to the message center?

Col. FRENCH. I was in my office across the hall from the code room when Colonel Bratton came to the code room with a message.

Lt. Col. GIBSON. Will you tell us now what took place at that time.

Col. FRENCH. I heard some commotion over in the code room and I immediately left my desk and on arrival there I found Col. Bratton with a message that he was anxious to have processed for immediate transmission. I asked Colonel Bratton if I could be of any assistance to him and he said he was anxious to get this message processed [4] immediately. The message, as I recall, was written in pencil on a slip of paper. It was rather difficult to read so I told Colonel

Bratton it would be necessary to type the message and have him verify. The message was typed and Colonel Bratton verified and authenticated the message. We immediately processed this message into a code system and after the work was under way I went into the Signal Center to check and determine the method of transmission. I found that our channel at Honolulu was out, due to atmospheric conditions, from about 10:30 that morning. I had the operator check the channel to Honolulu and at that time Honolulu could not be heard. It was determined that Honolulu was working San Francisco but the atmospheric condition was so bad that to transmit the message to San Francisco in a relay to Honolulu would mean that it would have to be sent at slow speed and then copied and retransmitted at San Francisco to Honolulu. I made up my mind that the quickest method of dispatch would be via commercial service and avoid the risk of any garbling or error in relaying the message via Army facilities through San Francisco.

Lt. Col. GIBSON. What did you know about the means of communication between RCA and Honolulu and Ft. Shafter?

Col. FRENCH. Our normal method of transmitting a message, when atmospheric conditions prevent handling via radio, is to utilize commercial facilities that are available in the Signal Center. As this message could be handled directly to San Francisco via the Western Union and on a tube relay of this message to the RCA office in San Francisco, with that excellent dispatch, this method had been chosen. I had learned on Saturday, the day previous, that the RCA was installing a teletype circuit to the Department headquarters at Ft. Shafter, so I assumed that this would be the most expeditious means of getting that message with the least practicable delay to the Department headquarters.

Lt. Col. GIBSON. You have no personal knowledge, I assume, of actually what happened to the message when it got to Hawaii?

Col. FRENCH. No.

Lt. Col. GIBSON. Did Colonel Bratton return to the message center a second time after he had been there the first time as you have described?

[5] Col. FRENCH. Yes, I believe Colonel Bratton was in my office several times during that Sunday morning.

Lt. Col. GIBSON. Was he there a second time with reference to this particular message?

Col. FRENCH. As I recall, on my return to the code room from the Signal Center, I met Colonel Bratton at the code room door and he asked me how long it would take to get that message transmitted to Hawaii. I informed him that I thought it would be there within a half hour to 45 minutes.

Lt. Col. GIBSON. Did Colonel Bundy ever at any time come that morning to your office with Colonel Bratton?

Col. FRENCH. I don't recall that Colonel Bundy came to my office with Colonel Bratton but I very definitely recall Colonel Bundy coming to my office that morning and spending some time with me there.

Lt. Col. GIBSON. Was that before or after this episode?

Col. FRENCH. After this episode. In fact, Colonel Bundy and I reviewed the action taken on certain messages.

Lt. Col. GIBSON. Which messages were they that you reviewed the action taken on?

Col. FRENCH. Whatever messages were at that time being transmitted through the office.

TESTIMONY OF WILLIAM F. FRIEDMAN

[1]

PART I

Place: Room 20637 Pentagon Building, Washington, D. C.

Date: 16 September 1944.

Time: 1045-1115.

Present:

Colonel Carter W. Clarke.

Lt. Col. E. W. Gibson.

Mr. William F. Friedman.

Mr. William F. Friedman, having been sworn and warned of his rights by Colonel Carter W. Clarke, gave the following sworn testimony:

Col. CLARKE. Will you state your name and official position in the U. S. Government.

Mr. FRIEDMAN. William F. Friedman, Director of Communications Research, Signal Security Agency, Office Chief Signal Officer.

Col. CLARKE. What were your duties in this position during the six months period immediately prior to Pearl Harbor?

Mr. FRIEDMAN. I was principal cryptanalyst in the Signal Intelligence Service. I had just been retired from active duty as lieutenant colonel, Signal Reserve, in about April, I think it was the early part of April 1941, and was given an honorable discharge for permanent disability. I had been in Walter Reed hospital for some three or four months and was recovering from a nervous breakdown.

Col. CLARKE. In your position you were familiar with and had access to and had read all of the production of the Signal Intelligence Service?

Mr. FRIEDMAN. I had access to it. I didn't read it all because at that time, in my condition I was not able to carry on a full day's duty and had been assigned to other work by Col. Minkler who was then the Chief of SIS.

Col. CLARKE. Were you familiar with a message which was received on or about November 28 which later became known as the Winds message?

Mr. FRIEDMAN. Yes.

Col. CLARKE. I gave you this document and ask you to identify it.

Mr. FRIEDMAN. I believe that I was familiar with it at the time.

[2] Col. CLARKE. Will you state what, to the best of your recollection, is the history of this message, with any implementing message which may have been received in connection with it.

Mr. FRIEDMAN. My recollection is so hazy at the moment and I really was not in on the details of cryptanalytic operations at the time, so I would hesitate to make any statement about that.

Col. CLARKE. Could you refresh your memory by getting a log of SIS?

Mr. FRIEDMAN. I think that would be possible.

Col. CLARKE. Do you know whether any implementing message on that was ever received?

Mr. FRIEDMAN. Not to my direct knowledge at the time. I only learned of it comparatively recently in talking with Col. Sadtler and Capt. Safford of the Navy. If I did know it at the time I have forgotten it.

Col. CLARKE. Would you care to make any statement with reference to the arrangement which was then in existence where the Navy processed messages one day and the Army the next. Would that have contributed to the disaster where you had no continuity of study?

Mr. FRIEDMAN. I don't believe that arrangement had any particular affect on the situation. It was an arrangement that was worked out between Adm. Noyes and Gen. Mauborgne, to have as fair a distribution of work and credit in the results achieved as possible.

Col. CLARKE. The point I am making there though is, would the translators who worked on the same thing day in and out not have had this continuity of thought in mind if the same people had been working on it?

Mr. FRIEDMAN. Of course the translators in both the Army and the Navy cryptanalytic sections were constantly engaged on the same sort of material. There was a full exchange of material and results. A message might be done one day by the Navy people and another message the next day by the Army people, so that they kept their hands in it together and they were keeping abreast of each other in the work. That of course was one of the aims of that arrangement. I, as a technician, think that it was a poor arrangement from a cryptanalytic standpoint but from a practical standpoint, in trying to share the work on an equal basis and share credit perhaps, that is as good an arrangement as could be worked out, with two separate but cooperating organizations.

Lt. Col. GIBSON. Just one question. You received from the FCC a document with three attachments, a letter dated August 18, 1944 having to do with the so-called Winds Message and possible implementation thereof. Is that correct? I show you this telegram.

Mr. FRIEDMAN. The documents were not received directly by me from the FCC. I was given a copy by Capt. Safford of the Navy.

Lt. Col. GIBSON. And this is the document that I now have in my possession?

Mr. FRIEDMAN. That is right.

PART II

Place: Room 2C637 Pentagon Building, Washington, D. C.

Date: 19 September 1944.

Time: 1030-1200.

Present:

Colonel Carter W. Clarke.

Lt. Col. E. W. Gibson.

Mr. William F. Friedman.

[4] **Lt. Col. GIBSON.** Do you now have access to the Signal Intelligence Service records of the United States Army for the dates October through Pearl Harbor 1941?

Mr. FRIEDMAN. I do.

Lt. Col. GIBSON. And have you searched those records to see what, if anything, was done about having Army signal stations monitor for the Japanese Winds Code message?

Mr. FRIEDMAN. I have examined the files which are extant and find that certain messages were sent and I can present copies of those which were found.

Lt. Col. GIBSON. Did the Army ask its stations to monitor for implementations of the so-called Winds messages?

Mr. FRIEDMAN. Not specific Winds messages so far as I know, but a general directive was sent to all its monitoring stations on December 2 directing that monitoring stations were to copy all Japanese plain text in addition to code text and that traffic be forwarded with the regular traffic.

Lt. Col. GIBSON. Was any other message sent in this regard after that?

Mr. FRIEDMAN. On December 7 a message was sent to Signal officers at Manila, Ft. Shafter and Presidio of San Francisco directing that they were to send to the War Department by priority enciphered radio Japanese clear language messages all ending with the English word "stop," copied since November 27 and thereafter.

Lt. Col. GIBSON. Is there any record showing that the Army Signal Service received prior to Pearl Harbor any message that implemented either of these Winds Codes?

Mr. FRIEDMAN. Not that I have been able to find so far.

[5] Lt. Col. GIBSON. Have you made a diligent search from all possible sources available to you to see if the Army Signal Service, through its monitoring stations, ever received any executing message to these Winds messages?

Mr. FRIEDMAN. I have made a diligent search but I will not say that it is a completely exhaustive search because of the lack of time. Thus far I have not found a single bit of evidence to indicate that an Army station actually intercepted a Winds execute message.

TESTIMONY OF MAJ. GEN. L. T. GEROW

[1] Place: Room 3E794 Pentagon Building, Washington, D. C.

Date: 25 September 1944.

Time: 1420-1530.

Present:

Major General L. T. Gerow.

Colonel Carter W. Clarke.

Lt. Col. E. W. Gibson.

Major General L. T. Gerow, having been sworn and warned of his rights by Colonel Carter W. Clarke, gave the following sworn testimony:

Col. CLARKE. Will you state your name, rank, organization and station please.

Gen. GEROW. L. T. Gerow, Major General, U. S. Army, Commanding V Corps, Luxembourg.

Col. CLARKE. What were your duties, sir, from the period October 1, 1941 through December 7?

Gen. GEROW. Assistant Chief of Staff, War Plans Division.

Col. CLARKE. In this position, will you state whether or not you received from G-2 any material which was then known to you as Magic.

Gen. GEROW. I did.

Col. CLARKE. Are you familiar with that material? Do you identify any of it as material which you have previously seen?

Gen. GEROW. I saw material of a similar nature three years ago. I cannot definitely state at this time whether or not I saw these particular documents. I imagine I did.

Col. CLARKE. Do you recall having discussed with Colonel Bratton or General Miles a message which later became known as the "Winds" message? In that message there was a statement that if certain words occurred in the weather broadcast that would indicate the severance of diplomatic relations between the United States and Japan or Great Britain and Japan or Russia and Japan. The message is Top Secret Army No. 29432.

Gen. GEROW. I believe I saw the message and discussed it with [2] Colonel BRATTON. I cannot be sure, at this late date.

Col. CLARKE. Do you recall whether on the morning of approximately December 5 or at any other time that you discussed with General Miles or Colonel Bratton any message which implemented that which would indicate the severance of relations between the United States and Japan?

Gen. GEROW. I do not remember any such message.

Col. CLARKE. Do you recall, as Chief of War Plans Division, any warning message being sent out on or about November 27, 28 or 29 to the overseas commanders?

Gen. GEROW. Yes, I remember the message sent out on 27 November.

Col. CLARKE. Do you have any recollection of any of this stuff that Sadtler says here in his testimony?

Gen. GEROW. I have recollection of talking to Sadtler only once. I don't recall ever being informed by Colonel Sadtler of the fact that Japan had decided to declare war on Great Britain.

Col. CLARKE. Were you ever informed by Colonel Bratton or General Miles of that?

Gen. GEROW. Not to the best of my recollection.

Col. CLARKE. When Colonel Bratton would bring this material to you, would you just read it or did you discuss it with him?

Gen. GEROW. Ordinarily he would leave it for me to read. On some occasions he would remark that he had something very hot or refer to a particular paragraph which we would discuss.

Col. CLARKE. Do you recall ever discussing the contents of any of this, prior to Pearl Harbor, with General Marshall?

Gen. GEROW. Yes, I do recall discussing Magic information with General Marshall on numerous occasions.

Col. CLARKE. Do you remember whether or not any of the warning messages which you sent out, as Chief of War Plans Division, were based on this material?

[3] Gen. GEROW. The warning messages were based on the general situation as we knew it and a part of that information came from these messages.

Col. CLARKE. Do you recall ever having gotten a warning from the Secretary of State to the effect that negotiations would very likely break down and that war would ensue?

Gen. GEROW. Of course I didn't get any information as a rule direct from the Secretary of State. On one occasion I recall there was a general discussion in the Secretary of War's office relative to the phrasing of a warning message to go to the overseas commanders. Prior to sending this message out the Secretary of War conferred over the

telephone with the Secretary of State. The result was that a message, dated November 27th, was sent out containing such a statement.

Col. CLARKE. General, will you state what you recollect about the instance of the morning of December 7, with particular reference to any message which may have been brought to your attention by Colonel Bratton or General Miles.

Gen. GEROW. I have here a memorandum for record on that subject which I prepared on December 15, 1941. I would like to insert that memorandum in the record as my answer to your question.

Lt. Col. GIBSON. I show you Top Secret Army No. 25850. Is that the message you refer to?

Gen. GEROW. I cannot definitely identify this message, but I think it is the same one that was under discussion.

Lt. Gen. GIBSON. Do you recall who, if anyone, there wrote a message to be sent to Honolulu?

Gen. GEROW. General Marshall personally wrote the message.

Lt. Col. GIBSON. Referring to your memorandum dated 15 December 1941, do you remember whether General Marshall sent Colonel Bratton back to the message center a second time to check?

Gen. GEROW. I don't recall.

Lt. Col. GIBSON. Do you recall whether there was any discussion or debate regarding the interpretation on either of [4] these messages in General Marshall's office prior to the writing of this message? Was it discussed freely?

Gen. GEROW. The message was discussed freely. The main point involved was the significance of the time—1:00 p. m.

Lt. Col. GIBSON. And who was there exactly besides you, Bratton and General Marshall?

Gen. GEROW. General Miles and Colonel Bundy.

Lt. Col. GIBSON. The discussion, as you remember it, was about this one o'clock proposition?

Gen. GEROW. That is right.

Lt. Col. GIBSON. Do you remember whether or not General Marshall asked your opinion, what it meant, or anything of this nature?

Gen. GEROW. He asked all of us for an opinion as to the meaning of the message.

Lt. Col. GIBSON. This Magic, was that delivered in a dispatch case at that time to your office everyday—a locked dispatch case?

Gen. GEROW. As I recall, Bratton used to bring it down himself personally in a locked dispatch case.

Lt. Col. GIBSON. During the day you would go over it and the next day he would come and get that and leave you some more?

Gen. GEROW. I don't think we kept it. I think I went over it as soon as I could and occasionally I would call Bundy, my war planning man, in and let him see parts of it, and then it would be returned immediately to Bratton.

Lt. Col. GIBSON. Were you pretty close to G-2 at the time; did they give you estimates of the situation occasionally?

Gen. GEROW. Yes.

Lt. Col. GIBSON. And you conferred with them about the enemy situation generally?

Gen. GEROW. That is correct.

[5] Lt. Col. GIBSON. It was your duty, as head of the War Plans Division, to direct the Commanding General of the Hawaiian Depart-

ment as to dispositions, what state of alert to take, or anything of that nature?

Gen. GEROW. Not necessarily that way. If something important would come up it would be discussed with the Chief of Staff and might be discussed by the Joint Board. Messages would result from those discussions.

Lt. Col. GIBSON. Generally such instructions sent out would be sent through your office?

Gen. GEROW. Yes, on matters involving WPD responsibilities. If it were purely a G-2 matter, the instructions would go out through the G-2 office. War Plans Division occupied a little different status at that time from what it occupies now.

Lt. Col. GIBSON. Did the Navy ever inform you exactly of what their naval schedule was, that is, when their ships would be in harbor and when they would be out to sea, or anything of this nature, particularly referring to the Hawaiian Islands?

Gen. GEROW. No. I don't believe they did specifically inform me. I could have gotten that information, however, from the Navy had I asked for it.

Lt. Col. GIBSON. Were you aware that the Navy were coming in and tying up on definite weekends in Hawaii?

Gen. GEROW. No. I was not.

Lt. Col. GIBSON. I show you a message dated 27 November 1941 and ask if that is the message that you have referred to in your testimony where the telephone conversation was had with the Secretary of State prior to the sending of that particular message?

Gen. GEROW. Yes, this is the message I referred to. I presume that it is a true copy of the original message.

Col. CLARKE. Yes it is.

Lt. Col. GIBSON. I also show you a copy of a secret radiogram dated July 7, 1941 which is in the nature of a warning to the Hawaiian commander and others and ask if you recollect that.

[6] Gen. GEROW. Yes. It carries my signature.

Lt. Col. GIBSON. I just wondered if you had any recollection of it now.

Gen. GEROW. Yes. I remember such a message.

Lt. Col. GIBSON. In other words, even on July 7, 1941, you were giving some sort of warning to these various commanders?

Gen. GEROW. That is right.

Lt. Col. GIBSON. When you sent this warning of November 27, did you consider that as a definite war warning, General?

Gen. GEROW. I considered it very definitely a message to put our forces on the alert in these various overseas garrisons against a possible attack by Japan.

I was called to the Deputy Chief of Staff's office (General Bryden) and there General Miles, Colonel Bundy, General Bryden and I discussed the advisability of including in this message any reference to sabotage or subversive activities. I objected to the inclusion of any reference to sabotage in this message that was being prepared by War Plans Division. As I recall, the decision was finally made by General Bryden that G-2 would send a message to the G-2 of the Hawaiian Department telling them to be on the alert against sabotage. The original copy of the message that we had at that meeting shows that the

reference to subversive activities and sabotage was stricken out and initialed by me, with the approval of General Bryden.

Col. CLARKE. In view, sir, of what you have just stated, in your opinion this message of November 27 constituted a definite war warning to the overseas commanders and you did not want to confuse sabotage or subversion with an alert?

Gen. GEROW. Yes, I did conceive it to be that, very definitely.

Lt. Col. GIBSON: General, this message of November 27, 1941 to the Commanding General, Hawaiian Department and Commanding General, Caribbean Defense Command, was considered by you to be a definite warning to be on the alert against a possible enemy offensive against those garrisons.

[7] Gen. GEROW. That is correct.

Lt. Col. GIBSON. I show you now, General, a paraphrase of a radiogram from General Short received in the War Department 29 November 1941 and ask if you recollect that message.

Gen. GEROW. I don't recall having seen that message. If I did see it my initials probably appear on it in the permanent records.

Lt. Col. GIBSON. Do you have any recollection of having an answer from General Short to your warning radiogram of 27 November 1941?

Gen. GEROW. The War Department records show that such a message was received in the War Department.

Lt. Col. GIBSON. You mean an answer from General Short?

Gen. GEROW. Correct.

Lt. Col. GIBSON. Did you recollect what his answer was?

Gen. GEROW. I have refreshed my memory from War Department records. There was a reply received from General Short which in substance stated that he had taken all the necessary precautions against sabotage and that he had liaison with the Navy.

Lt. Col. GIBSON. Did you know of the message of November 24, 1941 sent by the Chief of Naval Operations to Admiral Kimmel, which message stated that in the opinion of the Navy Department a surprise aggressive movement in any direction by the Japanese, including an attack on the Philippines or Guam, was a possibility; that the doubt as to favorable outcome of pending negotiations, the statements of the Japanese government, and the movements of its army and naval forces, supported this opinion, and that the message stated that the Chief of Staff of the Army requested the local senior Army officers be advised that he concurred in the dispatch? Did you know of the sending of that dispatch on or about 24 November 1941?

Gen. GEROW. I knew that the Navy sent such a message and believe that I read it. As to the exact date and wording, I cannot recall at the moment.

[8] Lt. Col. GIBSON. But it was at about that time?

Gen. GEROW. Yes.

Lt. Col. GIBSON. Did you also know that on the 27th of November, the date on which this warning message was sent through your office to the Commanding General of Hawaii, that the Chief of Naval Operations was sending a message to the Commander-in-Chief of the Pacific fleet which stated in substance that the dispatch was to be considered a war warning; that the negotiations with Japan in an effort to stabilize conditions in the Pacific had ended; that Japan was expected to make an aggressive move within the next few days; that an amphibious expedition against either the Philippines, Thai, or Kra Pen-

insula, or possibly Borneo, was indicated by the number and equipment of Japanese troops and the organization of their naval task forces. The message further stated that Guam, Samoa and Continental Districts had been directed to take appropriate measures against sabotage, that a similar warning was being sent by the War Department. At about that time did you know such a message was being sent by the Navy Department?

Gen. GEROW. To the best of my recollection, at that meeting in the Secretary's office on the morning of November 27, it was agreed at that time that the Navy would send a similar warning message to the one that the War Department was sending out.

Lt. Col. GIBSON. Did you know at the time that on December 3, 1941 the Navy Department sent a message to the Commander-in-Chief of the Pacific fleet stating it was believed certain Japanese consulates were destroying their codes and burning secret documents; and that on December 4 and again on December 6 they sent instructions to the Commander-in-Chief of the Pacific fleet with regard to destroying certain confidential documents and means of confidential communication under conditions of emergency. Did you know of such messages being sent?

Gen. GEROW. I have no recollection of having seen such a message although I may have seen it before dispatch. The War Plans Divisions of both the Army and Navy were in constant contact and kept each other advised of action taken.

[9] Lt. Col. GIBSON. At that time, was it your opinion that the Commanding General of the Hawaiian Department and the other Commanding Generals of the Departments in the Pacific or of the Caribbean had had sufficient warning against any aggressive action by an enemy, particularly the Japanese?

Gen. GEROW. I felt that they had been sufficiently warned as to the possibility of aggressive action on the part of Japan.

DECEMBER 15, 1941

On Sunday, December 7, 1941, about 11:30 A. M., E. S. T., General Marshall called me to his office. General Miles and Colonel Bratton were present. General Marshall referred to the fact that the Japanese Ambassador had been directed to deliver a note to the State Department at 1 P. M., December 7, 1941. He felt that the Japanese Government instructions to deliver the note at an exact hour and time might have great significance. The pencilled draft of an alert message to be sent at once to CG, U. S. Army Forces in Far East; CG Caribbean Defense Command; CG Hawaiian Department; and CG Fourth Army were read aloud by General Marshall and concurred in by all present. Colonel Bratton was directed to take the pencilled draft of the message to the Message Center and have it sent immediately by the most expeditious means. Colonel Bratton returned in a few minutes and informed General Marshall that the message had been turned over to the Message Center and would reach destinations in about thirty minutes. The pencilled draft was typed later during the day and formally made of record.

/s/ L. T. Gerow

L. T. GEROW

Brigadier General,

Acting Assistant Chief of Staff.

TESTIMONY OF BRIG. GEN. HAYES A. KRONER

[1] Place: Room 2C637 Pentagon Building, Washington, D. C.

Date: 13 September 1944.

Time: 1430-1510.

Present:

Brigadier General Hayes A. Kroner.

Colonel Carter W. Clarke.

Lt. Col. E. W. Gibson.

Brigadier General Hayes A. Kroner, having been sworn and warned of his rights by Colonel Carter W. Clarke, gave the following sworn testimony:

Col. CLARKE. Will you state your name, rank and station.

Gen. KRONER. Hayes A. Kroner, Brigadier General. Station: Rio de Janeiro, Military Attache.

Col. CLARKE. When did you first come on duty in G-2, War Department General Staff?

Gen. KRONER. About the first of March 1941.

Col. CLARKE. What were your duties at that time?

Gen. KRONER. I was assigned to the British Empire Section of the Intelligence Branch, G-2 but before taking up those duties I was sent to England for a period of observation of the war. I returned from England early in June, about the middle of June 1941, and took up my duties of Chief of the British Empire Section, G-2 at that time.

Col. CLARKE. How long did you continue on that duty?

Gen. KRONER. Approximately one month.

Col. CLARKE. And then what did you do?

Gen. KRONER. About the middle of July I was informed by the retiring Chief of the Intelligence Branch, Col. C. H. Mason, that he was leaving G-2 and that he had been instructed to turn the Branch over to me as the next senior officer. I immediately took over charge of the Branch and for the next several months was acting in charge and later on I was appointed Chief of the Branch. To the best of my memory it was about September 17 that an order was issued by the Executive Officer, G-2 appointing me as the Chief of the Intelligence Branch, which position I [2] held until sometime in the month of December, when General Lee became Acting Assistant Chief of Staff, G-2 and I was then verbally relieved from Chief of Intelligence Branch and made Deputy to General Lee.

Col. CLARK. What did the Intelligence Branch consist of principally?

Gen. KRONER. I found the Intelligence Branch, in July '41, to consist of a very small Administrative Section and of several geographic sections and an Air Section. The Administrative Section was in process of transition. Because of the impact of the war and more information coming into G-2, there was a greater need for proper handling and dissemination of that information. The only geographic section of G-2 which appeared to be expanding at that time was the Latin American Section. By the 10th of October—referring here to the official chart on record—the Intelligence Branch consisted of a headquarters or the Administrative Section, Contact Section, Situation Section, Dissemination Section, and the Air and geographic sections composed of the following: Air Section, British Empire Section, Western European Section, Central European Section, Eastern European Section, South-

ern European Section, Far East Section, and the Latin American Section. The several European sections had been set up to deal with the increased information coming in from the European war and, together with the British Empire Section, it was considered adequate to handle the war in Europe. The Latin American Section was expanding for obvious reasons of hemisphere defense. The Far Eastern Section at this time had not undergone any material change, so far as I remember, for several months. This organization, with a few changes, continued during my tenure of office as Chief of the Branch. The second exhibit of the organization chart of December 5, 1941 indicates that.

Col. CLARKE. I understand you to say then that you were Chief of the Intelligence Group from about July through Pearl Harbor, December 7?

Gen. KRONER. Yes.

Col. CLARKE. During that time was there any recommendation made—first let me ask you this—who was the Chief of the Far Eastern Section?

Gen. KRONER. Col. R. S. Bratton.

Col. CLARKE. During that time was there any recommendation made to you as Chief of the Group for any increase in personnel [3] or expansion of its intelligence gathering activities?

Gen. KRONER. Not any to give me any trouble—there was some minor increase of a clerk or two and perhaps one officer, I don't remember, but nothing in the line of expansion as I have referred to in the European Section. I would say this further, that one of their Far East experts, Col. Pettigrew, was taken from the Far Eastern Section at that time to assist in the reorganization of the Headquarters dissemination, so that I had very close to me at that time an experienced Far East officer on my staff.

Col. CLARKE. Who was that?

Gen. KRONER. Pettigrew. It was, I think, worthy of note just here that Col. Betts, who was the Chief of the Situation subsection, whom I called my G-2-G-3 officer on my own staff, Col. Pettigrew being so-called G-1-G-4 officer, together with my own experience in the Far East, that with Col. Bratton it was a fairly good team of Far East trained officers at the head of the Intelligence Group.

Col. CLARKE. Was there any action taken by the Chief of the Far Eastern Group that would lead you to think that any difficulties or hostilities were expected in the Orient that would affect the United States?

Gen. KRONER. None specifically as to direct threat in regard to time or date or place. Japanese possible lines of action were often discussed, as you might expect among officers as closely allied as the ones I mentioned above with Far East training and influence. I left the evaluation of information pertaining to the Far East and its interpretation initially to Col. Bratton, and in that over-all sense to Col. Betts.

Col. CLARKE. What was your chief source of information with regard to the Far East?

Gen. KRONER. Military Attache reports and translations of books and journals which were received from various sources, so far as I was aware.

Col. CLARKE. You had no secret intelligence service?

Gen. KRONER. No.

Col. CLARKE. Was any attempt made to create any during the time that you were in charge?

[4] Gen. KRONER. Yes. I remember the time—I don't remember exactly—but I remember an instance which was partially fulfilled, I believe, that a former Far East trained officer, who I think was retired and living in California, Captain or Major W. C. Clear, was brought into G-2 and given secret briefing by Gen. Miles, to the best of my knowledge, and sent out to the Far East, I think to Singapore, in order to initiate some secret intelligence, of which I have no detailed knowledge.

Col. CLARKE. Did we have any liaison with the Chinese secret intelligence?

Gen. KRONER. Not that I know of. The Military Attache in China may have had such but it did not come to my attention.

Col. CLARKE. Did you have direct communication and contact or a direct reporting system with the G-2 of the Philippine Department?

Gen. KRONER. Yes, we exchanged reports and some telegrams. That I left largely in the hands of Col. Bratton who, as Chief of the Far Eastern Section, encompassed Japan, China and the Philippines and in general the whole Pacific area. In the Intelligence Section, as far as I know, prior to Pearl Harbor the exchange of information was routine; it was automatic. I recall toward the end of the summer of '41 that Col. Bratton got somewhat disturbed because our Military Attache in Tokyo was getting practically no information. The Japanese had practically closed up on him, and we took that as an indication of their general hardening of their relationship towards us.

Col. CLARKE. Did you receive any reports from the State Department agencies such as the Commercial Attache or the consular service?

Gen. KRONER. Yes, all sections in the Intelligence Branch had at that time direct liaison with their appropriate opposite number in the State Department. This was an established standard procedure, and only when something out of the ordinary came to the front was the State Department paper given any special attention. In addition to that I, Chief of the Branch, and Col. Betts talked and discussed things concerning the Far East with various officers in the State Department and also in the Navy Department.

Col. CLARKE. I was going to ask, did you have the same relation with the Navy?

[5] Gen. KRONER. And the same relation with the Navy.

Col. CLARKE. Did that give you, so far as you know, full and complete exchange of information and intelligence?

Gen. KRONER. So far as I know.

Col. CLARKE. What were your relations with the F. B. I.? Did you have any contact with them?

Gen. KRONER. I had none whatever. I got no information—

Col. CLARKE. Did you from any other federal government agency?

Gen. KRONER. The Commerce Department is the only one at that time, I remember.

Col. CLARKE. Did you have access to a source of information which we know as Top Secret or the British known as Most Secret?

Gen. KRONER. Meaning communications information?

Col. CLARKE. Signal intelligence.

Gen. KRONER. No, none whatever.

Col. CLARKE. You mean you didn't get it or your Branch didn't get it?

Gen. KRONER. I personally as Chief of the Branch did not get it. I was aware that something, which later I found out to be of this nature, existed, but I was given to understand, particularly by Col. Bratton and Col. Pettigrew, who sometimes handled the matter for Col. Bratton, that he received information from Col. Minkler, whom I knew to be in the Signal Corps, which perhaps had to do with Japanese troop movements, which he by long custom and by General Miles special desire, was to handle himself directly with Gen. Miles.

Col. CLARKE. Then you don't know what Col. Bratton did with this stuff other than to give it to Gen. Miles?

Gen. KRONER. No official information. I frequently remember seeing him leave his office with several parcels under his arm and be gone for some hours, but I felt it was my duty to follow the established procedure which was apparently pleasing to my own chief, and I didn't question the procedure.

[6] Col. CLARKE. During the time that you were Chief of the Intelligence Group you never had access or never saw any of this material yourself? When did you first see it?

Gen. KRONER. I only saw the material, which later I learned was called material, when I used to receive it from Minkler's hands when Bratton was absent, and lock it up in my safe and give it to Bratton without sorting it out. In other words, I understood, without any specific orders from Gen. Miles, *that he wished it handled that way and therefore I did not violate that procedure.*

Col. CLARKE. Do you know if any estimates were written in the Far Eastern Section based on this material or any prognostications, forecasts, or predictions?

Gen. KRONER. I do not.

Col. CLARKE. If any had been made you would have seen them, wouldn't you, as the Chief?

Gen. KRONER. I think so because estimates were accustomed to being made, not only at regular intervals, but also special estimates from time to time would be made, the Far Eastern part of which was always prepared initially in the Far East, held by Col. Bratton or under his direction brought in to Col. Betts, who revised it and fitted it in with information from other geographic sections. I assumed that the Chief of the Far Eastern Section used all the information at his disposal to make a complete estimate and as accurate an estimate as possible.

Col. CLARKE. Did there exist anything like a central evaluating section where all information came in and was there melted into one estimate or report or summary?

Gen. KRONER. No. There was a trend toward that at the end of the year but we didn't get anywhere with it. It was just in the planning stage.

Col. CLARKE. Well then, you have no personal or official knowledge of who other than Col. Bratton and Gen. Miles saw this Top Secret material?

Gen. KRONER. That is correct. I have not.

Col. CLARKE. Are you familiar with any warning messages that may have been sent to the Hawaiian or other departments?

[7] Gen. KRONER. Only now—not at the time of the sending.

Col. CLARKE. At the time they were prepared and sent you had no knowledge?

Gen. KRONER. No, none whatever.

Colonel CLARKE. When did you first become aware of the existence of these warning messages which were sent out of the War Department?

Gen. KRONER. I remember a few days after Pearl Harbor, when there was naturally a certain amount of excitement in the War Department, hearing it said by someone—I don't remember—either in Col. Ralph Smith or Gen. Miles' office, words to the effect, "I wonder if that message got through in time," and it was several days later that I learned that an official message from the War Department had gone out to the Commanding General at Honolulu either the night before or the day after Pearl Harbor, I am not certain.

Col. CLARKE. Did you know anything about any warning messages that were sent out late in November?

Gen. KRONER. No.

Col. CLARKE. Or early in December before the morning of December 7?

Gen. KRONER. I never heard about those until today.

Lt. Col. GIBSON. I would like to ask, General, if you ever asked Gen. Miles yourself whether or not you were to see this Top Secret information or whether it was his desire that you not see it.

Gen. KRONER. No, I am very certain I did not ask him and I have a very good reason and that is because Col. Bratton impressed me so much with the secrecy and the importance of his relation with Gen. Miles, that it was Gen. Miles' wish.

Lt. Col. GIBSON. In other words, you received the information from Col. Bratton that that was Gen. Miles' wish.

Gen. KRONER. Not so much the specific information as it was that I received the impression from Col. Bratton that Gen. Miles wished Bratton to handle this information with him.

[8] Lt. Col. GIBSON. I want to go back to the State Department liaison. Were you, as head of the Intelligence Division, kept informed of the conversations between the Secretary of State and Admiral Nomura and Kurusu prior to Pearl Harbor?

Gen. KRONER. No, except that Gen. Miles once in a while would make some remark on the subject.

Lt. Col. GIBSON. You personally never went over to the State Department or talked with anyone there about the situation?

Gen. KRONER. In regard to communications?

Lt. Col. GIBSON. You never received any warning of any kind from anybody in the State Department?

Gen. KRONER. No.

Lt. Col. GIBSON. Did your Intelligence Section, in receiving reports from the Navy receive any submarine reconnaissance reports or reports of that nature from the Navy?

Gen. KRONER. Not to the best of my knowledge. I don't remember any submarine reconnaissance reports until 1942.

Lt. Col. GIBSON. Did you maintain any gathering of information, any contacts with religious societies or anything to gather information about the Far East from missionaries or anything of that nature?

Gen. KRONER. Yes. There were some missionaries who, by habit and custom, maintained certain contact direct with the Far Eastern Section.

Lt. Col. GIBSON. I see. How about these big private corporations, banks and companies that deal with local ones throughout the Far East—were they contacted by your intelligence?

Gen. KRONER. I think they were rather few and far between.

Lt. Col. GIBSON. Was there any contact with the British Secret Service at that time?

Gen. KRONER. Not to my knowledge.

Lt. Col. GIBSON. Were inquiries made of the Maritime Commission on whether or not shipping was being obstructed out in that area?

Gen. KRONER. There may have been, but I don't remember that. We [9] were building up, you will notice from the chart, the Contact Section and they were beginning to explore the field you were referring to. How far they got I don't remember.

Lt. Col. GIBSON. Did you maintain close liaison with the War Plans Division—I believe that is what it was called at that time?

Gen. KRONER. Yes. Every section in G-2 knew personally and talked to the Section in War Plans Division.

Lt. Col. GIBSON. Did you personally, for instance, know of what the Fleet consisted of out in Pearl Harbor prior to Pearl Harbor?

Gen. KRONER. Yes, in a general way.

Lt. Col. GIBSON. Did you know the extent of our own anti-aircraft defenses and of our radar installations?

Gen. KRONER. A very incomplete idea of that.

Col. CLARKE. I would like to ask one more question. In any estimate from the time you took over the Intelligence Group up to and including Pearl Harbor, was there ever any prediction or forecast made of a possible attack on Pearl Harbor?

Gen. KRONER. None to my knowledge. I have in mind the last estimate that was made before Pearl Harbor, which was an estimate covering a future period from December 1 to sometime in 1942.

Lt. Col. GIBSON. Did you consider it a capability of the Japanese to successfully attack Pearl Harbor with bombers?

Gen. KRONER. No. The matter was discussed—

Col. CLARKE. Did you identify this document?

Gen. KRONER. Yes. I identified it—this is the document to which I referred—IB 159, November 29, 1941. This particular estimate was considered by the whole division, not only the Intelligence Group but by General Miles himself, as perhaps the most important we had ever gotten out. That importance lay not in so much the danger that we saw from Japan, although danger in that field was pretty thoroughly discussed, but primarily because Gen. Miles wished to focus War Department thought on the defeat that could be administered to the Nazi powers. In the [10] preparation of the estimate each geographic section in the Intelligence Branch prepared its part. Colonel—now Brigadier General—Thomas J. Betts put the several estimates together and did what we called “polish them up.” He and I discussed the lines of action and capabilities of all the warring powers and especially of each potential enemy to the U. S. A., and I took them to Gen. Miles where they were finally altered to suit him or approved.

This particular estimate does not include in the lines of action open to Japan, an attack on Pearl Harbor, and I remember that so distinctly because when the word came through the radio on that fateful Sunday, December 7, that Japan had attacked Pearl Harbor, I was sitting in my office in the Munitions Building reading from this paper the Japanese capabilities. Therefore from my point of view, I feel that Japan's potential capability against Pearl Harbor was left from this estimate because neither Col. Betts nor I had any information which would lead us to believe that they were capable of or planned to do so.

Col. CLARKE. I would like to ask one final question again just to reiterate the fact that you personally had no knowledge of what Col. Bratton did with this most secret material or to whom he showed it.

Gen. KRONER. That is correct, except to Gen. Miles.

Col. CLARKE. And you don't know what Miles did with it.

TESTIMONY OF MAJ. GEN. SHERMAN MILES

[1] Place: Room 2C637 Pentagon Building, Washington, D. C.

Date: 14 September 1944.

Time: 0930-1030.

Present:

Major General Sherman Miles. Colonel Carter, W. Clarke.

Lieutenant Colonel E. W. Gibson.

Major General Sherman Miles, having been sworn and warned of his rights by Colonel Carter W. Clarke, gave the following sworn testimony:

Col. CLARKE. Will you state your name, rank and station please.

Gen. MILES. Sherman Miles, Major General, First Service Command, Boston, Massachusetts.

Col. CLARKE. During what period were you A. C. of S., G-2?

Gen. MILES. I was Acting Assistant Chief of Staff, G-2 from the first of May 1940 until late in December 1941, when I was made Assistant Chief of Staff—that was a technicality—and relieved from the duty the end of January 1942.

Col. CLARKE. In the six months period preceding Pearl Harbor did you have presented to you all information and intelligence which was received in the War Department General Staff with reference to the war making potentialities of Japan?

Gen. MILES. I can't say that all came to me personally. A synopsis of all came to me through my organization. Certain dispatches and reports I never saw in toto. They were handled by the particular Section of the Military Intelligence Division, which I headed, and came to me in the original form if they were of very great importance, but otherwise in the form of summaries, estimates, etc.

Col. CLARKE. Who was the head of the Intelligence Group during the time that you were A. C. of S., G-2?

Gen. MILES. General John Magruder was the Chief. He was succeeded by Colonel Charles Mason, as I remember it, who was relieved in the summer of 1941 and succeeded by General Hayes Kroner.

[2] Col. CLARKE. During this entire period who was your Chief of the Far Eastern Section?

Gen. MILES. Colonel Bratton.

Col. CLARKE. The entire period?

Gen. MILES. I think so although I wouldn't be positive.

Col. CLARKE. I am sure that is correct.

During this period, information which was received with reference to Japan or the Far East, was that presented to you, when it was important, direct by Col. Bratton or did you have that transmitted through the Chief of the Intelligence Group, Colonel Kroner or Colonel Mason?

Gen. MILES. Such information as came in Top Secret was habitually handed direct by Colonel Bratton to me. This was particularly so in the six months preceding Pearl Harbor. We were tightening up on secrecy to a great extent. Other information normally came to me through the Chief of the Intelligence Branch.

Col. CLARKE. How was this Ultra information presented to the Chief of Staff?

Gen. MILES. It was presented in a loose-leaf folder in a locked dispatch case for which the Chief of Staff had the key. He took the folder out, read the Top Secret dispatches and returned it to its bag.

Col. CLARKE. Who made the selection of what was presented to the Chief of Staff?

Gen. MILES. The Chief of the Far Eastern Section—Colonel Bratton.

Col. CLARKE. Did he present all of that or just what he, Colonel Bratton, considered were the important items?

Gen. MILES. Only what were considered the important items. There was, as I remember, an immense amount of what we called chitter-chatter which came in Top Secret, routine stuff and stuff of no particular significance except to the people to whom it was addressed. This was not put in.

Col. CLARKE. Did Colonel Bratton present this direct to the Chief of Staff or did you present it?

[3] Gen. MILES. It was presented by Colonel Bratton direct to the Chief of Staff. We had a regular system by which it was taken around by an officer courier.

Col. CLARKE. Then Bratton himself didn't always take it to the Chief of Staff and discuss it with him, to the best of your knowledge?

Gen. MILES. No.

Col. CLARKE. Did the Chief of Staff ever discuss with you or Colonel Bratton the contents of any of these messages and their significance?

Gen. MILES. Oh yes, he discussed it with me several times.

Col. CLARKE. Do you recall any particular messages of the Top Secret which he discussed with you?

Gen. MILES. No I don't. Strangely, I recall the lack of messages which he discussed with me. The one thing we couldn't understand was why they weren't talking more about our air reinforcements of the Philippines. I remember he discussed that point with me at length although we reached no conclusion.

Col. CLARKE. Were you familiar with what has later been referred to as the "Winds Message" at the time of its receipt?

Gen. MILES. Yes, I remember the receipt of the "Winds Message."

Col. CLARKE. Was that discussed with you by the Chief of Staff?

Gen. MILES. Not that I remember.

Col. CLARKE. Did you ever receive any information that the Winds Message had been implemented?

Gen. MILES. I have been trying to remember and my memory is very hazy about it. I do not remember seeing any document on it, any written statement on it. I'm sorry but my memory is—

Col. CLARKE. Do you recall any oral discussion you may have had with any individual with reference to that message, with the implementation of it?

Gen. MILES. No I do not, and yet I do know of course that we sent a dispatch to Hawaii early in December, to the G-2 in [4] Hawaii, directing him to contact a certain officer about the Winds Message.

Col. CLARKE. Do you recall what the occasion of the sending of that message was?

Gen. MILES. Sending which message?

Col. CLARKE. The one to contact the officer in Hawaii who was familiar with the "Winds Message."

Gen. MILES. It must have been information that the naval command had in regard to the "Winds Message" but I don't remember the background.

Col. CLARKE. Were any of the warning messages that were sent from November 25 through to include Pearl Harbor the result of this most secret source?

Gen. MILES. Oh yes, very definitely. The first warning message, the main warning message, written by the War Plans Division, of 27 November was the result not only of what we knew about our own note to the Japanese of the 26th of November, but of the general build-up of Top Secret information, and that also applied to my message to the G-2's of the 27th of November.

Col. CLARKE. At that time did you have direct contact or authority to communicate directly with all of the corps area and department G-2's or did your traffic have to go through command channels?

Gen. MILES. That is somewhat a difficult question to answer because it depended on the message. I realized that I should never put myself, the G-2, in a position of influencing the commanding generals, particularly of overseas departments, on action which had not previously been approved by command channels. I kept in very close contact with War Plans Division, General Gerow, and I remember particularly in my message to the G-2 of November 27 discussing that with Gerow, and I am pretty sure it was his suggestion that I put in the sentence to communicate this only to the Commanding General and Chief of Staff. The general proposition held that the Assistant Chief of Staff, G-2 of the War Department had authority to communicate freely with his G-2's but always under the principal that he did not influence the commanding generals in lines of action not previously approved.

[5] Col. CLARKE. During this period from July 1 through to Pearl Harbor, did the officers of G-2 in the various geographic branches have daily contact with their opposite numbers in the War Plans Division?

Gen. MILES. I can't say that they had daily; they had very close contact I know but how frequent that contact was I think undoubtedly depended on the situation. It might have been two or three times a day in some cases.

Col. CLARKE. In your opinion every piece of vital information that was available in G-2 was made known to the proper people in War Plans?

Gen. MILES. That was my policy and Gen. Gerow's policy—what we were trying to work to at all times. The same applied to ONI.

Col. CLARKE. Then it was the responsibility of War Plans Division and not of yourself to inform these overseas department commanders?

Gen. MILES. To promulgate command decisions, yes.

Col. CLARKE. That is what I am trying to bring out. Do you know whether or not there were discussions between the Chief of the War Plans Division and the Chief of Staff regarding this Top Secret material that you weren't a party to?

Gen. MILES. I don't know whether there were such conversations or not.

Col. CLARKE. Did you ever discuss any of this material with the Chief of the War Plans Division and its significance?

Gen. MILES. Oh yes, frequently.

Col. CLARKE. These warning messages that you spoke about, they were sent to all overseas departments, Panama, Philippines and Hawaii?

Gen. MILES. My recollection is that the first one drafted by War Plans was sent to all overseas departments. Mine, the one of the 27th to the G-2's, was not sent to the Philippines.

Col. CLARKE. Do you know whether or not messages were received from the overseas commanders of the three overseas departments at that time indicating that they had been warned and had taken appropriate action? [6]

Gen. MILES. I did not at that time know because I never saw the answers of the overseas departments to the first or War Plans warning of the 27th. I did, however, see General Short's reply to a subsequent telegram of November 28 about sabotage which of course clearly indicated to me at that time that he had at least received that warning.

Col. CLARKE. Did you ever have any discussions with the Chief of the ONI with reference to the contents of the Top Secret material?

Gen. MILES. Frequent discussions with him.

Col. CLARKE. Did you and he take parallel action with reference to this material?

Gen. MILES. In the sense of informing our Chiefs, yes. I don't remember any difference of opinion on this evaluation between Admiral Wilkinson and myself or Admiral Kirk and myself on Top Secret.

Col. CLARKE. Did you ever receive any information in G-2 from FBI with reference to this material?

Gen. MILES. Top Secret?

Col. CLARKE. Yes.

Gen. MILES. No, not that I remember.

Col. CLARKE. Can you say whether or not this material or copies of the same material that was made available to the Chief of Staff was also made available to the President and the Secretary of State?

Gen. MILES. Yes, definitely.

Col. CLARKE. Would the President and Secretary of State have received any material which the Chief of Staff didn't receive?

Gen. MILES. Of Top Secret?

Col. CLARKE. Yes, sir.

Gen. MILES. No.

[7] Col. CLARKE. Can you state definitely that the same material which was made available to the Chief of Staff here was made available to the President and the Secretary of State?

Gen. MILES. My recollection is that on Navy day the Navy put these things in the file and that the same file copies went to the Chief of Staff of the Army, Chief of Naval Operations, the two Secretaries, the President and Secretary of State. But I see your point—I don't know.

Lt. Col. GIBSON. General, I may ask some rather unintelligent questions because I am somewhat foggy about this whole thing. Did you know of the letter that the Secretary of the Navy wrote the Secretary of War on or about the 24th of January 1941, wherein the Secretary of the Navy warned the Secretary of War that hostilities might be initiated any time by an attack on Pearl Harbor, and did you have at that time any knowledge of such a letter being written?

Gen. MILES. I had at that time no knowledge of a letter containing a warning of an attack on Pearl Harbor other than this, that I remember in the late winter of 1940-41 that the Navy was worried about our anti-aircraft defense and air defense of Pearl Harbor. I didn't know that it resulted, although I assume it resulted, from some communication from the Navy Department. I never saw the letter, to my knowledge. However I remember that it was a matter under discussion at about that time.

Lt. Col. GIBSON. Did the Chief of Staff ever tell you of any such letter being received from the Navy?

Gen. MILES. Not that I remember.

Lt. Col. GIBSON. Did you ever attend any War Council meetings during that period of 1941?

Gen. MILES. Those were the ones with Secretary Welles, Assistant Secretary of State and the Chief of Staff?

Lt. Col. GIBSON. Generally, I believe, provided for a meeting of the Secretaries of War, Navy and State.

Gen. MILES. No I did not attend any of them.

Lt. Col. GIBSON. Did the Chief of Staff ever talk with you of any matters that were discussed as these War Council meetings during the year 1941?

[8] Gen. MILES. I don't remember.

Lt. Col. GIBSON. Did you yourself ever have any conferences with the Secretary of State or the Assistant Secretary of State or any responsible official in the Department of State relative to their interpretation or understanding of these so-called Top Secret reports during the year 1941?

Gen. MILES. No I did not. I remember, however, once—perhaps twice—going to the office of the Secretary of State, Secretary Hull, rather formally, together with the head of ONI and certain other State Department officials, for a general discussion of the military and naval situations throughout the world. I don't remember in any of these discussions that Top Secret was mentioned.

Lt. Col. GIBSON. Were you ever informed by the Chief of Staff of any warning from the State Department that war might be expected any minute because of a breakdown of negotiations between the two countries that were then going on in November 1941?

Gen. MILES. No, I don't remember ever having been told by the Chief of Staff that the State Department considered war might result. I did know at the time the general trend, and I think very accurately, the actual substance of our note of November 26 which gave me certainly the impression that war might result.

Lt. Col. GIBSON. Was your knowledge of that note obtained from the newspapers or from State Department copies of the note?

Gen. MILES. From our liaison with the State Department. We sent an officer to the State Department every day.

Lt. Col. GIBSON. Do you recall who the officer was at that time?

Gen. MILES. Colonel Betts, generally. I don't know whether he actually did it that particular day.

Lt. Col. GIBSON. Were you ever advised or told by the Chief of Staff of the message of 24 November 1941 sent by the Chief of Naval Operations to Admiral Kimmel, which message said it was concurred in by Marshall, warning of a possible surprise aggressive Japanese attack?

Gen. MILES. I was never told by the Chief of Staff of any such message.

[9] Lt. Col. GIBSON. You of course knew from previous history that the Japs were apt to make a surprise attack in starting any war?

Gen. MILES. I knew that they had done that in the Russian war.

Lt. Col. GIBSON. Did you have any knowledge from our military attaches or any other information, possibly from the Navy Department, that certain Japanese consulates were burning their documents and codes on or about 3 December 1941?

Gen. MILES. I have no recollection of any such knowledge as of that date.

Lt. Col. GIBSON. Did you know of the bulletin issued by the Director of ONI on the Japanese situation, on the Japanese naval situation, on December 1 of 1941? I show you a copy of it.

Gen. MILES. I undoubtedly saw this document. I certainly remember that ONI and the Navy Department were persuaded that there was a considerable movement of Japanese naval forces to the south and that there were rumors of forces in the mandates, which were, of course, Japanese waters.

Lt. Col. GIBSON. Do you remember seeing document 23673, message from Berlin to Tokyo?

Gen. MILES. Yes.

Lt. Col. GIBSON. Do you recollect seeing Army 23570?

Gen. MILES. Yes I do.

Lt. Col. GIBSON. With reference to this 23570, did you ever talk with the ONI about this conversation between Admiral Turner and Admiral Nomura?

Gen. MILES. My recollection is that I did. Admiral Turner was rather a law unto himself and my recollection is that I discussed it in a friendly way with my colleague. We didn't reach any definite conclusion.

Lt. Col. GIBSON. Did you ever visit with Admiral Turner about this?

Gen. MILES. No.

Lt. Col. GIBSON. Did you ever get any information on how this meeting came about?

Gen. MILES. No.

[10] Lt. Col. GIBSON. Did you ever hear from the Navy Department of any other meeting between Admiral Turner and Admiral Nomura about one week prior to Pearl Harbor as a result of which Admiral Turner called a meeting of high naval officials as to what Nomura was alleged to have told Turner at this meeting?

Gen. MILES. No I don't remember having any knowledge of that.

Lt. Col. GIBSON. Army No. 23631. Had you seen that?

Gen. MILES. Yes I remember seeing this one, which was to indicate that Germany and Italy might act of themselves against the United States.

Lt. Col. GIBSON. I ask you now if you remember seeing 23859 at that time.

Gen. MILES. Yes I do.

Lt. Col. GIBSON. Would you say that, generally speaking, you saw these shortly after the date shown on the bottom, apparently translated 10-23-41?

Gen. MILES. In all probability the same day.

Lt. Col. GIBSON. That is undoubtedly true of all of these?

Gen. MILES. Yes.

Lt. Col. GIBSON. I show you 23860 and ask if you recollect seeing that.

Gen. MILES. Yes I saw that.

Lt. Col. GIBSON. I show you 24373 and ask if you saw that.

Gen. MILES. I am pretty sure that I saw that.

Lt. Col. GIBSON. I show you 24655 and 24656, which go together, and ask if you saw those.

Gen. MILES. I saw that.

Lt. Col. GIBSON. I show you No. 25644 and ask if you saw that.

Gen. MILES. I don't remember seeing that.

Lt. Gen. GIBSON. No. 25390. Did you see that?

Gen. MILES. I don't remember. I would like to say here that those I have said I have seen recall to my mind in each case [11] certain things that make me say I have seen them. I don't recall that or the one preceding it.

Lt. Col. GIBSON. I show you No. 24878.

Gen. MILES. I recall that.

Lt. Col. GIBSON. No. 25773.

Gen. MILES. I recall that because it was about Mamala.

Lt. Col. GIBSON. No. 25817.

Gen. MILES. I don't recall that.

Lt. Col. GIBSON. No. 25432, which is the Winds Code.

Gen. MILES. I recall that.

Lt. Col. GIBSON. And did you have that in mind when this so-called Winds Message was reported to you?

Gen. MILES. You mean the implementation of that.

Lt. Col. GIBSON. Do you recall a message being intercepted on the evening of December 3 or 4 which apparently used this code as shown in Army 25432?

Gen. MILES. Well that question I have already answered. My memory is very hazy about it. I don't remember seeing any document on the subject.

Lt. Col. GIBSON. In other words, you yourself never got the intercepted message of December 3 or 4?

Gen. MILES. Not that I remember.

Lt. Col. GIBSON. No. 25392.

Gen. MILES. I don't recall this message, which is supplementary to the Winds Code.

Lt. Col. GIBSON. No. 25138.

Gen. MILES. No. 25138 I do recall. You want this 25441 too?

Lt. Col. GIBSON. Yes.

Gen. MILES. 25441, yes I do recall that.

[12] Lt. Col. GIBSON. 25435 and 25436.

Gen. MILES. Yes I remember 25435 and 436.

Lt. Col. GIBSON. No. 25442.

Gen. MILES. That is a continuation of the summary of our note of November 26. I remember it.

Lt. Col. GIBSON. 25446.

Gen. MILES. I do not recall that message.

Lt. Col. GIBSON. 25548.

Gen. MILES. I do recall that message.

Lt. Col. GIBSON. 25823.

Gen. MILES. I don't recall that message.

Lt. Col. GIBSON. 25496.

Gen. MILES. Yes I recall that.

Lt. Col. GIBSON. 25497.

Gen. MILES. I don't remember seeing that radio telephone message.

Lt. Col. GIBSON. 25554.

Gen. MILES. Yes, I remember that.

Lt. Col. GIBSON. 25344.

Gen. MILES. I don't recall that.

Lt. Col. GIBSON. 25762.

Gen. MILES. I don't recall that.

Lt. Col. GIBSON. 25605.

Gen. MILES. I think I recall that, yes that was when they told us they were going to handle the note here, not in Tokyo.

Lt. Col. GIBSON. 25727.

Gen. MILES. Yes, I remember that.

[13] Lt. Col. GIBSON. 25783.

Gen. MILES. I don't remember that.

Lt. Col. GIBSON. 25715.

Gen. MILES. Yes, I remember that.

Lt. Col. GIBSON. 25659 and 25660.

Gen. MILES. Yes. This is the interview with Sumner Welles. I remember that.

Lt. Col. GIBSON. 25730.

Gen. MILES. Yes, I remember that.

Lt. Col. GIBSON. 25725, and 25721 goes with it.

Gen. MILES. Yes, I think I remember both of those.

Lt. Col. GIBSON. 25731.

Gen. MILES. I don't remember that.

Lt. Col. GIBSON. 25785.

Gen. MILES. I think I remember that.

Lt. Col. GIBSON. 25807.

Gen. MILES. I don't remember that.

Lt. Col. GIBSON. 25838 and 25843.

Gen. MILES. 25838, yes. 25843, this is an answer. Yes I certainly remember that.

Lt. Col. GIBSON. 25445.

Gen. MILES. Yes, I remember that. Before we go any further I think I ought to make a statement. You have shown me a series of important dispatches. I believe, from my knowledge of the system then in effect, that I saw them all. I have identified certain ones as being those that I remembered because as I read them I find statements of fact or assumption that ring a bell in my mind. Others I have identified as not having seen, so far as I now remember, because [14] I find no such statements or assumptions in them that ring a bell in mind. I am conscious of my oath and I want to make it plain that my memory, after two and a half years, is not of the best and I cannot even be sure of identifying those messages which I think I remember.

Lt. Col. GIBSON. I want to come back for just a moment to that so-called Winds Cods. I believe you said you did not remember seeing that.

Gen. MILES. I remember seeing the Winds Code. Then there was another code that I don't remember seeing that was in the intelligence summary.

Lt. Col. GIBSON. Did you make any arrangements with the Army or Federal Communications Commission or Navy or any listening agencies to listen—to pick up anything that might be broadcast?

Gen. MILES. We did.

Lt. Col. GIBSON. And what were those arrangements?

Gen. MILES. These arrangements were that if certain words that we had from the Top Secret were intercepted in any of our monitoring stations we were to be immediately notified by telephone. As I remember, the telephone number that we gave was that of Colonel Bratton—it was to come through that source. We did not, of course, tell FCC what the meaning of this intercepted message would be. They were simply to notify us if they heard it.

Lt. Col. GIBSON. Did you have knowledge, General, along about the first of December 1941, that there was a Japanese fleet operating in the Marshalls area?

Gen. MILES. I had knowledge that the Navy had received reports that there was a Japanese naval force in the mandated islands.

Lt. Col. GIBSON. Did you know of your own knowledge or did the Navy tell you as to our own fleet out there around Pearl Harbor, what we had out there, etc.?

Gen. MILES. I knew in general what part of our fleet was in Pearl Harbor. I don't remember that I particularly tried to find out exactly what ships were there but the [15] greater part of the battle fleet was there, I knew from general knowledge. Whether it was in Pearl Harbor or in that area I did not know on any particular day.

Lt. Col. GIBSON. Did you have any general knowledge from anybody on the state of our anti-aircraft defenses of Hawaii at this time?

Gen. MILES. Yes, I know from my previous knowledge of the defenses of Hawaii pretty generally the number and strength of our anti-aircraft batteries on the island.

Lt. Col. GIBSON. Did you know about the practice of the fleet coming in and tying up in the Harbor for the weekends?

Gen. MILES. No, I did not know that.

Lt. Col. GIBSON. General, you, I believe, got out an estimate of the situation generally for the Chief of Staff as of 29 November 1941. I will show you a copy for your recollection.

Gen. MILES. I did.

Lt. Col. GIBSON. That did not disclose in it that you considered the Japs had a capability of attacking Pearl Harbor by air. I wonder, was that considered before you submitted the report, was that capability considered by you?

Gen. MILES. I presume so. Please note that this estimate starts out with this sentence: "This estimate is addressed to the objective of Nazi defeat." It was deliberately written that way. I was a little tired of certain defeatist attitudes among certain of my own people and I wanted to get out an estimate of the situation addressed to the objective of the defeat of the Nazis. Now an air attack on Pearl Harbor or any other attack on Pearl Harbor had been, I knew very well, a source of study for twenty years in Hawaii and in the War Department. It is not mentioned in this estimate of the situation presumably because it was so obvious. We had spent several hundred million in defense of Hawaii, we had our greatest fleet out there. That Hawaii could be attacked if Japan went to war was obvious to everyone. I re-read that estimate yesterday. I regret that in stating the possibilities we stated an attack on the Philippines and did not state an attack on Hawaii, Alaska, West Coast, Panama, etc. It was an omission, but I think a rather obvious omission.

[16] Lt. Col. GIBSON. Did you ever talk with the Chief of the War Plans Division as to the possibility of a Jap attack on Hawaii?

Gen. MILES. I don't remember specifically talking with him on that subject, no. We both were thoroughly familiar with the defense plans and I don't remember that the subject came up.

Lt. Col. GIBSON. These reports, these Top Secret reports, when you got them did you evaluate them yourself or did you have somebody else give you their evaluation of them?

Gen. MILES. I evaluated them myself in my own mind. Colonel Bratton was evaluating them and putting his evaluation into the big estimate.

Lt. Col. GIBSON. The only dissemination that you made of the evaluation of these reports would be to Colonel Bratton or WPD or the Chief of Staff?

Gen. MILES. As I say, I do not remember that the Chief of Staff ever discussed the effect of the Top Secret dispatches except their absence in not talking about our reinforcement of the Philippines. I don't remember any particular discussion that I had with General Gerow on evaluating them. These were highly important dispatches which all three of us saw and after all I assumed that the command channels could evaluate about as well as I could, in plain English, what the Japanese were saying and thinking.

Lt. Col. GIBSON. Did you ever take it upon yourself to go up to see the Chief of Staff and say you thought a very serious situation was being revealed by these things and jog him on it?

Gen. MILES. Not until the morning of December 7th. The seriousness of the situation was, obviously, known to him.

Lt. Col. GIBSON. On what occasion on that particular morning did you go up and personally see him?

Gen. MILES. Well, upon the receipt of the long Japanese telegram reply. That, I notice, is dated December 6. I first knew that it was in that evening and of course we were watching for it very eagerly. We knew that that meant some very definite decision regarding the conference. It was being translated all night. [17] I knew that the first part of it was translated on the evening of the 6th but that did not give away the whole business. I went to the office the morning of the 7th and got the whole thing, also was informed that it was to be delivered that afternoon, and arrangements were made to see Secretary Hull. That of course alone was enough to go to the Chief of Staff.

Col. CLARKE. These messages which you have identified here and which you say according to the system you are sure you had seen all of them, you are positive these were seen by the Chief of Staff, to the best of your knowledge?

Gen. MILES. They were all seen by the Chief of Staff and all seen by me to the best of my knowledge. Certain ones, as I say, ring a bell in my mind. I feel morally certain that I saw them all and the Chief of Staff saw them all.

Col. CLARKE. Were you ever told by the Assistant Secretary of State or the Under Secretary of State in July of 1941 that in their opinion war was inevitable and that the War Department should get a secret intelligence service started and get their agents planted around through the world while there was yet time?

Gen. MILES. No, I have no recollection whatever of being told by the Secretary of State or Assistant Secretary of State.

Col. CLARKE. What was the occasion when you started censorship in the War Department?

Gen. MILES. It is rather a long story. A censorship plan had been drafted in the War Department, largely in MID, before I came in May 1940. My recollection is that that plan was approved by the Joint Board. It must have been because I distinctly remember it went to the President and was disapproved. From then on there were many attempts to revise some form of censorship plan. It was obviously a war necessity if war did occur between us and the Germans or Japanese or anyone and a necessity which could be filled only by pre-preparation and training, in other words, you had to train censors. During 1941, or perhaps as early as late 1940, the Navy, without approval of the President, quietly began to train censors and my naval colleague at that time, Admiral Anderson, Chief of ONI, used to spur me on—"why don't you do this too?" I remember several conversations about that. We were trying, as usual, to play the game and do only what was approved, but as the thing warmed up all over the world, our lendlease and other [18] approaches to war, it became obvious that the War Department had to do something about it and I started the censorship school, as you remember, over here in Clarendon.

Col. CLARKE. That had nothing to do with any of this material, it was the general knowledge inherent within you that—

Gen. MILES. It was just the general trend. We knew we had to prepare for censorship immediately.

Col. CLARKE. You had close contact with ONI but not with the Naval Operations—is that true, at that time?

Gen. MILES. That was very true. Admiral Turner was practically Naval Operations through a large part of that time. Neither Gerow nor McNarney nor McCloy nor myself could get very far with him.

Lt. Col. GIBSON. So the only real liaison you had was with ONI, which really had the strategic intelligence data and not the actual up-to-the-minute operations of the Navy?

Gen. MILES. Yes. The liaison which I should have maintained with the Navy was with ONI. I had nothing officially to do with the Naval Operations.

Lt. Col. GIBSON. Did ONI ever give you any information of Naval Operations or what Naval Operations were doing or what messages they sent to their fleet in Hawaii?

Gen. MILES. Yes. I knew, for instance, through ONI of the naval telegram that went out paralleling ours of November 27. I am pretty sure that I knew other definite moves that were made.

Lt. Col. GIBSON. Your liaison was an officer that went from here to the Navy, ONI?

Gen. MILES. Several officers, but more directly my own relationship with Admirals Anderson, Kirk and Wilkinson, the latter two of which happened to be very old friends of mine.

Lt. Col. GIBSON. Did your liaison with the State Department merely consist of getting cables that were coming in to the State Department?

Gen. MILES. Yes.

Lt. Col. GIBSON. It didn't consist of contacting the Under Secretaries [19] or Secretary of State or the experts on the various country desks to ask for their judgment on what was picked up?

Gen. MILES. In a sense it did. Our liaison officer, particularly Colonel Betts, who was extremely successful as a liaison officer, established very personal relations in order to carry out his job with various people of the State Department, from whom he could get this information, not only the factual information but what they thought of it. I had that close relationship also with Assistant Secretary Berle. I saw Under Secretary Sumner Welles at times. I saw Mr. Hull at least once and perhaps more, I don't remember.

Lt. Col. GIBSON. At this time while these critical negotiations were going on in November 1941, did you yourself or Colonel Betts go over particularly to ask the State Department what the result of this thing was going to be?

Gen. MILES. I did not. I don't know if Colonel Betts did or not.

TESTIMONY OF LIEUTENANT O'DELL

[1] Colonel Carter W. Clarke, Colonel E. W. Gibson, and Lt. O'Dell. 6 October 1944, 9 A. M.

CWC: All right, now tell me your story. We got the story that you wrote to Kemper and said you knew who did Pearl Harbor, or something to that effect; so you can start telling us what you know.

O'D: Well, sir, here's the part of the information that I thought might not have come out through other sources. There was a cable that was sent on the fifth of December to the Commanding Generals of the Hawaiian and Philippine Departments concerning the movement of a Japanese Task Force in the South China Sea. The information had come to the Military Attache through the Australian

Government, Air Chief Marshal Sir Charles Burnett, who called Colonel Merle Smith and myself to his office.

CWC: You were then Merle Smith's assistant?

O'D: That's right. There were the two of us, and he is now dead. That's the reason I stuck my nose in this. We were called over on Thursday afternoon about 5 o'clock. Air Chief Marshal Sir Charles Burnett, myself, and Colonel Merle Smith and Commander Saom, who is the Naval Liaison Officer from the Dutch East Indies. The information was primarily in regard to the Netherlands, to the Indies, and, as I say, principally concerned itself with the movement of a Jap Task Force in the South China Sea. However, within an hour after we had gotten there some additional information came in, the exact nature of which I wasn't told at the time, but when we went out, Colonel Merle Smith had me prepare a cable which he revised to send out and the principal part of that other than the movement of this convoy was that the Dutch had ordered the execution of the Rainbow Plan, A-2. I remember, it's been almost three years now, and I can distinctly remember that particular part of the cable where it said A-2, repeat A-2, which was a part of the joint Abducun plan only to be taken in the event of war. It provided for specific occurrences they would counteract by certain other action. In other words, A-1 would have been some other direction expected attack, A-2 was from a particular direction, and they ordered the execution of this A-2. That was significant, because the plan called for joint operations for the Australians and the Dutch and to the best of my knowledge our Navy if nothing else. That was to go into effect only in case of war and here the Dutch had ordered it. That was the definite information that it had gone into effect. There was a bit of flurried excitement with that, and Sir Charles Burnett asked us not to send that cable and Colonel Merle Smith, although impatient to send it, said that he would wait twelve hours at Sir Charles Burnett's specific request. In other words, they didn't say they wouldn't let that cable go out, but I dare say they probably would have stopped it had we tried to launch it.

[2] CWC: Let me ask you—now that was on December 5?

O'D: Sir, that was Thursday, the 4th, and we held it.

CWC: In other words that's the 3rd our time.

O'D: That's right, sir.

CWC: And you didn't send it actually until the 5th?

O'D: Well, the reason for the delay was that there was a War Cabinet Meeting at which Sir Charles Burnett was to report this information to the Australian War Cabinet which was meeting in Melbourne that evening, and he went from his office to the War Cabinet meeting. We, on our part, held the cable twelve hours, and I coded it and had it ready for dispatch and held on to it. In the cable (it was extremely urgent) this convoy, they had it doped out, could get to somewhere, either the Philippines or the Indies within, I believe it was, 60 hours, and that is the way that we had figured it. So we sent the cable one copy to General MacArthur in his code that we had then and another copy in a different code to Hawaii with a repeat to the Commanding General, Hawaiian Department, the request to repeat it to Washington. In other words, we sent none direct to MILID as we would have done if time hadn't been such a factor. But, we were extremely laborious in writing—

CWC: In other words, you fellows instead of having a drop copy for Hawaii, you gave it to Hawaii and told them—

O'D: And told them to repeat it here, sir, and then send another copy to the Philippines. There was no hint of Pearl Harbor in this whatsoever. It wholly concerned itself with the Philippines and the Indies, and it looked like the Indies at that precise moment would be the first to get it. Now, we sent that cable, that would be the morning of the 5th their time, and I see in the papers where Dixon denied that his country had any information of an attack on Pearl Harbor, and it was reported to the press in that way, which is so. But they did have a warning of action in the Philippines or in the South Pacific Area. I would say it is inescapable that they did. I don't know—we never had any acknowledgment of the cable from either Hawaii or the Philippines, and we never heard anything from MILID to let us know whether or not it had reached them. Of course, the subsequent events were such that it might have been overlooked. The file copy was destroyed—ah, this looks like it. That's it, sir, Netherlands Far East Command on Execution of Plan A-2. Naval moves in Mindanao—(interrupted)

CWC: General Osmun, this is Lieutenant O'Dell.

RAO: O'Dell.

[3] O'D: How do you do, sir.

RAO: Mighty glad to know you.

O'D: Pleased to meet you, sir.

CWC: He's giving us some information here in connection with this Pearl Harbor business.

RAO: I've heard about it.

CWC: You've heard about Pearl Harbor?

RAO: Ha! Ha! I'll tell you sometime about a year from now at Christmas we'll all get together and celebrate that. I'm glad to have met you.

O'D: Thank you, sir.

O'D: What made us particularly angry about this was that the next morning the newspaper came out in the early edition with a certain part of this information about the Indies. And, after we had held the cable up at their request, Colonel Merle-Smith naturally raised a great deal of trouble over why we had had to hold our cable and the press had gotten an inkling of it; they hadn't gotten the works, sir, but they had an inkling. That is the message in particular, sir. That is the one.

CWC: Notice the footnote down there.

O'D: "And relayed to War Department message center" (reading from message).

(Interrupted by telephone. CWC talked for some time with General Strong)

O'D: We expected action to take place on Sunday our time, and we all went down to the office on Sunday and waited with bated breath, and nothing happened Sunday. That led us to believe that, well, this was another of those scares. As you can probably guess, sir, we had had several previous warnings of impending action in time to reflect that in the reports and cables that we had sent. One other positive action was that Kopang—two days before this happened—received fifty (the Japanese Consul received) cases which he wished to have in under Diplomatic privilege and it was refused by the Dutch and opened by the Dutch before he could get them back on this Japanese ship.

I think that was the trouble, there wasn't a Japanese ship that he could put it on. And, when they opened it, they found a complete, well not radar because radar wasn't in the state that we now know it, but it was a sending and receiving radio set, and we had had information about that. Also, [4] of course, all the Japanese shipping had been pulled back into Japanese waters for at least sixty days before. And, then on the afternoon that this was sent, we sent that in the morning, the Japanese consul in Melbourne, who was under surveillance, was seen to burn all of his codes in the backyard. Nobody, of course, was able to make a move to stop him, but they saw that.

CWC. You're sure this was sent out from Singapore, or where was it sent from?

O'D. From Melbourne, sir.

CWC. Melbourne on the fifth.

O'D. The fifth, in the morning, sir.

EWG. According to this copy, Colonel, this was received by Signals Hawaii, don't know when, but it was relayed to the War Department, arriving here at the night of Pearl Harbor day, December 7, with a memo on it that this was addressed to CG, Hawaii and relayed here with request for decipherment and repeat back to them.

CWC. Well, we got that in there with old man Smith's note.

EWG. Yes, we have that. The only thing is, it is curious why Signals Hawaii held that so long. They couldn't decipher it; maybe they thought they could, I don't know.

O'D. It was sent positively in a code which Hawaii had.

CWC. What did you use?

O'D. The information that was on the code and cipher. We used the secret book with the cipher table.

CWC. Did you use the black book or the red book? Do you remember?

O'D. If I saw it, of course, I could identify it. As I remember it, it was gray. I don't remember. There was a thick confidential and a thin secret and then there were the cipher tables that were changed every thirty days, and we were very careful to pick one. That's why we had to code it twice, once in a code that we knew Hawaii had and once in one the Philippines had because the Philippines had different codes entirely from Hawaii, and we had to—well, you can imagine, that is a rather laborious job, a message like that.

CWC. The message we got in said it was held 17 hours.

O'D. That was 17 hours, sir, from one afternoon until the next morning. I see they have a question mark under what government. It was the Australian government. We put that in the message.

[5] EWG. Did you ever in Australia hear of any information indicating that there was a task force sailing toward Pearl Harbor?

O'D. Not toward Pearl Harbor, sir. We never had any information or anything in that direction. We knew of a task force in the South China Sea, and whether it was headed for the Philippines or whether it was headed for any part of the Indies, the reconnaissance information that was available to us did not specify.

CWC. Did you know about the build up of a task force in the Marshalls?

O'D. Yes, sir.

CWC. You did know about that.

O'D. Yes, sir, through the Australian Government again. Mostly the RAAF. They were the ones rather than the Army or the Navy, it was the RAAF that was feeding us what information of value——

CWC. How far in advance of Pearl Harbor did you know that, do you recall?

O'D. I should say it was in that same week. Probably early in that week. That was toward the latter part of the week. I should say in the early part of that week, sir. We had been following the Japanese disposition of troops and had sent a report, a regular M/A report on the disposition of all Japanese divisions about a month before all this came up, which was used merely to confirm what other reports were here. It was just how the Australians had the disposition of the Japanese Army and which we sent in confirming the other information here. Shipping, as I say, we knew that all the Japanese shipping had been moved back into its own territorial waters. Most of our information led us to the definite and inescapable conclusion that war was going to break here, nothing about Pearl Harbor, sir.

CWC. Well, of course, that is a typical Jap stunt. Now, who is this Sir Charles Burnett again?

O'D. He was Chief of Staff of the RAAF. He has been sent back to England now. He is an RAF officer who was on loan, and it was through him and Air Commodore Hewett, he was an intelligence officer, that we had disposal of whatever information they had, and they did, of course, cooperate a great deal with us. But the message that you have there, sir, which is the same one exactly as we sent it out, and a pretty good decipherment as well, Colonel Merle Smith was exceedingly careful, and he was the opposite of an alarmist. He would not put anything in a cable that he didn't have absolutely down under his thumb perfectly.

CWC. Yes, I knew Merle Smith. I knew him very well.

[6] O'D. And you can see from that cable, sir, that he put nothing that would tend to alarm that wasn't definite fact that he could attribute to something precise.

EWG. Do you know whether or not Hawaii knew what this plan A-2 was?

O'D. We believed that they did. That point came up because of the Naval, because of Pearl Harbor being the Naval Headquarters and the Plan A-2 being for U. S. participation mostly in a naval manner. We certainly assumed that if anybody knew A-2, Pearl Harbor did know it. Now, whether the Army would show that to the Navy and that sort of thing, we naturally left up to them. But this Naval Plan, you see there was a Naval Attache in Melbourne, Captain Coursey, and we informed him of that and curiously enough Captain Coursey did not send any message like that. I do not believe he did. I'm not qualified to say for certain, but he was not in the same state that we were about it. What I am trying to say is that what we sent back might not have seemed such a positive indication, but that everything where we were definitely led to the assumption that war was going to break out. This was about the third or fourth time it had happened, but this time it really seemed in a state where in 60 hours that task force was going to be somewhere and with all this code burn-

ing and various other indications from all sorts that I knew about and no doubt they knew more than I did, it looked like this time it was going to be the end, and, as I say, we expected it on our Sunday and that Sunday came and went and nothing happened, and we had a let down, and then of course it was Monday, our time, that it happened. He put nothing in that cable that wouldn't be——

EWG. Well, this cable says the Netherlands Command at 8 A. M. on 7 December reported planes to have reached Kopang. Could you have sent it before?

O'D. That was added, sir, on the morning as was the fact that it was delayed. In other words we had to re-write it because the situation was changing momentarily.

EWG. Then you don't think that this was——

O'D. No, sir, that went out on Friday.

EWG. Do you think that might have been a mistake in deciphering?

O'D. Yes, sir. You see the meat of the thing: the suggestion that the RAAF likewise take reciprocal action. In other words "we're going to live up to our obligation——".

EWG. This date bothered me. That's all.

O'D. Well, it bothers me a bit, sir. That is the only copy that I know of in existence. The file copy was destroyed by the present Military Attache with all old papers, about two years ago.

[7] CWC. Do you think that the Australians notified their people here? Do you have any way of knowing that, or any opinion?

O'D. I know that our own Minister was not informed of the situation. You see, of course, the capitol, sir, is in Canberra, and we were stationed in Melbourne because that was the scene of activity. The War Cabinet met the previous night. That's when Sir Charles Burnett had told them this information. Whether the War Cabinet, who would be the body then who would have instructed them to let Washington know——. Sir Owen Dixon wasn't here then. He was a shipping man in Australia, and Mr. Casey was here.

CWC. Casey was the guy that was here then.

O'D. That's right, sir. Mr. Casey.

CWC. I know there was a roar about it when they pulled him out of here.

O'D. Yes, sir, that's right, sir, jealousy I think. Whether or not they sent a cable to—I rather doubt that they did, sir, because, as I say, the Australian Government wasn't too happy about our sending this out even after the delay. I mean they realized that it was inescapable, and we had to keep our government informed, but——.

CWC. Well, there is one thing I'd like to get straight in my own mind. Now, when Burnett gave Merle Smith this information, he gave it to you with the understanding that you not transmit it.

O'D. No, sir, when he told it to us we were getting ready to send it out. It was only after we had the cable—you see, we were there over an hour, over two hours, that afternoon, and the information was dribbling in in spurts, and we had that and it was only when we were getting ready to go, which was around seven o'clock, that the War Cabinet meeting was called. I shouldn't say before six thirty, at the time we came out there, it wasn't scheduled. They called this emergency meeting and at that time when we had prepared the cable and were getting ready to go code it, Sir Charles Burnett requested very specifically that it not be sent, that we hold it up until he had

informed the War Cabinet. I rather think that that is why he didn't want the information to leave Melbourne. In other words, he hadn't told his own government yet.

CWC: In other words he wanted to spring it on his people first.

O'D: Before there was any chance of our sending anything out, sir.

CWC: That's logical.

O'D: I might say, sir, that because there were only two of us and because everything was happening day and night then, that was one of the last messages that we sent out in our own code. From then on we used the Australian cipher section back and forth.

[8] CWC: Why?

O'D: Well, sir, we weren't too sure of our codes to the Philippines. We knew they had the cipher device, but we weren't sure of the security afforded by the cipher device.

CWC: You mean the cylindrical?

O'D: That's right. After the outbreak of war, you see, sir.

CWC: But it was secure before the outbreak of war?

O'D: Once the show broke and we were going back and forth between General MacArthur's headquarters and Australia, we were given the use of the Australian code and it was mostly of a liaison nature, anyway, as to whether General MacArthur could send a plane here on reconnaissance or a plane there or what could be expected in one way or another. There were so many messages coming and going. General MacArthur would send us messages. Sir Charles Burnett would ask us for certain information from the Philippines. You see Washington was pretty far removed from us at that time. We didn't know what delays would be encountered in the cables going through Hawaii to Washington, which was the only means of sending any message here, and there were matters which would come up which we would want answered in 5 or 6 hours, which we knew we'd never get to Washington and back in that time, and it concerned what General MacArthur would be able to tell us and which Washington would only have to ask someone else for. So, we had quite a bit of correspondence back and forth by cable and wireless from the Philippines to Australia as soon as the war broke out. We simply didn't have the means, I mean it would take at least three hours to do a job like that message there. By that time the information was not even wanted. So, we had this coming and going. We moved our office right into the RAAF Headquarters.

CWC: They had the machines then, too, didn't they?

O'D: No, sir, they did not. They had—I can assure you that Colonel Merle Smith went into it to the last detail, no violations of any security.

CWC: Oh, no, I wasn't thinking about that. Mine was just a question of the time factor. There is one question I want to ask you. This has nothing to do with Pearl Harbor. Were you aware of that convoy which was at sea when Pearl Harbor hit?

O'D: Yes, sir.

CWC: Were you aware of the correspondence when they sent it all over the whole damned South Pacific?

O'D: Then, sir, we started getting messages from General Marshall in a code that was, at first one message came and we didn't have the code. They repeated the message in a different code, and we had that code, and curiously went through that and got that, it was a

[9] double transposition, which, of course, didn't use the book. We got that, and, of course, that was a long one there again. We were having our troubles. We got that deciphered, and it was from General Marshall, and we called that the Pensacola, sir, that was under escort by one cruiser, which was the Pensacola. We would do about ten of those in one message, sir. One little error in the first, and you go back and do the whole thing over again, and you can't tell until after you've finished that you've made an error, when you start to get your word groups. But we had heard, we got several cables about the arrival of the Pensacola convoy, including what was on it. As I remember, there were A-24's and P-40's. There were, I think, 26 P-40's and 18 A-24's. Immediately Sir Charles Burnett wanted to know what was the A-24. Well, sir, frankly the means at our disposal there, the Air Force manuals on what the A-24's were, we didn't get far, and that was a little annoying.

CWC: That was that Mitchell dive bomber?

O'D: That's right, sir, single engine and, of course, the A-20 was a twin engine, and the question in Sir Charles Burnett's mind was, is it a single engine or is it a twin engine. They wanted those planes and they had to make arrangements for staging areas for them and discharge and so forth, and it was rather difficult to do without that information. Still, by the time we wired to Washington to ask them (we didn't, of course, because, with everything happening all over) they were going to land. They were due on the 23rd of December, sir. They arrived in Brisbane and we went up to Brisbane to meet the convoy.

CWC: Some of my old gang in the Second Air Force were on that. That interceptor outfit that came out with them.

O'D: Yes, sir, they were destined, of course, for the Philippines and South Hawaii. General Brereton had sent a mission down. General MacArthur had sent General Brereton with a mission of about eight men, eight officers, from the Philippines in the latter part of November, and General Brereton had arrived at Darwin and Colonel Merle Smith went up to Darwin and flew over to Rabaul with them, and I met them in Brisbane and they went on this mission. They were primarily concerned with the fueling facilities for B-17's being flown out from Hawaii via Rabaul, Darwin and then up through the Indies to the Philippines. They were trying to arrange for petrol from the Shell Oil Company and airports, airports principally. That was where we got about a 60 day start, not quite that, about a 45 day start on building airports around Darwin which were later used when they evacuated the B-17's, these strips through the jungle. General Brereton, of course, had come down in plain clothes. He wouldn't have been allowed in the country in uniform at that time. He had flown down here, and we took them all around looking for airports where we could land them. Then, of course, this Pensacola convoy came in.

CWC: Yes, I remember all those things. Well, I don't think there is anything else unless you have something you want to add to what you have said.

O'D: No, sir, I just wanted you to have——

CWC: All right. Well, I'm awfully glad you came in, and I appreciate your taking the trouble. It's nice to have seen you.

O'D: Thank you very much, sir.

TESTIMONY OF COL. OTIS K. SADTLER

[1] Place: Room 2C637 Pentagon Building, Washington, D. C.

Date: 16 September 1944.

Time: 0945-1030.

Present:

Colonel Carter W. Clarke.

Colonel Otis K. Sadtler.

Lt. Col. E. W. Gibson.

Colonel Otis K. Sadtler, having been sworn and warned of his rights by Colonel Carter W. Clarke, gave the following sworn testimony:

Col. CLARKE. Will you state your name, rank, organization and station.

Col. SADTLER. Otis K. Sadtler, 03577, Headquarters Army Ground Forces, War College, Washington, D. C.

Col. CLARKE. When did you become Chief of Army Communications Service, approximately what date?

Col. SADTLER. About the 7th of August 1941.

Col. CLARKE. You held that position at the time of Pearl Harbor?

Col. SADTLER. I did.

Col. CLARKE. As such were you responsible for the production of what is known as Magic or Ultra intelligence?

Col. SADTLER. I was.

Col. CLARKE. Did you have access to this?

Col. SADTLER. I did.

Col. CLARKE. Did you read the messages before they were sent to G-2?

Col. SADTLER. In general yes, not always.

Col. CLARKE. Were you familiar with a message which was received in the SIS on or about November 28 which later became known as the Winds message?

Col. SADTLER. I am familiar with that message.

Col. CLARKE. I hand you that and ask if you can identify it—#25432.

Col. SADTLER. That is the message, yes.

[2] Col. CLARKE. Will you state what, to the best of your knowledge, belief and recollection, you know of the history of this message and any implementing message which may have been received regarding it?

Col. SADTLER. It is my recollection that that message was intercepted by the Navy and we asked the Federal Communications Commission to monitor all press broadcasts from Japan as a result of that message.

Col. CLARKE. By "we" you mean Signal Corps?

Col. SADTLER. Yes, and Col. Guest, as I recall, was the man who made the arrangements. The FCC put their Wharton station on these broadcasts from Japan and made arrangements with the telephone company to contact Col. Bratton, the G-2 liaison officer at that time, directly if they heard anything regarding the implementing of that message.

Lt. Col. GIBSON. Meaning message #25432.

Col. SADTLER. That Winds message. We contacted the FCC from time to time and asked them whether anything had been heard that would give us any clue as to when that was going to happen, etc. The

first information that I had regarding any new developments on that message was on the morning of December 5, when Adm. Noyes called me and said, "Sadtler, the message is in," or words to that effect. Adm. Noyes was the head of Navy communications service which included this code and cipher work. I went immediately to General Sherman Miles' office, who was G-2 of the Army at the time, and told him that the message was in and that it was to the effect that war would be declared between Japan and Great Britain. He said, "Wait a minute, I will get Col. Bratton." Bratton came in almost immediately. I told him what Adm. Noyes had told me and he said, "What was the word?" I told him I didn't know what the word was. He took out a little slip of paper he had in his pocket which had the Japanese words shown in this message and asked me if it was one of those. I said, "I don't know but it is the one that means war with Japan and Great Britain." He said, "Do you think you can verify this?" and I said, "I will go back and call Adm. Noyes." The reason I had to go back to call Adm. Noyes was that the secret phone was in my office. I called Adm. Noyes and he said something to the effect that, "I don't know any more Japanese than you do; it's the one of Japan and Great Britain." I said, "Do you think you can verify it?" He said, "I can't do it [3] now because I must report to the Chief of Naval Operations but I will do it later." I said it would be too late then.

I then returned to Gen. Miles' office and told him that Adm. Noyes did not know the word but that it was the one that war was going to be declared between Japan and Great Britain. They said, "Well unless there is something definite as to the meaning of this word this may be a false alarm." There was some other conversation on the subject, and as I recall I was instructed by Gen. Miles to make sure that FCC and other agencies listened on that Japanese press broadcast and to let him know of any future developments. I then returned to my office.

Col. CLARKE. Did you ever discuss this with anybody else? Did you make any report of this to the Chief Signal Officer, for example, or to the Chief of Staff or Secretary of General Staff?

Col. SADTLER. No, it wasn't told to anyone else in the Signal Corps because the Chief Signal Officer was in Panama at the time. That was discussed in War Plans Division and it was to some extent discussed with the Secretary of the General Staff, Col. Smith.

Col. CLARKE. Did they evidence any interest in this case?

Col. SADTLER. Not a great deal. As I remember, Gen. Gerow made a statement that they had been adequately warned.

Col. CLARKE. By they you mean the department commanders?

Col. SADTLER. Hawaii, Panama and Philippines. Col. Smith decided that nothing further should be done because it had been discussed with G-2 and War Plans.

Col. CLARKE. Will you state what you know about any action that may have been taken on the morning of December 7.

Col. SADTLER. I did not go to the office on the morning of December 7. Anything that I can say about December 7 is as a result of going down to the office afterwards.

Lt. Col. GIBSON. This Col. Smith is Col. Bedell Smith, now General?

Col. SADTLER. That's the one.

[4] Lt. Col. GIBSON. Did you talk to Col. Smith personally about the 5th of December?

Col. SADTLER. It was the morning of the 5th, Friday morning, after I talked to G-2.

Lt. Col. GIBSON. And he asked you if you had talked with G-2?

Col. SADTLER. He asked me what I had done as a result of this and I told him I had been to G-2 and that I had visited WPD and had seen Col. Gaily and Gen. Gerow. Gaily had nothing to say but Gen. Gerow said they had had plenty of warning.

Lt. Col. GIBSON. Did you ever, prior to Pearl Harbor, tell this to Gen. Marshall?

Col. SADTLER. Personally, no.

Lt. Col. GIBSON. Do you know of anybody who did?

Col. SADTLER. I don't know if Gen. Marshall ever knew it.

ROUND TABLE DISCUSSION

[1]

Place: Room 2C637 Pentagon Building, Washington, D. C.

Date: 14 September 1944.

Time: 1330-1430.

Present:

Major General Sherman Miles.

Brigadier General Hayes A. Kroner.

Colonel John T. Bissell.

Colonel Rufus Bratton.

Colonel Carter W. Clarke.

Lieutenant Colonel E. W. Gibson.

Gen. MILES (to Col. BISSELL). Definitely you confirmed yesterday my impression that the information we got from F. B. I. through the translations or intercepts of their messages at Hawaii was not given to us and was not available in fact to F. B. I. until after Pearl Harbor.

Col. BISSELL. That is correct.

Gen. MILES. I think you also said that we got nothing from the F. B. I. before Pearl Harbor indicating the possibilities of an open break of war with the United States.

Col. BISSELL. That is correct, too.

Col. CLARKE. Where did this message come from here on December 3 that they were burning the codes? Where did that information come from—it is in the Roberts Report. It apparently was the Navy and it must have had something which McCullom didn't make available to you. Bissell says he knew about burning the codes on the morning of December 7. That was in the papers of course.

Lt. Col. GIBSON. Was there much interchange between the F. B. I. and G-2 prior to Pearl Harbor?

Col. BISSELL. Oh yes, there was a great deal but not of this nature.

Col. CLARKE. It was all on domestic intelligence.

Gen. MILES. Oh, no, there was a lot on South American stuff and a lot on Japanese stuff. I had a personal meeting with Hoover and ONI once a week.

[2] Lt. Col. GIBSON. Had you ever asked them if they had anything on Hawaii, any information of Japanese activities in Hawaii prior to Pearl Harbor?

Col. BISSELL. Yes, to a great extent. The F. B. I. kept us informed as to the locations of these Japanese military attaches and then when they passed into Panama I in turn notified the G-2, with Gen. Miles'

consent, where they were going, and they in turn shadowed them in Panama, and if they turned up in Hawaii we got information both from the F. B. I. and our own people.

Lt. Col. GIBSON. Why was it that the F. B. I. suddenly started to turn over to you after Pearl Harbor information that might have been helpful before Pearl Harbor?

Col. BISSELL. They didn't have it before.

Gen. MILES. They were held down.

Col. BRATTON. I would like to clear this up. I understand that you (Col. Bissell) and Gen. Kroner have stated that this material (referring to Top Secret) was not made available to you prior to Pearl Harbor. I am of the distinct impression that, under orders from Gen. Miles, I did make it available to you before Pearl Harbor in the form of memorandums that had to do with certain subversive activities. I told you sometime before Pearl Harbor that I had a source of information which—

Col. BISSELL. I don't remember the date. That may have been before Pearl Harbor.

Col. BRATTON. I am of the distinct impression that that was initiated sometime before Pearl Harbor, and I am also of the distinct impression that these things were made available to you, at Gen. Miles' order, prior to Pearl Harbor and that you (Gen. Kroner) and Betts used to read them in the evening in the office.

Gen. KRONER. That is not my impression. I am aware of such (Top Secret) existing but I remember very clearly—

Col. BRATTON. Pursuant to instructions to you and an understanding with the General here, when anything was hot I used to run to General Miles first and I always acquainted you with what I had done afterwards at your convenience.

[3] Gen. KRONER. I do not remember that procedure with regard to signal intelligence or what was known as Magic. I do not remember any specific instance.

Col. BRATTON. I cannot recall any specific instance, but I am under the impression you knew what had gone between General Miles and myself.

Gen. KRONER. Well I have just the opposite impression, and that is that it was General Miles' wish, not expressed specifically but as I got it in working with you and his not talking about it to me specifically, that he wished it to continue to be handled between you two and that would form the basis of information, with your general information, and you advised me about the Philippines or about the Far Eastern situation according to the information you had available to you.

Gen. MILES. Your section, Bratton, was part of Kroner's Branch. Now it is true, I remember, that we were always closing in on Magic, making it more secure all the time—trying to—and that we had several people outside of the Munitions Building to serve. It was my definite desire and direction, I think, that you would handle the mechanics of Magic direct with me and the Chief of Staff, and later WPD, ONI, etc., but that you were to inform your Chief of anything important and certainly use Magic in your estimate of the Far East that you were giving to your Chief, Gen. Kroner. I am pretty sure that was the definite arrangement.

Col. BRATTON. That is my understanding too.

Gen. KRONER. My only comment on that is that I was never told or never received the impression that you wanted me to be specifically informed, but I assumed from our association that you expected Bratton to use the information in an all around appreciation of what was available to him when he gave me an opinion about the Far East.

Gen. MILES. I would like to ask Gen. Kroner if you can remember what your general impression of the Far Eastern situation was, of the probabilities of Japanese action whether against us or foreign powers, late in November or early in December.

Gen. KRONER. That there were a number of lines of action open to Japan, mostly connected with the Asiatic Continent, [4] which she would be more likely to take in case she decided to go to war against England or America, and that my attention was focused, after frequent discussions with Col. Bratton and Col. Betts, on the Asiatic Continent rather than toward the South Pacific.

Gen. MILES. Then I would like to ask both of you this. I have just read today that excellent summary that you prepared last year on the information received in MID. From that I get the very distinct impression, and I can remember this was my impression at the time, that the bulk of our information, all of it including Magic, indicated the major probability of a Japanese move to the south, Indo China, Siam, Thailand, perhaps the Dutch West Indies, perhaps Malaya, that our general impression at that time was that that was the most probable Japanese move. We did not exclude war with the United States since we specifically mentioned the Philippines as being part of the Japanese southern push and in a war with the United States of course there was a possibility, particularly with the Japanese, that a surprise attack might be made anywhere, certainly including Hawaii which had been armed and prepared for such an attack for twenty years.

Col. BRATTON. But that initially, as I have testified this morning, any attack against an American installation in the middle or eastern Pacific would be in the nature of a diversion and having as its objective the immobilizing of any force that we might call in to help the Dutch and British in west and southwest Pacific, but as you say their primary initial objective was the destruction of Great Britain's power in southeast Asia and the seizure of—

Gen. MILES. We don't very greatly differ there. I don't know that I would have said at the time that an attack on Hawaii or the Panama Canal, if made, would be a diversion. It would be a pretty serious attack to attain the objective, but not likely in view of the mass of information that we had as to the southern push. Is that more what you remember, Kroner?

Gen. KRONER. Yes.

Col. CLARKE. In view of what you have just stated here with reference to this great mass of information, didn't you consider it was equally the responsibility of the Chief of the War Plans Division to advise the Chief of Staff, as much [5] his responsibility as it was yours with reference to any potential attack which we might expect from Japan or any line of action that Japan might take?

Gen. MILES. It was the primary responsibility of Military Intelligence, always is and always will be, to advise the Command what the enemy may do and possibly do or more probably do. It is certainly the responsibility of Operations to advise the Chief of Staff

what we should do as the result of information received in Military Intelligence from their sources. I certainly considered it then a part of my business to know, in general terms, the disposition of American forces and rather specifically our defense plans of vital installations such as the Panama Canal, Hawaii, and the Philippines. I certainly knew the location of the major parts of the U. S. fleet.

Lt. Col. GIBSON. In other words, General, once you informed the Chief of Staff and the War Plans Division the possibility of an attack, it was then up to the WPD, through the Chief of Staff, to inform our forces what plan to put into effect?

Gen. MILES. Yes, a command responsibility. Now Bratton, in reading your testimony, it gave me the impression that the Magic that you selected for the Secretary of State might not be and was not in some cases perhaps quite the same as that presented to the Chief of Staff and to me.

Col. BRATTON. No, if you got that impression from anything I said I wish to correct it at this time. The Secretary of State never saw any document that was not presented to you, the Chief of Staff and WPD, as far as I am concerned.

Gen. MILES. Vice versa, was any document presented to the Chief of Staff that was not also presented to the Secretary of State?

Col. BRATTON. Yes, very often.

Gen. MILES. Really?

Col. BRATTON. Initially, but in our final breakdown of the thing it was the understanding that Mr. Hull was to see all [6] the communications that you and General Marshall saw.

Gen. MILES. And that had been in effect for sometime previous to Pearl Harbor.

Col. BRATTON. Yes. When I first started handling this stuff the State Department didn't see any of it. It was not until our relations with Japan became rather strained that I was instructed to serve it to the State Department at all.

Gen. MILES. I remember that, but for months preceding Pearl Harbor exactly the same selections from Magic which you made went to the Secretary of State, the Chief of Staff, the A. C. of S., G-2, WPD, and the Secretary of War.

Col. BRATTON. Identical.

Col. CLARKE. This meeting is primarily for the purpose of getting the four of you together here to iron out any little differences.

Col. BISSELL. After Bratton talked, I do recall now—I was thinking primarily of Japanese information at the time—Bratton did give me in the summer time various things which applied to domestic things as Communism and things of that nature. It was not primarily Japanese.

Col. CLARKE. One thing I want to bring out, you did not receive any raw material?

Col. BISSELL. I never got any raw material until after Pearl Harbor.

Lt. Col. GIBSON. Going back to this so-called Winds matter again. Gen. Kroner, do you have any recollection of how this telegram was sent to G-2, Hawaii—how it happened to be sent on December 5, 1941, asking them to contact Commander Rochefort immediately regarding a Tokyo weather reference?

Gen. KRONER. No, I have no knowledge of it.

Col. BRATTON. I wrote that, had General Miles' O.K. and had it dispatched.

Lt. Col. GIBSON. Who initiated it?

Col. BRATTON. I did. The basis is in one of those messages there.

Col. CLARKE. That message is November 19 and this is December 5. [7] Col. BRATTON. There were a number of these messages about this boogey-woogey they were going to send out on weather broadcast. They changed them a number of times and finally it became apparent this was what they were going to do.

Col. CLARKE. It has never been clear in my mind what brought this on. Sadtler said the message came in on the night of December 4 and on the morning of December 5 is when he went to General Miles with reference to this. This message is dated December 5. I wondered if by any chance you could recall whether or not Gen. Miles talked to you about it and told you to have the message sent, or whether McCullom, or maybe Sadtler.

Col. BRATTON. I had discussed this weather announcement system with Commander McCullom of the Navy and was informed by him that the officer in Hawaii who had complete knowledge of all of these Magic messages and who could explain most readily to the Army officials the significance of the radio broadcast, was Commander Rochefort.

Gen. MILES. So then this was a means of getting the information to Hawaii that the Winds message was out. Is that what you mean?

Col. BRATTON. No, that this would be the most expeditious way of telling our people in Hawaii that relations between Japan and one or more countries would be broken off.

Gen. MILES. If a certain message came through?

Col. BRATTON. They were monitoring them in Hawaii; they got them there before we got them. They were listening to the same stuff we were, so my idea here was that if our G-2 got in touch with Rochefort, he having already received this code by broadcast, could tell our G-2 at once what it meant. It was a means of saving time.

Col. CLARKE. Why did you wait two weeks? You got it on November 19 and told Hawaii on December 5. I am not clear on that. Circumstantial evidence points to the fact that Sadtler is partly accurate in what he says.

Gen. MILES. The message of November 19 gave us the word which they would use in three cases. Now what Bratton is saying, if I understand correctly, is that this message of December 5 was a means of letting our G-2 know thoroughly not only that this code had been arranged [8] but the implementing message was in, which would account for the date of December 5. My recollection about that is very vague.

Col. BRATTON. This accounts for some of the discrepancy in the timing. It wasn't translated until the 28th.

Gen. MILES. The Winds Code message was not translated until November 28.

Col. BRATTON. And may not have been given to me until the 29th.

Col. CLARKE. What I am trying to prove is, was there any knowledge in G-2 of the implementing message?

Gen. MILES. I think that that is the correct explanation but, as I say, on that particular thing my memory is hazy, of the implementation of the Winds Code. I can conceive, however, of no reason for

sending that message about Commander Rochefort except that Rochefort was in position not only to know the code but to know the implementation of the code.

Col. BRATTON. There were several nights when I sat up all night waiting for this thing to come through.

Gen. MILES. I am not trying to excuse my poor memory, but I can say that certainly from the 5th to the 7th of December there was little doubt in my mind that war was going to ensue. I wouldn't have said it was inevitable, but on the 6th the President appealed direct to the Emperor of Japan and there wasn't much doubt in our minds here that we were in a very difficult crisis.

Lt. Col. GIBSON. It seems to me that if you had notice that the Japanese were ordered to burn their codes on the 5th of December you wouldn't have forgotten that anyway.

Gen. MILES. This (Winds message) says that these words mean "east wind rain" which means, according to this code, that the Japanese-U. S. relations are in danger and also means that these code papers will be burned, but we knew damned well that the Japanese-U. S. relations were in danger. I cannot say that I did know of the implementing message. I can't explain why I knew and why Bratton didn't know if I knew. That is a blank in my memory.

[9] Col. BRATTON. It isn't conceivable that you would have known of this without saying something to me about it because we were both waiting for the thing.

Memorandum for the Chief of Staff

17 AUGUST 1945

Subject: Investigation regarding certain testimony of William F. Friedman, Director of Communications Research, Signal Security Agency, War Department, regarding alleged destruction of certain War Department records pertaining to Pearl Harbor

1. The report of the investigation regarding statements of fact made by William F. Friedman in testimony before Admiral H. K. Hewitt of the U. S. Navy sometime prior to 5 July 1945 is attached hereto as TAB A.

2. In view of the fact that the investigation being conducted by Admiral Hewitt is on the same level as that being conducted by Lt. Col. Henry C. Clausen, JAGD, it would seem that the release of information to the Navy, as requested by Admiral Hewitt in his letter of 5 July 1945, is a matter for determination by the Secretary of War. It is recommended, therefore, that the request of Admiral Hewitt and the results of this investigation be referred to Lt. Col. Clausen for preparation of such portion of the testimony in this case as the Secretary's office deems desirable to furnish Admiral Hewitt.

CARTER W. CLARKE
Brigadier General, GSC
Deputy Chief, MIS

Memorandum for the Chief of Staff

13 AUGUST 1945

Subject: Investigation regarding certain testimony of William F. Friedman, Director of Communications Research, Signal Security Agency, War Department, regarding alleged destruction of certain War Department records pertaining to Pearl Harbor

1. The undersigned was appointed by the A. C. of S., G-2 to conduct an investigation regarding the manner in which certain Top Secret communications were handled, under authority of a letter of 9 September 1944 which read as follows:

It is desired that you designate officers of your Division to conduct an investigation and interrogations, in accordance with the oral instructions issued to you by the Chief of Staff regarding the manner in which certain Top Secret communications were handled.

The officers designated to conduct this investigation will be authorized to administer oaths for this purpose.

By order of the Secretary of War:

/s/ J. A. Ullo
J. A. ULLO
Major General,
The Adjutant General

2. The investigation was completed in September 1944.

3. On about 8 July 1945 the undersigned was instructed to re-open the investigation to investigate certain statements made by William F. Friedman in testimony before Admiral H. K. Hewitt of the Department of the Navy earlier in July 1945.

4. The investigation was re-opened on 13 July 1945 in Room 2E780, Pentagon Building. Testimony under oath was taken of Mr. William F. Friedman, Director of Communications Research, [2] Signal Security Agency, War Department; Col. Otis K. Sadtler, Signal Officer of the Army Ground Forces; Brig. Gen. Isaac Spalding, presently stationed at Ft. McPherson, Georgia; Maj. Gen. Ralph C. Smith, presently Military Attache to France and, during the days of Pearl Harbor, Executive Officer of the Military Intelligence Division; and Brig. Gen. John T. Bissell, Headquarters 89th Division, Artillery, APO 89, c/o Postmaster, New York. At the time of Pearl Harbor, Gen. Bissell was Chief of the Counter-intelligence Branch of the Military Intelligence Division. There was also introduced into evidence the testimony of Mr. William F. Friedman as given before Admiral H. K. Hewitt.

5. All the testimony taken was stenographically reported and transcribed.

6. All the testimony and evidence received have been considered and, as a result of this consideration, I find the following facts:

a. That shortly before 5 July 1945 William F. Friedman, Director of Communications Research, Signal Security Agency, War Department, testified before Admiral H. K. Hewitt of the Department of the Navy in an investigation pertaining to the Pearl Harbor disaster. In his testimony Mr. Friedman testified, along with other things, as follows:

Approximately a year and a half ago I had a conversation with Colonel Sadtler, who came to duty in Washington about then, and we talked about

Pearl Harbor because of the fact that he had been the head of our communications service at the time, and he indicated that he had tried his best to urge that some specific warning message be sent out to the Department commander. He indicated that the "winds" code execute message had come in on the—some time on the 4th or 5th of December. I don't think that he was clear himself as to which of those two days it was. If I remember correctly, he was either notified himself by somebody in the Navy, possibly Admiral Noyes that the message was in—"It's in," as I recall it, was the expression used—or it may be that the Navy source called Army G-2 and indicated that they had had word that the message was in, and that Colonel Sadtler was then called to G-2 to corroborate the interception of the message.

At any rate, there was a question as to the exact word, the Japanese word, that was used and when Colonel Sadtler couldn't indicate the word, because he hadn't seen the message himself, I think they tried—I think he said [3] that they tried to get a verification from whoever it was—Admiral Noyes—but they weren't successful, whereupon the G-2 authorities simply passed the matter over. There was apparently nothing to substantiate the existence of the message.

Then, if I remember correctly, I asked Colonel Sadtler whether he had a copy, had ever gotten or seen a copy of this message, and his answer was, if I remember correctly, that he hadn't himself seen a copy, but that he had been told by somebody that the copies had been ordered or directed to be destroyed by General Marshall. Of course, I regarded this as merely hearsay evidence and nothing more than that: highly inconceivable that such a thing would happen. And when I talked over the Pearl Harbor story with Captain Safford, I probably just passed that out as one of those crazy things that get started. I shouldn't have done it. I certainly had no idea that he would repeat it.

b. I find that Mr. Friedman was not told by Col. Sadtler the facts as outlined in the last paragraph of Finding a, but was told by Col. Sadtler at some time in 1943 that Brig. Gen. Isaac Spalding had told Col. Sadtler that Brig. Gen. J. T. B. Bissell had told Gen. Spalding that everything pertaining to Pearl Harbor was being destroyed or had been destroyed.

c. I find that Col. Sadtler was told by Brig. Gen. Isaac Spalding sometime in August 1943 that Brig. Gen. J. T. B. Bissell had told Gen. Spalding that certain messages, pertaining to Pearl Harbor, had been received and were in the files of G-2 on 7 December 1941 and that Bissell had deemed it most necessary to destroy them.

d. I find that Brig. Gen. Isaac Spalding was not told by Brig. Gen. J. T. B. Bissell that certain messages had been received and were in the files of G-2 and that he (Bissell) deemed it most necessary to destroy them.

e. I find that Col. Sadtler did not tell Mr. Friedman that Gen. Spalding had told Col. Sadtler that certain messages implementing the Winds Code message were destroyed as a result of an order or direction of Gen. Marshall.

f. I find that no written message implementing the Winds Code message was ever received by G-2, and I find that no records pertaining to Pearl Harbor have been destroyed by G-2 or by anybody connected with G-2.

CARTER W. CLARKE,
Brigadier General, GSC
Deputy Chief, MIS

PART II

PEARL HARBOR INVESTIGATION

(On the oral directive of the Chief of Staff, Brig. Gen. Carter W. Clarke is now re-opening the investigation concerning Pearl Harbor)

13 JULY 1945

FINDINGS

TESTIMONY OF WILLIAM F. FRIEDMAN

[1] Place: Room 2E780, The Pentagon.

Date: 13 July 1945, 1:00 p. m.

Present: Brig. Gen. Carter W. Clarke.

Colonel E. W. Gibson.

Mr. William F. Friedman.

Gen. CLARKE. I have been directed by Gen. Marshall to reopen this investigation on the basis of the old order that we had here last September 9 when we started this investigation. I would like to remind you that you are still under oath with reference to that and I would like to re-swear you in, in connection with this new investigation. Do you solemnly swear to tell the truth, the whole truth and nothing but the truth, so help you God?

Mr. FRIEDMAN. I do.

Gen. CLARKE. State your name, rank, position and organization.

Mr. FRIEDMAN. William F. Friedman, Director of Communications Research, Signal Security Agency, War Department.

Gen. CLARKE. I would like you to refresh your memory on this matter by looking that letter and statement over before we ask you some questions about it. It is a statement sent by the Navy bearing date of 5 July 1945 enclosing your testimony before Adm. Hewitt, together with letter from Hewitt to Marshall.

Gen. CLARKE. Will you state, to the best of your knowledge and belief and recollection, just what conversations you have had with Capt. Safford on this whole subject of the Winds message from the very beginning.

Mr. FRIEDMAN. Well that would go back to a period of about 18 months ago when Capt. Safford apparently began to collect material, either on his own behalf or at the direction of some higher authorities, having a bearing upon the Pearl Harbor attack. In the course of his studies he prepared a list of the pertinent message or messages which he thought pertinent that came out of the Navy cryptanalytic bureau. Of course at that time we were working very closely with the Navy on the diplomatic side and we exchanged fully translations and technical data. There were some cases in which he wanted to piece out some things which might have been missing from his list of messages. He asked the Signal Security Agency—well he asked me first—to

supply [2] certain of this material, which was supplied only after approval had been obtained to supply whatever was necessary. In the course of getting together these materials we compared notes of our recollections and of the dates because at that time he was the head of the Navy cryptanalytic unit and I was principal cryptanalyst in the Signal Intelligence Service, and naturally I had a deep interest in the whole affair. At about the same time as Capt. Safford began his studies, I thought it would be interesting to collect material of that nature too. And I had a good deal of such material collected in the form of messages and in the form of reports, for example, the Roberts published report, periodical literature that was pertinent, and of course the technical files at the Agency were available for gathering together such material as I was directed to gather together upon three or four instances—I don't remember now just how many times. Well Capt. Safford came over to see me at my office.

Col. GIBSON. When, about?

Mr. FRIEDMAN. I wish I had brought my notes. I can't place the date accurately enough for this purpose, I am afraid.

Col. GIBSON. Do you have notes that could place it?

Mr. FRIEDMAN. I have some notes of dates of conversations, etc. I could place it fairly accurately that way. It is 18 months ago anyhow and possibly more.

Gen. CLARKE. Suppose you refresh your memory on that from your notes and—

Mr. FRIEDMAN. I will do that. Then I was a member of a special committee in connection with cryptographic security, and ad hoc committee, and we had occasion to go over to the building where Capt. Safford had his office from time to time, and every time I passed by he would ask me in or I would stop in to exchange a pleasant word or two with him, because he is a long-standing friend of mine. We had not only official relations of a cordial nature but also in a personal way we were fairly well acquainted. It was in that sort of way that we exchanged ideas about Pearl Harbor, and it was from him that I first learned of the Winds execute message. I had a very good recollection of the Winds code setup—well I had a knowledge of the Winds code setup from the old days of pre-Pearl Harbor, but I hadn't had any recollection whatsoever, if I even had knowledge at the time, of the existence of a so-called [3] Winds execute message. It was in these conversations that Capt. Safford stated on several occasions that there had been such a Winds execute message, that he believed that a copy of it was still in somebody's safe in the Navy Department, but that all of his attempts to local a copy of the Winds execute message in the official files of OP-20-G had been fruitless. And he naturally wanted to know if we had anything of that nature, and I told him I didn't know and I didn't look for anything like that. But some time thereafter—months thereafter—an official request came through from somebody higher up in the War Department—I think it might have been Gen. Bissell—who directed that a search be made through our files at Signal Security Agency to see if we could locate such a Winds execute message, and that was fruitless.

Capt. Safford was very firm in his conviction that there had been a Winds execute message and moreover that he himself had had it in his hands and that there was no question in his mind of the actual transmission of the Winds execute message, of its actual interception,

of its translation in accordance with the terms of the Winds code setup, of its having been handed over in the proper translated form to the Navy people in Naval Intelligence who had jurisdiction of dissemination. Also, he was apparently quite convinced that dissemination had been made to the Army, if not to the Signal Intelligence Service then to somebody in G-2. And he felt that there was some very excellent reason why no copies of this message could be found, and of course it left a number of questions and inferences in his mind which he naturally transferred to my mind. Well he also had apparently definite knowledge that certain testimony before one of the several Boards investigating Pearl Harbor showed clearly that there had been a Winds execute transmission and he believed that the Roberts Board had some definite knowledge about its having been transmitted, etc.

Well this mysterious disappearance, according to him, of all copies of the Winds execute message naturally was of extreme interest to me, and some time after my first, or possibly second, conversation with Capt. Safford, I learned of the return to Washington for duty of Colonel Sadtler. We were old friends. I have known him for certainly 20 years. And when he came to Washington—I don't know whether he called me or I called him—I can't recall that—but being old friends, naturally we wanted to get together. Shortly after he came back he came over to my office one day—and I don't know whether he had specifically in mind to talk about Pearl Harbor [4] he may have, but at any rate in the course of our reminiscences about those days, he told me some very startling things. I might say he was quite positive about what he said and left me more or less breathless at one part of his news. I don't know whether I should call it information or what, but at any rate, when I asked him about the Winds execute message his recollection was apparently extremely clear, and he certainly was positive about his recollection of the fact that such a Winds execute message had been intercepted by a Navy source, because he told me that he was called over to either Gen. Miles' office or Col. Bratton's office—I don't recall which one—but at any rate he was called over to—well we may have to go back—I recall now that he said that Adm. Noyes called him one morning and my recollection is that it was on December 4—might have been the 5th—1941, saying—and this stands very bright in my memory—he actually quoted what Adm. Noyes said to him on the telephone: "It's in," meaning that the Winds execute message had been transmitted and had been intercepted and that it meant a break in relations between Japan, and he said, if I recall correctly, a break in relations between Japan and England, and that he had then gone over to either Gen. Miles' office or to Col. Bratton's office—or Adm. Noyes had telephoned the same message or the purport of the Winds execute message to Gen. Miles or to Col. Bratton. At any rate, Col. Sadtler was either summoned or presented himself to G-2 and said that the Winds execute message had come in and that something should be done right away. Well Col. Bratton, who was the Japanese language expert, wanted Col. Sadtler to tell him what the Japanese word was that had been included in the Winds execute message. I don't think it is necessary for me to indicate the nature of the Winds code setup, but at any rate, Col. Bratton wanted to know what the Japanese word was. Well Sadtler said

that he himself had not seen the message, he had gotten the information from the Navy source by telephone and that he therefore couldn't give the Japanese word. He was directed to go get the Japanese word. And here my recollection isn't very clear as to whether he actually went over personally to Adm. Noyes' office or whether he tried it on the telephone, but he apparently wasn't able to get the Japanese word, whatever it was. He went back to Col. Bratton or Gen Miles when he was unsuccessful in getting the Japanese word, or perhaps even a copy of the message—which is something I don't understand—at any rate when he was unable to produce the message or the Japanese word they said there was nothing they could do, that perhaps there was disbelief on their part in the allegation that [5] the message had been transmitted and intercepted. That of course was very interesting to me. And then I asked him whether he had a copy of the Winds execute message, and I am pretty sure in my recollection that he said that he never had had one and of course didn't have any now. He did have certain things put away in a safe deposit box, and I don't know what sort of documents he might have put away. But he did mention one document which was of very great interest to me. I have naturally not seen it—I didn't ask him to show me a copy of it, but this, to the best of my recollection is what he told me about that. He said that on Friday, possibly earlier than Friday, December 5th, he, being deeply concerned about the threat of negotiations with the Japanese Government and noting the tenor of the messages that we were turning out in translation, became extremely apprehensive that war might break out at almost any hour without any declaration on the part of the Japanese. And he felt that somebody high up in the War Department ought to send a message out to Gen. Short warning him that—well I remember the words in general of what he said was the type of message that he actually prepared in his own hand: "Break in relations between Japan and United States may be expected within the next 24 or 48 hours. Take all necessary steps to insure that there will be no repetition of Port Arthur." Now by that of course he meant that in the Russo-Japanese war the Japanese attacked at Port Arthur without warning, and the implication was quite clear what he had in his own mind. Well he tried to interest some of the people in the higher echelons in sending such a message, and I don't recall the various steps he took. He tried somebody in G-2; he tried somebody in Operations Division; the Secretary of the General Staff—I can't enumerate them all now—but at any rate he said that he got turned down all the way and nobody would pay any attention to him. He claims to have a copy of such a proposed message, or rather a draft of a message, still in his possession.

Well, in the course of this conversation I asked him, "What do you suppose happened to the Winds execute message which we believe so firmly was intercepted?" Well he said he was told that they were ordered destroyed. And that sort of took me aback, and I said, "By whom?" And he said, "By Gen. Marshall." It was something that I just couldn't believe, swallow, or give credence to, and I expressed my disbelief, but he was pretty firm in his statement and there was no checking him in that. Now where he got it from I don't remember. I do know that on a subsequent occasion or two—because we met each other once or twice thereafter—my disbelief of the story was discredited by [6] him apparently, because he still remained

very firm in his belief that all copies of the Winds execute message, both in the Army and in the Navy, had been destroyed and ordered to be destroyed.

Col. GIBSON. Did he say who told him this story that these messages had been burned—at Gen. Marshall's order?

Mr. FRIEDMAN. He did.

Col. GIBSON. Who did he say told him that story?

Mr. FRIEDMAN. The name is Ike Spalding, but I don't recall his grade or rank. It is possibly Col. Spalding—I don't recall whether or not he told me of the official position which Spalding occupied. Now, while I am at it, I recall that Col. Sadtler stated that there were two messages ordered destroyed.

Col. GIBSON. Did he say that as of his own knowledge or that somebody had told him there were two?

Mr. FRIEDMAN. I am quite sure that it was not of his own knowledge. He was passing on second-hand information. Now what credence he gave to the story that was told to him I don't know—I don't recall—but the other message which was allegedly also one that was destroyed was a message which was supposed to have—well as I recall it—a message was sent by the War Department a day or two after Pearl Harbor, maybe Monday, to the Signal Officer, Col. Powell, asking him whether the radar installation in the islands was in operative order at the time of the attack. And the answer came back in the affirmative. Now whether the question and answer were destroyed, or rather alleged to have been destroyed, or just the answer, I don't recall, but at least there were two different things involved.

Gen. CLARKE. In order words, they were on two different subjects?

Mr. FRIEDMAN. Yes.

Col. GIBSON. This talk took place in your office?

Mr. FRIEDMAN. In my office.

Col. GIBSON. You don't know the exact day?

Mr. FRIEDMAN. I could place that because I made very, very rough notes of the substance of the conversation after—

[7] Col. GIBSON. Will you supply us the approximate date? Was anybody else in your office when that took place?

Mr. FRIEDMAN. No. There were just the two of us.

Col. GIBSON. Was that the first talk you had with Col. Sadtler after he came back in the War Department?

Mr. FRIEDMAN. The very first.

Col. GIBSON. And after that you had two or three other talks with him?

Mr. FRIEDMAN. Yes.

Col. GIBSON. Those took place where?

Mr. FRIEDMAN. I think there was one more occasion when he came over to the office and the other time or two was when we were socially having dinner together or something like that. At my home I know there was one evening that we talked about it privately, just the two of us, in my own study.

Col. GIBSON. He never claimed to you to have seen the Winds execute message himself?

Mr. FRIEDMAN. He never did.

Col. GIBSON. What did he say he had in his safe deposit box other than a copy of the draft of the message he tried to get sent out?

Mr. FRIEDMAN. I don't recall that he said anything. I may have asked him, "What else do you have there," and he either passed it off with a remark, "Well never mind, I am not telling anybody." But I rather got the impression that he felt that as head of the Army communications at the time and the superior of the officer in charge of the Signal Intelligence Service, he might be called upon some day in connection with an investigation and that he had put certain things away. I might say that, to the best of my knowledge and recollection, Col. Sadtler didn't impose any secrecy upon what he was telling me. Oh naturally he trusted to my discretion, but I don't know whether he had in mind that I might or might not communicate the information to others entitled to know about such things or not. I certainly wouldn't have said anything to Capt. Safford about it if he had imposed some sort of secrecy upon what he was telling me, and of course you understand that, not giving any credence to it myself, I didn't feel that Safford would believe any of it. But to my astonishment. [8] Safford seemed to think there might be something to it, at least he thought there was a Winds execute message and now it can't be found.

Col. GIBSON. Did Safford come to your office for some of these conferences?

Mr. FRIEDMAN. Yes, he was over to my office two or three times in an official way—I mean getting together the data that he wanted. He supplied us with digests of his series of messages and I think he turned over a copy of everything he gave me to Gen.——. I do have rough notes made of some of these conversations. If they are necessary I will put them at your disposal.

Gen. CLARKE. I think that would be highly advisable, because I hope this is the last round-up and I think that you ought to come back in the morning——

Mr. FRIEDMAN. General, I am going to take for the air tomorrow. I had better do it this afternoon.

Col. GIBSON. At the time of Pearl Harbor and before or somewhat prior, you were not working with Jap cryptography, were you?

Mr. FRIEDMAN. No, I was not directly engaged in it because, as you know, I had been ill, had had a nervous breakdown.

Col. GIBSON. You were putting in part time at that time?

Mr. FRIEDMAN. Yes, when I came back to duty after I was discharged from Walter Reed, Gen. Mauborgne and Col. Minckler told me I was to take it easy and come and go as I pleased. I used to come in about a half hour or an hour late in the morning and leave a half hour before the end of the day so as to avoid heavy traffic. I was not in direct touch with the cryptanalytic work, although I did see, whenever I wanted to, the messages that came out.

Gen. CLARKE. Who was in direct charge of the Japanese at that time, while you were ill?

Mr. FRIEDMAN. Well of course at the time of Pearl Harbor it was Col. Minckler, who was in charge of Signal Intelligence Service, and then I think he was ranked as Captain—Capt. Doud, Capt. Svensson and then Rowlett was in technical charge of the Jap diplomatic operation.

Gen. CLARKE. Do you know whether or not Col. Sadtler saw the output of the institution?

[9] Mr. FRIEDMAN. I am certain that he saw the very important messages but I don't know that he saw everything that came out.

Gen. CLARKE. Did Gen. Mauborgne?

Mr. FRIEDMAN. The same situation. He saw the important messages.

Gen. CLARKE. Of course Olmstead was in there—not Mauborgne.

Mr. FRIEDMAN. Well Gen. Olmstead didn't take as much interest in that sort of thing as Gen. Mauborgne did. He may have seen occasional messages. As a matter of fact, I recall Sadtler said that four or five days before Pearl Harbor, Gen. Olmstead was planning on going to Panama on an inspection tour and that Col. Sadtler tried to dissuade Gen. Olmstead from taking this trip, saying that "conditions are extremely critical and I believe war is going to break out within the next 72 hours; maybe you had better stay around." Well Gen. Olmstead didn't agree with him and decided to go ahead with the trip, and he did. I think he came back within a day or two after Pearl Harbor.

Col. GIBSON. How many were engaged in the cryptanalytic work on this Japanese traffic at the time of Pearl Harbor by the Signal Intelligence Service?

Mr. FRIEDMAN. You mean right in the Munitions Building—exclusively the intercept personnel?

Col. GIBSON. Yes.

Mr. FRIEDMAN. I prefer to wait until I get my notes to answer.

Col. GIBSON. Was our section as big as the Navy section?

Mr. FRIEDMAN. They were comparable in size. I think there were just as many on the diplomatic side as on our side.

Col. GIBSON. Did the Army process its material as speedily after receiving it as the Navy did?

Mr. FRIEDMAN. Oh yes. I believe that there is little to be said about comparative speeds. We were both most anxious to get these things out as expeditiously as possible, in fact there was a good deal of competition in getting out the translations and if, of course on isolated occasions, we found that they were a bit slow or we were a bit slow, we would inquire to see what had happened. Well it might have been a key had to be reconstructed or—I couldn't [10] say that we processed a certain message faster than they because there was no way of telling.

Col. GIBSON. Who set the priorities as to which code should be read first?

Mr. FRIEDMAN. Those were set by the Chief Signal Officer and the Director of Naval Communications in conference with the technical people, etc. As a general rule we processed the messages in the Purple system under a first priority because our experience had been that that was the system that carried the most important traffic. What came after that I don't recall exactly. It might have been the combined PA-K2, as I remember one designation. That was an enciphered code system. Then there was a J-19, also an enciphered code system, and the least of the codes in priority was what we called LA, and of course below that would come plain language.

Col. GIBSON. The Army and Navy agreed on this priority?

Mr. FRIEDMAN. Oh yes, the priorities were set by mutual agreement.

Gen. CLARKE. That was done in conference from the Director of Naval Communications and the Chief Signal Officer. Do you mean by that those two individuals or their representatives?

Mr. FRIEDMAN. At that time, Gen. Mauborgne, who was in office as Chief Signal Officer when the odd and even date was set up as the basis for operation, took a great interest in this work, much more so than the Chief Signal Officer. I can't say absolutely at the moment that he himself sat down with his opposite number—at that time Adm. Noyes—and decided the priority scale, but I think those two officers would certainly approve a schedule recommended by the technical people. Naturally the technical people would have to have a hand in determining those priorities because of technical considerations, the difficulty of each system, etc. I should have said also that the A. C. of S., G-2 would have a very vital word to say in the processing of priorities.

Gen. CLARKE. You never got any guidance from the Chief Signal Officer or the A. C. of S., G-2 in your case, or the Office of Naval Intelligence in the Navy, on interception or anything of that kind? As you got this stuff you worked on it according to the classification of the code and its degree of security? Is that what I understand?

Mr. FRIEDMAN. I don't understand your question. Are you asking did the technical people process these messages in accordance with their own ideas?

[11] Gen. CLARKE. Their own ideas, or did they get guidance from on high?

Mr. FRIEDMAN. Guidance from on high. The decision to process Purple messages, for example, would be one for the people of a higher echelon to say, "Yes, process those first." In fact, even in connection with the intercept operation and the forwarding operation, those things were all set up by priorities. The material that came from Honolulu, for example, had to be sent according to some priority system.

Gen. CLARKE. Is it correct in your opinion—something that I have heard—that the most important traffic came in a lower grade system and not in the high grade Purple?

Mr. FRIEDMAN. No, I wouldn't subscribe to that. We occasionally did encounter a case in which a message of considerable importance would be in a low or medium grade code, but largely because it came from a place which didn't have the higher level material, or there have been cases in which some sort of a condition of a breakdown of a machine at a station which was provided with a machine would cause a message to go in a code of a lower category.

Gen. CLARKE. In our discussions here we have referred a number of times, and so have you, to the so-called Japanese Purple system. Will you state approximately when that was solved and by whom it was solved?

Mr. FRIEDMAN. To the best of my recollection, the first complete translation was handed in some time in August, it might have been the early of August or the middle part of August. We had been working on the Japanese Purple system. This system had superseded a system known as the Red, which was also a machine cipher. But when the Purple system was first introduced it presented an extremely difficult problem on which the Chief Signal Officer asked us to direct our best efforts. After work by my associates when we

were making very slow progress, the Chief Signal Officer asked me personally to take hand. I had been engaged largely in administrative duties up to that time, so at his request I dropped everything else that I could and began to work with the group. Naturally this was a collaborative, cooperative effort on the part of all the people concerned. No one person is responsible for the solution, nor is there any single person to whom the major share of credit should go. As I say, it was a team, and it was only by very closely coordinated teamwork that we were able to solve it, which we did. It represents [12] an achievement of the Army cryptanalytic bureau that, so far as I know, has not been duplicated elsewhere, because we definitely know that the British cryptanalytic service and the German cryptanalytic service was baffled in its attempts and they never did solve it. After we solved the Purple system, the technical data necessary to operate the system and a machine constructed by ourselves were turned over to the British so that they were in position to process Purple messages also. We did the same so far as concerns the Navy. We provided them with a Purple machine or two.

Gen. CLARKE. On approximately what date did we give the Purple machine to the British?

Mr. FRIEDMAN. I recall that very clearly. A joint U. S. Navy-U. S. Army cryptanalytic mission consisting of four officers, two from each service, went to London for the purpose of establishing technical cooperation with the British cryptanalytic service. It was at that time the Army furnished a Purple machine and the technical data to the British.

Gen. CLARKE. To the best of your knowledge and belief then, was all of the traffic which has since become known as the Pearl Harbor traffic in these Pearl Harbor investigations available to the British at the same time as it was available to the American Army and Navy?

Mr. FRIEDMAN. I believe that to be a correct statement. The only thing that they might lack would be certain intercepts which they were not in a position to—

Gen. CLARKE. You mean by that individual messages?

Mr. FRIEDMAN. Yes.

Gen. CLARKE. Did you ever discuss or hear them discuss the Pearl Harbor traffic?

Mr. FRIEDMAN. No.

Gen. CLARKE. Or any of the traffic leading up to Pearl Harbor?

Mr. FRIEDMAN. No. The only thing that I do know is that there exists in the files one or two messages which came from British sources out in the Far East. If you remember, the British had some relations with the Dutch in the East Indies.

TESTIMONY OF COL. OTIS K. SADTLER

[1] Place: Room 2E780, The Pentagon.

Date: 14 July 1945.

Time: 10:00 a. m.

Present:

Brig. Gen. Carter W. Clarke.

Colonel E. W. Gibson.

Colonel Otis K. Sadtler.

Col. GIBSON. Col. Sadtler, you realize that you are under oath and you are fully aware of what your rights are?

Col. SADTLER. Yes.

Col. GIBSON. I want to ask you first if you ever saw a so-called Winds execute message?

Col. SADTLER. I did not.

Col. GIBSON. To your knowledge, was such a message ever in the War Department?

Col. SADTLER. It was not.

Col. GIBSON. And all that you know about that message and all contact that you had with it is in your former testimony?

Col. SADTLER. That is right. I might further add that the information came from Adm. Noyes.

Col. GIBSON. Mr. William F. Friedman has testified before Adm. Hewitt of the Department of the Navy recently as follows: "Then if I remember correctly, I asked Col. Sadtler whether he had a copy, had ever gotten or seen a copy of this message, and his answer was, if I remember correctly, that he hadn't himself seen a copy but that he had been told by somebody that the copies had been ordered or directed to be destroyed by Gen. Marshall." Did you tell Mr. Friedman that you had been told by somebody that the copies of the Winds execute message had been ordered or directed to be destroyed by Gen. Marshall?

Col. SADTLER. I will make an absolute flat denial of that statement made by Mr. Friedman because, as far as I know, that message was never in the War Department and I never made any statement that Gen. Marshall ordered it destroyed or that anyone told me that Gen. Marshall ordered it destroyed.

[2] Col. GIBSON. When did you return to duty in Washington this last time?

Col. SADTLER. About March 28, 1944.

Col. GIBSON. After your return during the following summer and fall on occasion did you visit with Mr. Friedman?

Col. SADTLER. Yes.

Col. GIBSON. And did you visit about Pearl Harbor, amongst other things?

Col. SADTLER. Yes. We had discussed what had happened at that time.

Col. GIBSON. Did some of those discussions take place in Mr. Friedman's office?

Col. SADTLER. Well I assume they did because I have been in his office several times. I had talked to him on occasions about what had happened, not only in his office but at his house.

Col. GIBSON. At some time did somebody tell you that messages pertaining to the Pearl Harbor affair were being destroyed?

Col. SADTLER. Yes. Some time during 1943 Gen. Isaac Spalding at Ft. Bragg, North Carolina, told me something to the effect that J. T. B. Bissell had told him that everything pertaining to Pearl Harbor was being destroyed or had been destroyed.

Col. GIBSON. Is it possible that you told that to Mr. Friedman in one of your conversations?

Col. SADTLER. It is possible.

Col. GIBSON. You have been an old friend of Mr. Friedman for many years?

Col. SADTLER. I have known him for over 25 years.

Col. GIBSON. This Colonel, now Brigadier General J. T. B. Bissell, that you speak of, do you know him personally?

Col. SADTLER. I do not.

Col. GIBSON. To your knowledge have you ever met him?

Col. SADTLER. Yes, I have met him casually but I doubt if I would recognize him today if I saw him.

[3] Col. GIBSON. During the period immediately prior to Pearl Harbor did you have any official business of any nature with the then Col. Bissell?

Col. SADTLER. No.

Col. GIBSON. And your only business of an official nature that you did with G-2 at that particular time was done with Col. Rufus Bratton and Gen. Miles?

Col. SADTLER. Yes, and Hayes Kroner. Mostly with Bratton and Miles. They were my normal contacts.

Col. GIBSON. Col. Sadtler, Mr. Friedman also has testified that on or about the time Adm. Noyes advised you that the Winds execute message was in that you prepared a draft of a message that you wanted to suggest be sent to the Commanding Generals of the Philippines, Hawaii and Panama. Is that so?

Col. SADTLER. That is correct.

Col. GIBSON. Will you relate now what happened about that?

Col. SADTLER. In substance the message was about as follows: "Reliable information indicates war with Japan in the very near future. Take every precaution to prevent a repetition of Port Arthur. Notify the Navy. Signed Marshall."

Col. GIBSON. Did you type that message out yourself or who did the typing?

Col. SADTLER. I am positive that I did it because Miss Robinson says she never saw it.

Col. GIBSON. Did you have that message with you when you went to discuss Adm. Noyes' message to you that the "Winds Execute" message was in, with Col. Bratton and Gen. Miles?

Col. SADTLER. I did not. After leaving Gen. Miles' office where Gen. Miles and Col. Bratton more or less casually threw off this information about the execute of the Winds message, I went back to my office and thought that something ought to be done. That message was typed up and I went to see Gen. Gerow and talked this over for a few moments with him and suggested that he notify them. Gerow's reply to the effect was that they had been adequately notified, as I recall it. I then went to see Secretary of General Staff, Col. Bedel Smith, and told him what had been done and [4] suggested he send a message. His reply was to the effect that he refused to discuss it further.

Col. GIBSON. Did Gen. Gailey or Gen. Gerow see the message you had prepared—or Gen. Bedel Smith?

Col. SADTLER. No, I don't think so.

Col. GIBSON. Col. Sadtler, I also want to ask you if it is true that early in December you tried to dissuade Gen. Olmstead from making a trip to Panama because you felt sure that war was going to break out.

Col. SADTLER. That is correct—on December 1.

Col. GIBSON. Tell us about that.

Col. SADTLER. On December 1, when Gen. Olmstead was making preparations to go to Panama, I attempted to dissuade him from his trip because I felt positive that war would be declared before he returned and I thought that it was his duty to be in Washington.

Col. GIBSON. What did he say?

Col. SADTLER. He said, "I am going anyhow and that's all there is to it."

Col. GIBSON. When did Olmstead return, do you know?

Col. SADTLER. About the 20th of December.

Col. GIBSON. Did he have any conversation with Marshall when he got back, do you know?

Col. SADTLER. He said that he had gone to Gen. Marshall or had visited Gen. Marshall and Gen. Marshall had told him that his men that he had left in charge while he was gone had not performed 100 percent, or words to that effect. Olmstead said, "Why didn't you act on the information you already had?"

Col. GIBSON. Col. Sadtler, have you ever talked anything pertaining to Pearl Harbor over with Capt. Safford of the Navy?

Col. SADTLER. No.

Col. GIBSON. Have you discussed it with any naval officer who had any direct contact with naval communications at the time of Pearl Harbor?

[5] Col. SADTLER. Only with Adm. Noyes.

Continued—17 July 1945, 9:30 a. m.

Place: Room 2E780, The Pentagon.

Present:

Brig. Gen. Carter W. Clarke.

Col. E. W. Gibson.

Col. O. K. Sadtler

Col. GIBSON. Col. Sadtler, Mr. Friedman has also testified that you told him that you had heard that in addition to the Winds execute message being ordered destroyed by Gen. Marshall, there was a second message that was ordered destroyed by Gen. Marshall. This second message was a message which was the result of a message sent by the War Department a day or two after Pearl Harbor to the Signal Officer, Col. Powell, asking him whether the radar installation in the Islands was in operative order at the time of the attack, and the answer came back in the affirmative. Did you tell Mr. Friedman that you had heard that the message of inquiry relative to the working of the radar installation in the Islands or the answer thereto had been destroyed?

Col. SADTLER. I did not. The circumstances attending that message are about as follows: I sent the inquiry, with the approval of the General Staff, inquiring as to the operation of radar on December 7. Upon receipt of that message Col. Colton, Acting Chief Signal Officer, personally took a copy of it into Gen. Marshall's office. I gave a copy to Geo. Gerow. Col. Colton, upon his return from Gen. Marshall's office, said that he wanted all copies of that message collected and held intact as, inasmuch as radar and the damage done at Pearl Harbor secret at that time, the information was not to be disclosed. Gen. Gerow kept his message and I think that Col. Handy had it and he held it.

Col. GIBSON. To your knowledge, did Gen. Marshall ever order this radar message, either the original inquiry or the answer thereto, destroyed?

Col. SADTLER. No. To my knowledge, he did not.
 Col. GIBSON. Did you ever hear from any source that he had ordered either of those destroyed?
 Col. SADTLER. No.

TESTIMONY OF BRIG. GEN. ISAAC SPALDING

[1] Place: Room 2E780, The Pentagon Building, Washington, D. C.

Date: 17 July 1945.

Time: 9:30 a. m.

Present:

Brig. Gen. Carter W. Clarke.

Brig. Gen. Isaac Spalding.

Col. E. W. Gibson.

Col. O. K. Sadtler.

Gen. CLARKE. Do you solemnly swear that the testimony you give in this case will be the truth, so help you God?

Gen. SPALDING. I do.

Gen. CLARKE. Will you state your name, rank, organization and present station?

Gen. SPALDING. Isaac Spalding, serial number O3383. Brigadier General, USA, Station Ft. McPherson, Georgia.

Gen. CLARKE. What were your station and duties in the three months preceding Pearl Harbor?

Gen. SPALDING. I was on duty as Chief of the Officers Branch of the office of Assistant Chief of Staff, G-1, War Department up to the night of December 3, 1941, and on the morning of December 4, 1941 I became Chief of the Army Exchange Service, which lasted for some time after the Pearl Harbor incident.

Gen. CLARKE. Had you previously been on duty in the old War Plans Division?

Gen. SPALDING. I had. I was on duty in the War Plans Division from the summer of 1932 to the summer of 1936.

Gen. CLARKE. But you were not in the War Plans Division on your return from that tour of duty you were then on just preceding Pearl Harbor?

Gen. SPALDING. No. I was placed on duty in G-1, War Department, on January 11, 1941 on my return from overseas service in Hawaii.

Gen. CLARKE. Were you on occasion called into conference by the War Plans Division with reference to Hawaiian war plans?

Gen. SPALDING. During my four year tour you mean?

[2] Gen. CLARKE. While you were with G-1.

Gen. SPALDING. I don't remember ever talking with anyone in WPD about any war plans. I had many friends there and would occasionally go over and see them on matters connected with personnel. I remember someone in the summer of '41—I think it was Gen. Gerow—stating that a message had been sent to the Philippines making Gen. MacArthur the head of all our Army forces over there, but I think that is the nearest that I ever came to anything connected with the war plans in any way. I don't remember talking about Hawaii with anyone in '41, nor do I remember who was in charge of the Hawaiian Defense Project.

Gen. CLARKE. Did you have knowledge of the intercepted traffic which was being produced by the Signal Corps at that time?

Gen. SPALDING. No. My friend Spencer Akin was in charge of some kind of a secret room which was right over G-1 in the same wing of the Munitions Building, and I had planned to go up and visit Akin and see what was going on but I never did go and Akin was transferred away. I knew they had some kind of a secret room up there and I thought it was something with breaking down codes but I don't know what they did.

Col. GIBSON. General, Mr. William F. Friedman, who is at present Director of Communications Research of Signal Security Agency of the War Department, has testified that sometime in 1944, in a conversation with Col. O. K. Sadtler, that Col. Sadtler told him that he had been told that a certain message pertaining to a warning on the Japanese attack on Pearl Harbor, which we called the Winds execute message, had been ordered destroyed by Gen. Marshall and that another message dealing with the question of whether or not the radar installation on the Hawaiian Islands was in operation on the date of Pearl Harbor, and the answer thereto, had been destroyed by Gen. Marshall's order. Mr. Friedman further testified that Col. Sadtler told him that he had been told this story by you. Thereafter Col. Sadtler testified that he had never told Mr. Friedman that he had heard that Gen. Marshall had ordered this so-called Winds execute message destroyed or the radar message destroyed, but that he had been told by you at Ft. Bragg sometime in 1943 that the then Col. J. T. B. Bissell, now Brigadier General Bissell, had been ordered to destroy all matters pertaining to Pearl Harbor, or that in substance. I want to ask you, having given you this background, first, did you tell Col. Sadtler that in substance?

[3] Gen. SPALDING. I did not tell him that in substance, answering specifically your question, but I did tell him certain things. But at no time was the name of Gen. Marshall ever brought into the conversation or discussion.

Col. GIBSON. What was it you did tell Col. Sadtler?

Gen. SPALDING. I would like to make a rather full statement. By so doing maybe I can answer questions which you might specifically ask me later. I wish it to appear in my testimony that it is my full belief that the Secretary of War, Mr. Stimson, and the Chief of Staff, Gen. Marshall, are not involved in any way whatsoever with the testimony which I am about to give, and it is my belief that neither one knew anything of it.

I was around in the War Department for a year preceding Pearl Harbor and for six months thereafter, and of course there were various conversations about Pearl Harbor after that "blitz." It was all very vague to me as to why the A. C. of S., G-2, Gen. Sherman Miles, had not diagnosed this coming war, and it was rather queer to me that soon after the blitz he was transferred to other duty and Gen. Raymond Lee was brought back from England to be the War Department G-2. This transfer aroused my curiosity but I never did know why it was done.

In the summer of 1943 I was stationed at Ft. Bragg, and certain troops at Ft. Jackson, South Carolina, came under my command. It was my custom to visit the troops at Ft. Jackson about once a week for from one to three or four days at a time. In July of 1943 I moved

my whole headquarters and headquarters battery from Ft. Bragg down on to the reservation at Ft. Jackson for two weeks field training. Previous to that time and during July and for several weeks after, Col. John T. Bissell, Field Artillery, commanded one of my artillery groups at Ft. Jackson, and so I requested him to make the necessary reservations for camping space and maneuver ground on the Ft. Jackson Reservation. Upon my arrival at this camp site I found that Col. Bissell and his staff had made arrangements preliminary to our entering the camp and Col. Bissell himself had established his command post under canvas within a few hundred yards of my camp site. We were thus camped close together for several days and during that time we often sat under the trees and talked in the late afternoons and early evenings. Bissell had been on duty in the War Department and I believe part of his [4] duties were connected with secret service operators. Naturally we talked about matters which were of interest to each other and I had some curiosity on our secret service, but I learned nothing from him except such generalities as that we had considerable such effort now that the war was under way. I remember telling him that G-2 denied during peacetimes that they ever had any operators, but I didn't believe those statements. He made no remark as to whether they did or didn't. I remember telling him that I had always wanted to be a sleuth or a detective of some kind but I didn't think I would be a success at it. But I was always curious concerning detective stories, etc. It is my opinion and recollection that Bissell in no way whatsoever revealed any secrets connected with his duties concerning our secret operators. I remember that I would have liked to have him talk more but he didn't.

We talked about the Pearl Harbor incident. I remember expressing to him my failure to understand how Sherman Miles and the Navy could fail to discover that those Japanese vessels had left home ports. I was under the impression from my experience in both the Army and Navy War Colleges and in the War Department General Staff and in my dealings with the Navy while on duty in the General Staff, from all these experiences I had thought or believed that our Navy kept track of every vessel carrying the Japanese flag, both commercial and war vessels, and I didn't see how those vessels in peacetime could get away from Japan and come down near Hawaii without our Navy knowing it. I was astounded at their ignorance or inability to detect that! I remember shooting off my mouth about Sherman Miles, for whom I didn't have a very high regard professionally, and I think I remember telling him what I told Walter Krueger when he asked me what I thought about Sherman Miles, I told him that I thought Miles was a "stuffed shirt," and Krueger was astonished that I should think that about him. And so by our talking we got into the subject of Pearl Harbor and the information which we must have had and which the Navy must have had and our failure to give some kind of a better warning to Gen. Short. I remember expressing my disgust at those airplanes up at Wheeler Field all lined up for Saturday morning inspection and were still there on Sunday morning, and I told him of my disgust that those radars weren't working, that I knew when I left Hawaii in 1940 they were being installed. And Bissell said that certain messages had been received and were in the files of G-2 and he deemed it most necessary [5] to destroy them. I got the impression that these messages were derogatory to

the War Department and that he (Bissell) on his own responsibility destroyed them. I had the impression that they were secret information which it was most desirable that the President, Congress, the public, Mr. Stimson and Gen. Marshall not know about. I had the feeling that Bissell destroyed them without even Gen. Raymond Lee, the G-2 at that time, knowing they were in existence.

Now the question may come up as to sobriety on this occasion. We were out there under the trees and upon my arrival a bottle of Scotch and two or three bottles of soda water had been presented to me and when I broke camp 14 days later I returned the unopened bottle of Scotch and possibly the soda water to the officer who had given them to me upon my arrival at Ft. Jackson. I may have had some liquor of my own with me and Bissell and I may have had a drink or two of Bourbon which I provided—I don't remember—but it is customary for me to drink one or two highballs after the day's work is over. Sometimes the day's work is not over until late at night, midnight or later, and then of course I don't drink, but I am sure I was sober all the time I was down there in camp with my headquarters battery and headquarters staff.

Gen. CLARKE. Was Bissell sober?

Gen. SPALDING. Yes. Bissell and I, in the course of three or four months that he was in my command, we would have a bottle of beer together or over at his quarters before supper have a bottle of beer or a highball. I loafed with him considerable, was with him a lot during duty hours, and never knew him to take a drink during duty and after retreat we would have a drink or two, but I never remember taking more than two. Bissell carries liquor very well and did not drink to excess.

Now about this occasion of my talking to Sadtler. It is natural that we talk about those things which worry us a little and Sadtler dropped into my house one evening at Ft. Bragg about August of 1943 and we talked for an hour or two there in my home. Col. Sadtler does not drink alcoholics, to my knowledge, and didn't there at my house. I knew that he was interested in Pearl Harbor and I told him of this incident of my talking with Bissell out there under the trees and [6] Bissell having told me that he had destroyed what I would call vital records which, if known, would be very unpleasant for the War Department. I don't remember that Bissell used those expressions but that is the impression which I got.

Gen. CLARKE. I got the impression from your statement that these messages were from secret operatives. Was that your impression?

Gen. SPALDING. No, they might have been either, but they were so hot that if Gen. Marshall had known about them it would have been very disagreeable for Gen. Marshall, but what the source of them was I don't remember that Bissell indicated it in any way whatever.

Col. GIBSON. You definitely understood, then, from him that this destruction was done on his own initiative and not at the suggestion of anyone else?

Gen. SPALDING. That is absolutely the impression I have.

Col. GIBSON. Have you ever heard from any other source of any of these Pearl Harbor records, the claim that they were destroyed?

Gen. SPALDING. No. Bissell was the only man who ever told me anything, that I remember. I hope it is clear in here that I wouldn't want anything I say to transgress the integrity of Mr. Stimson or

George Marshall. They are two of the finest men in the world and they would hew to the line I know.

TESTIMONY OF MAJ. GEN. RALPH C. SMITH

[1] Place: Room 2E780, The Pentagon.

Date: 18 July 1945.

Time: 10:05 a. m.

Present:

Maj. Gen. Ralph C. Smith.

Brig. Gen. Carter W. Clarke.

Col. E. W. Gibson.

Gen. CLARKE. Do you solemnly swear that the statements you make in this case will be the truth, so help you God?

Gen. SMITH. I do.

Gen. CLARKE. Are you familiar with your rights as a witness, self-incrimination?

Gen. SMITH. I am.

Gen. CLARKE. Will you state your name, rank, organization and station.

Gen. SMITH. Major General Ralph C. Smith. Presently Military Attache, Paris, France.

Gen. CLARKE. What were your duties in the three months preceding and approximately 3 months following the so-called Pearl Harbor incident?

Gen. SMITH. During the period specified and for something more than a year previous, I was Executive Officer of the Military Intelligence Division.

Gen. CLARKE. Under General Miles?

Gen. SMITH. Under General Sherman Miles, until his relief in December 1941. Thereafter I occupied the same position with respect to Brig. Gen. Raymond Lee.

Gen. CLARKE. You never were Executive Office under Gen. Strong?

Gen. SMITH. My recollection is that Gen. Strong was actually designated as G-2 after I left the G-2 Division. He was acting as G-2 for a week or so prior to my departure.

Gen. CLARKE. Will you state in a general way what your duties as Executive Officer were?

Gen. SMITH. As Executive Officer of the Military Intelligence Division I was charged primarily with responsibility for all administrative functions of the Division. As Executive Officer I was also head of the Administrative Branch. I conceived my mission to be to relieve the [21] G-2 from as much concern about the routine operation of his Division as possible. The Administrative Branch included matters such as finance, personnel, both military and civilian, allotment of office space (Which I may say parenthetically was a terrible headache at that time because we were being moved from one part of the Munitions Building to another). I also had charge of the filing system, the records room and the general procedure of handling records. The Translation Section was also included. Being charged primarily with administrative responsibilities, I did not have any direct responsibility in the intelligence chain. Because of my close relationship with the G-2, I was aware of a great deal that was going on in the intelligence and counter intelligence part of the

Division's work, but I did not have any direct responsibility for operating that. The chain of responsibility passed directly from G-2 to the heads of the Intelligence Branch, Counter Intelligence Branch and Plans and Training Branch.

Col. GIBSON. Were you aware of the existence at that time in 1941 of the so-called Magic material?

Gen. SMITH. I was. Of course, as you know, every effort was made to limit to the very minimum, persons who had contact with or even knowledge of the existence of Magic material. However, because of my position, I knew of course, of our work in the Signal Intelligence Service of intercept and I was aware of our success in breaking the Japanese codes. I knew that this material was being handled in the raw in the Far Eastern Section by Japanese experts and that the product of the code-breaking work was being distributed in locked leather pouches to the Chief of Staff, the Secretary of War, G-2 and later to the State Department and the White House.

Col. GIBSON. Will you state your recollection as to how this Magic material was handled between the period of 1 July 1941 and Pearl Harbor?

Gen. SMITH. The head of the Far Eastern Section, Col. Bratton, and his principal assistant, Col. Pettigrew, were the principal ones involved in handling this material. I knew that they had a great deal of contact with Gen. Miles, the head of G-2, on this material and I was generally cognizant of its nature and sometimes of its context, but I made no effort to pry into the exact nature of it because it did not concern my direct functions.

[3] Col. GIBSON. At some time did you read this material?

Gen. SMITH. Along in the late summer, as I recall it, Gen. Miles gave me a key to the Magic pouches. If I remember correctly, it was when he was absent on leave for a few days. For a period of several weeks or a month, approximately, I saw the pouches and read the contents of most of them. Later in the fall, it was about September, Gen. Miles told me that the Chief of Staff had expressed the desire to restrict to the absolute minimum persons having access to and knowledge of the Magic material. Therefore I returned to Gen. Miles the key to the pouches that I had and after that date I did not see any of the material, so far as I remember.

Col. GIBSON. Who delivered those pouches to Gen. Miles?

Gen. SMITH. As a matter of routine, Col. Bratton. Sometimes Col. Pettigrew. I do not recall their being handled by any other person.

Col. GIBSON. Was that delivery made daily?

Gen. SMITH. Yes.

Col. GIBSON. On occasions did you see Col. Bratton with several pouches in his possession?

Gen. SMITH. Yes. Col. Bratton would have several pouches because similar ones were being given to the Chief of Staff, to the best of my recollection. I believe that the same copy went from the Secretary of War's office to the Chief of Staff, and I know that there was a separate copy for G-2. Whether there was a third copy I am not certain.

Col. GIBSON. Is it your recollection that WPD had a pouch?

Gen. SMITH. Yes. I am certain that Gen. Gerow had access to the material because I remember some incidents through the fall when I made contact with Gen. Gerow and arranged a meeting with him for Gen. Miles and vice versa. I also know that the Navy was handling

the material because I remember there were conferences of Adm. Wilkinson with Gen. Miles and Gen. Gerow in the G-2 office.

Col. GIBSON. Is it your recollection that the State Department received a pouch?

[4] Gen. SMITH. Yes. A pouch went to the State Department, delivered there in person I believe by Col. Betts, who was the liaison officer with the State Department at that time. That I am a little hazy on, whether it was Col. Betts or Col. Bratton that took it over. And I know a pouch was taken to the White House on many days.

Col. GIBSON. Will you describe how the contents of the pouch looked when you saw them and about how many sheets might be in the pouch?

Gen. SMITH. The Magic pouches were leather brief cases, I believe, with a zipper opening and susceptible of being locked with a padlock. On removing the padlock and opening the zipper the material inside was contained in a loose-leaf red board cover. In the ones that I recollect seeing there were always from three to a dozen or 15 pages. They were always carbon copies of other messages.

Col. GIBSON. Did Gen. Miles destroy the contents or what happened to them?

Gen. SMITH. Gen. Miles would read the material, place it in the locked pouch and leave it on his desk and I would return it to Col. Bratton or Col. Pettigrew the next time they came up.

Col. GIBSON. Did you ever hear of a so-called Winds code message prior to Pearl Harbor?

Gen. SMITH. Not that I can recall.

Col. GIBSON. Were you in any conferences of G-2 immediately prior to Pearl Harbor or the month prior to Pearl Harbor where the question of Japan and its capabilities and intentions were discussed?

Gen. SMITH. I did not attend such conferences. I think I recall a meeting in Gen. Miles' office attended by Col. Kroner, Col. Bratton, Col. Pettigrew, Col. Betts and some of the other members of the Intelligence brain-trust. I did not participate in the conference but I knew it was being held.

Col. GIBSON. These estimates of the situation that were being prepared by the various intelligence branches during that period of time, did they come through your office?

Gen. SMITH. They came through my desk. The volume of business in my office was increasing in geometric proportions at [5] about that time. I tried to read those estimates insofar as I could because I wished to keep abreast of the general situation. However, many of them I was unable to touch; they would go over my desk to G-2 and out again.

Col. GIBSON. The Military Attache reports and observer reports that came in from the field did not cross your desk?

Gen. SMITH. They did not. They went directly from the mail room where they had a processing system that would get them with the minimum delay to the interested section in the Intelligence Branch. About the only thing that came to the front office would be the evaluations and estimates based on the Military Attaches' raw material. Sometimes I know, when a report would be of particular interest, it would be brought up and shown to Gen. Miles. I remember some particularly good reports by Gen. Lee's office in London and from the office in Germany.

Col. GIBSON. Were you informed prior to Pearl Harbor of the contents of the message that our Government had sent to the Imperial Government of Japan along in the latter part of November 1941?

Gen. SMITH. I recall vaguely that such a message was in existence, but I do not remember that I saw it in the course of my official duties.

Col. GIBSON. In early December 1941 were you preparing to leave the War Department?

Gen. SMITH. A list of senior colonels had been prepared by the G-1 Division with an indication of possible dates when they might be called for active combat duty with the new divisions that were being contemplated. I remember that my name was on that list, as well as the names of Col. Bratton, Col. Compton, Col. Pettigrew and several other officers. From other divisions of the General Staff I knew Col. Huebner, Col. Ridgeway and others were likewise on this list. The Chief of Infantry had arranged a special two-weeks' refresher course at Ft. Benning for the benefit of colonels who might be relieved from staff duty and assigned to active command in the next few months. My name and that of Col. Bratton were submitted for this course. Bratton's name was later removed because of conversations going on at the White House with the Japanese special envoy and the general tense nature of the Japanese situation. The course was actually planned to begin on the 8th of December. I remember distinctly that I left Washington on the train from the Union [6] Station for Atlanta about 6:00 p. m. December 6th. Ralph Huebner, Mat Ridgeway and several others were on the same train with me. I remember distinctly that we reached Ft. Benning soon after noon of December 7th. We were at the Officers' Club having luncheon when the announcement by radio of the attack on Pearl Harbor was received. A few hours after this, perhaps about 5:00 p. m., I received a telephone message from Gen. Omar Bradley, Commandant of the school, that Gen. Miles had called by phone and asked to have me return to Washington by the quickest available means. Gen. Bradley loaned me a car to drive to Atlanta, where I got a plan and reached Washington Monday morning. I must admit that because of this course and my preparations to leave, that happenings in the office on the morning of December 6 are quite hazy in my mind. My place during my absence was taken by the late Col. Roderick, my Assistant Executive Officer.

Col. GIBSON. In the immediate few days prior to Pearl Harbor, any messages that were sent out from G-2 to the Commanding Generals of the Philippines, Hawaii or Panama, would clear through your office?

Gen. SMITH. They would clear through my office. The volume of messages had reached a formidable proportion at this time and in order to clear them out in the evening, I had had an autograph rubber stamp prepared that was kept locked in my desk or in the desk of one of my assistants. Whenever a message came up properly authenticated with the initials of one of the Chiefs of Branches or Sections, this message would be cleared by one of my assistants without ever coming to my attention.

Col. GIBSON. As a matter of routine then, any message that came to your office at that time to be cabled to the field or sent to the field would be stamped by someone in your office and sent forward for dispatch provided that the Chief of a Branch had initiated the same?

Gen. SMITH. That is right. The functions of my office were to verify that the message had been properly coordinated within the G-2 Division prior to being sent. I assumed no responsibility for the actual context of the message except that it made sense. I had instructed my assistants to read through and see that the message was understandable to them and there were no obvious errors.

[7] Col. GIBSON. The wisdom or the propriety of sending such a message was not a duty of yours?

Gen. SMITH. No. I had no function on that score. I accepted any message that had the approval, as indicated by initials, of any Branch or Section Chief, and I had delegated that responsibility for approval to my assistants.

Col. GIBSON. In fact in your administrative duties, you were kept so busy that you didn't know enough of the intelligence situation to really pass sound judgment on these messages. Is that correct?

Gen. SMITH. I am sorry to say that that is an understatement, if anything. The office was a beehive of activity about this time.

Col. GIBSON. Were you aware of certain warning messages that were being sent out by G-2 to the field during the first week in December?

Gen. SMITH. As I have reflected on the events of that week in retrospect, I have a vague awareness that such messages were going out and there was a tense atmosphere in the office. I of course knew about the presence of the Japanese Ambassador and knew that the conferences were not going satisfactorily, but that is about the limit of my detailed knowledge.

Col. GIBSON. Any answers to these messages that were sent out in either the latter part of November or the first week of December, the answers being from Department Commanders, did you see?

Gen. SMITH. Not that I recollect. Our system of office procedure was such that the handling of such messages would be expedited to get them to the interested agency as quickly as possible. Outgoing messages did pass through my office. Incoming messages were handled directly from the Record Section to the interested agency.

Col. GIBSON. Do you ever recall seeing or knowing about a message from Gen. Short, the Commanding General in Hawaii, to G-2 in answer to a warning message that G-2 had sent out either the latter part of November or the first week of December?

Gen. SMITH. I have seen references to the message which I know you mean since, but I am certain that I had no knowledge of it prior to December 7.

[8] Col. GIBSON. After you returned from Ft. Benning on the morning of 8 December, then what were your duties?

Gen. SMITH. My duties continued unchanged as Executive Officer of the Division until approximately the end of March.

Col. GIBSON. Then from the 8th of December until the end of March you were in charge of the records of G-2?

Gen. SMITH. In a broad supervisory sense, yes.

Col. GIBSON. If any records were to be copied or destroyed or transferred to any other source, would you in the ordinary course of your duties have had to pass on it?

Gen. SMITH. I am certain that my subordinates would not have accepted any orders to tamper with the records, either in changing

them, removing them or destroying them without having reported the fact to me.

Col. GIBSON. At any time during your service in the War Department in 1941 and until you left in March 1942, to your knowledge were any of the records of G-2 destroyed?

Gen. SMITH. Categorically, no. The only recollection of any destruction of records that I have occurring during my administration was in the early part of my function as Executive Officer in 1941 when we were making an effort to collect out of the files and eliminate a lot of obsolete material dating back to World War I in order to conserve filing space. A considerable cleaning up of the Record Section was done in 1940 and 1941, as I recall it, in order to place with the National Archives material that should be kept of permanent record, and material of no permanent value was destroyed.

Col. GIBSON. After that time to your knowledge was any material of any type destroyed?

Gen. SMITH. I am very certain that no permanent records after January 1941, perhaps, were removed or destroyed.

Col. GIBSON. At any time did you ever receive any order from anyone after Pearl Harbor while you were in the War Department to destroy or have any records destroyed?

Gen. SMITH. I did not.

[9] . Col. GIBSON. Or held?

Gen. SMITH. I did not.

Col. GIBSON. Or tampered with?

Gen. SMITH. I did not.

Col. GIBSON. Or touched in any way, shape or manner?

Gen. SMITH. I did not.

Col. GIBSON. As far as you know, are the records of G-2 that pertain to Pearl Harbor for 1941 and up until March 1942 complete?

Gen. SMITH. To the best of my knowledge they are.

Col. GIBSON. Until you arrived at the War Department yesterday, did you ever hear of any story to the effect that some of the Pearl Harbor records or reports bearing on Pearl Harbor had been destroyed?

Gen. SMITH. I did not.

Col. GIBSON. Prior to yesterday had you ever heard any comments made that if certain records in G-2 became known or were made public that it would be very damning to the Secretary of War or the Chief of Staff?

Gen. SMITH. No I had never heard any such comment.

Col. GIBSON. Did you know Col. J. T. B. Bissell?

Gen. SMITH. I did.

Col. GIBSON. And was he on duty in the War Department in G-2 at the same time you were?

Gen. SMITH. Col. Bissell was, first, assistant to Col. Lester and later became Chief of Counter Intelligence Branch. He occupied that position, as I recall it, in December 1941.

Col. GIBSON. Now let me ask you this question. Did Col. Bissell, to your knowledge, ever destroy any records in G-2 in the War Department?

Gen. SMITH. He did not during my tenure of office; and I believe that if he had I would have known about it from my subordinates.

[10] Col. GIBSON. Let me ask you this. Did Col. Bissell ever tell you that he had destroyed some records dealing with Pearl Harbor?

Gen. SMITH. He did not.

Col. GIBSON. Had you ever heard, until yesterday, any story alleging that Col. Bissell had said he did destroy certain records?

Gen. SMITH. I had not.

Gen. CLARKE. Did you ever discuss any of the incidents leading up to Pearl Harbor with Col. Bissell?

Gen. SMITH. I have no recollection. It is true that we were both members of the G-2 Division for the 3 months following Pearl Harbor. It is possible that we may have discussed it in general terms but I have no specific recollection.

Gen. CLARKE. I would like to ask one question here. Do you know whether or not the Chief of the Counter Intelligence Group, Col. Bissell, had at his disposal all of the information and intelligence which was available to the Intelligence Group?

Gen. SMITH. I have a vague recollection that some point was brought up either shortly before Pearl Harbor or possibly afterward that some sources of Counter Intelligence data were in existence but not being exploited to the maximum. I think I can state as a certainty that the Counter Intelligence Branch did not receive the pouch containing the full Magic material. I do, however, have a vague recollection that the Far Eastern Branch had some contacts with the Counter Intelligence Branch on activities of Japanese agents in this country.

Gen. CLARKE. What about Japanese agents in Hawaii?

Gen. SMITH. I have no recollection on that specific score.

TESTIMONY OF BRIG. GEN. JOHN T. BISSELL

[1] Place: Room 2E780, The Pentagon.

Date: 4 August 1945, 3:10 p. m.

Present: Brig. Gen. John T. Bissell.

Col. E. W. Gibson.

Col. GIBSON. Gen. Bissell, Gen. Clarke has been directed by Gen. Marshall to reopen this Pearl Harbor investigation on the basis of the old order that he had here last September 9 when this investigation was commenced. I would like to remind you that you are still under oath. With reference to that I would like to reswear you in, in connection with this new investigation. Do you solemnly swear to tell the truth, the whole truth and nothing but the truth so help you God?

Gen. BISSELL. I do.

Col. GIBSON. You of course are aware of your rights?

Gen. BISSELL. I am.

Col. GIBSON. Will you please state your name, rank, position and organization.

Gen. BISSELL. John T. B. Bissell, Brigadier General, O8624. Headquarters 89th Division, Artillery, APO 89, c/o Postmaster, New York.

Col. GIBSON. You are here as a result of receiving cable orders to return here for purposes of this interrogation?

Gen. BISSELL. I am.

Col. GIBSON. Since your arrival here have you read the sworn testimony of Mr. Wm. F. Friedman of 13 July 45 before General Clarke

and myself, of Col. Otis K. Sadtler of 14 July 1945, and of Brig. Gen. Isaac Spaulding of 17 July 1945 pertaining to this Pearl Harbor matter?

Gen. BISSELL. I have.

Col. GIBSON. Did you also read a copy of the letter that Adm. Hewitt sent to Gen. Marshall calling Gen. Marshall's attention to certain testimony of this Mr. Wm. F. Friedman before Adm. Hewitt's board?

Gen. BISSELL. I did

[2] Col. GIBSON. Gen. Bissell, you testified previously on this matter in September 1944?

Gen. BISSELL. That is correct.

Col. GIBSON. And you have refreshed your memory by reading over that testimony?

Gen. BISSELL. I have.

Col. GIBSON. Do you know Brig. Gen. Isaac Spaulding?

Gen. BISSELL. I do.

Col. GIBSON. How long have you known him?

Gen. BISSELL. I reported to him in June of 1943 at Ft. Bragg, N. C. while he was in command of the 13th Field Artillery Brigade. I had just been ordered to take command of the 112th Field Artillery Group which was part of that Brigade.

Col. GIBSON. Had you known him before that?

Gen. BISSELL. I had not.

Col. GIBSON. How long did you serve under Gen. Spaulding at Ft. Bragg?

Gen. BISSELL. From about the 12th of June until some time in October. I was stationed with my Group at Camp Jackson, S. C.

Col. GIBSON. During this period of time did you have many occasions to converse with Gen. Spaulding?

Gen. BISSELL. I conversed with him frequently as he came down from Ft. Bragg about once a week.

Col. GIBSON. How far is Jackson from Ft. Bragg?

Gen. BISSELL. Roughly, 70 miles.

Col. GIBSON. So that he was stationed at Bragg and you were down at Jackson all of this time?

Gen. BISSELL. Yes.

Col. GIBSON. There did come a time when his Headquarters Battery did come down to Jackson for some training?

Gen. BISSELL. That is correct. It was in the latter part of July as I remember.

[3] Col. GIBSON. At some time in your acquaintance with Gen. Spaulding during those months in 1943 did he ask you about what G-2 knew about the Pearl Harbor attack?

Gen. BISSELL. Yes, he asked me several questions about it.

Col. GIBSON. Did he ask you that on more than one occasion?

Gen. BISSELL. I don't recall. I think he may have.

Col. GIBSON. Is there any particular occasion that you have in mind when he did talk with you at some length about it?

Gen. BISSELL. Yes, I recall his saying that he could not understand why the airplanes at Pearl Harbor had been lined up on the fields when conditions were as strained as they were.

Col. GIBSON. Where was that?

Gen. BISSELL. I think that was at Camp Jackson. It might possibly have been at Bragg, as I was up there several times.

Col. GIBSON. Do you remember conversing with him about Pearl Harbor when you were sitting together under some trees on the training grounds at Jackson?

Gen. BISSELL. I don't remember the incident. It may well have occurred there or somewhere else. I don't remember the details.

Col. GIBSON. Gen. Spalding has testified that, among other things, you told him that certain messages had been received, these messages pertaining to Pearl Harbor and were in the files of G-2 and that you deemed it most necessary to destroy them. Did you ever make such a statement?

Gen. BISSELL. No, I did not.

Col. GIBSON. I show you Gen. Spalding's testimony, pages 3, 4 and 5 of his testimony of last July, and ask if you will give your recollection of the talk you had with Gen. Spalding.

Gen. BISSELL. As I recall it, Gen. Spalding asked me a great many questions with reference to the Counter Intelligence operated by the Military Intelligence Service of which I had been the Chief. He was particularly interested in knowing about how we had placed agents, etc. I tried to avoid the issue as much as possible and give [4] no information that I thought should not be revealed. Following that, he discussed at some length the Pearl Harbor disaster and stated that he could not understand why G-2 had not been more alert and why the planes on the fields at Pearl Harbor had been assembled together. He asked me what I know about the matter and I told him that G-2 had been afraid of sabotage and that a message had been sent out to the Hawaiian Department alerting them to be on their guard against possible sabotage. He endeavored to draw me out and as it was a matter that was more or less closed, he asked me what I had personally done in the matter. I stated that I had been directed by the A. C. of S., G-2 to draft a message to the G-2, Hawaiian Department, and I believe possibly to some of the other Defense Commands and Panama to be prepared for possible sabotage on account of the very strained relations with which everyone in G-2 was familiar. He asked me further details of the matter and I stated, as I recall it, that I had stayed in the office one evening until about eight o'clock, at the direction of Gen. Miles, who was then the A. C. of S., G-2, and had prepared a message alerting the Hawaiian Department for possible sabotage and stressing the strained relations between the U. S. and Japan. I took the message in to Gen. Miles personally. He read the message and change it materially, stressing the sabotage angle more than I had. That message, as far as I know, was sent. The draft which I drew Gen. Miles destroyed as it was marked Secret.

Col. GIBSON. I show you a message, a Memorandum for the Adjutant General, dated 28 November 1941, subject: Warning to Corps Area and Overseas Commanders, signed Sherman Miles, and ask if that is a copy of the message that you refer to just now in your testimony as being the message which Gen. Miles drew and substituted for the message that you had prepared.

Gen. BISSELL. That is the message Gen. Miles drew in substitution for the one which I drafted.

Col. GIBSON. Is it your recollection that Gen. Spalding expressed to you his failure to understand why Sherman Miles and the Navy

had failed to discover that these Japanese vessels participating in the Pearl Harbor attack had left their home ports?

Gen. BISSELL. I don't recall that. He may have discussed it but I don't recall it.

[5] Col. GIBSON. Do you recollect Gen. Spaulding telling you that he believed that Mies was a stuffed shirt?

Gen. BISSELL. I think in the course of conversation he did state that he believed that Miles was a stuffed shirt?

Col. GIBSON. Did he tell you of his disgust that the radars on Hawaii weren't working because he knew when he left Hawaii in 1940 that they were being installed?

Gen. BISSELL. As far as I remember he never made any mention of radar.

Col. GIBSON. To your knowledge, while you were connected with G-2 were ever any records pertaining to Pearl Harbor or anything else destroyed?

Gen. BISSELL. Not as far as I know.

Col. GIBSON. And once a message was okeyed and sent it was kept?

Gen. BISSELL. It went to the file immediately.

Col. GIBSON. And no files were ever destroyed?

Gen. BISSELL. Not as far as I know.

Col. GIBSON. Did you ever hear of any being destroyed?

Gen. BISSELL. No, except in 1940 when we cleaned out the World War I excess material that had no value.

Col. GIBSON. Again to clarify the record, your job in G-2 in 1941 and 1942 was always connected with the Counter Intelligence work of G-2?

Gen. BISSELL. That is correct.

Col. GIBSON. You had nothing whatsoever to do with the signal intelligence?

Gen. BISSELL. I didn't until after Pearl Harbor.

Col. GIBSON. Prior to Pearl Harbor did you receive summaries of what you later found to be information based on signal intelligence?

Gen. BISSELL. Yes I did. I knew that the summaries which I got emanated from signal intelligence. They pertained principally to [6] suspected Japanese again in this country, in Panama, in Hawaii, and in Alaska.

Col. GIBSON. Shortly after Pearl Harbor you began to see such material in the raw pertaining to the matters you have just outlined?

Gen. BISSELL. A few days after Pearl Harbor I saw materially more of the signal intelligence material.

Col. GIBSON. Did you tell Gen. Spaulding at any time, in substance, that you had destroyed what you would call vital records, records which if known to exist would be very unpleasant to the War Department?

Gen. BISSELL. I did not.

Col. GIBSON. Did you ever tell him anything from which he might infer such?

Gen. BISSELL. No.

#943 (Part 1 of 2)* (To be handled in Government Code)

I had an interview with Rear Admiral TURNER. If I sum up what he told me, it is this:

"What the United States wants is not just a pretense but a definite promise. Should a conference of the leaders of the two governments be held without a definite preliminary agreement, and should, in the meantime, an advance be made into Siberia, the President would be placed in a terrible predicament. Japan speaks of peace in the Pacific and talks as if she can decide matters independently, and so it would seem to me that Japan could set aside most of her obligations toward the Three-Power Alliance. As to the question of withdrawing or stationing troops, since it is impossible to withdraw troops all at once, it would seem that a detailed agreement could be arranged between Japan and China for a gradual withdrawal."

He speculated on the various difficulties which Japan had to face internally. It seems that this opinion of his has also been given to the Secretary of State.

Although I have been requested by both the German and Italian Ambassadors in Tokyo to give them confidential information on the Japanese-American negotiations, I have, in consideration of the nature of the negotiations, been declining to do so. However, early this month, following the German attacks on American merchant ships and the consequent (revival?) of the movement for the revision of the Neutrality Act, the German authorities demanded that the Japanese Government submit to the American Government a message to the effect that the Japanese Government observes that if the ROOSEVELT Administration continues to attack the Axis Powers increasingly, a belligerent situation would inevitably arise between Germany and Italy on the one hand and the United States on the other, and this would provide the reasons for the convocation of the duties envisioned in the Three Power agreement and might lead Japan to join immediately the war in opposition to the United States. We have not, as yet, submitted this message because, in view of the Japanese-American negotiations, we found it necessary to consider carefully the proper timing as well as wording of the message. The German authorities have been repeatedly making the same request and there are reasons which do not permit this matter to be postponed any longer. While Japan on the one hand finds it necessary to do something in the way of carrying out the duties placed upon her by the Three Power Alliance she had

* For part 2 see S. I. S. #23516

concluded with Germany, on the other hand, she is desirous of making a success of the Japanese-American negotiations. Under the circumstances, we can do no other than to warn the United States at an appropriate moment in such words as are given in my separate wire and as would not affect the Japanese-American negotiations in one way or another. This message is a secret between me and you

(Separate wire)

The Imperial Japanese Government has repeatedly affirmed to the American Government that the aim of the Tripartite Pact is to contribute toward the prevention of a further extension of the European war. Should, however, the recent tension in the German-American relations suffer aggravation, there would arise a distinct danger of a war between the two powers, a state of affairs over which Japan, as a signatory to the Tripartite Pact, naturally cannot help entertain a deep concern. Accordingly, in its sincere desire that not only the German-American relations will cease further deterioration but the prevailing tension will also be alleviated as quickly as possible, the Japanese Government is now requesting the earnest consideration of the American Government.

ARMY 5901 23631 SECRET

From; Berlin.
To: Tokyo.
1 October 1941

#1198

On this the occasion of the first anniversary of the Tripartite Pact, Foreign Minister Ribbentrop has come to Berlin from the Imperial Headquarters especially and I have had several visits with him. Using this opportunity I, and the other members of the staff, have mingled with people from all classes of society and visited with them. I am endeavoring to sum up all these experiences and analyze the present state of feeling toward Japan held by Germany in this report to you.

1. Ribbentrop said that he had absolute proof that, while reports of the content of the Japanese-American negotiations were withheld from Ambassador Ott, America was in secret communication with England in regard to the Japanese-American negotiations. Even Ribbentrop who is supposed to understand Japan's position, expressed great dissatisfaction regarding Japan's attitude.

2. That the Foreign Office staff from Weizsacker down and also everyone in general were thoroughly disgusted with Japan was very apparent from their attitude toward myself and other members of the staff. Everyone who feels kindly disposed toward Japan is deeply concerned over this state of affairs. Even those who do not come to the same conclusion that Ambassador Ott did in his telegram are outspoken in their dissatisfaction and expression of pessimistic views. I am trying to take the position in interviews with newspaper correspondents and others concerned with the outside that Germany is cognizant of the Japanese-American negotiations and that they are no indication of an alienation between Japan and Germany.

3. Foreign diplomats and newspaper correspondents of third countries show great interest in the Japanese attitude and seem to consider it in a certain sense as a barometer by which the course of the European war can be judged. However we receive the impression that the greater number feel that Japan is avoiding war because of the impoverishment resulting from the China incident and is taking a pessimistic attitude toward the course of the European war.

4. Even though it might be said that Germany is prepared for these machinations of estrangement by third countries and that she is keeping up the pretence that there is no change in her feelings toward Japan, the fact that the feeling of German leaders and the people in general toward Japan is getting bad is one that cannot be covered. Please bear this fact in mind. If Japan takes a wishy-washy attitude and goes ahead with her negotiations without consulting Germany there is no telling what steps Germany may take without consulting Japan.

Please convey this to the army and navy.

Relayed to Rome.

I have already wired you something about my present psychology. I am sure that I, too, should go out with the former cabinet. I know that for some time the Secretary of State has known how sincere your humble servant is, yet how little influence I have in Japan. I am ashamed to say that it has come to my ears that this is the case. There are some Americans who trust this poor novice and who say that things will get better for me, but, alas, their encouragement is not enough. Among my conferees here in the United States there are also some who feel the same way, but, alas, they are all poor deluded souls. As for Your Excellency's instructions, WAKASUGI can carry them out fully. Nor do I imagine that you all have any objection. I don't want to be the bones of a dead horse. I don't want to continue this hypocritical existence, deceiving other people. No, don't think I am trying to flee from the field of battle, but as a man of honor this is the only way that is open for me to tread. Please send me your permission to return to Japan. Most humbly do I beseech your forgiveness if I have injured your dignity and I prostrate myself before you in the depth of my rudeness.

(Of utmost secrecy)

Because of various circumstances, it is absolutely necessary that all arrangements for the signing of this agreement be completed by the 25th of this month. I realize that this is a difficult order, but under the circumstances it is an unavoidable one. Please understand this thoroughly and tackle the problem of saving the Japanese-U. S. relations from falling into a chaotic condition. Do so with great determination and with unstinted effort, I beg of you.

This information is to be kept strictly to yourself only.

JD-1:6254 SECRET (D) Navy Trans. 11-5-41 (S-TT)

From: Washington (Nomura)
To: Tokyo

1. I sent MOORE* to contact Senator THOMAS of the Senate Foreign Relations Committee and HULL. His report reads as follows:

"The United States is not bluffing. If Japan invades again, the United States will fight with Japan. Psychologically the American people are ready. The Navy is prepared and ready for action."

2. Yesterday evening, Sunday, a certain Cabinet member, discarding all quibbling, began by saying to me:

"You are indeed a dear friend of mine and I tell this to you alone." Then he continued: "The American Government is receiving a number of reliable reports that Japan will be on the move soon. The American Government does not believe that your visit on Monday to the President or the coming of Mr. KURUSU will have any effect on the general situation."

I took pains to explain in detail how impatient the Japanese have grown since the freezing; how they are eager for a quick understanding; how both the Government and the people do not desire a Japanese-American war; and how we will hope for peace until the end.

[2] He replied, however:

"Well, our boss, the President, believes those reports and so does the Secretary of State."

24655 ARMY Trans. 11/12/41 (2)

* Frederick Moore—Legal Adviser to the Japanese Embassy in Washington.

(Part 2 of 2)

In the newspapers and magazines, with the exception of the Daily News and the Hearst Papers, it is reported that the Americans are much more eager for a war with Japan than they are for one with Germany. It is said that some of the British are using this inclination for their own advantage and that already parleys have been started for joint Anglo-American action. Suggestions have already been made to the effect that it is necessary for some of the British fleet to be located in the Pacific. Now even if the President and other statesmen do not follow this trend, who can say how it will be? The friend I just spoke of told me that the United States cannot stop now because if Japan moves something will have to be done since it is a question of the United States saving its face.

3. Well, in any case, I am going to see the President today and talk with him on the bases of your instructions. You may be sure that I will do my very best.

#1180. (Part 1 of 2)

From Nomura and Kurusu.

As we have wired you several times, there is hardly any possibility of having them consider our "B" proposal in toto. On the other hand, if we let the situation remain tense as it is now, sorry as we are to say so, the negotiations will inevitably be ruptured, if indeed they may not already be called so. Our failure and humiliation are complete. We might suggest one thing for saving the situation. Although we have grave misgivings, we might propose, first, that President ROOSEVELT wire you that for the sake of posterity he hopes that Japan and the United States will cooperate for the maintenance of peace in the Pacific (just as soon as you wire us what you think of this, we will negotiate for this sort of an arrangement with all we have in us), and that you in return reply with a cordial message, thereby not only clearing the atmosphere, but also gaining a little time. Considering the possibility that England and the United States are scheming to bring the Netherlands Indies under their protection through military occupation, in order to forestall this, I think we should propose the establishment of neutral nations, including French Indo-China, Netherlands India and Thai. (As you know, last September President ROOSEVELT proposed the neutrality of French Indo-China and Thai.)

(Part 2 of 2)

We suppose that the rupture of the present negotiations does not necessarily mean war between Japan and the United States, but after we break off, as we said, the military occupation of Netherlands India is to be expected of England and the United States. Then we would attack them and a clash with them would be inevitable. Now, the question is whether or not Germany would feel duty bound by the third article of the treaty to help us. We doubt if she would. Again, you must remember that the Sino-Japanese incident would have to wait until the end of this world war before it could possibly be settled.

In this telegram we are expressing the last personal opinions we will have to express, so will Your Excellency please be good enough at least to show it to the Minister of the Navy, if only to him; then we hope that you will wire us back instantly.

Purple. (Extremely urgent)

#1189. (Part 1 of 2)

At 4:45 on the afternoon of the 26th I and Ambassador KURUSU met with Secretary Hull and we talked for about two hours.

HULL said, "For the last several days the American Government has been getting the ideas of various quarters, as well as conferring carefully with the nations concerned, on the provisional treaty proposal presented by Japan on the 20th of this month, and I am sorry to tell you that we cannot agree to it. At length, however, we feel compelled to propose a plan, tentative and without commitment, reconciling the points of difference between our proposal of June 21st and yours of September 25th." So saying, he presented us with the following two proposals:

A. One which seeks our recognition of his so-called "four principles."

B. (1) The conclusion of a mutual non-aggression treaty between Tokyo, Washington, Moscow, the Netherlands, Chungking and Bangkok.

(2) Agreement between Japan, the United States, England, the Netherlands, China and Thai on the inviolability of French Indo-China and equality of economic treatment in French Indo-China.

(3) The complete evacuation of Japanese forces from China and all French Indo-China.

[2] (4) Japan and the United States both definitely promise to support no regime in China but that of CHIANG KAI SHEK.

(5) The abolition of extra-territoriality and concessions in China.

25441 ARMY Trans. 11-28-41 (1)

[1]

(Part 2 of 2)

(6) The conclusion of a reciprocal trade treaty between Japan and the United States on the basis of most favored nation treatment.

(7) The mutual rescinding of the Japanese and American freezing orders.

(8) Stabilization of yen-dollar exchange.

(9) No matter what sort of treaties either Japan or the United States has contracted with third countries, they both definitely promise that these treaties will not be interpreted as hostile to the objective of this treaty or to the maintenance of peace in the Pacific. (This is, of course, supposed to emasculate the Three-Power Pact.)

In view of our negotiations all along, we were both dumb-founded and said we could not even cooperate to the extent of reporting this to Tokyo. We argued back furiously, but HULL remained solid as a rock. Why did the United States have to propose such hard terms as these? Well, England, the Netherlands and China doubtless put her up to it. Then, too, we have been urging them to quit helping CHIANG, and lately a number of important Japanese in speeches have been urging that we strike at England and the United States. Moreover, there have been rumors that we are demanding of Thai that she give us complete [2] control over her national defense. All that is reflected in these two hard proposals, or we think so.

#844.

Re your #1189^a.

Well, you two Ambassadors have exerted superhuman efforts but, in spite of this, the United States has gone ahead and presented this humiliating proposal. This was quite unexpected and extremely regrettable. The Imperial Government can by no means use it as a basis for negotiations. Therefore, with a report of the views of the Imperial Government on this American proposal which I will send you in two or three days, the negotiations will be de facto ruptured. This is inevitable. However, I do not wish you to give the impression that the negotiations are broken off. Merely say to them that you are awaiting instructions and that, although the opinions of your Government are not yet clear to you, to your own way of thinking the Imperial Government has always made just claims and has borne great sacrifices for the sake of peace in the Pacific. Say that we have always demonstrated a long-suffering and conciliatory attitude, but that, on the other hand, the United States has been unbending, making it impossible for Japan to establish negotiations. Since things have come to this pass, I contacted the man you told me to in your #1180^b and he said that under the present circumstances what you suggest is entirely unsuitable. From now on do the best you can.

Re my #844*

We wish you would make one more attempt verbally along the following lines:
The United States government has (always ?) taken a fair and judicial position and has formulated its policies after full consideration of the claims of both sides.

However, the Imperial Government is at a loss to understand why it has now taken the attitude that the new proposals we have made cannot be made the basis of discussion, but instead has made new proposals which ignore actual conditions in East Asia and would greatly injure the prestige of the Imperial Government.

With such a change of front in their attitude toward the China problem, what has become of the basic objectives that the U. S. government has made the basis of our negotiations during these seven months? On these points we would request careful self-reflection on the part of the United States government.

(In carrying out this instruction, please be careful that this does not lead to anything like a breaking off of negotiations.)

SIS 25496 JD-1: 6921 SECRET (F) Navy trans. 30 Nov. 1941 (S-TT)

*JD-1: 6898 (SIS 25445) dated 28 Nov., in which Tokyo's first reaction to the new U. S. proposals castigates them as humiliating. When Japan sends a reply in 2 or 3 days giving its views on them the negotiations will be "de facto" ruptured. However, do not give the impression that negotiations are broken off.

(NOTE: Following is a preliminary, condensed version of conversation between Ambassador Kurusu and the Japanese Foreign Office American Division Chief Yamamoto on Sunday night)

Kurusu: "It is all arranged for us to meet Hull tomorrow. We received a short one from you, didn't we? Well, we will meet him in regard to that. There

is a longer one coming isn't there? In any case we are going to see him about the short one." (i. e. telegram. The longer one is probably Tokyo's reply to Mr. Hull's proposals.)

Yamamoto: "Yes. I see."

Kurusu: "The President is returning tomorrow. He is hurrying home."

Y: "Is there any special significance to this?"

K: "The newspapers have made much of the Premier's speech, and it is having strong repercussions here."

Y: "Is that so?"

K: "Yes. It was a drastic statement he made. The newspapers carried large headlines over it; and the President seems to be returning because of it. There no doubt are other reasons, but this is the reason the newspapers are giving."

(Pause)

"Unless greater caution is exercised in speeches by the Premier and others, it puts us in a very difficult position. All of you over there must watch out about these ill-advised statements. Please tell Mr. Tani."

Y: "We are being careful."

K: "We here are doing our best, but these reports are seized upon by the correspondents and the worst features enlarged upon. Please caution the Premier, the Foreign Minister, and others. Tell the Foreign Minister that we had expected to hear something different, some good word, but instead we get this." (i. e. Premier's speech)

(After a pause, Kurusu continues, using voice code)

K: "What about the internal situation?" (In Japan)

Y: "No particular—(one or two words faded out)—"

K: "Are the Japanese-American negotiations to continue?"

Y: "Yes."

K: "You were very urgent about them before, weren't you; but now you want them to stretch out. We will need your help. Both the Premier and the Foreign Minister will need to change the tone of their speeches! ! ! Do you understand? Please, all use more discretion."

Y: "When will you see them. The 2nd?"

K: "Let's see . . . this is Sunday midnight here. Tomorrow morning at ten. That will be Monday morning here."

(Pause)

"Actually the real problem we are up against is the effects of happenings in the South. You understand don't you?"

Y: "Yes. Yes. How long will it be before the President gets back?"

K: "I don't know exactly. According to news reports he started at 4:00 this afternoon. He should be here tomorrow morning sometime."

Y: "Well then—Goodbye."

Re my #1190*.

So far silence has been maintained here concerning our talks with the United States; however, now the results of our conference of the 26th are out and headlines like this are appearing in the papers: "Hull Hands Peace Plan to Japanese," and "America Scorns a Second Munich." The papers say that is up to Japan either to accept the American proposal with its four principles, or face war, in which latter case the responsibility would be upon Japan.

This we must carefully note.

ARMY 25548 Trans. 12-1-41 (2)

* S. I. S. #25444 and #25480 in which NOMURA expresses the danger of the responsibility for the rupture of negotiations being cast upon Japan should Japan enter into her scheduled operations during the course of the negotiations. He suggests that the negotiations be irrevocably concluded either through an announcement to the American Embassy in Tokyo or by a declaration for internal and external consumption.

#986 (Strictly Secret) (To be handled in Government Code) (Part 1 of 2) (Secret outside the Department)

1. Japan-American negotiations were commenced the middle of April of this year. Over a period of half a year they have been continued. Within that period the Imperial Government adamantly stuck to the Tri-Partite Alliance as the cornerstone of its national policy regardless of the vicissitudes of the international situation. In the adjustment of diplomatic relations between Japan and the United States, she has based her hopes for a solution definitely within the scope of that alliance. With the intent of restraining the United States from participating in the war, she boldly assumed the attitude of carrying through these negotiations.

2. Therefore, the present cabinet, in line with your message, with the view of defending the Empire's existence and integrity on a just and equitable basis, has continued the negotiations carried on in the past. However, their views and ours on the question of the evacuation of troops upon which the negotiations rested (they demanded the evacuation of Imperial troops from China and French Indo-China), were completely in opposition to each other.

Judging from the course of the negotiations that have been going on, we first came to loggerheads when the United States, in keeping with its traditional ideological tendency of managing international relations, re-emphasized her fundamental reliance upon this traditional policy in the conversations carried on between the United States and England in the Atlantic Ocean. The motive of the United States in all this was brought out by her desire to prevent the establishment of a new order by Japan, Germany, and Italy in Europe and in the Far East, that is to say, the aims of the Tri-Partite Alliance. As long as the Empire of Japan was in alliance with Germany and Italy, there could be no maintenance of friendly relations between Japan and the United States was the stand they took. From this point of view, they began to demonstrate a tendency to demand the divorce of the Imperial Government from the Tri-Partite Alliance. This was brought out at the last meeting. That is to say that it has only been in the negotiations of the last few days that it has become gradually more and more clear that the Imperial Government could no longer continue negotiations with the United States. It became clear, too, that a continuation of negotiations would inevitably be detrimental to our cause.

[2]

(Part 2 of 2)

3. The proposal presented by the United States on the 28th made this attitude of theirs clearer than ever. In it there is one insulting clause which says that no matter what treaty either party enters into with a third power it will not be interpreted as having any bearing upon the basic object of this treaty, namely the maintenance of peace in the Pacific. This means specifically the Three-Power Pact. It means that in case the United States enters the European war at any time the Japanese Empire will not be allowed to give assistance to Germany and Italy. It is clearly a trick. This clause alone, let alone others, makes it impossible to find any basis in the American proposal for negotiations. What is more, before the United States brought forth this plan, they conferred with England, Australia, the Netherlands, and China—they do so repeatedly. Therefore, it is clear that the United States is now in collusion with those nations and has decided to regard Japan, along with Germany and Italy, as an enemy.

(Part 1 of 2)

Re my #1231.

Today, the 2nd Ambassador KURUSU and I had an interview with Under-Secretary of State WELLES. At that time, prefacing his statement by saying that it was at the direct instruction of the President of the United States, he turned over to us the substance of my separate wire #1233.* Thereupon we said: "Since we haven't been informed even to the slightest degree concerning the troops in French Indo-China, we will transmit the gist of your representations directly to our Home Government. In all probability they never considered that such a thing as this could possibly be an upshot of their proposals of November 20th." The Under-Secretary then said: "I want you to know that the stand the United States takes is that she opposes aggression in any and all parts of the world." Thereupon we replied: "The United States and other countries have pyramided economic pressure upon economic pressure upon us Japanese. (I made that statement that economic warfare was even worse than forceful aggression.) We haven't the time to argue the pros and cons of this question or the rights and wrongs. The people of Japan are faced with economic pressure, and I want you to know that we have but the choice between

* Not available.

submission to this pressure or breaking the chains that it invokes. *We want you to realize this as well as the situation in which all Japanese find themselves as the result of the four-year incident in China; the President recently expressed cognizance of the latter situation.

25650-B Trans. 12/3/41

*Original translation incomplete from this point on.

(Part 2 of 2)

[1] Furthermore, I would have you know that in replying to the recent American proposals, the Imperial Government is giving the most profound consideration to this important question which has to do with our national destiny." Under-Secretary of State WELLES said: "I am well aware of that." I continued: "We cannot overemphasize the fact that, insofar as Japan is concerned, it is virtually impossible for her to accept the new American proposals as they now stand. Our proposals proffered on the 21st of June and the proposals of September 25th, representing our greatest conciliations based on the previous proposal, still stand. In spite of the fact that the agreement of both sides was in the offing, it has come to naught. At this late juncture to give thoughtful consideration to the new proposals certainly will not make for a smooth and speedy settlement of the negotiations. Recently, we promised to evacuate our troops from French Indo-China in the event of a settlement of the Sino-Japanese incident and the establishment of a just peace in the Far East. In anticipating the settlement of fundamental questions the question of the representations of this date would naturally dissolve." The Under-Secretary assiduously heard us out and then said: "The American proposals of the 26th were brought about by the necessity to clarify the position of the United States because of the internal situation here."

25660 ARMY

[2] Then he continued: "In regard to the opinions that you have expressed, I will make it a point immediately to confer with the Secretary."

I got the impression from the manner in which he spoke that he hoped Japan in her reply to the American proposals of the 26th would leave this much room.

Judging by my interview with Secretary of State HULL on the 1st and my conversations of today, it is clear that the United States, too, is anxious to peacefully conclude the current difficult situation. I am convinced that they would like to bring about a speedy settlement. Therefore, please bear well in mind this fact in your considerations of our reply to the new American proposals and to my separate wire #1233.*

(Message having the indicator 20803* is part one of three.)

For this reason CHA has been the target of considerable attack and dissatisfaction. It was admitted that he was in a very tight spot. As the President recently said, it is clearly understood that the people of Japan, after over four years of the Japanese-Chinese incident, are very tense.

Japan, too, is highly desirous of having peace on the Pacific assured by successfully concluding these negotiations. It is our hope that he would give his support and encouragement to the efforts that Hull and we are making in this direction.

With regard to the matters pertaining to French Indo-China ----- the government of the United States, too, cannot help but feel concern since it has been receiving report after report during the past few days, from U. S. officials stationed in that area, of unusual movements of the Japanese army and navy; the landing

*Not available, probably is Part 1 of this message.

of various types of arms; and the movements of transport vessels. Concern is felt as to the goal of all these activities (the implication was they feared that they were going to be used not only against Thailand but in the southwestern Pacific area).

As to what plans the responsible persons in the Japanese army and navy are planning are not difficult to guess if one goes on the assumption that the Japanese army and navy joins forces with the Germans; even if, in actuality, that is not what is taking place, preparations must be made for this possible eventuality, and all nations concerned must concentrate their fighting forces in that area.

Chief of Office routing.
Re your #1232*

Please explain the matter to the United States along the following lines:

There seems to be rumors to the effect that our military garrisons in French Indo-China are being strengthened. The fact is that recently there has been an unusual amount of activity by the Chinese forces in the vicinity of the Sino-French Indo-China border. In view of this, we have increased our forces in parts of northern French Indo-China. There would naturally be some movement of troops in the southern part as a result of this. We presume that the source of the rumors is in the exaggerated reports of these movements. In doing so, we have in no way violated the limitations contained in the Japanese-French joint defense agreement.

#1227

Indications are that the United States desires to continue the negotiations even if it is necessary to go beyond their stands on the so-called basic principles. However, if we keep quibbling on the critical points, and continue to get stuck in the middle as we have been in the past, it is impossible to expect any further developments. If it is impossible from the broad political viewpoint, to conduct a leaders' meeting at this time, would it not be possible to arrange a conference between persons in whom the leaders have complete confidence, (for example, Vice President Wallace or Hopkins from the United States and the former Premier Konoye, who is on friendly terms with the President, or Adviser to the Imperial Privy Council Ishii). The meeting could be arranged for some midway point, such as Honolulu. High army and navy officers should accompany these representatives. Have them make one final effort to reach some agreement, using as the basis of their discussions the latest proposals submitted by each.

We feel that this last effort may facilitate the final decision as to war or peace.

We realize of course that an attempt to have President Roosevelt and former Premier Konoye meet, failed. Bearing in mind the reaction to that in our nation, it may be to our interest to first ascertain the U.S. attitude on this possibility. Moreover, since we have no guarantee either of success or failure of the objectives even if the meeting is held, careful consideration should first be given this matter.

We feel, however, that to surmount the crisis with which we are face to face, it is not wasting our efforts to pursue every path open to us. It is our opinion that it would be most effective to feel out and ascertain the U.S. attitude regarding this matter, in the name of the Japanese Government. However, if this procedure

does not seem practical to you in view of some internal condition, then how would it be if I were to bring up the subject as purely of my own origin and in that manner feel out their attitude. Then, if they seem receptive to it the government could make the official proposal.

Please advise me of your opinions on this matter.

I knew that to leave that error in the publication of this speech as it now stands would have a bad effect on negotiations, so on the morning of the 2nd prior to my interview with WELLES I sent TERAZAKI to visit BALLANTINE at the State Department to explain the substance of your #862. BALLANTINE said, "At this tense psychological moment in Japanese-American negotiations, the fact that such a strong statement as this has been circulated has given a severe shock to the American Government and people and it is very unfortunate and dangerous." TERAZAKI replied, "Well, as it was the American newspapers that made such a clamor about it, I did not come to vindicate ourselves or make any explanation. I merely wished to state the facts." He added, "At present the newspaper of both countries ought both to be cool and calm, so will you please advise them hereafter concerning this point."

#902 (Part 1 of 14)

Separate telegram
Memorandum

1. The Government of Japan, prompted by a genuine desire to come to an amicable understanding with the Government of the United States in order that the two countries by their joint efforts may secure the peace of the Pacific area and thereby contribute toward the realization of world peace, has continued negotiations with the utmost sincerity since April last with the Government of the United States regarding the adjustment and advancement of Japanese-American relations and the stabilization of the Pacific area.

The Japanese Government has the honor to state frankly its views concerning the claims the American Government has persistently maintained as well as the measures the United States and Great Britain have taken toward Japan during these eight months.

2. It is the immutable policy of the Japanese Government to insure the stability of East Asia and to promote world peace, and thereby to enable all nations to find each BOAMPYQBR place in the world.

Ever since the China Affair broke out owing to the failure on the part of China to comprehend Japan's true intentions, the Japanese Government has striven for the restoration of peace and it has consistently exerted its best effort to prevent the extension of war-like disturbances. It was also to that end that in September last year Japan concluded the Tri Partite Pact with Germany and Italy.

(Part 2 of 14)

However, both the United States and Great Britain have resorted to every possible measure to assist the Chungking regime so as to obstruct the establishment of a general peace between Japan and China, interfering with Japan's constructive endeavours toward the stabilization of East Asia, exerting pressure on The Netherlands East Indies, or menacing French Indo-China, they have attempted to frustrate Japan's aspiration to realize the ideal of common prosperity in cooperation with these regions. Furthermore, when Japan in accordance with its protocol with France took measures of joint defense of French Indo-China, both American and British governments, wilfully misinterpreted it as a threat to their own possession and inducing the Netherlands government to follow suit, they enforced the assets freezing order, thus severing economic relations with Japan. While manifesting thus an obviously hostile attitude, these countries have strengthened their military preparations perfecting an encirclement of Japan, and have brought about a situation which endangers the very existence of the empire.

(Part 3 of 14)

Nevertheless, facilitate a speedy settlement, the Premier of Japan proposed, in August last, to meet the President of the United States for a discussion of important problems between the two countries covering the entire Pacific area. However, while accepting in principle the Japanese proposal, insisted that the meeting should take place after an agreement of view had been reached on

fundamental—(75 letters garbled)—The Japanese government submitted a proposal based on the formula proposed by the American government, taking fully into consideration past American claims and also incorporating Japanese views. Repeated discussions proved of no avail in producing readily an agreement of view. The present cabinet, therefore, submitted a revised proposal, moderating still further the Japanese claims regarding the principal points of difficulty in the negotiation and endeavoured strenuously to reach a settlement. But the American government, adhering steadfastly to its original proposal, failed to display in the slightest degree a spirit of conciliation. The negotiation made no progress.

(Part 4 of 14)

Thereupon, the Japanese Government, with a view to doing its utmost for averting a crisis in Japanese-American relations, submitted on November 20th still another proposal in order to arrive at an equitable solution of the more essential and urgent questions which, simplifying its previous proposal, stipulated the following points:

(1) The Governments of Japan and the United States undertake not to dispatch armed forces into any of the regions, excepting French Indo-China, in the Southeastern Asia and the Southern Pacific area.

(2) Both Governments shall cooperate with a view to securing the acquisition in the Netherlands East Indies of those goods and commodities of which the two countries are in need.

(3) Both Governments mutually undertake to restore commercial relations to those prevailing prior to the freezing of assets.

The Government of the United States shall supply Japan the required quantity of oil.

(4) The Government of the United States undertakes not to resort to measures and actions prejudicial to the endeavours for the restoration of general peace between Japan and China.

(5) The Japanese Government undertakes to withdraw troops now stationed in French Indo-China upon either the restoration of peace between Japan and China or the establishment of an equitable peace in the Pacific area; and it is prepared to remove the Japanese troops in the southern part of French Indo-China to the northern part upon the conclusion of the present agreement.

(Part 5 of 14)

As regards China, the Japanese Government, while expressing its readiness to accept the offer of the President of the United States to act as "Introducer" of peace between Japan and China as was previously suggested, asked for an undertaking on the part of the United States to do nothing prejudicial to the restoration of Sino-Japanese peace when the two parties have commenced direct negotiations.

The American government not only rejected the above-mentioned new proposal, but made known its intention to continue its aid to Chiang Kai-Shek; and in spite of its suggestion mentioned above, withdrew the offer of the President to act as the so-called "Introducer" of peace between Japan and China, pleading that time was not yet ripe for it. Finally, on November 26th, in an attitude to impose upon the Japanese government those principles it has persistently maintained, the American government made a proposal totally ignoring Japanese claims, which is a source of profound regret to the Japanese Government.

(Part 6 of 14)

4. From the beginning of the present negotiation the Japanese Government has always maintained an attitude of fairness and moderation, and did its best to reach a settlement, for which it made all possible concessions often in spite of great difficulties.

As for the China question which constituted an important subject of the negotiation, the Japanese Government showed a most conciliatory attitude.

As for the principle of Non-Discrimination in International Commerce, advocated by the American Government, the Japanese Government expressed its desire to see the said principle applied throughout the world, and declared that along with the actual practice of this principle in the world, the Japanese Government would endeavour to apply the same in the Pacific area, including China, and made it clear that Japan had no intention of excluding from China economic activities of third powers pursued on an equitable basis.

Furthermore, as regards the question of withdrawing troops from French Indo-China, the Japanese government even volunteered, as mentioned above, to carry out an immediate evacuation of troops from Southern French Indo-China as a measure of easing the situation.

(Part 7 of 14)

It is presumed that the spirit of conciliation exhibited to the utmost degree by the Japanese Government in all these matters is fully appreciated by the American government.

On the other hand, the American government, always holding fast to theories in disregard of realities, and refusing to yield an inch on its impractical principles, caused undue delays in the negotiation. It is difficult to understand this attitude of the American government and the Japanese government desires to call the attention of the American government especially to the following points:

1. The American government advocates in the name of world peace those principles favorable to it and urges upon the Japanese government the acceptance thereof. The peace of the world may be brought about only by discovering a mutually acceptable formula through recognition of the reality of the situation and mutual appreciation of one another's position. An attitude such as ignores realities and imposes one's selfish views upon others will scarcely serve the purpose of facilitating the consummation of negotiations.

(Part 8 of 14)

Of the various principles put forward by the American government as a basis of the Japanese-American agreement, there are some which the Japanese government is ready to accept in principle, but in view of the world's actual conditions, it seems only a Utopian ideal, on the part of the American government, to attempt to force their immediate adoption.

Again, the proposal to conclude a multilateral non-aggression pact between Japan, the United States, Great Britain, China, the Soviet Union, The Netherlands, and Thailand, which is patterned after the old concept of collective security, is far removed from the realities of East Asia.

(2) The American proposal contains a stipulation which states: "Both governments will agree that no agreement, which either has concluded with any third powers, shall be interpreted by it in such a way as to conflict with the fundamental purpose of this agreement, the establishment and preservation of peace throughout the Pacific area." It is presumed that the above provision has been proposed with a view to restrain Japan from fulfilling its obligations under the Tripartite Pact when the United States participates in the war in Europe, and, as such, it cannot be accepted by the Japanese Government.

(Part 9 of 14)

The American Government, obsessed with its own views and opinions, may be said to be scheming for the extension of the war. While it seeks, on the one hand, to secure its rear by stabilizing the Pacific area, it is engaged, on the other hand, in aiding Great Britain and preparing to attack, in the name of self-defense, Germany and Italy two powers that are striving to establish a new order in Europe. Such a policy is totally at variance with the many principles upon which the American Government proposes to found the stability of the Pacific area through peaceful means.

3. Where as the American Government, under the principles it rigidly upholds, objects to settling international issues through military pressure, it is exercising in conjunction with Great Britain and other nations pressure by economic power. Recourse to such pressure as a means of dealing with international relations should be condemned as it is at times more inhuman than military pressure.

(Part 10 of 14)

4. It is impossible not to reach the conclusion that the American Government desires to maintain and strengthen, in collusion with Great Britain and other powers, its dominant position it has hitherto occupied not only in China but in other areas of East Asia. It is a fact of history that one country--- (45 letters garbled or missing)---been compelled to observe the status quo under the Anglo-American policy of imperialistic exploitation and to sacrifice the ---es to the prosperity of the two nations. The Japanese Government cannot tolerate

the perpetuation of such a situation since it directly runs counter to Japan's fundamental policy to enable all nations to enjoy each its proper place in the world.

(Part 11 of 14)

The stipulation proposed by the American Government relative to French Indo-China is a good exemplification of the above-mentioned American policy. That the six countries,—Japan, the United States, Great Britain, The Netherlands, China and Thailand,—excepting France, should undertake among themselves to respect the territorial integrity and sovereignty of French Indo-China and equality of treatment in trade and commerce would be tantamount to placing that territory under the joint guarantee of the governments of those six countries. Apart from the fact that such a proposal totally ignores the position of France, it is unacceptable to the Japanese government in that such an arrangement cannot but be considered as an extension to French Indo-China of a system similar to the n—(50 letters missed)—sible for the present predicament of East Asia.

(Part 12 of 14)

5. All the items demanded of Japan by the American government regarding China such as wholesale evacuation of troops or unconditional application of the principle of Non-Discrimination in International Commerce ignore the actual conditions of China, and are calculated to destroy Japan's position as the stabilizing factor of East Asia. The attitude of the American government in demanding Japan not to support militarily, politically or economically any regime other than the regime at Chungking, disregarding thereby the existence of the Nanking government, shatters the very basis of the present negotiation. This demand of the American government falling, as it does, in line with its above-mentioned refusal to cease from aiding the Chungking regime, demonstrates clearly the intention of the American government to obstruct the restoration of normal relations between Japan and China and the return of peace to East Asia.

(Part 13 of 14)

5. In brief, the American proposal contains certain acceptable items such as those concerning commerce, including the conclusion of a trade agreement, mutual removal of the freezing restrictions, and stabilization of the Yen and Dollar exchange, or the abolition of extra-territorial rights in China. On the other hand, however, the proposal in question ignores Japan's sacrifices in the four years of the China Affair, menaces the empire's existence itself and disparages its honour and prestige. Therefore, viewed in its entirety, the Japanese government regrets that it cannot accept the proposal as a basis of negotiation.

6. The Japanese government, in its desire for an early conclusion of the negotiation, proposed that simultaneously with the conclusion of the Japanese-American negotiation, agreements be signed with Great Britain and other interested countries. The proposal was accepted by the American government. However, since the American government has made the proposal of November 26th as a result of frequent consultations with Great Britain, Australia, The Netherlands and Chungking, *ANDND** presumably by catering to the wishes of the Chungking regime on the questions of *CHTUAL YLOKMMTT*** be concluded that all these countries are at one with the United States in ignoring Japan's position.

(Part 14 of 14)

(Note: In the forwarding instructions to the radio station handling this part, appeared the plain English phrase "VERY IMPORTANT").

7. Obviously it is the intention of the American Government to conspire with Great Britain and other countries to obstruct Japan's efforts toward the establishment of peace through the creation of a New Order in East Asia, and especially to preserve Anglo-American rights and interests by keeping Japan and China at war. This intention has been revealed clearly during the course of the present negotiations. Thus, the earnest hope of the Japanese Government to adjust Japanese-American relations and to preserve and promote the peace of the Pacific through cooperation with the American Government has finally been lost.

*Probably "and as"

**Probably "China, can but"

124 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

The Japanese Government regrets to have to notify hereby the American Government that in view of the attitude of the American Government it cannot but consider that it is impossible to reach an agreement through further negotiations.

UNITED STATES OF AMERICA,
FEDERAL COMMUNICATIONS COMMISSION,
Washington, D. C., August 18, 1944.

I hereby certify that the attached are true copies of documents described as follows:

Document No. 1 is a true copy of the weather message which Major Wesley T. Guest (now Colonel), U. S. Army Signal Corps, requested the Commission's monitors to be on the lookout for in Tokyo broadcasts and to advise Colonel Bratton, Army Military Intelligence, if any such messages was intercepted. This request was made on November 28, 1941 at approximately 2140 GMT.

Document No. 2 is a true copy of a weather message from Tokyo station JYW3, intercepted by Commission monitors at approximately 2200 GMT, December 4, 1941, which at 9:05 p. m. EST, December 4, 1941, having been unable to contact Colonel Bratton's office, was telephoned to Lieutenant Brotherhood, 20-G, Watch Officer, Navy Department, who stated that he was authorized to accept messages of interest to Colonel Bratton's office.

Document No. 3 is a true copy of a weather message from Tokyo station JYW3, intercepted by Commission monitors at 2130 GMT, December 5, 1941, which was telephoned to Colonel Bratton at his residence at 7:50 p.m. EST, December 5, 1941.

Document No. 4 is a true copy of two weather messages intercepted by Commission monitors from Tokyo stations JLG 4 and JZJ between 0002 and 0035 GMT, December 8, 1941, and telephoned to Lt. Colonel C. C. Dusenbury, U. S. Army Service Corps, at the request of Colonel Bratton's office at approximately 8 p. m. EST, December 7, 1941. Document No. 4 also contains the Romaji version of these messages.

on file in this Commission, and that I am the proper custodian of the same.

MEMORANDUM

1. The Government of Japan, prompted by a genuine desire to come to an amicable understanding with the Government of the United States in order that the two countries by their joint efforts may secure the peace of the Pacific area and thereby contribute toward the realization of world peace, has continued negotiations with the utmost sincerity since April last with the Government of the United States regarding the adjustment and advancement of Japanese-American relations and the stabilization of the Pacific area.

The Japanese Government has the honor to state frankly its views concerning the claims the American Government has persistently maintained as well as the measures the United States and Great Britain have taken toward Japan during these eight months.

2. It is the immutable policy of the Japanese Government to insure the stability of East Asia and to promote world peace, and thereby to enable all nations to find each BOAMI'YQBR place in the world.

Ever since the China Affair broke out owing to the failure on the part of China to comprehend Japan's true intentions, the Japanese Government has striven for the restoration of peace and it has consistently exerted its best efforts to prevent the extension of war-like disturbances. It was also to that end that in September last year Japan concluded the Tri Partite Pact with Germany and Italy.

(Part 2 of 14)

However, both the United States and Great Britain have resorted to every possible measure to assist the Chungking regime so as to obstruct the establishment of a general peace between Japan and China, interfering with Japan's constructive endeavours toward the stabilization of East Asia, exerting pressure on The Netherlands East Indies, or menacing French Indo-China, they have attempted to frustrate Japan's aspiration to realize the ideal of common prosperity in cooperation with these regions. Furthermore, when Japan in accordance with its protocol with France took measures of joint defense of French Indo-China, both American and British governments, wilfully misinterpreted it as a threat to their own possession and inducing the Netherlands government to follow suit, they enforced the assets freezing order, thus severing economic relations with Japan. While manifesting thus an obviously hostile attitude, these countries have strengthened their military preparations perfecting an encirclement of Japan, and have brought about a situation which endangers the very existence of the empire.

(Part 3 of 14)

Nevertheless, facilitate a speedy settlement, the Premier of Japan proposed, in August last, to meet the President of the United States for a discussion of important problems between the two countries covering the entire Pacific area. However, while accepting in principle the Japanese proposal, insisted that the meeting should take place after an agreement of view had been reached on fundamental—(75 letters garbled)—The Japanese government submitted a proposal based on the formula proposed by the American government, taking fully into consideration past American claims and also incorporating Japanese views. Repeated discussions proved of no avail in producing readily an agreement of view. The present cabinet, therefore, submitted a revised proposal, moderating still further the Japanese claims regarding the principal points of difficulty in the negotiation and endeavoured strenuously to reach a settlement. But the American government, adhering steadfastly to its original proposal, failed to display in the slightest degree a spirit of conciliation. The negotiation made no progress.

From: Tokyo
To: Washington
December 6, 1941
Purple

#902 (Part 4 of 14)

Thereupon, the Japanese Government, with a view to doing its utmost for averting a crisis in Japanese-American relations, submitted on November 20th still another proposal in order to arrive at an equitable solution of the more essential and urgent questions which, simplifying its previous proposal, stipulated the following points:

(1) The Governments of Japan and the United States undertake not to dispatch armed forces into any of the regions, excepting French Indo-China, in the Southeastern Asia and the Southern Pacific area.

(2) Both Governments shall cooperate with a view to securing the acquisition in the Netherlands East Indies of those goods and commodities of which the two countries are in need.

(3) Both Governments mutually undertake to restore commercial relations to those previously prior to the freezing of assets.

The Government of the United States shall supply Japan the required quantity of oil.

(4) The Government of the United States undertakes not to resort to measures and actions prejudicial to the endeavours for the restoration of general peace between Japan and China.

(5) The Japanese Government undertakes to withdraw troops now stationed in French Indo-China upon either the restoration of peace between Japan and China or the establishment of an equitable peace in the Pacific area; and it is prepared to remove the Japanese troops in the southern part of French Indo-China to the northern part upon the conclusion of the present agreement.

(Part 5 of 14)

As regards China, the Japanese Government, while expressing its readiness to accept the offer of the President of the United States to act as "Introducer" of peace between Japan and China as was previously suggested, asked for an undertaking on the part of the United States to do nothing prejudicial to the restoration of Sino-Japanese peace when the two parties have commenced direct negotiations.

The American government not only rejected the above-mentioned new proposal, but made known its intention to continue its aid to Chiang Kai-Shek; and in spite of its suggestion mentioned above, withdrew the offer of the President to act as the so-called "Introducer" of peace between Japan and China, pleading that time was not yet ripe for it. Finally, on November 26th, in an attitude to impose upon the Japanese government those principles it has persistently maintained, the American government made a proposal totally ignoring Japanese claims, which is a source of profound regret to the Japanese Government.

(Part 7 of 14)

It is presumed that the spirit of conciliation exhibited to the utmost degree by the Japanese Government in all these matters is fully appreciated by the American government.

On the other hand, the American government, always holding fast to theories in disregard of realities, and refusing to yield an inch on its impractical principles, caused undue delays in the negotiation. It is difficult to understand this attitude of the American government and the Japanese government desires to call the attention of the American government especially to the following points:

1. The American government advocates in the name of world peace those principles favorable to it and urges upon the Japanese government the acceptance thereof. The peace of the world may be brought about only by discovering a mutually acceptable formula through recognition of the reality of the situation and mutual appreciation of one another's position. An attitude such as ignores realities and imposes one's selfish views upon others will scarcely serve the purpose of facilitating the consummation of negotiations.

Memorandum for: The Chief Signal Officer.

Subject: Warning order to Overseas Departments

1. At about 11:30 a. m. Sunday, December 7, a secret radiogram, written by the Chief of Staff, was handed in to the Message Center by Colonel Bratton of this division. Colonel Bratton reported verbally to the Chief of Staff that the message would be in the air in about eight minutes as he was assured by the Message Center. This radio was a highly important warning to all overseas departments including Hawaii regarding the timing of the Japanese ultimatum on that afternoon.

2. It is recommended that steps be taken to determine the exact time of arrival of this message at Honolulu, the time when the deciphered message was transmitted by the Signal Corps to the Staff, and by what office it was received in the Staff. Prompt action on this message might have averted disaster.

SHERMAN MILES,
Brigadier General, U. S. Army,
Acting Assistant Chief of Staff, G-2.

Subject: Information Received from the Orient.

Summary of Information:

The following information received from the Orient, dated August 26, 1941, is considered reliable:

1. Mr. HIROTA, a presiding officer at directors' meeting of the Black Dragon Society, told of an order issued by War Minister TOJO (now Premier) "to complete full preparation to meet any emergency with United States in the Pacific.

134 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

All guns to be mounted in the islands of the Pacific under Japanese mandate. The full preparation to be completed in November."

2. HIROTA and others are said to have stated: "War with United States would best begin in December or in February."

3. "Very soon," they say, "the Cabinet will be changed. The new Cabinet would likely start war within sixty days."

G2 Note: Full name of individual mentioned above is KOKI HIROTA, who is reported to be a member of the House of Peers, former Premier of Japan and Director of the Bureau of Intelligence, U. S. Section.

Subject: Summaries of Information.

To: War Department General Staff,
Military Intelligence Division G-2,
Washington, D. C.

REC'D-B-2 SEP 17, 1941

1. It has been noted that many of the Summaries of Information received from your office originate with Office Naval Intelligence, 14th Naval District and have already been furnished this office by the Navy.

2. The cooperation and contact between Office Naval Intelligence, Federal Bureau of Investigation, and the Military Intelligence Division, in this Department, is most complete and all such data is received simultaneous with the dispatch of information to the respective Washington offices.

3. Inasmuch as such advices are received in duplicate and unless there are other reasons to the contrary it is recommended that such notices from your office be discontinued in order to avoid the duplication of effort.

THE TRUTH OF PEARL HARBOR

(AN EDITORIAL)

By Basil Brewer, Publisher, The New Bedford (Mass.) Standard-Times

Pearl Harbor is the saddest chapter in the history of America.

Here, in one hour, was destroyed the Pacific battle fleet, chief weapon to restrain Japan from war—chief weapon with which to win, if war came.

Here were wiped out 4,000 officers and men of the American Army and Navy. Innocent of responsibility, they died in a classic funeral pyre, built for them by the criminal negligence of others.

Pearl Harbor, which, as the Japanese planned, made impossible relief of the Philippines, may have been responsible for that other great tragedy—Bataan and Corregidor.

Pearl Harbor marked the beginning of war with Japan.

It may well have finished any hope of an early successful ending of the Japanese war.

Certainly the victims there, those who paid the "last full measure of devotion," were not to blame for the disaster.

Who were to blame for Pearl Harbor?

Surely here, if ever, there was guilt and there were guilty.

Who were the guilty and why have they not been apprehended, tried, convicted and punished?

WHY?

The President had said Jan. 7, 1941, 11 months before Pearl Harbor :

"When the dictators are ready to make war upon us, they will not wait for an act of war on our part. *They, not we*, will choose the *time*, the *method* and the *place* of their attack."

Why, then, were we "surprised" at Pearl Harbor?

Why was the battle fleet there, each in its place, names and exact locations map-marked by the Japanese flyers to receive the torpedoes, made especially for this attack?

Why was the air arm of the Army there, herded together, unarmed, for the kill?

Should the Pacific battle fleet have been at Pearl Harbor on Dec. 7?

And, if it should not, why was it there, and by whose orders?

INVESTIGATIONS

Four different "investigations" of Pearl Harbor have been conducted—all secret. Only one "report" has been made, the report of the Roberts Commission, released a few weeks after Pearl Harbor.

Of the 127 witnesses who testified in the Roberts investigation, the testimony of none has been made public.

Of the hundreds of documents studied and put in the record in the Roberts investigation, none has been made public.

Why have not these documents been made public?

The Roberts report blamed General Short, commanding general of the Army, and Admiral Kimmel, commander-in-chief of the fleet at Pearl Harbor, for the disaster.

As a result of the findings of the Roberts Commission, both have been ordered tried by court-martial.

Kimmel and Short, members of Congress and many others repeatedly have demanded the trials be held.

Today, more than 2½ years after the report of the Roberts Commission, neither Short nor Kimmel has been brought to trial.

It was urged, shortly after Pearl Harbor, that trials would interfere with the war.

Certainly now, almost three years after the disaster, no such claim validly can be made.

More than a year ago the late Secretary of the Navy Knox wrote a letter saying public trials of Kimmel and Short could not affect the progress of the war.

Very recently a sub-committee of the House Military Affairs Committee stated public trials would not interfere with the war.

Why, in justice, have not these trials been publicly held, that those charged may be punished, if guilty, and, if innocent, freed?

Why have not the American people been told the truth about Pearl Harbor?

Truth, which they need in order properly to appraise their military and political leaders—and their policies.

Truth, which they need to appraise their own share, if any, in the guilt.

Truth, which they need to better guide themselves, as citizens—in the interest of the country in war.

The American people grew old overnight at Pearl Harbor.

Why are they being treated as children, who must not be told?

Pearl Harbor was the Gethsemane of the American people, as well as of the soldier dead.

Why not the truth, no matter how hard to take to cleanse the soul—perhaps to bring temporal, as well as spiritual, salvation?

* * *

Not even the truth, as to the Pearl Harbor dead, was known, until long afterwards.

The facts as to the destruction of the battle fleet were withheld for a year—and then released with news of successful salvage operations.

WAR

For a year or more prior to Pearl Harbor, it had been clear to official Washington only a miracle or American surrender could keep the United States out of the European war and war with Japan.

Japan had signed the Tripartite pact with Hitler, binding her to war with the U. S., if war with Hitler came.

Japan had notified Ambassador Grew, in the Spring of 1941, the pact meant what it said.

Grew had advised Washington.

Concurrently, Japan's course of conquest clearly pointed to the Dutch East Indies, Singapore, Burma, possibly India, if not the Philippines.

That Britain could successfully meet this attack, without help, was dubious indeed.

Lend-lease, convoyed supplies, loaned destroyers, etc., would not suffice if Japan attacked Britain.

Therefore, the President faced, early in '41, the two horns of dilemma.

He must decide whether to join Britain in stopping Japan—which meant war.

Or he must take the chance, which seemed a certainty, that without the U. S. actively fighting, the Tripartite powers would defeat Britain, force Russia to peace—and attack the U. S.

That the President had determined on war seems indisputable.

On Jan. 21, 1941, he wrote Ambassador Grew in Tokyo that the maintenance of British supply lines from the Far East was vital.

On Feb. 14, 1941, Dooman, Counsel of the American Embassy in Tokyo, told the Japanese Vice-Minister of Foreign Affairs Okashi that, if the Japanese attacked Singapore, "the logic of the situation would inevitably raise the question" that this would mean war also with the U. S.

On Feb. 26, 1941, Ambassador Grew reported Dooman's conference to Washington, saying:

"I propose to say to Mr. Matsuoka (Japanese foreign minister), with whom I have an appointment this morning that the statements made by Mr. Dooman to Mr. Okashi were made with my prior knowledge and have my full approval."

Washington did not disapprove nor disavow Dooman's and Grew's statements.

In April 1941, Naval authorities in Washington had written the commanders of the Asiatic and Pacific fleets that the question of U. S. entry into the war seemed a matter of—"not whether—but when."

By the time of the Atlantic Charter meeting between Churchill and Roosevelt, early in August '41, events in Asia were moving with tremendous and ominous speed.

Churchill, the Australians and the Dutch urged an immediate ultimatum—war—if Japan pursued her expected course.

Responding to the argument for an immediate ultimatum, the President only asked if "we would not be better off in three months?"

And then said, "Leave it to me. I think I can baby them (the Japs) along for three months."

There was no disagreement between the President and Churchill as to Japanese plans—nor that Japan must be stopped.

Probably there was no disagreement that an ultimatum meant war.

It now is clear the President only was playing for time—time to be better prepared—

And—time for the American people to "catch up," mentally and morally, with commitments, made and to be made.

The Atlantic Conference between Churchill and Roosevelt settled the policy of a united front between the U. S. and England toward Japan.

That this was true seems implicit in the following from Churchill's address to Parliament on Jan. 28, 1942, about seven weeks after Pearl Harbor:

"It has been the policy of the Cabinet at almost all costs to avoid embroilment with Japan until we were sure that the United States would also be engaged. * * *

"On the other hand, the probability since the Atlantic Conference, at which I discussed these matters with President Roosevelt, that the United States, even if not herself attacked, would come into the war in the Far East and thus make the final victory assured, seemed to allay some of these anxieties, and that expectation has not been falsified by the events."

July 24, the United States had "frozen" Japanese funds.

Immediately after the Atlantic Conference, commercial embargoes, against oil, steel and gasoline were ordered which only could result in war.

This writer believes the President, in all these matters, made the correct decision—in the country's interests—that history shall so record.

With equal impartiality, history shall record that the President, out of his political genius, made one, perhaps two fatal errors, which may have brought on the Pearl Harbor disaster.

Certainly these contributed greatly to the disastrous success of the attack.

POLITICS

The working agreement with Churchill being what it was, the danger to the country being apprehended—the President failed to take the people into confidence.

This was the President's political bent.

A statesman long ago would have told the people the facts—and risen or fallen with the consequences.

Democracy rises or falls, lives or dies, based on how well this thesis is understood and followed.

But the President was not of that talent nor taste.

Far more than he trusted the people, he trusted his own facility of expression, his ability, not necessarily by the use of facts, to get the people to think as he wanted them to think.

Concurrently, this formula had seemed to the President not to have worked badly in eight years of the Presidency and three elections for President.

It was true, also, this was the only method the President knew.

Secretary Hull had said, when questioned about apparent inaction in Washington, "governments which get too far ahead of the people are apt to fall."

The President, in the grave war situation in the Fall of '41, had gotten far ahead of the people—far too far for the people ever to catch up by anything which he, by that time, could say.

Fortunately we can now depend on two of the President's friends and biographers for the facts at this stage of the crisis.

Forrest Davis and Ernest K. Lindley, friends of the President, had access, through the President, to confidential information, from which they produced early in 1942, "How War Came."

This is from page 305 under the title, "The Sands Run Out—Pearl Harbor":

"Few, if any, high officials believed, however, that the United States would, or could, stand aside for long if the Japanese struck at the East Indies or Malaya, or even thrust into Siam. For at stake were not only immediate interests vital to us, but resources and strategical positions affecting our long-term security as a nation.

"The question perplexing many high officials was how, in the absence of a direct Japanese attack on the American flag, to summon the nation, divided as it then was on questions of foreign policy, to the strong action which they believed essential.

"There had been considerable discussion of possible methods . . . It was commonly supposed that the Japanese were too smart to solve this problem for the President by a direct assault on the American flag—especially at Hawaii, which even the extreme isolationists recognize as a bastion of our security."

Surely this is plain enough.

"As the Sands Ran Out at Pearl Harbor," the Japanese "solved the problem for the President by a direct assault on the American flag."

The President, in the last weeks before Pearl Harbor, required an "incident" that would enable the people to catch up with him.

Pearl Harbor gave the President far more of an incident than he needed, expected—or wanted.

Born optimist, the incident the President expected was to be a glancing blow—but the blow came full and head-on at the whole body of the country.

Moreover, it was not *the kind* of an incident he had in mind, as shall be disclosed.

THE FLEET

Naval strategy opposed having the Pacific Fleet based at Pearl Harbor.

Three or more high admirals had opposed it, including Kimmel.

Admiral Richardson, immediate predecessor of Kimmel, was removed from command by the President because, among other things, he opposed basing the fleet at Pearl Harbor.

The fleet was at Pearl Harbor by orders of the President, though of course he ordered no such concentration as existed there on Dec. 7.

Reasons of diplomacy, and war strategy, as judged by the President, required a powerful fleet based at Hawaii, a threat and a warning to Japan, the only kind the Japanese could understand.

In no other way, the President judged, could the U. S. hope to keep open the British, and our own, supply lines from the Far East.

These supply lines, the President had told Grew, were vital.

These were the supply lines the President and Churchill had agreed to defend together at the Atlantic Conference.

The admirals were opposed to basing the main fleet at Hawaii, because they believed the fleet there was too confined, too exposed to possible attack.

Knowing the power of the Japanese fleet, high officers of the Navy had for years questioned its ability to meet the Japanese successfully in Far Eastern waters.

Defending the Philippines always had been considered difficult.

Certainly this thesis had not been changed by large increases in the Japanese Navy and by the fact the U. S. fleet in '41 was divided between the Pacific and the Atlantic.

Additionally, the admirals opposed using the fleet at Hawaii as a threat to Japan.

Such an approach, they considered, was apt to result in "backing into the war," instead of the more forthright and direct method, which they favored.

What the admirals didn't know was, we were, to all practical purposes, already in the war.

We were watchfully waiting for the "incident" which would make the war, already a foregone conclusion, "politically possible."

A plan of co-operation with the British Far Eastern fleet had been arranged, which required the U. S. fleet to be as near as practical to the Philippines.

The Japanese knew the full meaning of the U. S. fleet at Pearl Harbor.

Every war plan of the Japanese, including the latest by Kinoaki Matsuo, "The Three Power Alliance," published in 1940, plainly stated in war with U. S. Japan would be defeated—if the U. S. Pacific fleet were permitted to get to the Philippines.

We were, at the time of Pearl Harbor, waiting for an "incident" which would start war.

The Japanese, having in mind basic Japanese strategy, that the battle fleet of the U. S. must not get to Manila—for a long time had been *preparing the "incident."*

SABOTAGE

Having overruled his admirals in basing the Pacific fleet at Pearl Harbor, it would be expected that the President, of all persons, would make most certain no disaster came from the fleet's being there.

Doubtless the President thought he had so arranged.

It is a fact, however, the President, by his own acts, unwittingly of course, contrived to bring about the success of the Japanese attack.

This was not in the manner that he has been commonly accused, running all the way from plotting the attack, to ordering the fleet unprotected to appease the Japanese—all of which are false.

The President's responsibility is nevertheless direct and definite.

Early in January, Secretary of Navy Knox had sent a warning to both Army and Navy chiefs at Pearl Harbor suggesting the danger of a surprise bombing attack by air against the fleet at Pearl Harbor.

It had been a foregone conclusion, if war with Japan came, it would begin by surprise attack, the Japanese way, as the President himself had said Jan. 6, 1941.

But, as the months went by between the first of the year and Dec. 7, 1941, as the plans of the Japanese to attack became matured, for some strange reason there was less and less emphasis on surprise attack on the fleet at Pearl Harbor by air, more and more on sabotage.

Of seven warning messages from Washington to Short and Kimmel, recorded in the Roberts report, in addition to the one in January from Secretary Knox, four referred to sabotage.

None, after the Knox warning, referred to the possibility of surprise attack by air on the fleet.

Twice, in acknowledging warnings and instructions from Washington, General Short reported to Washington he had taken all precautions *against sabotage*.

On Nov. 27, 10 days before Pearl Harbor, General Short advised Washington he had ordered Hawaii "alert No. 1" against sabotage, and gave details of what measures he had taken.

Washington knew of and did not disapprove these "defense steps," solely against sabotage.

Sabotage, third in the list of attacks most expected by Knox in January, had become No. 1 of those expected in Washington and Pearl Harbor as Dec. 7 approached.

It is not sabotage which competent military leaders, in Washington or Pearl Harbor, would normally most fear, as war with Japan approached.

As Dec. 7 approached, the "incident," which would bring war with Japan, was daily, almost hourly, expected in Washington.

Historically, the sinking of the battleship Maine in Havana harbor on Feb. 15, 1898—an act of sabotage, had brought war with Spain.

By some strange twist, the President, and to some extent the military leaders in Washington, were in a "Battleship Maine" state of mind, when the attack occurred, or at least were up to the last hours before the attack.

This explains why the battle fleet was docked, each ship at its station, awnings up—why the planes were grounded wing to wing, unarmed, ammunition for guns and planes locked in magazines, when Japan struck Dec. 7.

The Army at Pearl Harbor on Dec. 7, interpreting its instructions from Washington, was "alerted" for sabotage only.

Had Hawaii "alert No. 3" been ordered, by General Short, the Japs might never have struck, certainly the damage would have been far less.

In far-away Aleutian Islands, at Dutch Harbor, where military orders only had to be followed, U. S. bombers were cruising with live bombs in racks, U. S. fighters, with live ammunition in guns, when the attack came to Pearl Harbor Dec. 7.

DISASTER

But it is not alone the "sabotage psychology" at Pearl Harbor for which the President must accept his share of responsibility.

There were blunders there, both of omission and commission, which he must shoulder.

The Commanders at Pearl Harbor had warnings of danger.

But with every warning, save one, came a "precaution," which tied their hands psychologically, if not actually.

As the danger became greater and Pearl Harbor closer, the "precautions" became more definite, more insistent, more urgent.

These precautions came direct from the White House.

The only warning message that Kimmel and Short received, which did not contain definite precautionary orders, was the one from Secretary of the Navy Knox in January '41.

This was 11 months before Pearl Harbor and long before the expected "incident," which would kick off hostilities, was expected.

Here are the precautions, which accompanied each "warning," as told in the Roberts report.

Oct. 16, as Kimmel and Short were warned of danger by Washington, they were ordered to do nothing which would "*constitute provocation as against Japan.*"

Nov. 24, 13 days before Pearl Harbor, Kimmel was enjoined to strictest secrecy, in any defense moves he made "*to prevent complication of tense existing situation.*"

Nov. 27, came the most serious warning yet, from the Chief of Staff to Short, but with it an order that under no circumstances was he to take any steps or make any moves that *would make it appear* the U. S. had committed "*the first overt act.*"

In the same message "reconnaissance" was ordered but only "*in such a way as not to alarm the civil population or disclose intent.*"

Here a military authority must have thought of the possibility such an order might tie the hands of the commander, for there was inserted:

"He (General Short) was not to be restricted to any course, which would jeopardize his defense."

Nov. 28, nine days before Pearl Harbor, Short was cautioned again that any protective measures he took, "*must be confined to those essential to security*" and he must avoid "*unnecessary publicity and alarm.*"

It was the next day, Nov. 29, Secretary Hull stated, "The diplomatic part of our relations with Japan is virtually over and the matter will now go to the officials of the Army and Navy."

Nov. 29, eight days before Pearl Harbor, Kimmel was ordered to "*take no offensive action until Japan had committed the first overt act.*"

Nov. 30, seven days before Pearl Harbor, Kimmel received the last warning message to reach Pearl Harbor before the attack.

It was a copy of a dispatch sent to Admiral Hart at Manila, ordering certain scouting, but again with the admonition, to "*avoid the appearance of attacking.*"

None of these precautionary orders came from military authorities in Washington, though all came through military channels.

None of these precautionary orders at Pearl Harbor ever was withdrawn.

One of the last warning messages sent to Pearl Harbor was changed by the President, personally, to insert the usual precaution.

The official explanation, of course, is that, if war came, the President wanted the record to show he had done all he could to prevent it.

But on Nov. 29, eight days before Pearl Harbor, as stated, the Secretary of State had said "the matter will now go to the officials of the Army and Navy."

The Roberts report, in No. 15 of its conclusions, quotes one of the many precautionary orders from Washington as a cause of the success of the Pearl Harbor attack though the report does not fix the responsibility.

The last full fatal week before Dec. 7, 1941, the Roberts report does not show a single message from Washington to Kimmel and Short at Pearl Harbor.

It now is known Washington had, during this week, information of greatest importance, which Short and Kimmel didn't receive until *after* the attack.

This is the real story of Pearl Harbor, seven warnings of danger to the commanders there, *six confusing and contradictory* "precautions," which tied their hands.

Word available the last fatal week—word most needed at Pearl Harbor—never was sent.

Obviously the President, "as the sands ran out" at Pearl Harbor, was definitely expecting a Japanese attack.

But the nearer it was expected the more careful he became that when the attack should come, it should be such as the isolationists could not tie onto himself.

The attack, which came at Pearl Harbor Dec. 7, was one which the "isolationists" could not tie onto the President.

But the success of the attack can in part, in all fairness, and in such measure as each citizen shall judge, be placed at the door of the Commander-in-Chief as commander and personally.

The President, and others, in Washington, first had lulled the commanders at Pearl Harbor into expecting only—sabotage.

The President then had given them such restraining precautions and orders they did not know what they could or dare do—in measures of protection and defense.

The Japanese, as Davis and Lindley had said, solved the problem of how to summon the nation against isolationism for the President at Pearl Harbor.

But in trying to keep "the record clear," the President unknowingly and unintentionally had contributed to the destruction of the Pacific battle fleet, had helped to bring about Bataan and Corregidor, had lengthened immeasurably the Japanese war.

WHY?

This of course explains many things.

It explains the long delay of the court-martial of General Short and Admiral Kimmel.

It explains why the President through members of Senate and House, stopped Congress from passing resolutions calling for trials.

It explains why the President still prevents the records of the Roberts Commission and the testimony of its 127 witnesses being made public.

It explains the Presidential order which forbade Admiral Hooper a year ago to testify about Pearl Harbor to a committee of Congress.

It explains why no information has been given out as to the investigation by Admiral Hart, at the suggestion of Secretary Knox.

It explains investigation number 4, now being held behind closed doors.

White House pressure succeeded in substituting secret hearing number 4, for a proposed resolution of Congress calling for immediate court-martial.

EXHIBIT No. 4

10 AUGUST 1944.

Confidential

Colonel CHARLES W. WEST, JAGD,
Recorder, Army Pearl Harbor Board,
Room 4741, Munitions Building,
Washington 25, D. C.

DEAR COLONEL: General Miles has asked me to write to you requesting a copy of the transcript of his evidence before the Board. The General desires this copy of the transcript because he is concerned with the possibility of his evidence showing an inaccurate statement of fact.

General Miles would have written to you personally on this matter but he is now on an inspection trip and by long distance telephone he communicated with me today, asking me to make this request of you. The General will be at this headquarters on Tuesday, 15 August 1944, and I can assure you that he will examine and return the same immediately.

I trust everything is going well with you and that you are enjoying your assignment.

Sincerely,

DANIEL L. O'DONNELL,
Lt. Colonel, J. A. G. D.,
Service Command Judge Advocate.

WAR DEPARTMENT

WASHINGTON

HEADQUARTERS ARMY PEARL HARBOR BOARD,
Munitions Building, 12 August 1944.

Lt. Col. DANIEL L. O'DONNELL, J. A. G. D.

Hqs. First Service Command,
Boston 15, Massachusetts.

DEAR COLONEL O'DONNELL: Pursuant to your request of 10 August 1944, I am enclosing herewith a copy of the transcript of General Miles' testimony. Certain minor inaccuracies such as typographical errors, may appear therein which we haven't yet had an opportunity to correct but will do so at the earliest opportunity. May I suggest that the matter of any possibly "inaccurate statement of fact" be made the subject of a letter to General Grunert.

Please return the transcript when it has served its purpose. With kindest regards, I am.

Sincerely yours,

Charles W. West,
CHARLES W. WEST,
Colonel, J. A. G. D.,
Recorder.

1 Incl: Transcript.

[91] TESTIMONY OF MAJ. GEN. SHERMAN MILES, COMMANDING 1ST SERVICE
COMMAND, BOSTON, MASSACHUSETTS

(The witness was sworn by the Recorder and advised of his rights under Article of War 24.)

Colonel WEST. General, will you state to the Board your name, rank, organization and station?

General MILES. Sherman Miles, Major General, Commanding 1st Service Command, Boston, Massachusetts.

General GRUNERT. General Miles, the Board, in an attempt to get at the facts, is looking into the War Department background and viewpoint prior to and leading up to the Pearl Harbor attack. It is hoped that, because of your assignment as A. C. of S. G-2, at that time, you can throw some light on the subject. In order to cover so large a field in the limited time available, individual Board members have been assigned objectives or phases for special investigation, although the entire Board will pass upon the objectives and phases. General Russell has this particular phase. So he will lead in propounding the questions and the other members will assist in developing them. So I will turn you over to the mercies of General Russell.

General RUSSELL. What was your assignment in the year 1941?

General MILES. I was Acting Assistant Chief of Staff, G-2, War Department.

General RUSSELL. Can you remember approximately the date on which you entered upon that assignment?

General MILES. May 1, 1940.

General RUSSELL. When were you relieved or transferred from that assignment?

[92] General MILES. The end of January 1942.

General RUSSELL. During that period of time you were actually the head of what we know as G-2 which embraced the Military Intelligence Division. Was that the name of it?

General MILES. That was the official name—Military Intelligence Division, War Department General Staff.

General RUSSELL. Briefly stated, General Miles, what were the functions of the G-2 section, including this Military Intelligence Division?

General MILES. The Military Intelligence Division, General, was all-inclusive. It was the whole thing, not as it is now, broken and divided between G-2 and Military Intelligence Service. It was all one division, just as the Operations and Training Division, or the Personnel Division, War Plans Division, and so forth. I was head of the entire division, which, in turn, was divided into counter-intelligence, positive intelligence, and in turn that was divided geographically to cover the world, or as much as we could cover.

General RUSSELL. Definitely, General Miles, as to the operations of your department related to the Japanese Government during your period of service there, what were you attempting to learn about the Japanese Government?

General MILES. We were attempting to learn everything we could about the Japanese Government, and had been doing so, in fact, a great many years. It was only one of the nations which we were attempting to cover, to gather all possible information about. Our system was a running digest.

General GRUNERT. May I interrupt there? If anything which [93] you put into the record is of such a nature as might be of value to other nations now, I wish you would consider that and, if so, give us that information in closed session, so that it will not be disclosed to anybody who may be able to see this record. Do you see what I am getting at?

General MILES. Yes, sir; I understand.

This summary digest was maintained on the principal countries of the world. Such a system is no secret. It has been maintained by practically every government. It was a running digest covering the military side, the political side, the economic side, and the psychological side. All the information that ever came in from any country to G-2 was collated and put into this digest and sent out to the various military attaches and G-2s, all the corps areas and overseas departments who were interested in a particular country, in the form of corrected loose-leaf, so that you had a running build-up constantly. This had been going on, to my knowledge, for ~~thirty~~ twenty years. In addition to that, of course, we sent out bi-weekly, as I remember, military intelligence summaries, which were short documents of facts that we had gotten in in the last two or three days from all sorts of agencies that we had. I say all sorts, because we kept in very close touch with the State Department, the Department of Commerce, the Rockefeller people in South America, and, of course, our own military attaches and observers that we had throughout the world.

That, in general, was our system of getting information and disseminating it.

General RUSSELL. Did the G-2 section, as such, have [94] personnel available for investigations in foreign fields in the year 1941?

General MILES. A limited personnel, General. We were building up. When I took over Military Intelligence in May of 1940 I remember there were 36 officers in the entire division. We built up rapidly to something over 400, with an equal proportion of clerical personnel. We built up very rapidly, as the war came nearer and nearer, our agencies in the field, field observers, military attaches. Our personnel was always limited. We did not have unlimited money or unlimited selection, of officers; particularly of officers. That was a time when the Army was building very rapidly. The natural inclination of a soldier is to go with troops and remain with troops. The general officers, in the field of course wanted the best men, naturally, and should have had them. and We did not have a free field for the selection of personnel, and quite rightly. We did the best we could with the personnel and the funds we had available.

General RUSSELL. About when did this personnel reach its maximum development of 400?

General MILES. Well, it was increasing all the time I was there. I do not know. I imagine it continued to increase after I left. I am pretty sure it did, I cannot place any date on any maximum reached.

General RUSSELL. Can you approximate the number of people who were available to you for service in Washington and throughout the country and in foreign fields, in October and November of 1941?

[95] General MILES. General, I would not try to answer that question from my memory. The records are certainly available to you. I could not do it.

General RUSSELL. General, a moment ago you referred to monthly or bi-monthly documents of some kind that were sent to the corps commanders and to the overseas departments. Did your office maintain copies of those reports?

General MILES. Oh, yes.

General RUSSELL. Are they in the files now?

General MILES. I imagine they are, sir. They are permanent records of the Military Intelligence Division.

General RUSSELL. There would be no reason to destroy them at all?

General MILES. Not that I know of.

General RUSSELL. I want at this point to say that I have asked for a search of the records over there and have looked at the records, but did not discover copies of such reports, although specifically I have asked for such reports. I am giving you that, because it may be necessary for us to conduct a further search to locate, if possible, these documents.

Now, to discuss for a moment the sources of information which you have divulged already and to limit it to Japanese information, what sources of information were there in Japan in the fall of 1941 on which you as G-2 could rely as to activities of the Japanese at home and in home waters?

General MILES. Within the United States?

General RUSSELL. No. I am now addressing myself to the situation in Japan and have asked what agencies or what sources existed in Japan upon which you could rely for information [96] about Japanese activities at home and in Hawaii.

General MILES. I would say that by far the most important source was our Embassy in Tokyo. We had a very excellent Ambassador who had been there a number of years with a staff that had been there a good deal longer than that. We had, of course, used the military attache and his assistants. The information which we could get on the military side from our military attache and his assistants was of course very limited; the Japanese being extremely close-mouthed. But the Embassy itself was constantly sending in dispatches to the State Department—Mr. Grew, particularly—on the state of mind of the Japanese people and the probability of what they were going to do next, and so forth. We also, of course, had direct access, through our very close connection with the State Department, to what was transpiring in the negotiations in the fall of 1941 here in Washington. Aside from that, I do not think there were any important sources of information in Japan. We were getting a good deal of information from what might be called the borders; in other words, China, and even the part of the Continent occupied by the Japanese. The Koreans would get out once in a while and we would get some information in that way. We exchanged information very freely with the British and, to a certain extent, with the Dutch. They were a little afraid to give us information, as I remember, but we were getting some.

General RUSSELL. Did the British have any organization within the homeland of Japan which was watching the movement of their Army and Navy in the fall of 1941?

General MILES. I believe that they had about the same as [97] we had. As to actually watching the movements of ships and troops, it was necessarily a system that worked sometimes and did not work at other times. You might see the ships move or the troops move, or you might not.

General RUSSELL. General Miles, is it true or not that from the State Department or from our Ambassador to Japan the information which we obtained related almost exclusively to the state of mind of the Japanese people toward the war and their enmity toward the United States?

General MILES. Are you putting that in the form of a question, sir?

General RUSSELL. Yes. Is it true or not that that was the case?

General MILES. That was the Ambassador's principal concern, naturally. I would not say, from my memory of the information that we got from our Embassy, that that by any means covered the field.

General RUSSELL. Do you remember a message from our Ambassador along in the fall of 1941, in which he summed up the situation and told the State Department to what extent they could rely upon him for information of troop movements, movements of the Navy, and so forth?

General MILES. I do not recall that particular message, General.

General RUSSELL. Maybe I can refresh your memory. May I ask you this as a preliminary? Did you attend the conferences that were held by the Secretary of State, which he refers to as the War Councils, where he had ordinarily the Secretary of War, the Secretary of the Navy, and some of our high-ranking military [98] and naval people in to discuss the Japanese situation?

General MILES. No, sir. I think only the Chief of Staff attended them.

General RUSSELL. I refer particularly to this message which is contained in the State Department's book that they call the White Paper, which is a report from our Ambassador to Japan on the 17th day of November, I believe, 1941 (handing a book to the witness).

General MILES. What is the question, now, sir?

General RUSSELL. When did you first know about that message?

General MILES. I don't remember, General; I can't answer that question.

General FRANK. Did you know about it at all?

General MILES. I am not sure that I did. I think I did, because we had very close liaison with the State Department. I feel sure that I did; but, frankly, it is so obvious a message that the impression it gives me today is

probably the same impression it gave me then: "Yes, of course I know we can't count on it, the Embassy. How can we be sure that any group can tell us the movement of the Japanese fleet or army?" We knew we could not.

General RUSSELL. In other words, the information which you have testified that you had from Japan about what was going on over there was rather general and indefinite in its nature?

General GRUNERT. Unless we know about that message the record will not be intelligible. Is it going to be copied into the record?

General RUSSELL. Yes.

Your information about the activities in Japan in the fall [99] of 1941 was very indefinite and general?

General MILES. Necessarily so.

General RUSSELL. The message from Ambassador Grew in Japan to the Secretary of State for purposes of the record will be identified as a paraphrase of a telegram dated November 17, 1941, and it may be copied from page 788 of this White Paper entitled "Peace and War, United States Foreign Policy, 1931-1941." (Telegram from Ambassador Grew to Secretary of State, dated November 17, 1941, is as follows:)

"The Ambassador in Japan (Grew) to the Secretary of State

"(Telegram: Paraphrase)

"Tokyo, November 17, 1941—1 p. m.

"Received November 17—2:00 p. m.)

"1814. Referring to Embassy's previous telegram No. 1736 of November 3, 3 p. m., final sentence, and emphasizing the need to guard against sudden Japanese naval or military actions in such areas as are not now involved in the Chinese theater of operations. I take into account the probability of the Japanese exploiting every possible tactical advantage, such as surprise and initiative. Accordingly you are advised of not placing the major responsibility in giving prior warning upon the Embassy staff, the naval and military attaches included, since in Japan there is extremely effective control over both primary and secondary military information. We would not expect to obtain any information in advance either from personal Japanese contacts or through the press; the observation of [100] military movements is not possible by the few Americans remaining in the country, concentrated mostly in three cities (Tokyo, Yokohama, Kobe); and with American and other foreign shipping absent from adjacent waters the Japanese are assured of the ability to send without foreign observation their troop transports in various directions. Japanese troop concentrations were reported recently by American consuls in Manchuria and Formosa, while troop dispositions since last July's general mobilization have, according to all other indications available, been made with a view to enabling the carrying out of new operations on the shortest possible notice either in the Pacific southwest or in Siberia or in both.

"We are fully aware that our present most important duty perhaps is to detect any premonitory signs of naval or military operations likely in areas mentioned above and every precaution is being taken to guard against surprise. The Embassy's field of naval or military observation is restricted almost literally to what could be seen with the naked eye, and this is negligible. Therefore, you are advised, from an abundance of caution, to discount as much as possible the likelihood of our ability to give substantial warning.

"GREW"

General RUSSELL. General Miles, referring to the statement which is contained in Ambassador Grew's message: "and with American and other foreign shipping absent from adjacent waters the Japanese are assured of the [101] ability to send without foreign observation their troop transports in various directions."

As a matter of information, do you know why at that particular time there was an absence of American and foreign shipping in Japanese waters?

General MILES. No, sir. I do not remember knowing of any particular absence of American shipping from Japanese waters at that time. Of course we had had information for a great many years which had been considered in all of our war plans in Hawaii that there was a certain part of the Pacific Ocean that we called the "Vacant Sea" in which there are practically no ships and in which large movement of ships could occur without anybody seeing them. It was that part of the ocean between the great southern routes that go from Hawaii to the coast of Japan and China, and the northern great circle routes that go near the Aleutians.

General RUSSELL. The term which you used intrigues me. What was it you called it?

General MILES. I used to call it the "Vacant Sea."

General RUSSELL. As applied to that part of the Pacific adjacent to the mandated islands, would you say that they were in the area of the "Vacant Sea" or not?

General MILES. No, sir. The southern trade routes, as I remember, from Hawaii to Yokohama, we will say, pass considerably north of most of the mandated islands, such as the Marianas. All the seas surrounding the mandated islands were, as you know, extremely difficult for us to penetrate and get any information on for other reasons.

General RUSSELL. Why?

[102] General MILES. Because the Japanese would not allow us in there. You might sail through, but you would not see very much. That had existed for many years.

General RUSSELL. Was there any restriction on Americans landing on those islands that were mandated to the Japanese?

General MILES. Absolutely, sir.

General RUSSELL. Were Americans prohibited from landing in the mandated islands?

General MILES. Well, they did not say "Americans are prohibited," but Americans did not land. That was well known for years. No American warship went in there.

General FRANK. Do you know of any American port or any point over which the United States had jurisdiction that excluded Jap vessels or Japanese nationals?

General MILES. No, sir.

General RUSSELL. Do you know where there is any documentary evidence of the exclusion of Americans from the Japanese mandated islands?

General MILES. General, I would not know exactly where to put my hand on documentary evidence. It was one of the things perfectly well known to all of us in the Intelligence. I should think probably the Navy Department could aid you in that respect. I am pretty sure that the Navy Department several times tried to get ships in there.

General GRUNERT. As far as the so-called mandated islands are concerned, they were sort of a blind spot for our Military Intelligence, were they?

General MILES. Yes, sir.

[103] General RUSSELL. That is exactly what I was trying to find out.

How far are the Marshall Islands from Honolulu?

General MILES. My recollection is, about 1,600 miles. I would not swear to it.

General RUSSELL. General, were you acquainted with the plans for the defense of Pearl Harbor and the estimates in connection with the Japanese situation as to the probabilities of attack? Were all those things known to you at G-2?

General MILES. Rather intimately. I was G-3 of the Hawaiian Department from 1929 to 1931. I rewrote the war plan. I wrote the general staff study and estimate of the situation, which was the "bible" at that time and for some years. Then from 1934 to 1938 I was here in War Plans Division and was particularly charged with the three overseas departments, their projects and their plans. So, up to 1938, at least, and between 1929 and 1938, I was intimately acquainted with it.

General RUSSELL. In our brief study of the plan generally and the evidence just given by you, there was considerable emphasis placed on a probability of an attack on Pearl Harbor by carrier-borne aircraft. During the year 1941 you were, of course, familiar with the estimate and the probabilities?

General MILES. Yes, sir.

General RUSSELL. Did it occur to you as G-2 from what port or ports these carriers might depart on a mission of that sort?

General MILES. They might have departed on a mission from a great many ports. We did not know really what bases they had in the mandated islands, and obviously they could have departed [104] from almost any port in Japan, such as Kobe or Yokohama.

General RUSSELL. You stated that you did not know what bases they had in the mandated islands?

General MILES. Very little information on bases in the mandated islands.

General RUSSELL. As I recall, they acquired jurisdiction, such as they had over the mandated islands, as a result of the settlement at the end of the other war in 1918?

General MILES. That is correct.

General RUSSELL. And in 1941 they had had approximately twenty years to develop their bases in the mandated islands, their ports and so forth. Was

there any information in G-2 in preparing ports and bases in any of the mandated islands?

General MILES. Very little, and very general information. We knew that they were developing certain places, such as Palau and Truk particularly, and we suspected Saipan. We relied very largely on information in military and from Naval Intelligence. Taken together it could not have been called any detailed or complete information of possible bases in the mandated islands.

General FRANK. Did you have anything on the Island of Jaluit?

General MILES. I do not remember what we had on Jaluit, but it was one of the islands that we used to discuss and suspect that they were developing.

General RUSSELL. General Miles, in the fall of 1941 did you in G-2 have sufficient data on Japanese developments in the mandated islands to predicate an intelligent opinion as to the [105] possibilities of launching convoys from there which might have included aircraft carriers?

General MILES. I would say that positively we knew enough to form an estimate that such a thing was a strong possibility, not a probability; that they had the means. That they would do it is another matter. They had the means to do it. I would say that our estimate at the time was that it was very possible, if not probable, that they did have those means.

General RUSSELL. Do you know whether or not the data on these developments on the mandated islands is a matter of record any place in the G-2 files?

General MILES. Oh, yes; we had files on them. We had maps and whatever we could get. The Office of Naval Intelligence had even more.

General RUSSELL. Did those maps show the developments, or just show where the islands were?

General MILES. So far as possible we made charts of the islands from one source or another and plotted on those charts, both Naval Intelligence and ours, where we thought they were developing, from what information we could get from traveling natives or missionaries or what have you.

General RUSSELL. I was asking you some questions a moment ago about the inhibition as to our going on those mandated islands. Were the inhibitions against going into the mandated islands only those of force or semi-force by the Japanese people who were there?

General MILES. That is what kept us away, General.

General RUSSELL. They just would not let you go in?

[106] General MILES. They just would not let us go in. They had one excuse or another. I don't remember just exactly what they were; but the net result was that mighty few people got into the mandated islands.

General RUSSELL. Did you attempt to send people from G-2 into the mandated islands in 1941?

General MILES. No, sir. I do not think any attempt had been made by G-2 for ten years. We knew we could not do it and get them out.

General RUSSELL. Were there any restrictions imposed on G-2 from higher authority about attempting to get in there and develop that situation in the mandated islands?

General MILES. Not specifically the mandated islands; no, sir.

General RUSSELL. But you did regard the geographic location of these mandated islands with respect to our naval base at Pearl Harbor as being rather material?

General MILES. Yes, I did, General; but, on the other hand, we knew perfectly well that Japan could attack the Hawaiian Islands without the use of the mandates. I remember very well writing one plan in which we developed the other side, based on a surprise attack launched from the mainland of Japan, with fast cruisers and carriers, carrying troops on their most rapid liners. We worked it up, just how they would take those liners off their routes for one reason or another—this one to be repaired, and so forth—and suddenly launch this an attack from the "Vacant Sea," and suddenly arrive in Honolulu. So the mandates were always a black shadow, but they were not [107] the only means of attacking Hawaii, and we it as far back as the early 1930's.

General RUSSELL. In those studies which were made by you, and others with which you may be familiar, did you ever consider steps which might be taken to discover in advance the mission and dispatch of these convoys to carry out that type of attack?

General MILES. We considered it, General, but, as Ambassador Grew says in that famous dispatch, "Don't rely on us from that point of view." It was much more as we attacked the problem from the other side.

General FRANK. What do you mean by that?

General MILES. I mean, from the Hawaiian side, particularly air reconnaissance and submarine reconnaissance [handwritten: by our own people in Hawaii] to detect any force coming in before it could actually attack. I recall particularly during all of General Drum's command out there in the middle 1930's that he was very much interested and in it. He was constantly sending in papers to War Plans, and they were coming to my desk, involving the possibility of a screen of large bombers which would cover the entire enormous perimeter contained the in these five big Hawaiian islands. That was a current matter almost. Then, of course, the submarine screen was another matter that was constantly discussed. We had about twenty submarines out there in the middle 1930's.

But, to answer your question more succinctly, I do not think any Intelligence officer ever thought that he could be sure of picking up a convoy or attack force or task force in Japan before it sailed and know where it was going. That was beyond our terms dreams of efficiency.

[108] General RUSSELL. Or even the mandated islands?

General MILES. Rather less in the mandated islands.

General RUSSELL. You had less chance there?

General MILES. Yes.

General GRUNERT. Would such a force moving from one of the mandated islands indicate where it was going? Would there be a clear indication that it was bound for Hawaii or elsewhere?

General MILES. It would be no indication at all where it was going, General.

(There was informal discussion off the record.)

General RUSSELL. The G-2 people in their studies had to all intents and purposes eliminated investigations in Japan proper and other Japanese territory to determine probable action on the part of the Japanese Army and Navy?

General MILES. Oh, no, sir. We had not eliminated it. As Mr. Grew says, it was the principal task of the Embassy, particularly of the military and naval part of the Embassy. What I say is just what Mr. Grew says, that we never dreamed that we could rely on getting that information. It would have been almost a military intelligence miracle had we been able to spot a task force in forming and have known before it sailed where it was going.

General RUSSELL. Now, general, if that be true, then the conclusion has been reached, so far as discovering task forces of any sort moving to the Hawaiian Islands, that the chief if not the sole reliance would have to be placed on reconnaissance agencies based on the islands or on United States possessions contiguous thereto?

[109] General MILES. Yes, and at sea. I mean, by submarine and air power.

General RUSSELL. Do you recall when the last estimate of the situation was sent out to the Hawaiian Department from G-2?

General FRANK. Prior to December 7?

General RUSSELL. Yes; prior to December 7, 1941.

General MILES. General, I do not know that any estimate of the situation, if you are using that term strictly, was sent. What we sent were those corrected sheets of the digest on Japan from time to time, whenever we got the information, and copies of the bi-weekly summary. The estimate of the situation is for the information of the Chief of Staff and the Secretary of War. G-2 is the G-2 of the General Staff. I am bringing up that point because I had to be very careful, and I think all G-2s of the General Staff have to be very careful. That the information you give your Chief is something which he must pass on from the command point of view. If that information is habitually sent out to the various overseas departments particularly, you run into the serious danger of telling the Lieutenant General commanding the Hawaiian Department, we will say, something that G-2 thinks which the Chief of Staff does not concur in, and forcing his hand or inducing him to take some action in which the Chief of Staff does not concur. In other words, you must be careful to keep out of the command channel. So you give your information, your summary, your estimate of the situation, to your Chief, and action must flow from the Chief through the command channels; and G-2 is not in the command channels.

[110] General GRUNERT. Insofar as action is concerned on the information that is passed to the subordinate command, is that action then passed back through G-2, or does G-2 prepare it for the Chief of Staff insofar as it pertains to information?

General MILES. I do not know that I have your question clearly.

General GRUNERT. You have gotten information from various sources which influenced you to make an estimate of the situation, which you passed to the Chief of Staff. Now, there are parts of that information, if true, that certain command channels in the Philippines or Hawaii should get. Who insures that they get that information?

General MILES. As a routine matter, G-2 insures it. In other words, all information that pertained directly to the Hawaiian Department or to the Philippine Department that G-2 received, it insured that G-2 in that Department got it. That is exclusive, however, of any deductions in a very broad sense that G-2 of the War Department might draw which would induce action. The latter, in other words, is a command proposition.

General GRUNERT. In other words, you give them the information, but you do not analyze it; or do you?

General MILES. Ordinarily you do not analyze it for them.

General FRANK. You gave information and interpretation only through command channels?

General MILES. Interpretation would certainly go only through command channels.

General GRUNERT. Any warning, then, should come from command channels rather than from G-2?

[111] General MILES. If it is warning that probably would result in action, yes, most definitely.

General RUSSELL. Your G-2 sent a message on November 27 out to G-2 of the Hawaiian Department?

General MILES. Yes; to all departments, as I remember.

General RUSSELL. Now, a few specific questions, General Miles, and I will be through:

On October 27, 1941, Brink reported to your office that there were two aircraft carriers that had been operating among the mandated islands, of which Kaga was one. Was Brink one of your operators?

General MILES. How is the name spelled?

General RUSSELL. B-r-i-n-k.

General GRUNERT. Was there not a Colonel Brink for a time in Singapore, and then he went to the Philippines?

General MILES. Yes; that was the man, I think.

General RUSSELL. This was sent from the Philippines?

General MILES. Yes.

General GRUNERT. He was one of the staff in the office of the A. C. of S., G-2, Philippine Department, and on my recommendation he was sent to Singapore to be directly under the War Department there. That is why I recall a man named Brink.

General RUSSELL. Do you have any recollection about that type of Japanese aircraft carrier being in the mandated islands? Do you have any independent recollection on that subject?

General MILES. I remember that the Japanese carriers were reported in the mandated islands, but I would not be able to [112] pin it down to any particular source.

General RUSSELL. Would it be about that time?

General MILES. It was about that time.

General RUSSELL. In the records some place we have discovered evidence of a photographic mission by aircraft down into the mandated islands in late November or early December of 1941. Do you have any independent recollection of that activity on our part?

General MILES. No, sir; I did not know we sent one.

General RUSSELL. You were in touch in a general way with the Navy at that time in obtaining information from them?

General MILES. I was intimately in touch with the Office of Naval Intelligence.

General RUSSELL. What did you know from the Navy about the location and disposition of the Japanese fleet in late November and early December? Do you remember?

General MILES. My recollection is that the Navy had information of carriers in the mandates, and definitely of a movement of naval vessels and transports, they thought, south through the China Sea in the direction of Indo China and Thailand.

General RUSSELL. What was your impression as to the knowledge which the Navy had generally during the last six months before the attack on Pearl

Harbor of the location of the Jap Navy and various types of craft that were in their Navy?

General MILES. Their information was very general and incomplete.

General RUSSELL. General, when in your opinion did it [113] become apparent that war with Japan was inevitable?

General MILES. On the 27th of November, when we learned that we had practically given what might be considered or probably would be considered by them an ultimatum from then on I considered war as very probable if not ultimately inevitable.

General RUSSELL. That was based almost exclusively on the negotiations between the Japanese who were in Washington negotiating with our State Department?

General MILES. Primarily on that. It was a build-up.

General RUSSELL. In the message of November 27, which I will not discuss with you in any great detail, there was a statement that negotiations had practically ended. I am not quoting, but it said substantially that—although there was a bare possibility that the Japanese might come back for further negotiations. Do you remember that?

General MILES. That was in General Marshall's dispatch?

General RUSSELL. Yes.

General MILES. I do not remember that; no.

General RUSSELL. Let us assume that they did come back after November 27 and continued negotiations: Would that have affected your conclusions about the inevitability of war?

General MILES. Oh, yes.

General RUSSELL. As a matter of fact, they were back on the 1st, 2nd, and 5th of December, were they not?

General MILES. The Japanese reply was not back, sir.

General RUSSELL. I mean, the Japs came back and negotiated.

[114] General MILES. Oh, they continued to stay here and talk, but ~~that~~ it all hinged, to my mind, on the reply or the position taken by the Japanese Government as a result of ~~our~~ the U. S. paper on the 26th of November, I think it was, ~~it~~; which was considered practically an ultimatum.

General RUSSELL. I think that is all.

General GRUNERT. I have a few questions.

General MILES. I should like, if I may, to add a little bit. I am not quite sure of my answer ~~there~~. I ~~did~~ regarding inevitable war. I do not want to give the impression that I thought on November 27th that war was immediately inevitable. I thought that, very definitely, ~~an~~ some action by Japan, a pretty radical action, would be taken almost at once; but that ~~we~~ need not necessarily ~~would~~ be an overt and open attack on the United States. I didn't feel at all sure that war with Japan was ~~practically~~ immediately inevitable any time. ~~But~~ There were a good many things Japan could have done, if she ~~did break those~~ broke her negotiations in Washington short of open war with the United States, and we were considering all of those ~~matters~~ possibilities.

General RUSSELL. That suggests one other question: Did you know that there had been established by reference to the degrees of latitude and longitude lines beyond which, if Japan went with armed force out in the Pacific, the British, Dutch, and Americans would regard that as an act of war?

General MILES. Yes.

General RUSSELL. Then you knew as G-2 that if certain things occurred, we, in association with those powers, might attack?

General MILES. Yes; certainly.

[115] General FRANK. You said you were not prevented specifically by higher authority from attempting to get information regarding the Japanese mandated islands. Was there any general prohibition in this regard? Was there a general attitude of "hands off"?

General MILES. Not specifically affecting the mandated islands. It was simply a question of whether you wanted to send a man to his almost certain death or not, and whether the information you expected to get out of it would be worth that risk. But there was no general or specific prohibition against my sending a man into the mandated islands if I could get him there. But I did not think I could get him in there and get him back alive, or get information from him while there.

General GRUNERT. Was there or was there not a fear on the part of all concerned that doing so and being picked up after having done so would offend the Japanese?

General MILES. Oh, it most certainly would. We would have had to disavow it and swear that we never sent him, and so forth. That is an old part of the game.

General FRANK. On November 27 there went out a message from G-2 of the War Department, which was your organization, saying:

"Advise only Commanding General and Chief of Staff that it appears that conference with the Japanese has ended in an apparent deadlock. Acts of sabotage and espionage probable. Also possible that hostilities may begin."

Do you remember that message?

General MILES. Very well.

[116] General FRANK. You are familiar with the war plan as it applied to Honolulu, the Standing Operating Procedure?

General MILES. Yes; in a general way.

General FRANK. Did not the provisions of that war plan and the Standing Operating Procedure provide for this defense against sabotage?

General MILES. Yes; it provided against all forms of attack, including sabotage.

General FRANK. Why, then, was sabotage especially emphasized in that message?

General MILES. I will be very glad to answer that question, General, but my answer must be somewhat long.

In the summer of 1939 the President issued a directive to all bureaus and offices of the Government to keep out of antisabotage and antiespionage work, except three that were to do it all, F. B. I., O. N. I. and M. I. D. After I took M. I. D. in May of 1940, I began to build up the counter-intelligence part of it. I drafted a written agreement with F. B. I. and O. N. I. delimiting our responsibilities under the President's directive. It was then countersigned by the three Cabinet Ministers concerned. Then I drew up a counter-subversive system for the Army, and later a counter-intelligence fifth-column plan, the first one we ever had. I met certain opposition among my colleagues, the other Assistant Chiefs of Staff and I am relating this only to point out that by the summer of 1941 I had gotten myself in a position where it was definitely established that counter-subversive activity of all kinds was G-2's responsibility and solely G-2's responsibility. I shared the [117] responsibility for measures against an effort overt to attack by a possible enemy with Operations and with War Plans, because I was supposed to give the information on which their orders were based. But I shared with nobody the responsibility for counter-subversive measures, and therefore, when I found on the 27th of November that nothing was specifically said about sabotage in General Marshall's dispatch of that date, the war warning order, I felt it necessary to warn the G-2's, not only of the overseas departments and later but particularly those in this country. It was but sent it to all of the corps area G-2s, because we knew the build-up in this country very well. The F. B. I., the O. N. I., and my people were very worried about what could be done in this country, particularly to the Air Force. General Arnold was very much worried and that He broke loose the next day and occasioned the further dispatch of November 28.

So that was the reason for the emphasis. The policy had already been laid down by General Marshall's telegram of the 27th. So I was simply backing up the policy of the Chief of Staff and emphasizing the form of attack for which I was most directly responsible as G-2, [handwritten:] and reiterating the possibility of open hostilities.

General FRANK. In the beginning of General Russell's questions you gave an answer to the effect that as a result of your background and experience you had felt a strong probability of an air raid or air attack on Honolulu. Is that correct?

General MILES. That was one of the methods of attack to which we were most vulnerable.

General FRANK. At this time, we will say, December 1, 1941, what was your attitude as to the probability of such an [118] air attack?

General MILES. If the Japs attack openly at all, and if their attack was made on Hawaii, I think I would have said on December 1, 1941, that an air attack on the Pearl Harbor installations and the fleet (although I did not actually know the ships were there in Pearl Harbor) was one of the most probable movements that the Japs would take.

General FRANK. Since you went out of your way to caution them about sabotage, why did you not likewise go out of your way to caution them about the probability of an air attack?

General MILES. Because, General, all that had been covered in General Marshall's dispatch in which he specifically ordered such necessary reconnaissances—I remember the use of that word—to protect the Hawaiian Department against attack. And that was the only way—that, and of course radar—that such an attack could have been countered. My message also warned of possible hostilities.

General FRANK. You knew that the following day General Arnold sent a message with respect to sabotage?

General MILES. Yes, indeed.

General FRANK. Did the logic ever occur to you that as a result of emphasizing sabotage in a series of messages it might have the result of de-emphasizing something else?

General MILES. That had occurred to me. I very strongly objected to General Arnold's message on the basis, among other things, that I did not want to overemphasize sabotage and that I had already sent the day before a sufficient message to cover the question of sabotage.

General FRANK. As hindsight, of course, and considering [119] the fact that provisions for all of these defenses were covered in the war plans and other documents, would not the following message have sufficed:

"War imminent. Act accordingly."?

General MILES. For me to send?

General FRANK. No; for the War Department to have sent. That would not have emphasized nor de-emphasized anything, would it?

General MILES. I would prefer not to pass upon the Chief of Staff's wording in his message of November 27.

General FRANK. There were six messages sent between November 16th and 28th. Four of them cautioned against provoking the Japs; three of them emphasized sabotage. Now, with respect to caution against provoking the Japs: while we were leaning over backward as a result of these cautions, what was the attitude of the Japanese, relatively speaking?

General MILES. Their attitude where, General? Here in Washington, in the negotiations?

General FRANK. All over the world. Were they as particular about preventing any suspicion on our part as we were particular about trying to prevent any provocation on their part?

General MILES. Oh, no. They had been provocative for a great many years, particularly since they began their attack on China.

General FRANK. Will you develop that in just a few words?

General MILES. I should say that the Japanese attack in Manchuria and later in China, which, after all, was the basis [120] of our diplomatic negotiations here in Washington in 1941 was the basic cause of it, was the beginning of a very provocative attitude on the part of the Japanese.

General FRANK. What I am after is this: There was little or no attempt on the Japanese side to keep from provoking us, where as there was every effort on the part of the Americans to keep from provoking the Japanese; is that correct?

General MILES. I should say as a general statement that that is very accurate, sir.

General FRANK. I asked that of you because you should have information on that as the War Department G-2 at that time.

General MILES. Yes, sir; but I think it was very general information that at Shanghai and all through the Peiping episode, they had been very provocative, as we all knew; and it was the policy of our Government not to provoke war; to take a firm stand in a certain way, as you know, but not to provoke war with Japan. At least, so we read it.

General FRANK. Do you think that we were leaning over backwards in that attitude?

General MILES. That is a very difficult question to answer, General. I simply say that our policy was to avoid any unnecessary provocative action.

[121] General FRANK. You said you objected to General Arnold's message. To whom?

General MILES. To General Arnold, in the first place, and later, to General Scanlon. It was quite a long discussion, as I remember it.

General FRANK. What were the circumstances under which your objection was finally overcome and the message sent?

General MILES. It had to go to the Deputy Chief of Staff, General Bryden. General Marshall was away. General Bryden did not want to decide it, either, very much. I objected strongly and was backed up by General Gerow. ~~and~~ Our objections were on this line: (1) ~~this~~ an antisabotage message had gone out; (2) ~~that~~ a the proposed message should not go to the air forces alone, but if sent at all, should go to the Commanding Generals for their air forces and for everybody else; and (3) ~~that~~ the message as originally drawn was very drastic. As you know very well, at that time, the Air Force had a lot of young men in command of fields and so forth, and a very drastic order, from General Arnold, particularly, to ~~earge~~ protect planes and so forth, might very well have resulted in somebody's being shot.

I would also like to say, here, that General Arnold's message was primarily addressed to the continental United States; he was thinking about that. What started him was the fact about seven planes arrived at one of your western fields—I think at Salt Lake—all with the same trouble, and from different depots, and he thought there was some real sabotage going on in this country. But, to go on with the story, we finally had to take it to the Deputy Chief of Staff, late that afternoon of the 28th. I don't think it was decided until [122] about six o'clock. General Scanlon was present, presenting the Air side, and I think, General Gerow and General Gullion, Provost Marshal General and General Bryden finally decided that it would be sent in modified form; that is, not directing such drastic action ~~to be taken~~ against anybody who might climb over a fence; and that it would be sent to the Commanding Generals, and that the Air Corps might also, if they desired, send it direct under General Arnold's name to the Air Force, to the Air Commanders concerned: ~~and~~ that was the final decision.

General FRANK. Now, another question that I am asking because G-2 might have drawn a conclusion on it: What was the attitude of the public toward the possibility of war at that time? Can you answer that?

General MILES. I can only give you my impression, that they were not nearly as much worried about it as they should have been. After all, it was only a few months ~~past~~ since we had saved the Army by one vote in the House of Representatives. You remember, I think it was in October 1941 that that vote was taken, and we just barely saved the Army at that time.

General FRANK. What do you mean, "saved the Army"?

General MILES. Well, you remember there was a bill, sir, to send back all the men that had been drafted, put them back on the reserve, or something like that.

General RUSSELL. A bill to demobilize the National Guard.

General MILES. To demobilize the National Guard and send the draftees back. The War Department was extremely worried about it.

General FRANK. Aside from the people "top side" in the Army, can you give me an expression of what the attitude in the [123] Army was with respect to the possibility of war?

General MILES. Not accurately. I attended the North Carolina maneuvers, ~~that November, preceding November,~~ early preceding November, and I don't remember to have heard the matter discussed. The Army in those days, as you well remember, we all remember, was intensely busy in building itself and training and maneuvering and so forth. I would not say the Army as a whole were much concerned as to where war was going to break if they could get their troops ready before the break.

General FRANK. Do you think they felt that war was on the horizon?

General MILES. The Army?

General FRANK. Yes.

General MILES. Yes, sir.

General FRANK. All right.

General MILES. Not necessarily with Japan, but war was on the horizon.

General FRANK. Did you know that there was a Japanese striking force consisting of several carriers and a couple of battleships and a submarine force in the Marshall Islands, in the vicinity of Jaluit, about the 1st of December?

General MILES. I knew that such a force had been reported about there, and about that time.

General FRANK. Was that information given to the Commanding General of the Hawaiian Department?

General MILES. I don't know, sir. I do not remember.

General FRANK. Have you any way of determining that?

General MILES. The records of the Military Intelligence Department undoubtedly will disclose it.

[124] General FRANK. If it were given?

General MILES. Yes, if it were given. I feel very sure that in one form or another he was informed of that report. I say "in one form or another" because one form might very well have been through Navy and Fleet.

General FRANK. Information on the situation surrounding the Hawaiian Islands, you stated some time back, information as to the presence of hostile activity in the waters, would mainly be obtained through submarine reconnaissance and air reconnaissance?

General MILES. That is correct—and radar.

General FRANK. And radar? Since the Navy is the only Department that has submarines, and since also in the plan for air reconnaissance at Honolulu they were responsible for distant reconnaissance, it would appear then that it was the responsibility of the Navy to keep both the Army and the Navy in Honolulu advised and to provide protection against any kind of attack so far as reconnaissance could provide that, is that correct?

General MILES. So far as distance reconnaissance is concerned, they alone had the means of carrying it out.

General FRANK. That is all I have.

General GRUNERT. I want you to explain once more so I can get it clear in mind about the dissemination of information gathered by G-2, of the War Department, so I will put it in various questions. You get information from the State Department, ONI, your own sources, and whatever other sources might become available to you. Now, when you get this information, who judges whether or not particular parts of that information [125] are of value and should be transmitted, for instance, to the Commanding General of Hawaii?

General MILES. The first people who pass on it are the members of the section, the Geographical Section, which includes the country about which we have that information—the Japanese, we will say. Information would pass first through the Far Eastern Section, I think it was called at that time, under Colonel Bratton, of the Intelligence Subdivision of the Military Intelligence. That It would then go to the Intelligence Division, itself, which collated all positive intelligence, dealt with all positive intelligence as distinguished from counter-intelligence, the negative side, and would then be sent out.

If it was simply routine, the Chief in the Military Intelligence Division, G-2, would simply see it passing over his desk. If there were any question about it, it would be brought up through normal channels to the executive officer, who, if he did not feel competent to decide it, would take it up with G-2 men and himself. That was the method.

General GRUNERT. If you were disseminating it, then, to the various commands, or any particular command, would it then pass directly from G-2 to such Commander, and in what form?

General MILES. The normal form would be these semiweekly summaries. I mean That would be the routine. Then any Any particular information of particular importance would be telegraphed out to those agencies concerned with that particular bit of information; in the case of Japan, to (certainly) the Philippines, to Hawaii, to Panama, to the West Coast, possibly and so forth right to our military attache at in China and to the G-2 of the foreign departments, or the corps areas.

[126] General GRUNERT. But when you make an estimate of the situation, that then goes to be processed through War Plans Division, to the Chief of Staff?

General MILES. Yes.

General GRUNERT. Now, if there is any information to be passed out on that estimate, it then must be authorized for you to pass it out, or for them to pass it out directly to those concerned, is that right?

General MILES. Yes. It becomes more than information, then; it becomes an opinion of the War Department, a communication of the Chief of Staff.

General GRUNERT. All right. Now, the next question I have is one on which we will have to go back to the sabotage message. Was that sabotage message of November 27 O. K'd by WPD, or the Chief of Staff, or whom? Or was it necessary to have that O. K'd? Did you send it out directly to the G-2?

General MILES. It was not necessary for the Chief of Staff or his office to pass on it, since it simply carried out a policy already established by the previous

messages of the same date from General Marshall. I do remember, however, consulting, as I almost always did, War Plans, as they consulted me on messages, and I think it was General Gerow who suggested that I add to the message that the G-2s were ~~was~~ to inform their Commanding Generals and the Chiefs of Staff only.

General GRUNERT. Did G-2 do its utmost to inform, by contact with the various agencies made available, so as to best advise the Chief of Staff and keep subordinate commands informed, and so that they could carry out their mission?

General MILES. I did not hear the first of your question, [127] relative to the G-2.

General GRUNERT. Did G-2 do its utmost, so far as you could judge, to carry out its mission, in informing the Chief of Staff of everything they had got, making estimates, and passing down information they thought was pertinent?

General MILES. The answer to that is Yes.

General GRUNERT. Naturally. I wanted to put it in the record.

General MILES. I might add, if I may, that we wrote so much that we got certain complaints—complaints that nobody could read all the stuff we turned out. We certainly tried to do whatever we could.

General GRUNERT. Did so many things go out at one time that the "low side" might have considered themselves as being informed to such a point of saturation that they did not pay much attention to the information they were getting? In other words, "crying wolf! wolf!" so that they became confused, or "fed up"?

General MILES. That could have been, sir.

General GRUNERT. Do you think that the G-2 message—we call it "the G-2 message," of November 27—and the sabotage message—we call that the "Arnold message," of the 28th, which was sent out under the Adjutant General's signature—did you consider whether or not they might be taken by the Command "down below" as modifying or changing the Chief of Staff's instructions of November 27?

General MILES. No, sir; I did not. The Chief of Staff's message of November 27 was a war-warning message, in my mind, all inclusive so far as different forms of attack or dangers [128] might be considered, and my message of the same date in regard to sabotage was simply inviting the attention of the G-2, who was particularly charged with that, in each corps area and overseas department, to that particular form of danger.

General GRUNERT. There was no report from the recipients required?

General MILES. There were no report required.

General GRUNERT. That is, to your message.

General MILES. No answer to my message, of the 27th.

General GRUNERT. No answer? But there was a report required by the Chief of Staff's message of November 27?

General MILES. That is true, sir.

General GRUNERT. The Commanding General of the Hawaiian Department made his report to the Chief of Staff, presumably on the Chief of Staff's message of November 27. Therein, he reported just the measures taken as to sabotage. Did you see that report?

General MILES. I did not see that message—that answer—until after Pearl Harbor.

General GRUNERT. I do not think of anything else. Does anybody else think of anything else?

General FRANK. When General Grunert just asked you about the possibility of confusing those messages on sabotage, you replied from the point of view of the man at this end. Now, consider yourself for a moment as the man at the receiving end of those messages, not knowing who prepared them, nor anything about their source, but from the point of view of their coming from the War Department, and considering that as a single source: under those conditions, might it or might it not have been a [129] little confusing?

General MILES. It might have been, but I think the first message was signed "Marshall."

General FRANK. That is right.

General MILES. That would be my answer.

General FRANK. Now, the next question is: I asked you, in my questions a few minutes ago, as to whether or not you had sent any message to the Commanding General of the Hawaiian Department with respect to the presence in the Marshall Islands of this Japanese force. We have, we think, all the communications that went from the War Department to the Hawaiian Department,

from the 16th of November until December 7. This Japanese force was not in the vicinity of Jaluit until about the 25th. In view of the critical stage of the situation, it would seem that that information was rather vital, as there is no record of its having been communicated. Is there any explanation of that?

General MILES. I wouldn't know what the explanation was, if it wasn't communicated. If we had known at the time, as we probably did, that that information, coming from Navy, was being transmitted to the Fleet in Hawaii, to all of their naval vessels, it might very well have been that we considered that as sufficient, knowing that the two Intelligence branches, Army and Navy, were working in very close cooperation, we thought, everywhere—in Hawaii and the West Coast and in the Philippines, and so forth.

I am a little worried about that message, because I was told, this morning, by Military Intelligence, that there are numbered gaps in their files today, and they do not know where [130] those messages are. We hope you have them, but they do not know.

General RUSSELL. We didn't get them from G-2.

General MILES. How?

General RUSSELL. We haven't gotten anything from G-2.

General FRANK. In the Roberts Commission interrogation of Colonel Fielder, who was G-2 in the Hawaiian Department—

General MILES. Yes, G-2.

General FRANK. He discloses that he was not, prior to December 7, getting this information from the Navy, in Honolulu. He was not getting it.

General MILES. He should have, of course.

General FRANK. That is all.

General GRUNERT. One final question. In your experience as Staff Officer and as a Commander in the field, outside the War Department, would a message signed by Marshall carry more weight with you than one signed by the Adjutant General, or one signed by a Staff Officer?

General MILES. Very much more weight, General, particularly when it begins with some such phrase as "This is a war-warning message."

General GRUNERT. Are there any other questions?

General RUSSELL. What message did he ever send, beginning that way, General Miles?

General MILES. My impressions of the message of November 27, but I haven't it before me.

General GRUNERT. There was one starting out that way, but it happened to be a Navy message. This particular message from the Chief of Staff did not start out that way, [131] according to the record.

General RUSSELL. Who was Creswell?

General MILES. Creswell? He was Military Attache in Japan.

General RUSSELL. I want to go back to my Mandated Islands for a minute, General, because you have excited me a little bit. I want to get some description of those islands. Referring to the Marshall Islands, where these carriers are supposed to have assembled, that attacked, is there anybody on those islands except Japanese?

General MILES. Some natives there, I believe—a few, there.

General RUSSELL. Are there towns and roads and those sorts of things there?

General MILES. The only so-called "civilized people" are the Japanese, there, and the others are natives of the Islands. They don't live in towns, very much, I imagine. My information about the Mandated Islands is very slim, now, particularly now—

General RUSSELL. There is no secret at all about the questions that I am asking, and what I am attempting to develop for my own satisfaction, in arriving at what happened at Pearl Harbor. They had everything on us, yet they sailed up and attacked us, and apparently today G-2 doesn't know where they came from, or how many there were, or where they went to. We have not been able so far to get any very intelligent information on what these convoys were like, if there were more than one. Do you have any ideas about that, the size of the attacking forces?

General MILES. Prior to the attack?

General RUSSELL. No, since the attack. Have you gotten [132] information that led you to know how strong these convoys were that came in there, launching this attack?

General MILES. We have only general information, largely from Naval Intelligence. The ships supposed to be the KAGA and AKAGI, those two very large carriers of theirs, supported by probably some of their older battleships of the KONGO class—their four old battle cruisers; but I have no definite information.

General RUSSELL. I think that is all.

General GRUNERT. Thank you, very much.

(The witness was excused, with the usual admonition.)

(Whereupon, at 12:45 p. m., the Board recessed until 2 p. m.)

No. 1225, June 25th.

Following is paraphrase of cable from Brink. For G-2. On 19th and 20th of June British Commander in Chief Far East and the Director of Operations of Chinese Air Force (General Mow) discussed plans for cooperation in the event of Japanese operations against the British. British plan to use following Chinese airfields as bases from which to attack Japanese sea communications, land troops, and Japanese bases on Hainan Island and in French Indo China in the event of Japanese attack against Malaya or Hongkong: Nanning 23 degrees zero minutes north 108 degrees 30 minutes east: Liuchow 24 degrees 20 minutes north 109 degrees 20 minutes east: Kweilin 25 degrees 20 minutes north 110 degrees 10 minutes east: Chihkiang 27 degrees 30 minutes north 109 degrees 40 minutes east: Hemagyang 27 degrees zero minutes north 112 degrees 30 minutes east. Chinese agree to stock these airfields now with gasoline and bombs. Chinese suggest that the British use airfields in the following area from which to make direct raids on Formosa and the Japanese mainland: Wenchow-Chuchowfu-Kienowhs.

British intend to encourage Guerrilla warfare against the Japanese in the following general areas: Ichang-Kingchow-Hanhu; Singtanhs-Changsha-Yowchow; Nanchang-Haochow-Kiukiang; Soochow-Changshow-Taiping; Canton-Kongmoon-China Sea-Shamchung. Agreements for mutual cooperation will be arranged the 1st week in July at a meeting between British and Chinese staffs in Burma. Signed Orear.

CONFIDENTIAL

[1] Rec'd—G-2 Jan 29, 1942

HEADQUARTERS HAWAIIAN DEPARTMENT

OFFICE OF THE ASSISTANT CHIEF OF STAFF FOR MILITARY INTELLIGENCE

Fort Shafter, T. H., 31 Dec. 1941.

In reply refer to: 350.05 (G-2)

Subject: Report on Internal Subversive Activities for the Month of December 1941

To: Assistant Chief of Staff, G-2, War Department General Staff, War Department, Washington, D. C.

1. Reference paragraph 6a, CONFIDENTIAL letter, AG 350.05 (8-5-40), M-B-M, dated 17 August 1940, the following items are submitted:

HAWAIIAN DEPARTMENT, INCLUDING ALL POSTS, FIELDS, AND DISTRICTS

Period: 15 November 1941 to 15 December 1941

Individual and special cases

The abnormal conditions which have prevailed in this Department since 7 December 1941 have made inadvisable, for the time being, continuing investigation of minor routine cases, other more pressing matters having been given priority. Only cases of more active character, such as have been listed in previous reports with an asterisk to denote their importance continue under active investigation at present. It is anticipated, however, that the summary for next month, January 1942, will be in its usual complete form.

Situation summary

PROPAGANDA: Japanese radio broadcasts, presumably originating in Japan, give highly exaggerated accounts of Japanese success, together with violent anti-American propaganda. No local stations are permitted to broadcast in Japanese (or in any other foreign language). Except for these broadcasts there has been no attempt at enemy propaganda. Gossip and loose talk among local residents of all nationalities, both service personnel and civilian, were common immediately after the raid of 7 December, but have subsided to a reasonable volume and are decreasing. No instance has been verified of deliberate spreading of rumors as enemy propaganda.

SUSPICIOUS CASES almost without number have been reported and investigated, with results largely negative. Among service personnel, the unanimous report of all S-2's has been that even those individuals in the past most suspected of subversive tendencies have proved intensely loyal when put to the test of actual war conditions.

Estimate of the situation

[2] No attempt can be made in this summary to cover other than the internal situation, as only preliminary investigations have been made of most of the aliens in detention, and the labor of checking reports of alleged subversive actions continues, with little positive result, on a 24 hour daily basis. In general it may be said, however, that the morale of the civilian populace is very high, and that labor disputes and other disturbing factors have disappeared in the general effort to effect a united front.

Within the various Army establishments morale is at the highest level. However, in anticipation of the probable "let-down" incident to the lessening of the initial excitement, the C. S. System is being completely reorganized and enlarged so as to cover effectively all of the newly arriving units as well as those already established in the Department.

SECRET

Subject: Reports of Rumors Concerning Japanese Attack on Hawaii.

[Stamped:] Secret. Date 12/18/41. HQ. 3RD C. A. Initial, PLT.

To: Assistant Chief of Staff, G-2

War Department

Washington, D. C.

Attention Lt. Col. W. A. Holbrook, Jr.

1. This office is in receipt of a report, information of undetermined reliability, source usually reliable, which is quoted as follows:

"Three weeks ago SENATOR GILLET at Washington warned officials what was going to happen. Stated that Japan would declare war on United States Dec. 19. Also told of an attack on Hawaii. No attention paid to assertions and Dec. 9 held conference with some of the leading officials of New York City, State of New Jersey, Jersey City and two congressmen from Washington who flew back for this conference. Conference was for purpose of possibly setting up an Individual Intelligence Unit because they are disgusted with the actions of G-2 in some cases and as far as O. N. I. is concerned they are so disgusted against this group that they do not know what to do about it. At Washington Dec. 9, one of the highest officials of the British Government got in communication with the same country's officials at New York and in substance here is the story—the Japanese Business Group at Honolulu had invited practically all the officers at Pearl Harbor to a big celebration and dinner on Saturday evening. A vast number of the Naval officers were reported to have been so drunk that they had to be taken to their quarters. He also stated that the damages suffered by the United States Government at Honolulu and on the sea were far greater than the total damages that England suffered the first year of the war on the sea. Am positive that SENATOR GILLET has received a lot of his information from WYTHE WILLIAMS, who has retired from the air and is now preparing several books. Remember that WILLIAMS is a pal and confidant of ATTORNEY GENERAL BIDDLE and still the F. B. I. is reported to be afraid of WILLIAMS and the material that he sends out. WILLIAMS is smart. He has a staff here in New York that

172 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

includes the ex-Chief of Police of Berlin (Note, G-2 III C. A. : Believed to be one GRZYSINSKI, who has lectured against Nazism in New York) and other good men." Destroyed by 84 Dec. 29, 1941.

2. However much or little truth there may be in this report, the possibility is not overlooked by this office that there may be an attempt to make political capital at the expense of military and naval morale.

3. No other distribution of this report whatsoever has been or will be made from this office. No action is contemplated except at the request of the War Department.

4. The original report, quoted above, was dated December 10th. The capitalization of names of persons was done by this office. The source was a Pittsburgh source which has been discussed with General Miles.

I. B. 150

BRIEF PERIODIC ESTIMATE OF THE SITUATION, DECEMBER 1, 1941—MARCH 31, 1942

Record Section

G2/1
TJB

[1] I. B. 150 NOVEMBER 29, 1941.

Memorandum for the Chief of Staff:

Subject: Brief Periodic Estimate of the Situation, December 1, 1941—March 31, 1942.

I. General.

1. This estimate is addressed to the objective of Nazi defeat. Its purpose is to examine the factors of strength and weakness and of strategic positions of the Nazis and of their opponents, in order to present the military possibilities and probabilities during the period December 1, 1941 to March 31, 1942.

2. a. During that period Germany, though weakened by her losses in Russia, will remain the only power capable of launching large scale strategic offensives. Her success in Russia and the advent of winter make disposable a larger portion of German land and air power than at any time since the beginning of the Russo-German war. On the other hand, the price she has had to pay for her Russian success and the width of the wasted zone behind her Eastern Front indicate that

a considerable period of time would be required for the reorganization and redistribution of her major forces. The German conduct of war, so far, has been characterized by a thoroughness and deliberation in this regard. Between the end of one campaign and the launching of the next there have been considerable periods of time. In the present case, if Germany should decide to shift the theater of war, all indications point to an even greater necessity for a considerable time lag than has so far existed between her successive campaigns. Large scale German strategic offensives are therefore not to be expected outside of the Russian theater within the period under consideration. It is much more probable that Germany will continue her attack on Russia, particularly in the Ukraine and the North Caucasus plain between the Azov and Caspian Seas during the winter and early spring.

[2] b. Japan also has the strategic initiative, but to a much more limited degree than is the case with Germany. Japan, already extended militarily, has a multiplicity of strategic objectives; but for a variety of reasons, she cannot concentrate the required forces to attack any of them on a large scale and with assurance of success. A possible exception to the latter statement lies in the contingency of a serious depletion of Russian forces in eastern Siberia. But even in this case, a large scale Japanese strategic offensive against Siberia during the period in question is somewhat doubtful in the light of present politico-military situation and of the rigorous winter climate in that region.

c. Great Britain is pressing a limited strategic offensive in Libya and has taken the aerial offensive over Western Europe. She, too, is extended militarily and more extensive ground and aerial action is beyond her means.

d. All other belligerent or potentially belligerent powers must be considered incapable of large scale strategic offensives during the period in question. The United States, committed to the defeat of Nazi Germany, is an increasingly important element in the situation. Our influence is exerted in naval and aerial participation in the Battle of the Atlantic, in the supply of material and technical assistance to the four land theaters and in psychological, economic and political action against the Axis throughout the world. But all this does not sum up to a large scale strategic offensive. We have only a means of strategic maneuver—our ability to make available more or less material and technical facilities and in their allocation to those theaters where they will be most advantageously employed.

e. Neither the economic nor the psychologic situation in Germany indicates any possibility of weakening the Nazi power to a critical extent during the period in question.

f. From the above it must be concluded that, during the period in question:

(1) Neither the anti-Axis nor the Axis powers can force a decision.

(2) The anti-Axis powers will have a period of at least four months in which they may strengthen their position in one or more of the four important theaters of war, and in which they may decide upon a regrouping of forces, subject to certain physical limitations, consonant with their chosen long range strategy for the defeat of the Nazis.

[3] II. *Brief Estimate on the Theaters of War.*

1. *The British Isles.* This theater is the citadel of the Anti-Axis Powers. Its security is, therefore, so essential to Nazi defeat that it must be held. The ground, sea and aerial defenses of the islands have been and are being materially strengthened.

For reasons given previously, it is not believed that Germany will be in a position to attempt an invasion of the islands during the period in question. It is probable that an invasion, if attempted, will be delayed until mid-summer of 1942. An attempt made at that time will probably be unsuccessful. As for the present, after a short delay of reorganization and transfer, Germany can launch large-scale air attacks on the United Kingdom at any time that she is willing to move the necessary forces from the Russian front. In view of improved British defenses and of the weakening of the German Air Force, however, it is estimated that in the period in question such attacks cannot reach the intensities of those of the winter of 1940-41.

From this theater the only British offensive capability lies in the air. It is to be expected that strategic bombing of Germany and the occupied territories will continue; but that this action will be indecisive.

Material aid from the United States has been an essential element in the resistance and survival of the British Isles. Continuance of this aid is still essential. It is, fortunately, the easiest of all the land theaters for us to aid.

2. *The Atlantic.* The Battle of the Atlantic is essentially a struggle for the sealanes radiating from the United Kingdom, this conflict is now trending against Germany. Sinkings by the Axis are decreasing and ship construction in Britain and the United States is increasing. It is now probable that replacements have overtaken losses. Figures on ship and tonnage losses during 1941 are as follows:

	Losses (British, Allied, and Neutral)			
	Total		Monthly Average	
	Ships	Tonnage	Ships	Tonnage
January 1 to June 30 (6 months).....	628	2,755,242	105	459,207
June 30 to Nov. 15 (4½ months).....	285	1,000,990	63	222,442

[4] During October over 4,200,000 tons of goods were imported into the United Kingdom, as compared with a monthly average for the year of approximately 2,500,000. The October imports were received after the United States Navy began convoy duty in the Atlantic. As the weight of the United States Navy continues to increase, success in the Battle of the Atlantic should be assured.

Since Germany's means of attack (surface raiders, long-range planes and submarines) are of limited use in other theaters, it is to be expected that she will continue the offensive in this theater, regardless of results or of operations elsewhere.

The United States is contributing powerfully to the decision in the Battle of the Atlantic by direct naval action and by the building of cargo vessels. Continuance of this action is essential to the defeat of Germany.

3. *Eastern Theater.* By a series of relentless offensives Germany has occupied vast stretches of terrain, including many of Russia's industrial regions and has inflicted grave casualties on the Red Army. But Germany has suffered great losses in men and material, and has not yet attained her basic objectives of destroying the Russian armies and the Stalin regime. While Germany could transfer her principal military effort to other theaters this winter, it is estimated that she will continue to concentrate on the attack on Russia. Specifically she will:

Seek to destroy the mass of the Russian armies.

Continue the siege of Leningrad.

Attempt to cut the Russian supply lines to Archangel and Murmansk.

Seek to seize the general line of the Volga.

Attempt to overrun the Caucasus, thus obtaining oil and securing a jump-off position for an eventual advance into the Middle East.

The most serious German threat is southeastwards to the Caucasus, and her goal is oil. Axis forces are extending eastward north of Rostov toward the Don. They may capture Stalingrad and gain control of the Volga south to its mouth at Astrakhan. Russian defense of the North Caucasus will probably eventually fail, after substantially delaying the Axis advance. With sufficiently determined and prompt allied aid, the Germans may be kept from occupation of the Trans-Caucasus and control of the Baku oil fields.

[5] The U. S. S. R. is weaker, relative to Germany, than at the outset of hostilities. Her political structure has remained stable and her armies, while depleted, have not been irreparably defeated. Russia is favored by the following: The extreme cold of winter is a deterrent to operations, and Russian training and technique in severe winter weather is considered better than that of the invaders. While the Soviet situation is critical, ready availability of manpower resources is in Russian favor. Defense industry is in operation at approximately 60% of pre-war volume. British and American material assistance is being received; increased and continuing allied assistance is urgently required.

The following considerations are unfavorable to the U. S. S. R.: The uncertainty of the Far Eastern situation causes concentration of efficient Soviet troops along the Manchukuo frontier, not available for use in the western theater. The Soviet Army has shortages in tanks, all weapons, probably in all ammunition. The shortage in tanks is especially serious; that in small arms and small arms ammunition is less marked than in other weapons. The means of supply from the outside world are difficult and precarious. To date no British operation elsewhere

has been sufficiently strong to cause any withdrawal of German troops from Russia.

Aside from surrender, which seems unlikely, Russia's only feasible line of action is to resist stubbornly in the hope that attrition, climate and lengthened communications will eventually bring her assailants to a standstill. By the spring of 1942 it is estimated that organized but depleted Russian armies will stand behind the Volga and perhaps even as far west as Moscow. It is also probable that Russian forces will hold the Caucasus mountains and Trans-Caucasia.

With her industry dislocated, Russia is in extreme need of material assistance from abroad. She requires raw materials, machine tools and munitions. Unfortunately, the avenues of entry are vulnerable, limited in capacity and very awkwardly located. Aid to Russia has been planned on the basis of a total import capacity of 500,000 tons per month. It is by no means certain that this figure will be reached. Russian requirements can only be met by the United States and Great Britain. This relatively small contribution at the crisis of the Russo-German war appears to be the total material means available to the Democracies to influence the struggle within this theater.

4. *Middle Eastern Theater.* In this theater, extending from Libya to the Caspian, only the western segment is active. In Libya the British are engaged in an offensive the issue of which is still in doubt. Farther to the east, Syria, Iraq and Iran are shielded from the war for the time being by neutral Turkey and by the Russian forces in the Caucasus.

[6] Because of the Russian campaign and certain great logistic difficulties, there is practically no danger of an Axis major offensive in this theater, from the north, before the spring of 1942. Even a British defeat in their current Libyan operations would so exhaust the Axis forces in North Africa as to free Alexandria and Suez from the threat of a thrust from the west. A British victory in Libya would probably force German entry into Tunisia and their occupation of Algiers and Morocco. But such an eventuality would be more apt to delay than to hasten an all-out German offensive, from the west and the north, against the Middle East Theater.

Even if successful in their current Libyan offensive, it is not believed that the British will be able to advance through Tripolitania without a considerable delay for reorganization. It is therefore probable that from the British point of view this theater will shortly become a defensive one, with a minimum of several months available for the completion of its organization.

In the eastern sector of this theater (the Levant, Iraq and Iran), the British are gradually building a substantial force to meet any Axis threat to the area through Turkey or the Caucasus Mountains. In the Levant, there are three Australian divisions with other troops, and General Wavell told our Military Observer in Iran that he expected to have at least ten divisions in Northern Iraq by March of 1942.

The United States is committed to providing great masses of material to the Middle East, and is undertaking vast construction projects to facilitate supply. Except the British Isles, the Middle East is the most accessible of the important active theaters to us, and our lines of supply to it, though long, are the least vulnerable.

We are building up an influence on British military policy in the Middle East. Further American commitments, including probably the eventual employment of our armed forces, will be necessary in this region.

5. *The Far Eastern Theater.* Here the initiative rests with Japan in spite of her military overextension. She has the following lines of action open to her:

a. Attack Siberia.

b. Attack Yunnan Province to cut the Burma Road with a view to an early end to the war with China.

[7] c. Occupy Thailand.

d. Through Thailand, attack

(1) Burma and the Burma Road,

(2) Malaya.

e. Attack the Philippines and Hong Kong, preparatory to a movement on Singapore or the Netherlands East Indies.

f. Contain or isolate the Philippines and Hong Kong and

(1) Attack Singapore

(a) directly, by sea;

(b) by sea in conjunction with a land attack through Thailand and Malaya.

(2) Attack the Netherlands East Indies.

g. Bide her time, wait for a better opportunity to pursue any of the above lines of action, hoping that the course of events will turn in her favor.

h. Seek a general settlement through American mediation, including an understanding with the United States and Great Britain as to political and economic penetration of southeast Asia and the southwestern Pacific.

i. Reorient her whole foreign policy by withdrawing from the Axis.

(h) and (i) are impossible, short of a complete overthrow of her governing forces.

The most probable line of action for Japan is the occupation of Thailand.

The forces of all other countries in the Far East are on the defensive before Japan. The British Commonwealth, the Netherlands East Indies and the United States are in consultative association for the defense of Malaysia. To date this association has been effective in slowing down the Japanese penetration to the southwest. China is containing the equivalent of 30 Japanese divisions. The U. S. S. R., hard pressed for troops in European Russia, has reduced her Siberian garrisons to what she estimates to be the minimum necessary to deter Japan from attacking to the north. So far she has been successful in this effort.

China, aided and encouraged by America, will remain in the war against Japan and will continue to contain important [8] Japanese forces. The effective use of China's unlimited manpower, as an anti-Axis potential, depends entirely on the extent to which she is able to equip it, particularly in artillery and aviation. For this, she is entirely dependent upon the United States. The stronger the Chinese become, the more Japanese troops will be pinned down in China, thereby releasing further Russian strength for use against Hitler.

Although China is receiving an increasing amount of equipment from this country, a major offensive by the Chinese cannot be expected during the period ending March 31, 1942.

The British Imperial forces in Malaysia and at Hong Kong occupy a purely defensive role. The forces in Malaya have recently been re-enforced by additional troops from Australia, New Zealand (air), and India, while those in Hong Kong have been augmented by the arrival of Canadian levies. Both of these localities present a very strong defense against any possible Japanese attack.

The people and government of the Netherlands East Indies have continued, affirmatively and constructively, to function practically as a sovereign state, loyal to the mother country. As evidence of Dutch spirit, they (a) have reorganized their army, (b) are actively at work manufacturing needed army equipment, (c) are actively training reserves, (d) have expanded their system of air fields throughout the islands, (e) have cooperated with the British and United States governments in preparation of extensive plans for defense, (f) have refused to renew their commercial treaty with Japan, (g) have delivered to Japan only 10,000 tons of oil since January 1, 1941—said delivery having been on an old contract still in force.

In the Far East the United States is concerned as a possible belligerent and also as a prime source of war materials for China, the British Commonwealth and for the Netherlands East Indies. We are in process of sending a few military airplanes to Thailand. But this theater will be a secondary one from the point of view of supply. Under all circumstances we will continue to be able to supply Australasia, the Dutch East Indies, and probably also China, though somewhat precariously, through the Burma Road. Siberia will become completely cut off if Japan attacks Russia.

Our influence in the East Eastern Theater lies in the threat of our naval power and the effort of our economic blockade. Both are primary deterrents against Japanese all-out entry in the war as an Axis partner. If we become involved in war with Japan we could launch a serious offensive against her by Naval and Air forces. But such an attack would fall short of a major strategic offensive because it could not be decisive within [9] a reasonable time, and still more, because it would be a diversion of forces away from rather than toward our objective, the defeat of the Nazis.

[10] III. *Morale.*

The outstanding feature of the war in 1941 has been the rise in anti-Axis and the decline in Axis morale.

The anti-Axis powers have been heartened by the Failure of the German air attack on Britain, the decreased German success in the Atlantic, the continued resistance in the Middle and Far Eastern theaters, the drain on Germany of the Russian Campaign and of her conquered territories, and probably most of all,

by the continued progress of America from neutrality towards participation in the war.

Even more notable has been the decline in Axis morale. In Italy and Japan the reasons are obvious. Both are weary of unsuccessful war and economically distressed. But Germany presents a true paradox. Here is a warrior nation which has made colossal sacrifices to build war power and has had unprecedented success in war—and yet is wholly apathetic. No enthusiasm prevails, only the desire to see it all end.

In any given period, a nation at war generally finds itself in one of three military situations. To each of these situations there should be a corresponding moral reaction. These situations and reactions are:

Military Situation

Moral Reaction

- | | |
|--|---|
| 1. Superiority of strength.
Possession of initiative.
Unbroken success. | 1. The elan of victory—fighting with confidence of success. |
| 2. Approximate equality in strength.
Initiative doubtful.
Ultimate success still in balance. | 2. The grim struggle—fighting to gain success. |
| 3. Inferiority in strength.
Strategic initiative lost.
Ultimate success doubtful. | 3. Their "back to the wall"—fighting prevent defeat. |

Perhaps the most fundamental fact in the war situation today is that Germany is, and has continuously been in military situation Number 1, while the moral reaction of her people is, and has been for some time rather lower than number 2.

The morale factor in the war will be affected by the out [11] come, probably within the next month, of the operations in Russia and in Libya, and by Japan's decision. But there is no reason to believe that the trend of 1941 in German morale will be reversed or even materially reduced in the period under discussion.

In this factor lies the germ of Nazi defeat.

[Paraphrase of a SECRET RADIOGRAM]

G2/CI
FMH

Received at the War Department, November 29, 1941.

From: Fort Shafter, November 29, 1941. No. 986.

To: TAG

With reference to protection of vital installations outside of Military reservations such as highway bridges, telephone exchanges, and power plants this headquarters by confidential letter of 19 June, 1941 asked the Governor of the territory to use the authority given him by the Organic Act Section 67 which provides that the Governor may call upon the Naval and Military Force Commanders of the United States in the Hawaiian Territory to suppress or prevent invasion, lawless violence, insurrection, etc. In accordance with the above stated Authority on 20 June 1941 the Governor made a confidential formal demand in writing on this headquarters to supply and to keep on furnishing such suitable protection as may be required in order to prevent sabotage, and violence of a lawless nature in connection therewith, being done in the territory against vital structures and installations. Suitable military protection in accordance with the above request is now being given important civilian installations and structures. Upon the suggestion of this headquarters, in connection with the above, the county and city of Honolulu enacted, an ordinance on 30 June 1941 permitting the Hawaiian Dept. Commanding General to restrict the use of and travel upon or to close within the county or city of Honolulu any road whenever such action is necessary in the interest of National Defense. No exercise of the authority thus given has yet been necessary. Cordial relations exist and have been maintained and mutual cooperation has been given on all pertinent matters which involve the FBI and all other Federal and Territorial Officials.

In regard to the secret radiogram of your office numbered 482 dated November 28, 1941, within the scope of investigative responsibility of the War Department (Paragraph No. 3 MID SC 30-45) and Military establishments which include equipment and personnel, full precautions against activities of a subversive nature are being taken.

SHORT.

NOVEMBER 27, 1941.

Memorandum for The Adjutant General (through secretary, General Staff):
Subject: Far Eastern Situation.

The Secretary of War directs that the following secret, first priority, message be dispatched by cable, radio or telegraph (whichever method is the most secure from the viewpoint of secrecy) to each of the following:

Commanding General, Hawaiian Department

Commanding General, Caribbean Defense Command

Negotiations with Japan appear to be terminated to all practical purposes with only the barest possibilities that the Japanese Government might come back and offer to continue. Japanese future action unpredictable but hostile action possible at any moment. If hostilities cannot, repeat cannot, be avoided, the United States desires that Japan commit the first overt act. This policy should not, repeat not, be construed as restricting you to a course of action that might jeopardize your defense. Prior to hostile Japanese action you are directed to undertake such reconnaissance and other measures as you deem necessary but these measures should be carried out so as not, repeat not, to alarm civil population or disclose intent. Report measures taken. Should hostilities occur you will carry out the tasks assigned in Rainbow Five so far as they pertain

to Japan. Limit dissemination of this highly secret information to minimum essential officers.

L. T. GEBOW,
Brigadier General
Acting Assistant Chief of Staff.

MILITARY INTELLIGENCE DIVISION G-2,
Washington, October 28, 1941.

INFORMATION RECEIVED FROM THE ORIENT

Dated August 26, 1941.

1. "Mr. HIROTA, a presiding officer at directors' meeting of the Black Dragon Society, told of an order issued by War Minister TOJO (now Premier) "to complete full preparation to meet any emergency with United States in the Pacific. All guns to be mounted in the islands of the Pacific under Japanese mandate. The full preparation to be completed in November."

2. HIROTA and others are said to have stated: "War with United States would best begin in December or in February."

3. "Very soon," they say, "the Cabinet will be changed. The new Cabinet would likely start war within sixty days."

No. 504, July 21st.

Recently imposed restrictions of indefinite duration on land, water, and air travel in Japan reduces available services southward to NYK Transpacific liner. Application has been made for reservations through to Manila on first possibility namely Yawata sailing Yokohama August 14th Shanghai August 19 arriving Manila August 21 without touching Hongkong. Company states that reservations cannot be confirmed for several days. If it is desired that Pape carry digest on Japanese vessel he requests specific authority therefor. If not, suggest that assistant naval attaché in Shanghai be requested to forward digest to Manila by first available safe hand and if it does not arrive before Pape leaves he be authorized to pick up Manila copy of digest. Only other alternative is for Pape to go to Shanghai first available transportation and to proceed thence by whatever combination of clippers and non Japanese shipping will put him soonest in Singapore. Schedule of British and Dutch lines are not available to their agents in Japan. Assist naval attaché in Shanghai has been requested to secure and forward pertinent information if possible. No detailed schedule can be reported until transportation to Shanghai is secured and possibly until after arrival there.

Memorandum for the Adjutant General:

Subject: Secret Radiogram

1. The Secretary of War directs that a secret radiogram, as follows be sent to the:

Commanding General, Caribbean Defense Command

Commanding General, Philippine Department

Commanding General, Hawaiian Department

Commanding General, Fourth Army

For your information stop Deduction from information from numerous sources is that the Japanese Govt has determined upon its future policy which is supported by all principal Japanese political and military groups stop This policy is at present one of watchful waiting involving probable aggressive action against the maritime provinces of Russia if and when the Siberian garrison has been materially reduced in strength and it becomes evident that Germany will win a decisive victory in European Russia stop Opinion is that Jap activity in the south will be for the present confined to seizure and development of naval comma army and air bases in Indo China although an advance against the British and Dutch cannot be entirely ruled out stop The neutrality pact with Russia may be abrogated stop They have ordered all Jap vessels in US Atlantic ports to be west of Panama Canal by first of August stop Movement of Jap shipping from Japan has been suspended and additional merchant vessels are being requisitioned end

II. That a copy of the above radiogram be furnished to the Chief of the Army Air Force.

L. T. GEROW,
Brigadier General,
Acting Assistant Chief of Staff.

*Nov. 4	A 6248	24330	Tokyo 725.....	Counter proposals will be given in #726 & 727. Conditions both within and without our Empire are so tense that no longer is procrastination possible. This is our last effort. The success or failure of the pending discussions will have an immense effect on the destiny of the Empire of Japan.
*Nov. 4	A 6249	24334 to 24337	Tokyo 726.....	Proposal "A"—Submitted in Part to State Dept. on Nov. 7, 1941. "How hard have we fought in China for four years. What tremendous sacrifices have we made. They must know this . . . In any case, our internal situation also makes it impossible for us to make any further compromise."
Nov. 4	A 6250	24338	Tokyo 727.....	Proposal "B"—Never submitted. "A last effort to prevent something happening."
#Nov. 4	A 6251	24339	Tokyo 730.....	"Ambassador Kurusu is leaving by clipper on the 7th. He is carrying no additional instructions (!)"
**Nov. 5	N 6254	24373	Tokyo 736.....	It is absolutely necessary that all arrangements for the signing of this agreement be completed by the 25th of this month. (Of utmost secrecy.)
#Nov. 5	N 6275	24386	Tokyo 734.....	Ambassador Kurusu left the 5th for (Shanghai(?)).
#Nov. 6	A 6302	24439	Tokyo 739.....	We are sending Ambassador Kurusu to show our Empire's sincerity. . . To make it sound good we are telling the public. . . Both the Army and the Navy are pleased. (Note: See JD #6017.)
Nov. 7	N 6320	24479	Wash. 1040.....	There is danger that America will see through our condition. If we have made up our minds to a final course of action it would be the part of wisdom to keep still about it.
Nov. 8	N 6335	24533	Manila 722.....	Spy report on U. S. aircraft in the Philippines and analysis. (Note: This is why we did not worry too much over Japanese espionage.)
[8]				
Nov. 12	N			"Dissemination to White House." (This memorandum in Kramer's handwriting records reasons for giving original translations to Pres. Roosevelt (& Sec'y Hull) after Nov. 12, 1941. Prior to that time Memoranda forwarding Paraphrases of important messages had been furnished.)
*Nov. 12	N 6415	24373	Tokyo 762.....	The United States is still not full aware of the exceedingly criticalness of the situation here. The date set in message #736 is a definite deadline. The situation is nearing a climax . . . time is indeed becoming short.
#Nov. 12	N 6416	24654	Tokyo 763.....	Germany putting pressure on Japan to get tough with the U. S.
Nov. 17	A 6540	24853	Hsinking #1.....	Umetsu to Kurusu (Nov. 6, 1941).
*Nov. 17	A 6541	24854	Hsinking #2 (Appended to #1).	Manchukuo-Soviet Relations. (It would be impossible for us to fight the Soviet Union unless something unforeseen happens. The Kwantung military command is restraining the forces there from any rash action. The Soviet is also endeavoring not to antagonize our country.)
*Nov. 17	A 6542	24856	Hsinking #3 (Appended to #1).	Estimate of the Russo-German War. (The foundations of the Stalin regime are very firmly fixed. The outlook for any early close to hostilities in Europe is fading.)
**Nov. 17 & 22.	A 6553	24877 24857 & 25139	Wash. 1090.....	Nomura's swan song (Nov. 14, 1941). (The policy of the American Govt. in the Pacific is to stop any further moves on our part, either southward or northward. They are contriving by every possible means to prepare for actual warfare. It is not their intention to repeat the Munich Conference. The apex of German victories has been passed. The United States would not favor us at the sacrifice of China: This war will be long, and whoever can hold out till the end will be the victors. I would like to caution patience for one or two months to get a clear view of the world situation. This would be the best plan.
[9]				
Nov. 17	A 6638	24878	Tokyo.....	Reply to Nomura. (The fate of our Empire hangs by the slender thread of a few days. I set the deadline. There will be no change.)

NOVEMBER 1941—Continued

DATE	JD#	SIS#	OTHER#	BRIEF
*Nov. 22	A 6710	25138	Tokyo 812.....	There are reasons beyond your ability to guess why we wanted to settle Japanese-American relations by the 25th, but if the signing can be completed by the 29th, we have decided to wait until that date. This time we mean it that the deadline absolutely cannot be changed. After that things are automatically going to happen.
Nov. 24	N 6731	25171	Tokyo 969.....	We would welcome peace between Germany and the Soviet Union.
#Nov. 24	A 6737	25174	Wash. 1148.....	Continue your efforts in guiding newspaper opinion.
*Nov. 24	A 6744	25178	Tokyo 823.....	The time limit set in my #812 is in Tokyo time. (See JD #6710.)
Nov. 26	A 6801	25322	Tokyo 2319.....	Should negotiations collapse . . . we will completely destroy British and American power in China. Keep absolutely quiet the existence of these decisions. (Circular to China Net—Nov. 14, 1941.)
#Nov. 26	A 6841	25344	Tokyo 836.....	Telephone Code (see JD 6890).
Nov. 26	N 6850	25392	Tokyo 2354.....	Winds Code—Morse (Nov. 19, 1941-J19).
*Nov. 28	N 6875	25432	Tokyo 2353.....	Winds Code—Voice (Nov. 19, 1941-J19).
			Appended to JD 6875..	(Singapore version of the Winds Code. (N. E. I. (Thorpe) version of the Winds Code. (N. E. I. (Foote) version of the Winds Code. Japan-U. S.=East Wind Rain. Japan-U. S. S. R.=North Wind Cloudy. Japan-British=West Wind Clear (including N. E. I.).
Nov. 28	N 6890	25443		Washington-Tokyo Telephone Conversation Nov. 27, 1941 (2327-2334 E. S. T.)—The south, southward matter. A crisis does appear imminent. Regarding negotiations—do not break them off. We have a crisis on hand and the Army is championing at the bit. [Note: This was the only telephone conversation of any importance.] (See JD 6841.)
#Nov. 26	A 6891	25435	} Wash. 1180	Our failure and humiliation are complete.
[10]	6896	25436		
#Nov. 28	A 6892	25437	Wash 1181.....	It is better to wire urgent news than to phone it. The United States has gone ahead and presented this humiliating proposal (of Nov. 26th). Negotiations will be de facto ruptured. Do not give the impression that negotiations are broken off.
*Nov. 28	A 6898	25445	Tokyo 844.....	
Nov. 28	N 6899	25446	Tokyo 843.....	Tokyo Broadcast Schedule.
#Nov. 29	N 6908	25476	Wash 1197.....	Ref. Tokyo 843, recommends change in Broadcast Schedule—Nov. 27, 1941. (See JD 6899.)
Nov. 30	N 6921	25496	Tokyo 857.....	Make one more attempt. Please be careful that this does not lead to anything like a breaking off of negotiations.

[11]

DECEMBER 1941

#Dec. 1	N 6939	25545	Tokyo 2436.....	Destroying codes with chemicals.
*Dec. 1	N 6942	25556	Berlin 1393.....	Ribbentrop said, "It is essential that Japan effect the New Order in East Asia without losing this opportunity." "Should Japan become engaged in a war against the U. S. Germany, of course, would join the war immediately." Foreign Minister Ribbentrop requested that the contents of our talks be kept a strict secret.
**Dec. 1	A 6943	{ 25552 25553	} Tokyo 985.....	The conversations between Tokyo and Washington now stand ruptured—broken. Say <i>very secretly</i> to Hitler and Ribbentrop that there is extreme danger that war may suddenly break out between the Anglo-Saxon nations and Japan, and this war may come quicker than anyone dreams. Will not relax our pressure on the Soviet, but for the time being we would prefer to refrain from any direct moves in the north. Impress on the Germans and Italians how important secrecy is. (Nov. 30, 1941.) [Note: Coded message forwarded by Com 16 as GYROF 010001, 010014, or 010027. Also forwarded from London as Admiralty #104 and #105. Admiralty 011530 advised "Tokyo to Berlin #985 of immediate interest to].

EXHIBIT No. 24

SECRET

[1] SUMMARY OF FAR EASTERN DOCUMENTS RELATING TO JAPAN'S WAR POTENTIAL AND INTENTIONS

Explanatory Notes.

The summaries which follow are based solely on information relating to Japan's war potential and intentions included in reports from U. S. Military Attachés and Military Observers during the period beginning 1 January 1937 and ending 7 December 1941. These intelligence documents, a descriptive catalogue of which follows the yearly summaries, are reproduced in Far Eastern Documents, Volumes I-XV. In most cases marginal lines have been added to the documents to indicate sections pertinent to the subject.

Marginal references in the yearly summaries indicate the documents from which the information is extracted. For instance, "FE 1" refers to the first Far Eastern document. Where several sources contain essentially the same information, they are indicated in the margins but not always referred to

specifically in the text of the summaries. When the source of any statement is desired, the marginal references should be compared with the annexed table of contents of the documentary file.

The following abbreviations have been used:

MA Military Attaché or Assistant Military Attaché
MO Military Observer

Expressions such as "Tokyo reported" or "Singapore reported" refer to reports from War Department intelligence personnel stationed at those places. Reports are included from Military Attachés or Assistant Military Attachés on duty at embassies or legations in Japan, China, Thailand, Australia, Portugal, Great Britain, and Mexico, and from Military Observers in India, Malaya, and Netherlands Indies, where no diplomatic representation was maintained.

[2] *Japan's War Potential and Intentions*

1937

FE 1 During the first half of 1937, the military leaders of Japan were building up a war psychology. One of the most formidable instruments used as an army propaganda agency was the Imperial Reservists Association, with a large and well disciplined membership scattered throughout Japan. The Army was engaged in a six-year expansion program providing for (a) increase of the Air Corps and antiaircraft defenses; (b) increase of the military force in Manchoukuo; (c) improvement of military training facilities; (d) replenishment of war materials; and (e) organization of industry in the interest of national defense.

FE 4 In the budget debate in the Diet during the early months of the year, references were made to the so-called "Continental Policy" and "Southward Expansion". While most of the pronouncements on expansion came from army leaders, there was indication of concurrence by the Navy when Rear Admiral Sekine, addressing a private gathering, said: "Even with no naval treaty, we need not worry. Our duty is clearly to go ahead with our preparations for overseas development."

FE 16 In early July the so-called China Incident began, and what at first appeared to be a local incident in North China developed into a major conflict engulfing a large portion of the Chinese Republic. FE 18 Following the outbreak of hostilities, Japan began mobilizing the FE 24 Army, and the movement eventually took on the proportions of a FE 26 general mobilization. Four divisions were added to the active army by reconstituting similar units disbanded in 1925.

FE 29 The Japanese War Office extended the terms of service for members FE 31 of mobilized units and units in China until ordered transferred to the reserves, except such privates as might be ordered discharged. Special volunteer officers and reservists of all ranks and grades called into active service were to serve until relieved from active service. For members of non-mobilized units at home stations, including conscript reserve privates, where the term would normally expire in 1938, the term was extended to 1939.

FE 30 The Japanese War Office, as of 30 September, estimated that there were available 4,750,000 trained and partly trained reservists meeting physical requirements. The MA in Tokyo estimated Japan had FE 36 950,000 troops under arms as of 29 October. The Imperial Headquarters FE 40 was established in the Imperial Palace on 20 November. Only on two previous occasions had this headquarters been established: in 1894, just prior to the Sino-Japanese War; and [3] in 1904, following the outbreak of the Russo-Japanese War.

FE 23 Appropriations for the Army during 1937-38 totalled Yen 2,464,078,-117, including supplementary appropriations of Yen 1,422,712,777, or 45 per cent of the expenditures voted for the year, which amounted to Yen 5,483,364,279.

FE 20 Few thoroughly modern army airplanes were in use in 1937, but prospects of improvement were excellent with an ambitious building program for 1937-38. The new 97 (1937) type planes compared favor-

- ably with service models of foreign nations. Contracts were let for 500 new 97 (1937) type planes for delivery by 1 July 1938. Compared with the previous year, squadron strength increased from 53 to 59. Trained pilots numbered about 1400, with 288 trained during the year. The number of obsolete planes decreased, so that the number of available planes on 1 July (1223 of all types) represented an increase of only 34 planes. Several new airplane companies were formed, and plans were made for increasing production facilities.
- FE 13 Legislation of a wartime character enacted at special sessions of the Diet included the "Military Secrets Protection Law," passed on 7
- FE 17 August, and the "Munitions Industry Mobilization Law," passed on 9 September. The Cabinet Planning Board was reorganized to plan for complete control of industry, finance and labor, in accordance with the need of the national defense program.
- FE 20 An unfriendly attitude toward foreign powers was manifested on several occasions during military operations in China. It was clearly stated on 17 September by the Senior Aide to the Navy Minister that peaceful commerce with China would not be interfered with, but if a situation like that in Spain should develop, Japan might change her policy. Nevertheless, there were several incidents involving British and American nationals. The attitude toward Great Britain was decidedly unfriendly, although Russia was constantly referred to as the immediate and potential enemy.
- FE 22 The reaction to President Roosevelt's "Quarantine" speech of 5 October was one of shocked disappointment without any demonstration of enmity. Likewise, the sinking of the American gunboat
- FE 34 "Panay" brought an official expression of regret with offer of restitution. The public and the press expressed hope that the United States would be magnanimous in its judgment of the incident.
- FE 32
- FE 41

JAPAN'S WAR POTENTIAL AND INTENTIONS

[4]

1938

- FE 42 The MA in Tokyo reported on 6 January that the amicable settlement of the Panay Case should not obscure the fact that nationalistic groups in Japan harbor "considerable irritation and ill-feeling" toward the United States because of our "interference in the affairs of the Far East."
- FE 56 The Japanese often reiterated that the United States "does not understand Japan" or "fully recognize the justice of Japan's stand,"
- FE 57 and in so doing they made it evident that "understanding Japan"
- FE 58 really meant giving her a free hand in East Asia.
- FE 57 The Japanese Foreign Minister stated in March that "Japan desires stabilization in the Far East, with herself as the central figure," and that "there will be no conflict between Japan and the United States as long as they understand each other."
- FE 58 Tokyo reported on 18 March that the Shiunso Society, a Japanese nationalistic group, stated in newspaper advertisements addressed to the American people that the way for the United States to get "peace in the Orient" was to stop oppressing Japan; "respect the position of Japan, the greatest power in the Orient; . . . make absolutely no political activity or economic operations having political significance without the understanding of Japan; . . . guide other Powers to take the same attitude."
- FE 62 The enactment of the General Mobilization Law on 24 March
- FE 65 laid the foundation for totalitarian control and for complete war-
- FE 66 time mobilization of Japan's economy and manpower. This law,
- FE 68 which was originally passed with the specific assurance that it
- FE 69 would not be invoked for the "China Incident," virtually suspended
- FE 78 the constitution and enabled the Government, through the issuance
- FE 87 of Imperial Ordinances, to mobilize and regulate the human and material resources of the Empire exclusively for war. The Minister of War told the Japanese Army Division Commanders in April that there must be a mobilization of the entire Japanese strength "because the end of the China incident was remote and
- FE 62

- the changes in the international situation were difficult to predict." Tokyo reported on 12 May that the Japanese War Ministry planned to issue a pamphlet which emphasized that "Japan is facing a crisis in which the fortune of the nation is at stake" and that "only by strengthening this general mobilization system can the ambitions of a third power be restrained." On 15 November the
- FE 66
- FE 86 MA in Tokyo outlined the process by which the [5] General Mobilization Law was gradually being put into full effect through the piecemeal application of the various provisions at times when propaganda or military successes made conditions favorable.
- FE 59 With the extension of military operations in China during 1938 the mobilized strength of the Japanese Army steadily increased. On 28 March the MA in China reported that a total of 1,200,000 Japanese troops were under arms. Various measures to strengthen the military conscription system, to increase the efficiency of military training, and to begin to utilize the manpower of Japan's colonies for military purposes were reported during 1938. The MA
- FE 44 in Tokyo reported on 18 January that the new law to require two
- FE 78 years of military service by all conscripts in the Japanese Infantry,
- FE 60 regardless of preconscription training, was necessary because of the need for "further training of soldiers in the varied weapons now in use." An Imperial Ordinance, effective 3 April, provided that all Japanese subjects, including Koreans, Formosans, Ainu, and South Sea Islanders, above the age of 17, might volunteer for the Army, subject to selection and physical examination. Under this new program 400 Koreans were selected for training in 1938. Under the leadership of General Araki, Minister of Education, the Japanese educational system put increased emphasis on Japanese nationalism and military training.
- FE 45
- FE 78
- FE 61 In commenting on the continued strengthening of Japanese home air defenses, the MA in Tokyo reported on 11 April that the Japanese were not greatly worried over the prospects of air raids by Chinese but that they were "drawing plans to combat potential danger from any source" and were "taking advantage of the present emergency to organize and train personnel on a nation-wide basis for coordination with military preparations." On 14 May the MA in Tokyo
- FE 67 reported Japanese plans for the construction of 28 new airdromes near large cities and of double purpose parks-emergency landing fields in Japanese villages.
- FE 63 Tokyo reported on 19 April that appropriations for the Army
- FE 64 during 1938-39 totalled Yen 3,823,594,189 (compared with Yen
- FE 23 2,464,078,117 for the fiscal year 1937-38) of which Yen 2,259,000,000 represented appropriations for the "China Incident" (against supplemental appropriations of Yen 1,422,712,777 during 1937-38).
- FE 67 In the spring of 1938 the Japanese Government launched a vigorous "spiritual mobilization" program to secure on the home [6] front the fullest possible support of the war in China. The MA in Tokyo reported on 14 May: "The response of the people appears to be all that could be desired. . . . With stoic determination the people have set to fight a serious war." Tokyo reported "as significant" that General Araki, Minister of Education, stated in a speech on 2 July that Japan possessed the perfect social system and therefore had become the center of the world. General Araki emphasized Japan's "mission" to unite the cultures of the Orient and the Occident in accordance with the "Imperial Principle."
- FE 75
- FE 74 Tokyo reported on 1 July that the Japanese Army Air Corps was undergoing a "most widespread modernization program." On 1 July the number of Army planes was estimated to be 1,455 with 305 additional planes ordered but not delivered. The increase in first-line army planes from 782 to 1,093 and the decrease in obsolescent planes from 435 to 359 during the preceding 12 months was "due largely to the tremendous Army production program which commenced during the spring of 1937 and continues at present." Japanese aircraft production facilities were unable to meet the increased demands of the Army and Navy, however, and the Army bought 80 Fiat bombers abroad. During the preceding year Japanese army squadron

strength increased from 59 to 80, and on 1 July army pilots numbered 1,600, with 350 trained during the preceding 12 months.

FE 67 Increasing Japanese irritation over the foreign aid rendered the
FE 71 Chinese Government by foreign powers was reflected in numerous
FE 72 reports from the Far East during 1938. France was especially
FE 73 singled out for allowing the use of French Indo-China railways
FE 76 in transporting material to the Chinese and for objecting to Japan's
FE 77 apparent intention of occupying Hainan Island.
FE 84

FE 85 The MA in China on 15 July quoted Prince Konoe as saying that
FE 76 "foreign aid alone is prolonging the life of the Chiang Kai-shek regime" and that "Japan would take both economic and diplomatic measures to dissuade the foreign powers from aiding Chiang Kai-shek."

FE 67 While the Japanese were using discriminatory measures and other.
FE 71 pressure against French, English, and American interests in
FE 84 Japanese-occupied territories in the hope of stopping foreign aid
FE 67 to China, Germany tried to strengthen its ties with Japan by such acts as the recognition of Manchoukuo on 12 May, the ban on German exports of arms to China in June, and the withdrawal of German military advisers from China in July.

[7]

FE 72 Russo-Japanese relations remained strained as a result of
FE 77 continued delay in renewal of the fishing agreement and of recurrent
FE 78 border incidents, especially the fighting at Changkufeng during July
FE 81 and August.

FE 79 During the European crisis over Czechoslovakia in September,
FE 80 the MA in China reported by radio that a Japanese-controlled newspaper in Tientsin and a Japanese military spokesman in Shanghai indicated that Japan was prepared to support Germany and Italy even to the point of war.

FE 84 After the League of Nations authorized the imposition of economic sanctions upon Japan, but left it up to the individual nations to take action as they saw fit, the MA in China commented on 12 October that such decisions mean nothing unless strong nations "are willing to go to war to back them up." Japan answered this action of the League of Nations by severing all relations with that organization on 2 November, but the Japanese retained their Mandated Islands.

FE 86 Tokyo reported that the United States note of 6 October relating to the Nine Power Treaty brought Japanese newspaper comments, probably government-inspired, to the effect that this treaty was "out-moded" and could not "be made a cloak for political interference with Japan's aims."

FE 59 The Japanese Army continued its advance in China, having
FE 76 overrun over 500,000 square miles of territory in China by the
FE 85 end of 1938. Japan began to consolidate her military and economic
FE 58 gains in North and Central China. In order to strengthen the
FE 71 Japanese military machine, the semi-official North China Development Company and Central China Development Company placed
FE 75 their main emphasis upon the expansion of communication and
FE 72 transportation facilities and the production of iron, steel, coal, and synthetic oil.

[8]

1939

FE 91 The occupation of Hainan Island early in 1939, Tokyo reported on 13 February, gave Japan the following advantages: (1) It provided an air base close to Burma and French Indo-China; (2) It made possible a naval blockade of South China; (3) It brought French and British holdings in South China under Japanese guns; (4) It threatened Manila with encirclement; and (5) It added a second "Formosa" to Japan's island possessions. On 28 February Tokyo interpreted the significance of recent Japanese pressure upon French Indo-China and related to this aggression the strategical implications involved: "The occupation of Hainan is so obvious a form of pressure on the French that it is universally assigned a political motive of retaliation, in spite

FE 93

of official denials. Occupation of the island not only gives Japan a potential naval base right in the front-yard of Indo-China, but it also provides a close-in base for immediate air operations to cut the supply routes leading into China from French territory." Concurrently, the MA evaluated the reaction of the Japanese press to "recent manifestations of U. S. foreign policy": "These developments [i. e., United States sale of war planes to France and proposed fortification of Guam], along with the parallel diplomatic action by the United States, England and France concerning Hainan and previous issues, are widely interpreted as indications of abandonment by the U. S. administration of the isolationist tradition of U. S. foreign policy, and of an alignment of the democratic powers against the authoritarian states including Japan." Subsequently, on 7 March, the MA in China reported the Japanese occupation of Hainan as a strategic move directed toward French Indo-China, Hongkong, Singapore, and the Philippines rather than a military expedient for current operations in China.

FE 95

FE 96

FE 99

On 8 March Tokyo forwarded further evidence of Japanese legislative measures designed to bring the nation closer to a war footing. Of particular significance was the proposal of a new "Law for the Protection of Secrets Concerning Military Resources," supplementing the provisions of the Military Secrets Protection Law of October 1937.

On 23 March the MA in Tokyo reported that Japan was preparing a three-year plan for expansion of production of strategic materials and products in Japan, China and Manchoukuo in order to attain self-sufficiency. The MA stated that the government intended to spend 13 billion yen on the project and that in his opinion the degree of dependence on foreign sources in wartime would as a result be considerably reduced.

[9]

FE 102

On 1 April the MA in Tokyo commented on and forwarded to the War Department a tactical study made by an Army officer under his command. The study reviewed tactical doctrines of the Japanese Army, as modified by the new combat regulations of 1939 and by observation of current military operations in China. The report stated that the Japanese were making great efforts to modernize the Army, were spending large sums on aviation, motorization, and mechanization, and were increasing the strength of the division artillery. They were at the same time endeavoring to increase the efficiency of their military organization and tactical operation.

In the light of these improvements, the report concluded:

"The division which started the China Incident will not be the division of a future war. Increased material means will facilitate the task of Japanese tactics. Tactics are without meaning unless studied in relation to the human agent who will apply them in battle. This study has avoided excursions into the field of Japanese military psychology and national characteristics; however, it should be read with a constant eye to the nature of the Japanese Army for which these tactics are designed. It is an army easily misjudged by the foreign officer who sees first of all its straggling columns, slovenly dress and unmilitary bearing. Just as there is no glitter to its accoutrements, there is little theoretical excellence to recommend its tactics. But it is an army which excels in durability and performance. In the same way that its infantry "straggles" thirty miles a day and arrives at the destination on time and with surprisingly few casualties, its command and staff can be counted on to evolve plans and orders which, without being brilliant tactical combinations, are practical and workable schemes for getting a maximum performance from the Japanese soldier. Furthermore, the Japanese Army which fought with bows and arrows seventy years ago is thoroughly capable of learning from its mistakes and advancing with the new developments of warfare. While its swaggering self-confidence may receive some rude jolts in a major war, it is a rugged army fired with a devotion to duty and a narrow patriotism which make it a dangerous foe on a field of its own choosing."

- FE 103 The rapid expansion of Japanese armaments was reflected in the 1939-40 budget passed by the Diet. On 10 April Tokyo reported that the sum for defense amounted to Yen 6,432,155,345, which was 68.35 per cent of the total budget. Both the Army and the Navy were being improved and modernized, and large sums were allocated to artillery, aviation, motorization, and new ships.
- FE 104 Tokyo reported on 12 April further legislation enacted to establish the nation upon a more secure war footing. Articles 2 [10] and 6 of the National General Mobilization Law were invoked to provide (1) governmental limitation of dividends, and (2) governmental regulation of a maximum working day of 12 hours and of wages in factories employing more than 50 workers.
- FE 105 In April, the MA in Japan, reviewing the trend of military aviation toward expansion, stated that since the beginning of the war in China, the personnel and aircraft strength of the Army Air Corps had increased 60 per cent, production had increased 125 per cent, and new construction of plants had enlarged production facilities by 40 per cent.
- FE 106
- FE 110 Tokyo on 7 June reported a revision of the Military Service Law which extended the term of service in the Conscript Reserve from 12 years 4 months to 17 years 4 months and the training period of reservists to include the Second Conscript Reserve.
- FE 111 On 9 June the MA in Tokyo reported on the series of disputes occurring toward the end of May and early in June between the Japanese and British over control of the British and French Concessions at Tientsin and the International Settlement at Shanghai. Ill feeling between the Japanese and the British was described as acute, particularly in Tientsin.
- FE 113 On 1 July, Tokyo reported that the Army Air Corps, during the preceding year, had increased to 106 squadrons from 80; planes to 1961 from 1093; and pilot strength to 2900 from 1800.
- FE 74
- FE 115 The MA in China, reporting on 13 July with reference to the anti-British campaign of the Japanese, pointed out that "the Japanese credo is to drive out all western influence from China"; that the time for an anti-American campaign would come; and that Japanese extremists and conservatives were agreed on the necessity for Japanese dominance in Asia.
- FE 116 The MA in China, in a report dated 14 July, estimated the strength of the Japanese Army in China to be 840,000 men, and 240,000 additional men in Manchoukuo.
- FE 120 The MA in Tokyo reported on 15 August that as a result of changes in conscription regulations, the estimated strength of the standing army will be 800,000 men, with an annual enrollment of 400,000 men.
- FE 122 Tokyo reported on 12 September that the Japanese were taken aback by the announcement on 28 July of the American abrogation of the Treaty of Commerce and Navigation. The press claimed that the [11] United States Government was abandoning the isolationist tradition of foreign policy and was entering the alignment of democratic powers against the authoritarian states, including Japan. The government had adopted a "wait-and-see" course, being deterred, according to the MA, from exploiting an opportunity to push the hardpressed British only because of apprehension of Russia.
- On the same date the MA in Japan estimated the future course of Japanese foreign policy, particularly with reference to the outbreak of hostilities in Europe, as follows: "Under present conditions, it can safely be said that Japanese foreign policy will be directed toward a settlement of the China incident as rapidly as possible, and an avoidance, if possible, of any entanglements of any sort until a settlement of the China war shall have been realized."
- FE 124 Tokyo reported on 20 September that the Japanese government was concerned over possible loss of exports as a result of the China war and was taking steps toward reducing electric consumption on non-essential lines. The MA stated that the power shortage touched many points in the national economy and was a vital matter, although Japan, in his opinion, could fill the military need of manpower through the use of female labor or other devices to maintain electric power at a necessary level.

- FE 129 The MA in Shanghai dispatched on 1 October to the War Department a memorandum containing estimates of Japanese imperialistic designs in relation to the European war: "In the realm of foreign affairs Japan's immediate policy will be directed toward placating the United States and toward taking advantage of the present European embroglio to secure as many plums as possible. . . . Japan is reported to be watching carefully . . . the Dutch East Indies. It is rumored that Japan is waiting for the propitious moment to take advantage of British and French preoccupation to make a swoop in that direction. . . . Leap frogging Hongkong, French Indo-China and Singapore, the Japanese Navy could bring an irresistible force to bear and easily lop off this rich prize."
- FE 132 On 1 November the same source defined the probability of an impending Japanese-American conflict and reported: "[The] Japanese realize that the United States is the greatest potential threat to the attainment of their 'Manifest Destiny' . . . Regardless of the final outcome, we may expect early retaliation for any decisive action we may take against Japan."
- FE 133. Tokyo reported on 6 November (subsequent to the speech of Ambassador Grew of 19 October expressing unfavorable American opinion toward Japanese aspirations and activities in China, that [12] attempts on the part of the United States to apply economic pressure upon Japan would result in "a refusal to accept such pressure supinely and a turning toward such more sympathetic nations as may be available." The imminence of Japanese realignment incidental to such economic pressure was thus estimated: "Should the European struggle develop into a world war through participation by the United States, the grouping of Germany, Japan, and possibly Russia and Italy is a combination which under some circumstances could be very embarrassing to the United States as a belligerent in a world war."
- FE 134 An impending crisis in Japanese-American relations was reported on 20 November by the MA in Japan. Included among citations of threatening Japanese policy were the Japanese War Minister's assertions that the Army intended to press the China Incident to a successful conclusion "without over-much regard for public opinion" and that, although abrogation of the Japanese-American commercial treaty would undeniably affect Japan's material mobilization plans, "this situation can be met and our policy toward the United States should be a strong one."
- FE 138 The year closed with the Japanese opening the lower Yangtze River. With reference to this move, the MA in Japan, in his report of 22 December, estimated that such conciliatory policies might temporarily ease relations but had little long-run significance in view of the ambitious continental policy of the Japanese, from which they were "not likely to be diverted except by force of arms or circumstances."
- [13] 1940
- FE 140 Reporting on 11 January that the imminent fall of the Abe Cabinet was due in part to Japanese concern over the approaching non-treaty status with the United States, the MA in China stated that Japanese political and military leaders "are anxious to appease us only until their 'immutable policy' of a Far Eastern hegemony is well on the road to accomplishment. Thereafter they feel they can disregard American opinion and pressure with impunity."
- FE 141 Following the expiration of the Japanese-American trade treaty
FE 142 on 26 January, the Japanese felt that relations with the United States were in a "state of delicate balance." Tokyo reported that Japanese abrogation of the trade treaty with the Dutch might be the first step toward an eventual attempt at economic domination of the Netherlands Indies.
- FE 144 The Japanese interpreted the new twenty-million-dollar American loan made to the Chinese Government in March as further evidence of American determination to try to thwart Japan's China program. The Japanese were pushing plans for setting up the Wang Ching-wel regime in Occupied China.

- FE 146 The American non-recognition policy toward the Wang Ching-wei regime was interpreted by the Japanese as additional proof of our determination to try to check the Japanese in China, but Tokyo reported on 10 April that the Japanese were hopeful of making a deal with England and France whereby those nations would not oppose Japan's China policy in return for assurances of Japan's neutrality in the European war.
- FE 147 Tokyo reported on 24 April that rumors of an imminent German attack on Holland were current in Japan, and that the Japanese demand for the maintenance of the *status quo* of the Netherlands Indies "was so presented as to invite the conclusion that it was intended to pave the way for intervention by the Japanese themselves."
- FE 149 The increase in the Japanese Army budget for 1940-41 was accounted for by plans to reorganize the Army Air Corps and to replenish and improve armaments, Tokyo reported on 16 May. A chart of continuing expenditures for the years following 1940 indicated efforts to bring the equipment of the Japanese Army up-to-date as quickly as possible, but the decrease in the "China Incident" budget showed that new large-scale campaigns were not expected in China.

[14]

- FE 148 After the German invasion of Holland, Tokyo reported increasing Japanese concern over the status of the Netherlands Indies. Concentrations of Japanese troops on the islands of Formosa and Hainan
- FE 150 were reported on 7 June from Tokyo, while a report dated 10 June
- FE 151 stated that the impending American embargo on the export of machine tools had created "quite a furor" in Japan and that agitation for "positive action" against the Netherlands Indies was increasing.
- FE 152 The MA in China reported large Japanese military, naval, and air force concentrations on Hainan Island. The present goal is apparently French Indo-China, this report of 12 June added, but the "ultimate objective is of course complete domination of the East Asian seaboard."
- FE 153 The MA in Tokyo estimated that Japan had on 1 July a minimum of 4040 Army and Navy airplanes of all types, with 1510 additional planes contracted for and not delivered; a total of 4565 officers, 1350 cadets, and 63,045 enlisted men in the Army Air Corps and Naval Air Service, including 5950 pilots; and a total of 238 air combat squadrons, composed of 114 in the Army Air Corps and 124 in the Naval Air
- FE 156 Services. Further improvement in military aviation was expected with the establishment of the Hokota Army Air School for training in light bombing, as this would release the facilities at the Hamamatsu Army Air School for more extensive training in heavy bombardment and would be conducive to more efficient training in both light and heavy bombardment.
- FE 154 On 11 July Tokyo reported that within Japan "the situation is at present sharply drawn between those who favor a closer tie-up with Germany and prompt action against Allied possessions in the Far East, and those who, distrusting Germany or feeling that immediate action is not necessary or desirable, would continue to concentrate on accomplishment of the China venture." Pending a decision, the Japanese Army concentrated troops, ready for action, opposite both Hong-kong and the French Indo-China border.
- FE 155 Tokyo reported that Army Districts in Japan were being reorganized, effective 1 August, to increase the efficiency of the Japanese Army for national defense, training, and administration.
- FE 158 In the opinion of the MA in Tokyo the shakeup in the Japanese foreign service probably indicated an effort to remove men who were pro-American or pro-Allied. He reported on 4 September that the number of Japanese advocating an alignment with the Rome-Berlin Axis was increasing and that from a military standpoint the Japanese Army would not find it difficult "to take over the northern part of Indo-China."

[15]

- FE 159 On 19 September Tokyo reported that the Japanese Army continued to avoid further commitments in China in order to be ready for action

if and when a favorable opportunity presented itself for a new venture elsewhere. If the European war seemed to point to a long-drawn-out struggle, the Japanese would eventually decide to seize the desired territories, counting on having time to organize their conquests for defense against the final European victor. The Japanese felt that the United States was certain to object to this expansion, was likely to retaliate by economic means, and might possibly oppose aggression with armed force. The Japanese believed that time would be on their side, however, as they felt it would be years before America's naval and military strength could be built up sufficiently for major operations in the Far East as long as the German menace still existed. The most radical immediate action, however, would probably be a move across French Indo-China, with or without acquiescence, to hasten the conclusion of the China War.

FE 160 Tokyo reported on 5 October that the Tripartite Pact had been signed after Japan realized that the United States was irreconcilably opposed to Japanese expansion in Asia. Japan had decided to change her traditional policy of "at least quiet relations" with the United States and to pursue a course to satisfy her national ambitions. The statement of Prince Konoe, in which he flatly declared that the question of peace or war in the Pacific "will be decided by whether Japan and the United States respect and understand the stand of each other" expressed the determination of the Japanese not to be dissuaded from their present ambitions by any half-way measures. Other reports from Japan and China during October emphasized the tense state of Japanese-American relations and the probability of continued Japanese aggression.

FE 161 On 31 October the MA in China reported that if a nonaggression pact
FE 162 could be signed with Russia, Japan would probably continue her south-
FE 163 ern expansion regardless of its effect on Japanese-American relations.
FE 164

FE 165 Details of a new "Ten-Year-Plan" to weld Japan, China, and Man-
choukuo into a close-knit economic unit were transmitted by the MA
in Tokyo on 18 November, with comment on the great potential strength
of Japan's economic position if such plans were to succeed.

FE 166 The MA in London forwarded on 20 November a report on the Jap-
anese Army which stated, among other things, that the Japanese were
probably ahead of most Western nations in landing and [16]
combined operations. Special mention was made of the emphasis
which the Japanese put on outflanking and enveloping movements in
attacking and on morale and endurance in training army personnel.
Japan was estimated to have had 1,350,000 men under arms, of whom
1,000,000 had had active service experience, as of December, 1939.
This report concluded that "the Japanese army is a formidable fighting
machine but has not yet reached the standard of efficiency of Western
armies. It is, however, trained for and will probably only required
to fight in Eastern Asia where it will have inherent advantages over an
opponent."

FE 167 Reports from both China and Japan discussed the Japanese Army's
FE 168 evacuation of Kwangsi Province in November, and indicated that
Japan's next move might be into southern French Indo-China.

FE 168 The MA in China, in commenting on Japan's plane with regard to
the troops being assembled on the islands of Formosa and Hainan,
observed that "some even presume an attack on the Philippines via
Lingayen Gulf."

FE 169 Tokyo reported on 12 December that Ambassador Nomura's
mission to try to improve Japanese-American relations was
probably "doomed from the start" because the Japanese Government
was "completely in the hands of the more chauvinistic elements"
and was not prepared to make concessions in the Japanese program
for East Asia which would be acceptable to American opinion.

[17]

1941

FE 170 In forwarding the English text of the Japan-Thailand Treaty
of Amity, the Tokyo MA on 11 January called attention to the
progress of Japanese designs on French Indo-China and on bases
for operations against Malaya and Singapore.

- FE 174 In February Tokyo reported on the extreme character of the National Defense Security Act and said that its immediate effect would be closure of many sources of information. The MA
- FE 172 China reported that Japan was promoting border trouble in order to profit as a mediator "preserving the peace" between Thailand and French Indo-China. He also commented on Japan's warnings to the
- FE 173 United States that she would tolerate no interference in developing the East Asia economic bloc, on her inclusion of the Netherlands Indies in this bloc, and on the reports that many Japanese divisions were being trained on Formosa and Hainan, all of which indicated plans to move southward. He believed that under certain conditions Japan would move directly on the Netherlands Indies.
- FE 175 On 1 March Chungking reported that foreigners generally believed Japan's move on Singapore and the Netherlands Indies depended upon the outcome of Germany's offensive against England.
- FE 177 The Military Observer at Singapore on 22 March reviewed the
- FE 178 disposition of British forces in Malaya with approval, but predicted difficulties in meeting flank attacks and in maintaining signal communications. He also reported that the Japanese were reconnoitering the northern border of Malaya.
- FE 179 On 18 April Tokyo pointed out that although the newly-concluded Japanese-Soviet Non-Aggression Pact obviously freed Japan on one front and enabled her to prepare for issues elsewhere, it removed none of the basic differences of opinion between the two countries.
- FE 180 Tokyo reported the establishment of an Army Mechanization Headquarters charged with research into, and supervision of, training in the use of mechanized equipment.
- FE 181 Meanwhile on 2 May Tokyo cabled a warning that the reported increases of Japanese strength in Formosa, Hainan, and French Indo-China were greater than normal for the China Incident and that these forces "may be there in readiness for a move against Singapore or East Indies." A report on field operations from Tokyo,
- FE 184 21 May, warned that the Japanese would probably attempt [18] an all-out drive to conclude the China Incident in order to have a free hand for southward expansion if the United States should become involved in the war in Europe. In transmitting the Japanese
- FE 182 Army Budget for the fiscal year 1941-42, the Tokyo MA contrasted it with the budget for the preceding year and pointed out that the China Incident expenditures alone could not explain its expansion.
- FE 185 On 29 May Chungking forwarded Chinese estimates that Japan had 2000 Navy planes and 2500 Army planes.
- FE 186 On 3 June Tokyo wrote: " * * * two new Inspectorates have been established, the Chemical Warfare Inspectorate and the Communications Inspectorate, thus considerably raising these two forms of military activity above the places which they have heretofore occupied in the Japanese services." Tokyo also reported on the
- FE 187 yellow fever inoculations given in May to certain officers attached
- FE 188 to northern units, on the training for transport of troops and supplies by air, and on parachute troop training. The Japanese Government at this time was said to be facing great difficulty in preserving restraint vis-a-vis internal public pressure for strong, direct action toward the Netherlands Indies after the failure of the trade negotiations at Batavia.
- FE 194
- FE 189 The Singapore MO believed that the Japanese would not move without a 50-50 chance for success. He expressed the opinion on 5 June that the Japanese were forcing economic penetration of Thailand and Indo-China, to be followed by military occupation in readiness for any advantage to be had from weakened British or American positions in that area. "With regards to defense of Malaya," he continued, "it is believed that the present forces of approximately 60,000 Army and 5,000 Royal Air Force personnel can contain for six months or more the force of six divisions and 1,000 planes which it is estimated Japan can now send against them."
- FE 190 Hongkong reported that on 14 June 27 Japanese transports conveyed by 21 destroyers were off the China coast travelling southward, and were expected to be off Hongkong on 17 June. On 25 June Hongkong further reported that three convoys, totalling about 50 trans-
- FE 192

ports, had been seen during the preceding fortnight and were believed to have gone to the Pescadores or Formosa. The MA in Mexico forwarded a report that the Japanese were constructing special small submarines for attacking the American fleet in Pearl Harbor, and that a training program then under way included towing them from Japan to positions off the Hawaiian Islands, where they practiced surfacing and submerging.

[19]

FE 193 Chungking believed that the sudden German offensive against Russia had caused a temporary lull in the threatening attitude toward the United States, and on 27 June cabled the opinion that the Japanese would be reluctant to make a major move until results of border incidents revealed the potential strength of the Russians.

FE 195 On 12 July Tokyo cabled: "Considerable scale of mobilization and unusual secrecy attending it now beyond question." Tokyo believed the Government, however, was still seeking to avoid positive commitments. Two days later Tokyo cabled that it was "now evident that large scale mobilization under way covered by unusual secrecy. Some newly mobilized men being sent to Manchoukuo but unable to determine number or whether any being sent south."

FE 197 Hongkong reported that 19 Japanese transports were moving southward from Formosa on 12 July.

FE 199 Chinese Military Intelligence was reported on 15 July to anticipate an early invasion of French Indo-China and to believe that areas newly ceded to Thailand were to be used as air bases.

FE 201 On 21 July Singapore reported that the Japanese had delivered a virtual ultimatum, with a 20 July deadline, in which they demanded the use of naval bases in southern French Indo-China. "If the French refuse, regardless of British or United States interference, the bases will be taken forcibly."

FE 203 London on 22 July reported belief that the Japanese had completed all preparations for taking over French Indo-China bases.

FE 204 On 26 July Tokyo cabled: "Largest single draft since initial mobilization for China War now under way under conditions extreme secrecy involving restrictions on movements foreigners in all directions." Some Japanese in Tokyo interpreted the 26 July freezing of Japanese credits by the United States as the first step toward a final break with America.

FE 206 Singapore on 29 July estimated that Japanese strength in French Indo-China was approaching 40,000 men and believed there would be forcible seizure of additional bases.

FE 208 Japan demanded the right to occupy Thai naval and air bases, and on 31 July Bangkok commented: "An immediate Nipponese move is anticipated due to Thai indecision."

FE 209

[20]

FE 211 Estimates were forwarded from London on 3 August that more than 500,000 Japanese were mobilized during June and July, and further British estimates, forwarded from Chungking, 20 August, placed Japanese strength at 49 divisions, with 54 available by the end of August when mobilization would be complete.

FE 212 The MA in Tokyo estimated that Japan had on 1 July 3200 Army (FE 153) airplanes (1940 estimate was 2010); a total of 3600 officers, 1600 cadets and 34,800 enlisted men (1940 estimate was 2900 officers, 1350 cadets and 28,700 enlisted men) in the Army Air corps, including 3900 pilots (1940—3100 pilots); and 136 air combat squadrons in the Army Air Corps (1940—114 combat air squadrons).

FE 213 Tokyo estimated on 5 August that the aircraft industry, working at maximum wartime capacity, could produce annually the equivalent of 4,500 two-place, single-engine military airplanes. Actual production for the period 1 July 1940 to 30 June 1941 was estimated to be 2,730 combat aircraft. It was concluded that since the end of 1939 the aircraft industry had increased production by about one-half and capacity by about two-thirds, while completion of construction then in

slight would give a capacity double that of 1939. The number of employees engaged in the manufacture of airplanes had increased 55 per cent, and employees in engine manufacturing plants had increased in number 57 per cent from 1938-39 to 1940-41.

FE 218 Chungking reported 15 August Japanese plans to take over international concessions and to capture American marines in Shanghai by surprise.

FE 219 Chungking on 19 August forwarded British estimates that Japanese tank strength, exclusive of baby tanks and armored machine gun cars, was ten regiments, each consisting of 160 tanks, with an equal number in reserve.

FE 224 In addition the MA at Chungking on 27 August forwarded a Russian estimate that the actual strength of the Japanese Army was 48 divisions and 20 independent brigades (approximately 58 divisions), with 300,000 men in training, possibly ready in three months. Uncalled reserves were believed to number 210,000. Eleven divisions could be organized from reserves already trained and 16 from those then in training. These figures include corps, army, and service troops. Artillery was believed to be insufficient. The total potential strength was estimated by the Russians to be 76 divisions.

[21]

FE 222 On 21 August Tokyo reported that drastic shipping control measures were about to be instituted by the Japanese Cabinet. Tokyo also
FE 223 reported five main forces, composed of ten armies (54 divisions), located overseas.

FE 226 On 1 September the Tokyo MA reported on the organization and high quality of the Japanese military signal communications system, and commented that Japanese radio equipment was "comparable to our own in every respect."

FE 229 On 11 September Tokyo made a full report on the National mobilization which had begun 3 June. In his opinion "in round numbers about 700,000 were called up during this mobilization." This number did not include the home defense "National Army," which was called up for five days' training. "The number of men mobilized was far too great for mere replacement purposes in existing divisions now in Japan or on the Continent . . . While estimates of other foreign observers place the total number of men mobilized as high as 1,250,000, it is believed that these estimates . . . [are too high]." About 90 per cent of the total of 18,000 horses also mobilized at this time were known to have gone south rather than direct to Manchoukuo or Korea.

FE 230 Japan set up a National Defense General Headquarters (reported by Tokyo on 16 September) in a move to improve arrangements for the defense of Japan Proper.

FE 231 Invocation of the last drastic measures of the 1938 National Mobilization Law (revised) and a tense political atmosphere indicated, according to Tokyo, that the day for a final decision on "immutable" policies was drawing near. Internally the nation was mobilizing for total war.

FE 239 On 14 October Hongkong reported the presence of 22 transports on the Pearl River.

FE 240 The China MA cabled on 17 October: "Increased Nazi activity in Japan plus the cabinet crisis and attacks on U. S. by spokesmen and press considered strong evidence of drastic action in the near future."

FE 242 Commenting on heavy troop movements into French Indo-China, Tokyo concluded on 20 October: "If the rumored increase goes above the number originally agreed upon there cannot remain much doubt as to the intention behind it."

[22]

FE 243 Tokyo reported on 20 October that General Tojo, on becoming Premier, retained his status as an officer on the active list, an unusual

procedure, and concluded that the third Konoe cabinet fell because of inability to meet army criticism of its policy toward French Indo-China, the conversations in Washington, and its policy vis-a-vis a weakened Russia.

FE 245 London cabled on 21 October: "Japanese troops in Indo-China will be strengthened as follows: 86,000 there now; an estimated 20,000 enroute, and an additional 20,000 included in Japanese plans." Chungking on 23 October reported the official French Indo-Chinese view to be that the Japanese would attack Thailand about 15 November.

FE 247 A general southward movement of Japanese shipping in the Western Pacific was reported on 27 October from Singapore, together with intelligence that two aircraft carriers and 60 flying boats, fighters and bombers were operating in the Mandated Islands.

FE 249 Under pretext of surveying a new commercial air route the Japanese made a number of flights between Palau (Pelew) and Timor, violating at the same time certain provisions of the agreement granting them the privilege of flying over Dutch territory. Unusual passenger lists, the absence of commercial justification, the type of equipment, and the movement of guard vessels were reported on by the MO at Bandoeng on 30 October.

FE 248 On 29 October the MA in Chungking radioed that Japanese strength in French Indo-China was then 57,000 troops, and that it was steadily increasing in numbers. He anticipated a possible drive through Yunnan toward the Burma Road. Thailand was reported ready to capitulate in the hope that the country would be saved from the ravages of war.

FE 262 The Japanese Consul General at Batavia was reported to have recommended that on the outbreak of war all Japanese should report promptly to the Netherlands Indies authorities for internment, thus avoiding violence. The Singapore British, however, were reported by the MO to believe that no attack could be expected before April because of the prevailing northeast monsoon over Malaya.

FE 254 The MA in London forwarded on 9 November a British opinion that Japan no longer felt that it must make every effort to avoid war with the United States and that Japan would find it too difficult to attack Malaya or the Burma Road and hence might be expected to attack Netherlands Indies.

[23]

FE 256 On 16 November Tokyo estimated production of aircraft at 200 planes per month for the Army. All factories in the aircraft industry had gone on a 3-shift 24-hour day in mid-June. The MA estimated that the current monthly maximum for production was 420 military planes, including trainers.

FE 258 The London MA on 21 November cabled a summary of British Intelligence as of 18 November, in which it was stated that failure of agreement in the Washington talks would require a major Japanese decision whether to risk probable war; that Japan would probably not attack Siberia at that time; that unless agreement was reached in Washington, the war in China would continue; that Japan probably did not intend to attack the Burma Road at that time; and that the occupation of Thailand, the best possibility for the moment, would pave the way for subsequent attack upon Malaya, yet minimize the risk of a general war.

FE 264 The Singapore MO advised the War Department on 2 December that the alert in Malaya had been advanced from the third to the second degree on the previous day. Japanese reconnaissance activities over Malaya were reported.

FE 260
FE 268 The MA in Melbourne radioed that on 6 December the Netherlands Far East Command, upon learning of Japanese naval moves on Menado and/or Ambon out of Palau, had ordered the execution of Plan A-2.
